MEDIAN AGE AT FIRST MARRIAGE FOR MEN - United States -- States; and Puerto Rico
 Universe: Male population
 2012 American Community Survey 1-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

To view this table with statistical significance, select With Statistical Significance in the Action menu.

An # next to a geography indicates when an estimate is not statistically significant from the estimate for the selected geography.

The ## indicates the selected geography.

Rank	Geographical Area	Median Age	Margin of Error
	United States	29.1	+/-0.1
1	Rhode Island	31.6	+/-0.9
2	New York	30.9	+/-0.2
3	Massachusetts	30.7	+/-0.3
4	New Jersey	30.6	+/-0.2
4	Vermont	30.6	+/-1.0
6	Connecticut	30.3	+/-0.4
7	District of Columbia	30.2	+/-0.7
8	California	30.0	+/-0.1
9	Florida	29.9	+/-0.3
10	Pennsylvania	29.8	+/-0.2
11	Delaware	29.7	+/-0.5
11	Illinois	29.7	+/-0.2
11	Maryland	29.7	+/-0.3
11	New Hampshire	29.7	+/-0.5
15	Michigan	29.5	+/-0.3
16	Oregon	29.1	+/-0.5
17	Georgia	29.0	+/-0.3
17	Ohio	29.0	+/-0.3
19	Louisiana	28.9	+/-0.6
20	Arizona	28.8	+/-0.4
20	Minnesota	28.8	+/-0.3
22	Alaska	28.7	+/-1.2
22	Maine	28.7	+/-0.8
22	Virginia	28.7	+/-0.4
25	Wisconsin	28.6	+/-0.4
26	Montana	28.5	+/-1.0
27	Hawaii	28.4	+/-0.9
27	Mississippi	28.4	+/-0.7
27	Nevada	28.4	+/-1.2
30	North Carolina	28.3	+/-0.4
30	South Carolina	28.3	+/-0.6
30	South Dakota	28.3	+/-0.7

Rank	Geographical Area	Median Age	Margin of Error
33	Colorado	28.1	+/-0.6
33	Washington	28.1	+/-0.5
35	Tennessee	27.9	+/-0.5
36	Indiana	27.8	+/-0.4
36	Missouri	27.8	+/-0.4
36	Texas	27.8	+/-0.2
39	Alabama	27.7	+/-0.5
40	Iowa	27.6	+/-0.5
41	Kentucky	27.3	+/-0.4
41	Nebraska	27.3	+/-0.6
41	North Dakota	27.3	+/-1.2
44	West Virginia	27.1	+/-0.7
45	Kansas	27.0	+/-0.5
46	Arkansas	26.9	+/-0.6
46	New Mexico	26.9	+/-0.8
46	Wyoming	26.9	+/-1.2
49	Oklahoma	26.6	+/-0.3
50	Idaho	26.3	+/-0.6
51	Utah	26.2	+/-0.4
	Puerto Rico	30.0	+/-0.4

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

While the 2012 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
