

R2303

EMPLOYMENT/POPULATION RATIO FOR THE CIVILIAN POPULATION 16 TO 64 YEARS OLD - United States -- States; and Puerto Rico
 Universe: Civilian Population 16 to 64
 2011 American Community Survey 1-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Geography: United States

Rank	Geographical Area	Ratio	Margin of Error
	United States	65.9	+/-0.1
1	North Dakota	78.7	+/-1.0
2	Nebraska	75.7	+/-0.7
3	South Dakota	75.1	+/-0.9
4	Minnesota	74.6	+/-0.4
5	Iowa	74.5	+/-0.4
6	Wyoming	74.4	+/-1.2
7	Vermont	73.5	+/-1.0
8	New Hampshire	73.4	+/-0.9
9	Wisconsin	72.2	+/-0.3
10	Kansas	72.0	+/-0.5
11	Maryland	70.8	+/-0.3
12	Massachusetts	70.4	+/-0.3
13	Colorado	70.1	+/-0.4
13	Connecticut	70.1	+/-0.5
13	Montana	70.1	+/-1.0
16	Maine	69.8	+/-0.7
17	Rhode Island	69.4	+/-1.0
17	Utah	69.4	+/-0.6
19	Alaska	69.1	+/-1.1
20	Virginia	69.0	+/-0.3
21	Hawaii	68.6	+/-0.9
22	New Jersey	67.9	+/-0.3
23	Delaware	67.5	+/-0.9
24	Missouri	67.4	+/-0.4
25	Illinois	66.9	+/-0.2
26	Pennsylvania	66.8	+/-0.2
27	Ohio	66.4	+/-0.3
27	Washington	66.4	+/-0.3
29	Indiana	66.3	+/-0.4
30	Idaho	66.1	+/-0.9
30	Texas	66.1	+/-0.3
32	Oklahoma	66.0	+/-0.4
33	District of Columbia	65.7	+/-1.2
33	New York	65.7	+/-0.2
35	Nevada	64.6	+/-0.7

Rank	Geographical Area	Ratio	Margin of Error
36	North Carolina	64.1	+/-0.4
36	Oregon	64.1	+/-0.6
38	Tennessee	63.7	+/-0.4
39	Florida	63.2	+/-0.3
40	California	63.1	+/-0.1
41	Arkansas	63.0	+/-0.6
42	Louisiana	62.8	+/-0.5
43	Arizona	62.7	+/-0.4
44	Georgia	62.4	+/-0.4
45	Michigan	62.3	+/-0.3
46	New Mexico	62.2	+/-0.6
47	South Carolina	62.0	+/-0.6
48	Kentucky	61.8	+/-0.5
49	Alabama	60.6	+/-0.5
50	Mississippi	59.1	+/-0.6
51	West Virginia	58.8	+/-0.7
	Puerto Rico	45.0	+/-0.5

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

While the 2011 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
