PERCENT OF PEOPLE WITH A DISABILITY - United States -- States; and Puerto Rico
 Universe: Civilian noninstitutionalized population
 2012 American Community Survey 1-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

To view this table with statistical significance, select With Statistical Significance in the Action menu.

An # next to a geography indicates when an estimate is not statistically significant from the estimate for the selected geography.

The ## indicates the selected geography.

Rank	Geographical Area	Percent	Margin of Error
	United States	12.2	+/-0.1
1	West Virginia	19.0	+/-0.4
2	Kentucky	17.0	+/-0.2
3	Mississippi	16.5	+/-0.4
4	Alabama	16.4	+/-0.3
4	Arkansas	16.4	+/-0.4
6	Maine	15.9	+/-0.5
7	Louisiana	15.3	+/-0.3
7	Oklahoma	15.3	+/-0.2
9	Tennessee	15.1	+/-0.2
10	New Mexico	14.8	+/-0.4
11	Missouri	14.3	+/-0.3
12	South Carolina	14.0	+/-0.3
13	Michigan	13.9	+/-0.2
13	Oregon	13.9	+/-0.3
15	Ohio	13.6	+/-0.2
16	Pennsylvania	13.4	+/-0.1
16	Vermont	13.4	+/-0.5
18	North Carolina	13.0	+/-0.2
19	Florida	12.9	+/-0.1
19	Indiana	12.9	+/-0.2
19	Montana	12.9	+/-0.5
22	Rhode Island	12.5	+/-0.5
23	Idaho	12.4	+/-0.5
24	Nevada	12.2	+/-0.3
25	Delaware	12.0	+/-0.5
25	Georgia	12.0	+/-0.2
25	Kansas	12.0	+/-0.2
25	South Dakota	12.0	+/-0.5
25	Washington	12.0	+/-0.2
30	New Hampshire	11.8	+/-0.4
31	Arizona	11.7	+/-0.2
31	Wyoming	11.7	+/-0.7

Rank	Geographical Area	Percent	Margin of Error
33	Texas	11.6	+/-0.1
34	Massachusetts	11.5	+/-0.2
35	District of Columbia	11.4	+/-0.6
36	Iowa	11.3	+/-0.3
36	Wisconsin	11.3	+/-0.2
38	Alaska	11.0	+/-0.6
39	Hawaii	10.9	+/-0.4
39	New York	10.9	+/-0.1
41	Virginia	10.8	+/-0.2
42	Connecticut	10.7	+/-0.2
42	Illinois	10.7	+/-0.1
44	Nebraska	10.6	+/-0.3
45	North Dakota	10.5	+/-0.5
46	Maryland	10.3	+/-0.2
47	California	10.2	+/-0.1
47	Minnesota	10.2	+/-0.2
47	New Jersey	10.2	+/-0.1
50	Colorado	10.1	+/-0.2
51	Utah	9.2	+/-0.3
	Puerto Rico	21.0	+/-0.3

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the Evaluation Report Covering Disability.

While the 2012 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
