

United States and States

R1502. Percent of People 25 Years and Over Who Have Completed a Bachelor's Degree: 2007

Universe: Population 25 years and over

Data Set: 2007 American Community Survey 1-Year Estimates

Survey: American Community Survey, Puerto Rico Community Survey

NOTE. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

Rank	State	Percent	Margin of Error
1	District of Columbia	47.5	+/-1.2
2	Massachusetts	37.9	+/-0.4
3	Maryland	35.2	+/-0.5
4	Colorado	35.0	+/-0.5
5	Connecticut	34.7	+/-0.5
6	New Jersey	33.9	+/-0.3
7	Vermont	33.6	+/-1.1
7	Virginia	33.6	+/-0.4
9	New Hampshire	32.5	+/-0.9
10	New York	31.7	+/-0.2
11	Minnesota	31.0	+/-0.3
12	Washington	30.3	+/-0.3
13	Rhode Island	29.8	+/-0.9
14	California	29.5	+/-0.2
14	Illinois	29.5	+/-0.2
16	Hawaii	29.2	+/-0.8
17	Kansas	28.8	+/-0.5
18	Utah	28.7	+/-0.6
19	Oregon	28.3	+/-0.5
	United States	27.5	+/-0.1
20	Nebraska	27.5	+/-0.7
21	Georgia	27.1	+/-0.3
22	Montana	27.0	+/-0.9
23	Maine	26.7	+/-0.7
24	Delaware	26.1	+/-0.9
25	Alaska	26.0	+/-1.0
26	Florida	25.8	+/-0.2
26	Pennsylvania	25.8	+/-0.3
28	North Dakota	25.7	+/-0.9
29	North Carolina	25.6	+/-0.3
30	Wisconsin	25.4	+/-0.3
31	Arizona	25.3	+/-0.3
32	Texas	25.2	+/-0.2
33	South Dakota	25.0	+/-0.9
34	New Mexico	24.8	+/-0.6
35	Michigan	24.7	+/-0.2
36	Idaho	24.5	+/-0.7
36	Missouri	24.5	+/-0.4
38	Iowa	24.3	+/-0.4
39	Ohio	24.1	+/-0.3
40	South Carolina	23.5	+/-0.4
41	Wyoming	23.4	+/-1.2
42	Oklahoma	22.8	+/-0.4
43	Indiana	22.1	+/-0.3
44	Nevada	21.8	+/-0.6

Rank	State	Percent	Margin of Error
44	Tennessee	21.8	+/-0.3
46	Alabama	21.4	+/-0.4
47	Louisiana	20.4	+/-0.4
48	Kentucky	20.0	+/-0.4
49	Arkansas	19.3	+/-0.5
50	Mississippi	18.9	+/-0.5
51	West Virginia	17.3	+/-0.6
	Puerto Rico	21.2	+/-0.4

Source: U.S. Census Bureau, 2007 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

While the 2007 American Community Survey (ACS) data generally reflect the December 2006 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities. The 2007 Puerto Rico Community Survey (PRCS) data generally reflect the December 2005 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in PRCS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available. Selected migration, earnings, and income data are not available for certain geographic areas due to problems with group quarters data collection and imputation. See [Errata Note #44](#) for details.

The letters PDF or symbol  indicate a document is in the [Portable Document Format \(PDF\)](#). To view the file you will need the [Adobe® Acrobat® Reader](#), which is available for **free** from the Adobe web site.
