

## Halaula CDP, Hawaii

### Population and Housing Narrative Profile: 2005-2009

Data Set: 2005-2009 American Community Survey 5-Year Estimates

Survey: American Community Survey

NOTE. Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

For more information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

**HOUSEHOLDS AND FAMILIES:** In 2005-2009 there were 160 households in Halaula CDP. The average household size was 3.1 people.

Families made up 70 percent of the households in Halaula CDP. This figure includes both married-couple families (43 percent) and other families (28 percent). Nonfamily households made up 30 percent of all households in Halaula CDP. Most of the nonfamily households were people living alone, but some were composed of people living in households in which no one was related to the householder.
