

CENSUS DATA HIGHLIGHTS

Hawaii State Data Center, December 4, 2014

HIGHLIGHTS OF THE 2009-2013 AMERICAN COMMUNITY SURVEY 5-YEAR DATA FOR HAWAII

The U.S. Census Bureau released its 2009-2013 American Community Survey (ACS) 5-year estimates on December 4, 2014. The estimates are based on the annual American Community Survey conducted by the Census Bureau which include social, economic, and detailed housing characteristics of Hawaii's population.

The Census Bureau releases 5-year data for all census geographic areas down to the block group level. About 8.5% of Hawaii's population was surveyed between the 2009 to 2013 period.

Some interesting additions to the 2013 ACS 5-year dataset series are tables for bachelor's field of degree, poverty age breakdown, selected characteristics of the uninsured, and health insurance by age. Through the use of the census tract data, information by islands may also be obtained.

Selected small area rankings

The following analyses are based upon the ranking of the 317 census tracts in Hawaii which had population. The numbers presented below are averages over the 2009-2013 time period.

Here are some highlights for Hawaii. Tables included in these highlights display only the 20 top ranking census tracts. For the complete list and for the margin of errors, see the accompanying EXCEL data file.

- **Resident population.** Only one census tract, Ewa Villages (census tract 86.17) had 10,000 people or more. Eight additional census tracts had 9,000 people or more. (Table 1)
- **Median household income.** Waialae Iki (census tract 4.02) had the highest median household income which was \$158,105. All 43 census tracts that had median household incomes of \$100,000 or more were located on the Island of Oahu. (Table 2)
- **Median family income.** Round Top-Tantalus (census tract 32) had the highest median family income with \$195,739. There were 67 census tracts with median family incomes of \$100,000 or more. All of these tracts were located on the Island of Oahu. (Table 3)
- **Percent persons below poverty level.** Linapuni Street (census tract 62.02) on the Island of Oahu had the highest percentage of people below the poverty rate at 69.9%. Of the 17 census tracts with percent of persons below the poverty level equaling to or greater than 30%, 11 were located on the Island of Oahu, 5 were on the Island of Hawaii, and 1 was on the Island of Maui. (Table 4)

- **Percent families below poverty level.** Linapuni Street (census tract 62.02) also had the highest percent of families below the poverty level at 61.6%. There were 9 census tracts with family poverty rates equal to or greater than 30%. Three census tracts were located on the Island of Hawaii, 1 on the Island of Maui, and the rest were on the Island of Oahu. (Table 5)
- **Percent civilian unemployed.** Halawa Valley (census tract 75.02) had the highest percent of civilian unemployed with 24.6%. Of the 7 census tracts with civilian unemployment rates of 20% or above, 2 were found on the Island of Hawaii and the rest were on the Island of Oahu. (Table 6)
- **Percent high school degree or higher.** All 6 census tracts where 100% of their population 25 years and over had a high school degree or higher were located on Oahu. Only Hickam Air Force Base (census tract 73.03) and Mokapu East (census tract 108.02) in this listing, however, had total populations exceeding 250 people. (Table 7)
- **Percent bachelor's degree or higher.** The top 5 census tracts with 70% or more of their population 25 years or over holding a bachelor's degree or higher were also all located on the Island of Oahu. Unlike the other top areas in this list, Schofield Forest Reserve (census tract 9806) which has the highest percentage of people with bachelor's degrees also had a small total population with less than 100 people. (Table 8)
- **Percent foreign-born.** Foster Botanical Garden (census tract 51) on the Island of Oahu was the most significant census tract for foreign-born population with 58.7% of its population being born in other countries. This area was followed by Aala (census tract 53) with a foreign-born population of 58.4% and Palama (census tract 55) with a foreign-born population of 56.1%. A majority of the top census tracts with foreign-born populations of 50% or more were located in the urban Honolulu area. It should be noted that although Hanauma Bay (census tract 9800) topped the listing, the total population in that area was 3 people. (Table 9)
- **Percent persons who spoke a language other than English.** Mayor Wright Housing (census tract 54) was the most significant census tract in regard to the percentage of people who spoke a language other than English at home with 67.7%. This area was followed by Waiakamilo Road (census tract 58) with 67.6% of the people in this area who spoke a language other than English at home, then Honowai School (census tract 89.14) with a figure of 66.8%. Not surprisingly, 8 of these top 10 census tracts matched those found at the top of the percent foreign-born population listing. It should again be noted that although Hanauma Bay (census tract 9800) topped the listing, the total population in that area was 3 people. (Table 10)
- **Owner-occupied home value.** Nine census tracts in Hawaii had owner-occupied homes with values averaging a million dollars or more. Many of these areas were in East Oahu - Portlock (census tract 1.14), Waialae Iki (census tract 4.02), Waialae-Kahala (census tract 5), and Diamond Head (census tract 6). Neighbor island areas were also on the top of the list and included Ha'ena-Hanalei (census tract 401.04) on the Island of Kauai and Wailea (census tract 303.03) on the Island of Maui. (Table 11)
