Many Options in American FactFinder

- Detailed Tables*
- **Quick Tables***
- Geographic Comparison Tables**
- **Custom Tables**

Note: No Thematic Maps in SF 2 & SF 4.

- * Race, Hispanic, & ancestry iterations. Race & Hispanic iterations for some QTs (e.g., QT-H2) must be selected in SF 2 since the 100% numbers are more accurate.
- ** Iterations for major race groups & Hispanics, no ancestry groups

- 2. An area has 50 or more unweighted cases for a specified group (applies to race, Hispanic, & ancestry groups).

Reality Check!

Only in SF 4!

- Of the 575 Puerto Ricans working in health care services in Delaware, almost three-quarters were women.

Differences: SF 4 and SF 3

- PCT tables generally a subset of the P or PCT tables in SF 3
- SF 4 HCT tables are all found in SF 3
- Some additional detail by age & sex
- Some additional income & poverty detail
- Detailed data for 102 industries broken down by sex (PCT85)
- Detailed data for 125 occupations broken down by sex (PCT86)
- 20 tables unique to SF 4 (see handout)

Studying Heritage of America's Population?

Use SF 3 & SF 4 in tandem:

Ancestry:

- SF 3 (tables PCT 16-18) has population totals for 110 ancestry groups & identifies whether ancestries are the first or second reported.
- SF 4 provides *characteristics data* (i.e., table repetitions) for 86 groups with no reference to first or second ancestry.

More on Heritage

Use SF 3 & SF 4 in tandem:

Language Spoken at Home:

- With a breakdown for age, SF 3 (PCT10) has data on 40 different languages spoken at home ("speak only English" & 39 others).
- SF 4 (PCT40) has data on 5 *languages* & *broad language groups* ("speak only English" and 4 others).

Finally on Heritage

Use SF 3 & SF 4 in tandem:

Place of Birth:

- For the foreign-born population, SF 3 (PCT19) has population totals for 125 world regions and countries.
- SF 4 (PCT47-48) has only 13 regional totals.
- However, SF 4 has considerable data on the foreign-born population by sex.

Caution! Go Slow!

If you are looking for population counts with breakdowns for any short-form variables (age, race, sex, etc.), use SF 1 or SF 2. SF 3 and SF 4 contain *estimates*; SF 1 and SF 2 contain complete *counts*.

Summary File 4 (SF4) contains the sample data, which is the information compiled from the questions asked of a sample of all people and housing units.

The sample data are presented in 213 population tables (matrices) and 110 housing tables, identified with "PCT" and "HCT", respectively. Each table is iterated for 336 population groups: the total population, 132 race groups, 78 American Indian and Alaska Native tribe categories (reflecting 39 individual tribes), 39 Hispanic or Latino groups, and 86 ancestry groups.

SF 4 is released as individual files for each of the 50 states, the District of Columbia, and Puerto Rico; and for the United States. The tables (matrices) are identical for all files, but the geographic coverage differs. Data are provided down to the census tract level.
