**PERCENT OF WORKERS 16 YEARS AND OVER WHO WORKED OUTSIDE COUNTY OF RESIDENCE**  
 - United States -- States; and Puerto Rico  
 Universe: Workers 16 years and over  
 2011 American Community Survey 1-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

**Geography: United States**

Rank	Geographical Area	Percent	Margin of Error
	United States	27.6	+/-0.1
1	Virginia	51.4	+/-0.4
2	Maryland	47.2	+/-0.5
3	New Jersey	45.7	+/-0.5
4	Georgia	41.4	+/-0.6
5	Minnesota	36.8	+/-0.4
6	New Hampshire	36.5	+/-0.9
7	Mississippi	36.4	+/-0.9
7	Rhode Island	36.4	+/-1.3
9	Massachusetts	35.0	+/-0.4
9	New York	35.0	+/-0.3
11	Colorado	34.8	+/-0.5
11	Missouri	34.8	+/-0.5
13	West Virginia	32.6	+/-0.9
14	Indiana	32.2	+/-0.4
15	Kentucky	31.9	+/-0.6
16	Michigan	30.5	+/-0.4
17	Louisiana	30.2	+/-0.6
17	Ohio	30.2	+/-0.3
19	Pennsylvania	29.2	+/-0.3
20	South Carolina	28.4	+/-0.7
21	Tennessee	28.1	+/-0.4
21	Wisconsin	28.1	+/-0.4
23	North Carolina	27.7	+/-0.4
24	Alabama	27.2	+/-0.6
25	Illinois	26.8	+/-0.3
26	Connecticut	26.3	+/-0.6
27	Oklahoma	25.1	+/-0.5
28	Arkansas	24.9	+/-0.7
29	District of Columbia	23.9	+/-1.3
29	Iowa	23.9	+/-0.4
31	Kansas	23.3	+/-0.5
32	Oregon	23.1	+/-0.5
33	Maine	22.8	+/-0.7
34	Delaware	22.5	+/-1.3
34	Texas	22.5	+/-0.3

Rank	Geographical Area	Percent	Margin of Error
36	Nebraska	21.5	+/-0.6
36	Vermont	21.5	+/-0.9
38	Idaho	20.6	+/-1.0
39	South Dakota	20.3	+/-0.9
40	Florida	18.9	+/-0.3
41	Washington	18.8	+/-0.4
42	Utah	18.4	+/-0.6
43	California	17.2	+/-0.2
44	New Mexico	14.9	+/-0.7
45	North Dakota	14.7	+/-0.9
46	Montana	9.5	+/-0.6
47	Wyoming	8.2	+/-0.8
48	Alaska	6.5	+/-0.8
49	Arizona	5.9	+/-0.4
49	Nevada	5.9	+/-0.4
51	Hawaii	1.3	+/-0.3
	Puerto Rico	52.6	+/-0.7

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

While the 2011 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

#### Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
