Table 5. Statistics for Respondent Firms Operated as Home-Based, Family-Owned, or Franchised by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. Firms that reported as both family-owned and as having only one owner were counted in each category selected; they were not reclassified as nonfamily-owned businesses. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 5. Statistics for Respondent Firms Operated as Home-Based, Family-Owned, or Franchised by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. Firms that reported as both family-owned and as having only one owner were counted in each category selected; they were not reclassified as nonfamily-owned businesses. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 5. Statistics for Respondent Firms Operated as Home-Based, Family-Owned, or Franchised by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. Firms that reported as both family-owned and as having only one owner were counted in each category selected; they were not reclassified as nonfamily-owned businesses. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 5. Statistics for Respondent Firms Operated as Home-Based, Family-Owned, or Franchised by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. Firms that reported as both family-owned and as having only one owner were counted in each category selected; they were not reclassified as nonfamily-owned businesses. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 5. Statistics for Respondent Firms Operated as Home-Based, Family-Owned, or Franchised by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. Firms that reported as both family-owned and as having only one owner were counted in each category selected; they were not reclassified as nonfamily-owned businesses. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 5. Statistics for Respondent Firms Operated as Home-Based, Family-Owned, or Franchised by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. Firms that reported as both family-owned and as having only one owner were counted in each category selected; they were not reclassified as nonfamily-owned businesses. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 5. Statistics for Respondent Firms Operated as Home-Based, Family-Owned, or Franchised by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. Firms that reported as both family-owned and as having only one owner were counted in each category selected; they were not reclassified as nonfamily-owned businesses. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 5. Statistics for Respondent Firms Operated as Home-Based, Family-Owned, or Franchised by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. Firms that reported as both family-owned and as having only one owner were counted in each category selected; they were not reclassified as nonfamily-owned businesses. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 5. Statistics for Respondent Firms Operated as Home-Based, Family-Owned, or Franchised by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. Firms that reported as both family-owned and as having only one owner were counted in each category selected; they were not reclassified as nonfamily-owned businesses. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

¹Data include both respondent firms with paid employees and respondent firms with no paid employees.

Note: To maintain confidentiality, the Census Bureau suppresses data to protect the identity of any business or individual. The census results in this table contain nonsampling errors. Data users who create their own estimates using data from this table should cite the Census Bureau as the source of the original data only. See also explanation of terms. For the full technical documentation, see Appendix C.

Table 6. Statistics for Respondent Firms With Paid Employees Operated as Home-Based, Family-Owned, or Franchised by Employment Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002

[All estimates are based on firms that responded to the 2002 Survey of Business Owners. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. Firms that reported as both family-owned and as having only one owner were counted in each category selected; they were not reclassified as nonfamily-owned businesses. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 6. Statistics for Respondent Firms With Paid Employees Operated as Home-Based, Family-Owned, or Franchised by Employment Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. Firms that reported as both family-owned and as having only one owner were counted in each category selected; they were not reclassified as nonfamily-owned businesses. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A.]

Table 6. Statistics for Respondent Firms With Paid Employees Operated as Home-Based, Family-Owned, or Franchised by Employment Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. Firms that reported as both family-owned and as having only one owner were counted in each category selected; they were not reclassified as nonfamily-owned businesses. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 6. Statistics for Respondent Firms With Paid Employees Operated as Home-Based, Family-Owned, or Franchised by Employment Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. Firms that reported as both family-owned and as having only one owner were counted in each category selected; they were not reclassified as nonfamily-owned businesses. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 6. Statistics for Respondent Firms With Paid Employees Operated as Home-Based, Family-Owned, or Franchised by Employment Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) and indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. Firms that reported as both family-owned and as having only one owner were counted in each category selected; they were not reclassified as nonfamily-owned businesses. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 6. Statistics for Respondent Firms With Paid Employees Operated as Home-Based, Family-Owned, or Franchised by Employment Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. Firms that reported as both family-owned and as having only one owner were counted in each category selected; they were not reclassified as nonfamily-owned businesses. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 6. Statistics for Respondent Firms With Paid Employees Operated as Home-Based, Family-Owned, or Franchised by Employment Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. Firms that reported as both family-owned and as having only one owner were counted in each category selected; they were not reclassified as nonfamily-owned businesses. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 6. Statistics for Respondent Firms With Paid Employees Operated as Home-Based, Family-Owned, or Franchised by Employment Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. Firms that reported as both family-owned and as having only one owner were counted in each category selected; they were not reclassified as nonfamily-owned businesses. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 6. Statistics for Respondent Firms With Paid Employees Operated as Home-Based, Family-Owned, or Franchised by Employment Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. Firms that reported as both family-owned and as having only one owner were counted in each category selected; they were not reclassified as nonfamily-owned businesses. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 6. Statistics for Respondent Firms With Paid Employees Operated as Home-Based, Family-Owned, or Franchised by Employment Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. Firms that reported as both family-owned and as having only one owner were counted in each category selected; they were not reclassified as nonfamily-owned businesses. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 6. Statistics for Respondent Firms With Paid Employees Operated as Home-Based, Family-Owned, or Franchised by Employment Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. Firms that reported as both family-owned and as having only one owner were counted in each category selected; they were not reclassified as nonfamily-owned businesses. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 6. Statistics for Respondent Firms With Paid Employees Operated as Home-Based, Family-Owned, or Franchised by Employment Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. Firms that reported as both family-owned and as having only one owner were counted in each category selected; they were not reclassified as nonfamily-owned businesses. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A.]

