Topic Links A - Z

The screenshot shows the FEDSTATS website interface. The 'Topic Links - A To Z' link is circled in red. The website has a red header with 'FEDSTATS' in white. Below the header, there are two columns of links. The left column is titled 'Links to statistics' and the right column is titled 'Links to statistical agencies'. The 'Topic Links - A To Z' link is the first item in the left column. The website also features a search bar and a 'Submit' button.

America's Children in Brief 2004

Since 1997, the Federal Interagency Forum on Child and Family Statistics has published *America's Children: Key National Indicators of Well-Being*, a report that includes detailed information on a set of key indicators of child well-being. To make better use of its resources, the Forum has decided to alternate publishing the more detailed report with a new condensed version—*America's Children in Brief: Key National Indicators of Well-Being*—that highlights selected indicators. Thus, this July, the Forum is publishing the *Brief*; in July 2005 the Forum will publish the more detailed report, returning to the *Brief* in July 2006. [Detailed data tables](#) for all background measures and indicators are available, as well as a [press release](#).

Click [here](#) for a list of news coverage of the release.

Crimes reported in Hawaii

Crime 2000

[Arrests] [Crimes Reported] [Back To Hawaii]

Statistics presented are based on data collected by the FBI as part of its Uniform Crime Reporting Program. These data represent offenses reported to and arrests made by State and local law enforcement agencies as reported to the FBI. These data do not include Federal law enforcement activity. Additionally, not all law enforcement agencies consistently report offense and arrest data to the FBI. Users should refer to the Coverage Indicator for the proportion of the population covered by the agencies reporting to the FBI.

[Caution] [Coverage] [Definitions Of Crimes]

Crime	Number
Total	62,987
Murder	35
Rape	346
Robbery	1,123
Aggravated Assault	1,450
Burglary	10,665
Larceny - theft	43,254
Motor vehicle thefts	6,114
Population	1,211,537

Data provided by the Federal Bureau of Investigation to the National Archive of Criminal Justice Data, University of Michigan

Population statistics are based on data provided by the FBI and may differ from similar statistics reported by the Census Bureau. Population statistics generated by the FBI are used to calculate crime rates and to estimate the proportion of the population covered by the UCR program.

Teenage Births in the United States: State Trends, 1991–2000, an Update

by Stephanie J. Ventura, M.A., T.J. Mathews, M.S., and Brady E. Hamilton, Ph.D.,
Division of Vital Statistics

Abstract

Objectives—This report provides State-specific birth rates for teenagers for 1991 and 2000, and the percent change between the time periods.

Methods—Tabular and graphical description of trends in teenage birth rates by age group for each State and territory.

Results—Birth rates for teenagers 15–19 years declined significantly in all States, the Virgin Islands and Guam, between 1991 and 2000. Declines by State ranged from 12 to 39 percent. Rates also fell significantly for teenage subgroups 15–17 and 18–19 years.

Keywords: teenage fertility • State-specific birth rates

cent (Vermont) (table 1 and figure 2). Generally, the year-to-year declines in the State-specific rates echoed the national declines, but there was considerable variability in the State declines (1). Among young teenagers 15–17 years, birth rates dropped in all States, the District of Columbia, and the Virgin Islands. Statistically significant declines ranging from 15 percent (Texas) to 50 percent (Vermont) were reported. Rates for older teenagers, 18–19 years, declined in the Virgin Islands, Guam, the District of Columbia, and all but four States. Statistically significant declines ranged from 6 percent (Georgia) to 38 percent (Alaska).

This summary updates a recently issued report, "Births to Teenagers in the United States, 1940–2000," by providing State-specific data for 2000, and supplements information provided in "Births: Final Data for 2000," published earlier this year (1,2). These previous reports provide additional detail on the trends and variations for population

Health: Birthrates for Teenagers
