

R1501 | **PERCENT OF PEOPLE 25 YEARS AND OVER WHO HAVE COMPLETED HIGH SCHOOL (INCLUDES EQUIVALENCY) - United States -- States; and Puerto Rico**
 Universe: Population 25 years and over
 2013 American Community Survey 1-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

To view this table with statistical significance, select With Statistical Significance in the Action menu.
 A # next to a geography indicates when an estimate is not statistically significant from the estimate for the selected geography.
 The ## indicates the selected geography.

Rank	Geographical Area	Percent	Margin of Error
	United States	86.6	+/-0.1
1	Wyoming	93.5	+/-0.6
2	New Hampshire	92.8	+/-0.4
3	Montana	92.7	+/-0.5
4	Minnesota	92.4	+/-0.2
5	Maine	91.8	+/-0.4
6	Alaska	91.6	+/-0.5
6	Iowa	91.6	+/-0.3
6	South Dakota	91.6	+/-0.6
9	North Dakota	91.5	+/-0.5
9	Utah	91.5	+/-0.4
9	Vermont	91.5	+/-0.6
12	Hawaii	91.0	+/-0.5
13	Wisconsin	90.9	+/-0.2
14	Colorado	90.5	+/-0.3
15	Nebraska	90.2	+/-0.3
16	District of Columbia	90.1	+/-0.8
16	Kansas	90.1	+/-0.4
16	Washington	90.1	+/-0.2
19	Massachusetts	89.9	+/-0.2
20	Connecticut	89.7	+/-0.4
20	Oregon	89.7	+/-0.3
22	Idaho	89.4	+/-0.5
22	Michigan	89.4	+/-0.2
24	Pennsylvania	89.2	+/-0.2
25	Maryland	89.1	+/-0.3
26	Ohio	89.0	+/-0.2
27	Missouri	88.7	+/-0.2
28	New Jersey	88.5	+/-0.2
29	Virginia	88.4	+/-0.3
30	Delaware	88.3	+/-0.7
31	Illinois	87.8	+/-0.2
32	Indiana	87.6	+/-0.2

Rank	Geographical Area	Percent	Margin of Error
33	Florida	86.8	+/-0.2
34	Oklahoma	86.7	+/-0.3
35	Arizona	85.9	+/-0.3
35	Rhode Island	85.9	+/-0.8
37	North Carolina	85.7	+/-0.3
38	New York	85.6	+/-0.2
38	South Carolina	85.6	+/-0.4
38	Tennessee	85.6	+/-0.3
41	Georgia	85.5	+/-0.3
42	Nevada	85.2	+/-0.4
43	West Virginia	84.6	+/-0.5
44	Alabama	84.5	+/-0.3
45	Arkansas	84.4	+/-0.4
46	New Mexico	84.3	+/-0.5
47	Kentucky	84.1	+/-0.3
48	Louisiana	83.1	+/-0.4
49	Mississippi	82.4	+/-0.5
50	Texas	81.9	+/-0.2
51	California	81.7	+/-0.1
	Puerto Rico	72.9	+/-0.5

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

In data year 2013, there were a series of changes to data collection operations that could have affected some estimates. These changes include the addition of Internet as a mode of data collection, the end of the content portion of Failed Edit Follow-Up interviewing, and the loss of one monthly panel due to the Federal Government shut down in October 2013. For more information, see: User Notes

While the 2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