Note: To maintain confidentiality, the Census Bureau suppresses data to protect the identity of any business or individual. The census results in this table contain nonsampling errors. Data users who create their own estimates using data from this table should cite the Census Bureau as the source of the original data only. See also explanation of terms. For the full technical documentation, see Appendix C.

Table 7. Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

**Table 7. Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—
Con.**

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 7. Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 7. Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 7. Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 7. **Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 7. **Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 7. **Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 7. **Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 7. **Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 7. **Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 7. **Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 7. **Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 7. **Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 7. **Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

**Table 7. Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—
Con.**

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 7. Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 7. Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 7. **Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 7. **Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 7. Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 7. Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 7. **Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 7. Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 7. Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 7. **Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 7. Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 7. Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 7. Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 7. **Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 7. Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 7. Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 7. Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 7. **Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 7. **Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

See footnotes at end of table.

Table 7. Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 7. Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 7. **Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 7. Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 7. Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 7. **Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

¹Data include both respondent firms with paid employees and respondent firms with no paid employees.

²Data do not include crop and animal production (NAICS 111, 112).

³Data do not include large certificated passenger carriers that report to the Office of Airline Information, U.S. Department of Transportation. Railroad transportation and U.S. Postal Service are out of scope for the 2002 Economic Census.

⁴Data do not include funds, trusts, and other financial vehicles (NAICS 525), except real estate investment trusts (NAICS 525930).

⁵Data do not include religious, grantmaking, civic, professional, and similar organizations (NAICS 813) and private households (NAICS 814).

Note: To maintain confidentiality, the Census Bureau suppresses data to protect the identity of any business or individual. The census results in this table contain nonsampling errors. Data users who create their own estimates using data from this table should cite the Census Bureau as the source of the original data only. See also explanation of terms. For the full technical documentation, see Appendix C.

Table 8. Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 8. Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 8. Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 8. Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 8. Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 8. Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 8. Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 8. Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 8. Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 8. Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 8. Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 8. Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 8. Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 8. Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 8. Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 8. Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 8. Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 8. Statistics for Respondent Firms by Sources of Capital Needed to Start or Acquire the Business by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

¹Data include both respondent firms with paid employees and respondent firms with no paid employees.

Note: To maintain confidentiality, the Census Bureau suppresses data to protect the identity of any business or individual. The census results in this table contain nonsampling errors. Data users who create their own estimates using data from this table should cite the Census Bureau as the source of the original data only. See also explanation of terms. For the full technical documentation, see Appendix C.

Table 9. Statistics for Respondent Firms With Paid Employees by Sources of Capital Needed to Start or Acquire the Business by Employment Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002

[All estimates are based on firms that responded to the 2002 Survey of Business Owners. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 9. Statistics for Respondent Firms With Paid Employees by Sources of Capital Needed to Start or Acquire the Business by Employment Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 9. Statistics for Respondent Firms With Paid Employees by Sources of Capital Needed to Start or Acquire the Business by Employment Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 9. Statistics for Respondent Firms With Paid Employees by Sources of Capital Needed to Start or Acquire the Business by Employment Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 9. Statistics for Respondent Firms With Paid Employees by Sources of Capital Needed to Start or Acquire the Business by Employment Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 9. Statistics for Respondent Firms With Paid Employees by Sources of Capital Needed to Start or Acquire the Business by Employment Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 9. Statistics for Respondent Firms With Paid Employees by Sources of Capital Needed to Start or Acquire the Business by Employment Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 9. Statistics for Respondent Firms With Paid Employees by Sources of Capital Needed to Start or Acquire the Business by Employment Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 9. Statistics for Respondent Firms With Paid Employees by Sources of Capital Needed to Start or Acquire the Business by Employment Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Note: To maintain confidentiality, the Census Bureau suppresses data to protect the identity of any business or individual. The census results in this table contain nonsampling errors. Data users who create their own estimates using data from this table should cite the Census Bureau as the source of the original data only. See also explanation of terms. For the full technical documentation, see Appendix C.

