

United States and States

R0702. Percent of People 1 Year and Over Who Lived in a Different House Within the Same State (Including Puerto Rico) 1 Year Ago: 2007

Universe: Population 1 year and over

Data Set: 2007 American Community Survey 1-Year Estimates

Survey: American Community Survey, Puerto Rico Community Survey

NOTE. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

Rank	State	Percent	Margin of Error
1	Texas	16.2	+/-0.2
2	Oklahoma	16.1	+/-0.5
3	Arkansas	15.2	+/-0.6
4	Arizona	14.9	+/-0.4
4	Oregon	14.9	+/-0.5
6	Colorado	14.8	+/-0.4
6	Nevada	14.8	+/-0.7
8	Alaska	14.6	+/-1.2
8	Kansas	14.6	+/-0.6
10	Washington	14.4	+/-0.4
10	Wyoming	14.4	+/-1.2
12	Idaho	14.2	+/-0.6
12	Utah	14.2	+/-0.6
14	Nebraska	14.1	+/-0.6
15	Georgia	14.0	+/-0.3
16	Indiana	13.7	+/-0.4
16	Missouri	13.7	+/-0.4
18	California	13.4	+/-0.2
18	Ohio	13.4	+/-0.3
20	Florida	13.3	+/-0.2
20	North Carolina	13.3	+/-0.3
22	Alabama	13.2	+/-0.4
22	Iowa	13.2	+/-0.5
22	Mississippi	13.2	+/-0.6
25	Tennessee	13.1	+/-0.5
25	Wisconsin	13.1	+/-0.4
27	Montana	13.0	+/-0.9
28	Kentucky	12.9	+/-0.4
	United States	12.8	+/-0.1
29	North Dakota	12.8	+/-0.8
30	Michigan	12.6	+/-0.3
31	Louisiana	12.5	+/-0.4
31	South Dakota	12.5	+/-0.8
33	Illinois	12.0	+/-0.3
33	New Mexico	12.0	+/-0.6
33	Virginia	12.0	+/-0.3
36	Minnesota	11.8	+/-0.4
37	South Carolina	11.5	+/-0.5
38	Maine	11.2	+/-0.5
39	Massachusetts	10.6	+/-0.3
40	Hawaii	10.5	+/-0.8
40	Maryland	10.5	+/-0.4
42	Pennsylvania	10.3	+/-0.2
42	Vermont	10.3	+/-0.9
44	New Hampshire	10.2	+/-0.7

Rank	State	Percent	Margin of Error
45	District of Columbia	10.0	+/-1.2
45	West Virginia	10.0	+/-0.5
47	Connecticut	9.7	+/-0.4
47	Delaware	9.7	+/-0.8
49	New York	9.6	+/-0.2
50	Rhode Island	9.5	+/-0.9
51	New Jersey	8.6	+/-0.3
	Puerto Rico	6.9	+/-0.3

Source: U.S. Census Bureau, 2007 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

While the 2007 American Community Survey (ACS) data generally reflect the December 2006 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities. The 2007 Puerto Rico Community Survey (PRCS) data generally reflect the December 2005 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in PRCS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available. Selected migration, earnings, and income data are not available for certain geographic areas due to problems with group quarters data collection and imputation. See [Errata Note #44](#) for details.

The letters PDF or symbol  indicate a document is in the [Portable Document Format \(PDF\)](#). To view the file you will need the [Adobe® Acrobat® Reader](#), which is available for **free** from the Adobe web site.
