CLASS OF WORKER BY SEX AND MEDIAN EARNINGS IN THE PAST 12 MONTHS (IN 2011 INFLATION-ADJUSTED DOLLARS) FOR THE CIVILIAN EMPLOYED POPULATION 16 YEARS AND

2011 American Community Survey 1-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	Hawaii				
	Total		Male		Female
	Estimate	Margin of Error	Estimate	Margin of Error	Estimate
Civilian employed population 16 years and over	629,523	+/-8,252	51.5%	+/-0.6	48.5%
Private for-profit wage and salary workers:	404,912	+/-8,198	52.8%	+/-1.1	47.2%
Employee of private company workers	381,597	+/-8,455	52.2%	+/-1.1	47.8%
Self-employed in own incorporated business workers	23,315	+/-2,572	62.4%	+/-4.6	37.6%
Private not-for-profit wage and salary workers	45,850	+/-3,313	37.5%	+/-3.9	62.5%
Local government workers	23,740	+/-2,580	60.7%	+/-5.7	39.3%
State government workers	67,479	+/-3,585	36.6%	+/-2.9	63.4%
Federal government workers	43,899	+/-3,333	66.4%	+/-3.3	33.6%
Self-employed in own not incorporated business workers and unpaid family workers	43,643	+/-3,330	57.6%	+/-4.1	42.4%
PERCENT IMPUTED					
Class of worker	7.1%	(X)	(X)	(X)	(X)

Subject	Hawaii				
	Female	Median earnings (dollars)		Median earnings (dollars) for male	
	Margin of Error	Estimate	Margin of Error	Estimate	Margin of Error
Civilian employed population 16 years and over	+/-0.6	33,620	+/-1,039	38,961	+/-1,902
Private for-profit wage and salary workers:	+/-1.1	31,276	+/-607	36,303	+/-1,091
Employee of private company workers	+/-1.1	30,904	+/-612	35,766	+/-1,119
Self-employed in own incorporated business workers	+/-4.6	42,039	+/-3,993	49,947	+/-9,497
Private not-for-profit wage and salary workers	+/-3.9	35,960	+/-1,368	36,922	+/-3,961
Local government workers	+/-5.7	46,361	+/-3,332	50,800	+/-2,476
State government workers	+/-2.9	40,882	+/-1,244	44,321	+/-3,953
Federal government workers	+/-3.3	52,092	+/-2,561	60,185	+/-5,230
Self-employed in own not incorporated business workers and unpaid family workers	+/-4.1	22,244	+/-2,040	28,099	+/-2,906

Class of worker	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The Class of Worker status "unpaid family workers" may have earnings. Earnings reflect any earnings from all jobs held during the 12 months prior to the ACS interview. The Class of Worker status reflects the job or business held the week prior to the ACS interview, or the last job held by the respondent.

While the 2011 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
