

United States and States

R0601. Percent of the Native Population Born in their State of Residence (Including Puerto Rico): 2007

Universe: Native population

Data Set: 2007 American Community Survey 1-Year Estimates

Survey: American Community Survey, Puerto Rico Community Survey

NOTE. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

Rank	State	Percent	Margin of Error
1	Louisiana	82.2	+/-0.4
2	New York	82.1	+/-0.2
3	Michigan	80.9	+/-0.2
4	Pennsylvania	79.4	+/-0.2
5	Ohio	77.8	+/-0.2
6	Illinois	77.4	+/-0.2
7	Iowa	75.2	+/-0.5
7	Wisconsin	75.2	+/-0.3
9	Massachusetts	74.5	+/-0.4
10	Minnesota	73.8	+/-0.3
11	Alabama	73.5	+/-0.4
12	Mississippi	73.3	+/-0.5
13	Kentucky	73.2	+/-0.5
14	West Virginia	72.7	+/-0.5
15	California	72.5	+/-0.2
16	Texas	72.2	+/-0.2
17	Indiana	71.4	+/-0.3
18	North Dakota	71.3	+/-0.9
19	Nebraska	69.7	+/-0.7
20	Missouri	69.1	+/-0.4
21	Utah	68.7	+/-0.6
22	South Dakota	67.8	+/-1.0
	United States	67.4	+/-0.1
23	Rhode Island	67.2	+/-1.0
24	Hawaii	66.0	+/-0.8
25	Maine	65.7	+/-0.8
26	New Jersey	65.4	+/-0.4
27	Tennessee	64.9	+/-0.4
28	Oklahoma	64.7	+/-0.5
29	Arkansas	63.7	+/-0.5
29	Connecticut	63.7	+/-0.5
31	North Carolina	63.5	+/-0.3
32	South Carolina	62.8	+/-0.5
33	Kansas	62.6	+/-0.5
34	Georgia	61.4	+/-0.3
35	New Mexico	56.5	+/-0.6
36	Virginia	56.2	+/-0.4
37	Montana	55.5	+/-0.8
38	Maryland	54.9	+/-0.4
39	Vermont	54.6	+/-1.0
40	Washington	53.6	+/-0.4
41	Oregon	50.3	+/-0.5
42	Delaware	49.3	+/-1.2
43	Idaho	49.2	+/-0.7
44	Colorado	47.2	+/-0.4

Rank	State	Percent	Margin of Error
45	District of Columbia	45.4	+/-1.2
46	New Hampshire	44.8	+/-0.9
47	Wyoming	43.4	+/-1.3
48	Arizona	42.2	+/-0.4
49	Florida	41.9	+/-0.2
50	Alaska	41.7	+/-0.9
51	Nevada	28.5	+/-0.6
	Puerto Rico	94.3	+/-0.2

Source: U.S. Census Bureau, 2007 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

While the 2007 American Community Survey (ACS) data generally reflect the December 2006 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities. The 2007 Puerto Rico Community Survey (PRCS) data generally reflect the December 2005 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in PRCS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available. Selected migration, earnings, and income data are not available for certain geographic areas due to problems with group quarters data collection and imputation. See [Errata Note #44](#) for details.

The letters PDF or symbol  indicate a document is in the [Portable Document Format \(PDF\)](#). To view the file you will need the [Adobe® Acrobat® Reader](#), which is available for **free** from the Adobe web site.