Table 10. Statistics for Respondent Firms by Sources of Capital Used to Finance Expansion or Capital Improvements for the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 10. Statistics for Respondent Firms by Sources of Capital Used to Finance Expansion or Capital Improvements for the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 10. Statistics for Respondent Firms by Sources of Capital Used to Finance Expansion or Capital Improvements for the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 10. Statistics for Respondent Firms by Sources of Capital Used to Finance Expansion or Capital Improvements for the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 10. Statistics for Respondent Firms by Sources of Capital Used to Finance Expansion or Capital Improvements for the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 10. **Statistics for Respondent Firms by Sources of Capital Used to Finance Expansion or Capital Improvements for the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.**

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 10. **Statistics for Respondent Firms by Sources of Capital Used to Finance Expansion or Capital Improvements for the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.**

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 10. **Statistics for Respondent Firms by Sources of Capital Used to Finance Expansion or Capital Improvements for the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.**

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 10. **Statistics for Respondent Firms by Sources of Capital Used to Finance Expansion or Capital Improvements for the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.**

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 10. **Statistics for Respondent Firms by Sources of Capital Used to Finance Expansion or Capital Improvements for the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.**

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 10. **Statistics for Respondent Firms by Sources of Capital Used to Finance Expansion or Capital Improvements for the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.**

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 10. Statistics for Respondent Firms by Sources of Capital Used to Finance Expansion or Capital Improvements for the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 10. **Statistics for Respondent Firms by Sources of Capital Used to Finance Expansion or Capital Improvements for the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.**

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 10. Statistics for Respondent Firms by Sources of Capital Used to Finance Expansion or Capital Improvements for the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 10. Statistics for Respondent Firms by Sources of Capital Used to Finance Expansion or Capital Improvements for the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 10. Statistics for Respondent Firms by Sources of Capital Used to Finance Expansion or Capital Improvements for the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 10. Statistics for Respondent Firms by Sources of Capital Used to Finance Expansion or Capital Improvements for the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 10. Statistics for Respondent Firms by Sources of Capital Used to Finance Expansion or Capital Improvements for the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 10. **Statistics for Respondent Firms by Sources of Capital Used to Finance Expansion or Capital Improvements for the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.**

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 10. Statistics for Respondent Firms by Sources of Capital Used to Finance Expansion or Capital Improvements for the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 10. Statistics for Respondent Firms by Sources of Capital Used to Finance Expansion or Capital Improvements for the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 10. Statistics for Respondent Firms by Sources of Capital Used to Finance Expansion or Capital Improvements for the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 10. Statistics for Respondent Firms by Sources of Capital Used to Finance Expansion or Capital Improvements for the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 10. Statistics for Respondent Firms by Sources of Capital Used to Finance Expansion or Capital Improvements for the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 10. **Statistics for Respondent Firms by Sources of Capital Used to Finance Expansion or Capital Improvements for the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.**

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 10. Statistics for Respondent Firms by Sources of Capital Used to Finance Expansion or Capital Improvements for the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 10. Statistics for Respondent Firms by Sources of Capital Used to Finance Expansion or Capital Improvements for the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 10. **Statistics for Respondent Firms by Sources of Capital Used to Finance Expansion or Capital Improvements for the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.**

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 10. **Statistics for Respondent Firms by Sources of Capital Used to Finance Expansion or Capital Improvements for the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.**

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 10. Statistics for Respondent Firms by Sources of Capital Used to Finance Expansion or Capital Improvements for the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 10. Statistics for Respondent Firms by Sources of Capital Used to Finance Expansion or Capital Improvements for the Business by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

2002 NAICS code	Kind of business, Hispanic or Latino origin, race, gender, and expansion financing	Respondent firms ¹				Employer respondent firms				Nonemployer respondent firms
