The screenshot displays the U.S. Census Bureau website interface. At the top, a banner reads "U.S. Census Bureau 10 Years on the Web" with the tagline "Helping You Make Informed Decisions". The left sidebar contains a vertical menu with links: "2003 City Pop Estimates", "Subjects A - Z" (with a letter index A-Z), "New on the Site", "Search", "American FactFinder", "Access Tools", "Jobs@Census", "Catalog", "Publications", and "Related Sites". The main content area is divided into several sections: "Questions?" with a search box and "Go" button; "United States Census 2000" with links to "Your Gateway to Census 2000", "Census 2000 EEO Tabulations", and "Summary File 4 - All states are available"; "People" with links to "Estimates", "2002 Data Profiles - ACS", "Projections", "Income", "Poverty", "International", "Genealogy", and "Housing"; "Business" with links to "Economic Census - Survey of Business Owners", "Government", "E-Stats", "NAICS", and "Foreign Trade"; "Geography" with links to "Maps", "TIGER", and "Gazetteer"; "Newsroom" with links to "Releases", "Upcoming News Conference", "Minority Links", "Radio/TV/Multimedia", and "Photos"; "At the Bureau" with links to "Our Strategic Plan", "Regional Offices", "Doing business with us", and "About the Bureau"; and "Special Topics" with links to "Census Calendar", "The 1930 Census", "For Teachers", "Census - 10 Years on the Web", and "American Community Survey". On the right side, there is a "2002 Economic Census Securities & Exchanges" section, a "Population Clocks" section showing "U.S. 293,896,721" and "World 6,384,151,582" as of "13:44 EDT Aug 02, 2004", a "State & County QuickFacts" section with a dropdown menu for "Alabama" and a "Go!" button, and a "Latest Economic Indicators" section with a "Construction Spending" link. A red arrow points from the "People" section in the main content area to the "2003 City Pop Estimates" link in the left sidebar.

population estimates

The Population Estimates Program publishes total population estimates each year. The publication of net population estimates also includes demographic components of change (births, deaths, and migration). Later in the year, we publish the estimates by age, sex, race, and Hispanic origin. The reference date for county estimates is July 1.

Estimates usually are for the present and the past, while [projections](#) are estimates of the population for future dates. We develop these estimates with the assistance of the [Federal State Cooperative Program for Population Estimates \(FSCPE\)](#).

These estimates are used in federal funding allocations, as denominators for vital rates and per capita time series, as survey controls, and in monitoring recent demographic changes. With each new issue of July 1 estimates, we revise estimates for years back to the last census. Previously published estimates are superseded and [archived](#).

Population Estimates Program develops releases monthly national population estimates by demographic characteristics. These estimates cover four different populations: resident population, resident population plus Armed Forces overseas, civilian population and civilian noninstitutional population. Reference dates for monthly releases are for the first of the month.

first release of total population estimates at the end of the calendar year includes geographic components of change (births, deaths, and migration). Later releases include population data by age, sex, race, and ethnic origin and give numbers for single age, different age groups and median age. These data are estimates of the population as of July 1 of each year ...

The Population Estimates Program publishes county total population estimates each year. The publication of net population estimates also includes demographic components of change (births, deaths, and migration). Later in the year, we publish the estimates by age, sex, race, and Hispanic origin. The reference date for county estimates is July 1.

Population Estimates Program develops releases monthly national population estimates by demographic characteristics. These estimates cover four different populations: resident population, resident population plus Armed Forces overseas, total population and civilian noninstitutionalized population. Reference dates for monthly releases are for the first of the month.

First release of total population estimates for the end of the calendar year includes demographic components of change (births, deaths, and migration). Later releases include population data by age, sex, race, and Hispanic origin and give numbers for single age groups and median age. These data are estimates of the population as of July 1 of each year ...

The Population Estimates Program publishes age data for the U.S., states, counties, and metropolitan areas. Age data are presented by single year of age, 5 year age groups, selected age groups, and median age. Characteristics of age by sex, race, and Hispanic origin are published to the county level; age by nativity is published at the national level only. The reference date for these estimates is July 1.

Population estimates by race and Hispanic origin are published for the U.S. Race categories changed beginning with Census 2000; population estimates with the Census 2000 base will conform to those race categories. There are two Hispanic origin categories-Hispanic or Latino and Not Hispanic or Latino. Race and Hispanic origin are considered two separate concepts and therefore Hispanics may be of any race or races.

When comparing population estimates of the Hispanic population with those of the race populations, it should be noted that there are different ways to calculate the numbers. See [U.S. Census Bureau Guidance on the Presentation and Comparison of Race and Hispanic Origin Data](#).

Characteristics of race and Hispanic origin by age and sex are published to the county level. The reference date for these estimates is July 1.

Population Estimates Program develops releases monthly national population estimates by demographic characteristics. These estimates cover four different populations: resident population, resident population plus Armed Forces overseas, civilian population and civilian noninstitutional population. Reference dates for monthly releases are for the first of the month.

First release of total population estimates at the end of the calendar year includes geographic components of change (births, deaths, and migration). Later releases include population data by age, sex, race, and ethnic origin and give numbers for single age, different age groups and median age. These data are estimates of the population as of July 1 of each year ...

The Population Estimates Program each year publishes domestic migration numbers for the U.S., states, counties, and metropolitan areas. Demographic components of change (births, deaths, domestic and international migration) are developed as inputs to the population estimates. Estimates of domestic migration are based on migration rates derived from summarized administrative data and the changes in group quarters population. National and state numbers are published at the end of the calendar year, county numbers are published in the following months.

The Population Estimates Program each year publishes international migration numbers for the U.S., states, counties, and metropolitan areas. Demographic components of change (births, deaths, domestic and international migration) are developed as inputs to the population estimates. Estimates of international migration are based on data derived from the Census 2000 Supplementary Survey (C2SS), the 2001 Supplementary Survey (SS01), and the 2002 Supplementary Survey (SS02) along with estimates development from the Demographic Analysis and Population Estimates (DAPE) project. International migrants include legal immigrants, refugees, unauthorized immigrants, temporary residents, Puerto Rico immigrants and emigrants, legal residents that permanently emigrate, and federal civilians

The Population Estimates Program produces monthly national population estimates by age, sex, race, and Hispanic origin for the United States. These estimates cover four different populations: resident population, resident population plus Armed Forces overseas, civilian population, and civilian noninstitutional population. All reference dates in the monthly national estimates refer to the first of the month.

NOTE: All population figures for the year 2000 shown here (including April 1, 2000) are based on the 1990 Census; they do not reflect Census 2000 counts.
