PERCENT OF FOREIGN-BORN PEOPLE BORN IN MEXICO - United States -- States; and Puerto Rico  
Universe: Foreign-born population  
2011 American Community Survey 1-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

**Geography: United States**

Rank	Geographical Area	Percent	Margin of Error
	United States	28.9	+/-0.2
1	New Mexico	71.4	+/-2.1
2	Texas	59.6	+/-0.6
3	Arizona	58.7	+/-1.4
4	Idaho	54.6	+/-3.3
5	Wyoming	52.8	+/-6.1
6	Oklahoma	50.2	+/-2.0
7	Colorado	48.0	+/-1.7
8	Arkansas	47.9	+/-3.6
9	Nevada	45.8	+/-1.7
10	Utah	44.2	+/-2.2
11	Kansas	43.4	+/-2.1
12	California	41.8	+/-0.3
13	Nebraska	41.1	+/-3.5
14	Oregon	40.3	+/-1.7
15	Illinois	39.5	+/-0.7
16	Alabama	39.0	+/-2.5
17	Indiana	37.2	+/-1.9
18	Mississippi	35.7	+/-3.7
19	North Carolina	34.7	+/-1.6
20	Wisconsin	33.3	+/-1.7
21	South Carolina	33.0	+/-2.8
22	Tennessee	31.7	+/-1.8
23	Georgia	28.9	+/-1.3
24	Iowa	28.8	+/-2.5
25	Washington	25.8	+/-1.1
26	Kentucky	21.0	+/-2.2
27	South Dakota	20.2	+/-5.8
28	Delaware	19.6	+/-3.1
29	Missouri	19.4	+/-1.6
30	Louisiana	18.0	+/-2.3
31	Minnesota	16.7	+/-1.2
32	Michigan	11.4	+/-0.7
33	Ohio	11.0	+/-1.0
34	West Virginia	10.6	+/-3.8
35	Florida	7.8	+/-0.5
36	Pennsylvania	7.1	+/-0.7

Rank	Geographical Area	Percent	Margin of Error
37	Alaska	6.9	+/-1.8
38	New Jersey	6.7	+/-0.5
39	Montana	6.3	+/-3.1
40	Virginia	6.2	+/-0.7
41	New York	5.8	+/-0.3
42	Connecticut	5.2	+/-0.9
43	New Hampshire	4.3	+/-1.7
43	North Dakota	4.3	+/-1.7
45	Maryland	4.0	+/-0.6
46	District of Columbia	3.3	+/-1.5
47	Rhode Island	2.7	+/-1.3
47	Vermont	2.7	+/-1.6
49	Hawaii	1.9	+/-0.6
50	Maine	1.5	+/-1.0
51	Massachusetts	1.2	+/-0.3
	Puerto Rico	2.5	+/-1.0

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

U.S. citizens born in Mexico are excluded.

While the 2011 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

#### Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
