

R2304 | PERCENT OF MARRIED-COUPLE FAMILIES WITH BOTH HUSBAND AND WIFE IN THE LABOR FORCE -  
 United States -- States; and Puerto Rico  
 Universe: Married-couple families  
 2013 American Community Survey 1-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

To view this table with statistical significance, select With Statistical Significance in the Action menu.  
 A # next to a geography indicates when an estimate is not statistically significant from the estimate for the selected geography.  
 The ## indicates the selected geography.

Rank	Geographical Area	Percent	Margin of Error
	United States	51.7	+/-0.1
1	South Dakota	62.3	+/-1.2
2	Minnesota	61.0	+/-0.5
3	North Dakota	59.9	+/-1.6
4	Nebraska	59.7	+/-0.9
5	Iowa	59.2	+/-0.7
6	District of Columbia	58.9	+/-2.9
7	Maryland	58.8	+/-0.6
8	Massachusetts	58.5	+/-0.6
9	Alaska	58.1	+/-2.0
9	Connecticut	58.1	+/-0.8
11	Wisconsin	58.0	+/-0.5
12	Vermont	57.7	+/-1.5
13	Wyoming	57.6	+/-2.1
14	Kansas	56.5	+/-0.9
15	New Hampshire	56.3	+/-1.3
15	Rhode Island	56.3	+/-1.8
17	Illinois	55.1	+/-0.4
17	New Jersey	55.1	+/-0.5
19	Virginia	54.8	+/-0.5
20	Colorado	54.1	+/-0.7
21	Hawaii	53.8	+/-1.5
22	Pennsylvania	53.1	+/-0.4
23	Indiana	52.8	+/-0.6
24	New York	52.6	+/-0.4
25	Ohio	52.3	+/-0.4
26	Missouri	52.1	+/-0.7
27	Maine	52.0	+/-1.1
28	Georgia	51.6	+/-0.6
28	Montana	51.6	+/-1.3
30	Washington	50.8	+/-0.6
31	North Carolina	50.7	+/-0.5
32	California	50.5	+/-0.3

Rank	Geographical Area	Percent	Margin of Error
33	Texas	50.4	+/-0.4
34	Delaware	49.9	+/-1.9
34	Utah	49.9	+/-1.0
36	Nevada	49.7	+/-1.0
37	Michigan	49.5	+/-0.4
38	Louisiana	49.3	+/-0.7
39	Oregon	49.2	+/-0.9
40	Idaho	48.9	+/-1.6
41	Oklahoma	48.7	+/-0.7
42	Tennessee	48.6	+/-0.7
43	Kentucky	48.4	+/-0.7
44	South Carolina	47.8	+/-0.8
45	Mississippi	47.4	+/-1.2
46	Alabama	46.7	+/-0.8
47	Arkansas	46.4	+/-0.9
48	Florida	45.3	+/-0.4
49	New Mexico	44.1	+/-1.4
50	Arizona	43.3	+/-0.7
51	West Virginia	41.3	+/-1.1
	Puerto Rico	31.4	+/-1.0

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

In data year 2013, there were a series of changes to data collection operations that could have affected some estimates. These changes include the addition of Internet as a mode of data collection, the end of the content portion of Failed Edit Follow-Up interviewing, and the loss of one monthly panel due to the Federal Government shut down in October 2013. For more information, see: User Notes

Starting with 2013 data products, same-sex married couples are shown along with all married couples. For more information, see: User Notes

While the 2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

#### Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
