

R0209 PERCENT OF THE TOTAL POPULATION WHO ARE WHITE ALONE, NOT HISPANIC OR LATINO - United States -- States; and Puerto Rico  
 Universe: Total population  
 2013 American Community Survey 1-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

To view this table with statistical significance, select With Statistical Significance in the Action menu.  
 A # next to a geography indicates when an estimate is not statistically significant from the estimate for the selected geography.  
 The ## indicates the selected geography.

Rank	Geographical Area	Percent	Margin of Error
	United States	62.4	+/-0.1
1	Vermont	94.0	+/-0.1
2	Maine	93.9	+/-0.1
3	West Virginia	92.6	+/-0.1
4	New Hampshire	91.4	+/-0.2
5	Iowa	87.5	+/-0.1
6	North Dakota	87.4	+/-0.1
7	Montana	87.0	+/-0.1
8	Kentucky	85.7	+/-0.1
9	Wyoming	84.7	+/-0.4
10	South Dakota	83.4	+/-0.1
11	Idaho	83.2	+/-0.1
12	Wisconsin	82.5	+/-0.1
13	Minnesota	81.9	+/-0.1
14	Nebraska	81.0	+/-0.1
15	Indiana	80.6	+/-0.1
16	Missouri	80.4	+/-0.1
17	Ohio	80.3	+/-0.1
18	Utah	79.5	+/-0.1
19	Pennsylvania	78.2	+/-0.1
20	Oregon	77.3	+/-0.1
21	Kansas	77.1	+/-0.1
22	Michigan	75.9	+/-0.1
23	Tennessee	74.8	+/-0.1
24	Massachusetts	74.6	+/-0.1
24	Rhode Island	74.6	+/-0.3
26	Arkansas	73.6	+/-0.1
27	Washington	70.9	+/-0.1
28	Connecticut	69.3	+/-0.1
29	Colorado	69.1	+/-0.1
30	Oklahoma	67.4	+/-0.1
31	Alabama	66.3	+/-0.1
32	North Carolina	64.2	+/-0.1

Rank	Geographical Area	Percent	Margin of Error
33	Delaware	64.0	+/-0.1
34	South Carolina	63.8	+/-0.1
35	Virginia	63.5	+/-0.1
36	Illinois	62.7	+/-0.1
37	Alaska	62.5	+/-0.1
38	Louisiana	59.5	+/-0.1
39	Mississippi	57.4	+/-0.1
40	New Jersey	57.3	+/-0.1
41	New York	56.9	+/-0.1
42	Arizona	56.6	+/-0.1
43	Florida	56.2	+/-0.1
44	Georgia	54.6	+/-0.1
45	Maryland	53.2	+/-0.1
46	Nevada	52.1	+/-0.1
47	Texas	43.9	+/-0.1
48	New Mexico	39.3	+/-0.1
49	California	38.8	+/-0.1
50	District of Columbia	35.6	+/-0.1
51	Hawaii	23.0	+/-0.1
	Puerto Rico	0.6	+/-0.1

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

In data year 2013, there were a series of changes to data collection operations that could have affected some estimates. These changes include the addition of Internet as a mode of data collection, the end of the content portion of Failed Edit Follow-Up interviewing, and the loss of one monthly panel due to the Federal Government shut down in October 2013. For more information, see: User Notes

While the 2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

#### Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
