Table 16. **Statistics for Respondent Firms by Types of Workers by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.**

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. Some nonemployer respondent firms with no administrative employees and payroll reported using full- and part-time paid employees during 2002; however, these firms were not reclassified as employers. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A.]

Table 16. Statistics for Respondent Firms by Types of Workers by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. Some nonemployer respondent firms with no administrative employees and payroll reported using full- and part-time paid employees during 2002; however, these firms were not reclassified as employers. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A.]

Table 16. **Statistics for Respondent Firms by Types of Workers by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.**

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. Some nonemployer respondent firms with no administrative employees and payroll reported using full- and part-time paid employees during 2002; however, these firms were not reclassified as employers. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 16. Statistics for Respondent Firms by Types of Workers by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. Some nonemployer respondent firms with no administrative employees and payroll reported using full- and part-time paid employees during 2002; however, these firms were not reclassified as employers. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A.]

Table 16. Statistics for Respondent Firms by Types of Workers by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. Some nonemployer respondent firms with no administrative employees and payroll reported using full- and part-time paid employees during 2002; however, these firms were not reclassified as employers. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 16. Statistics for Respondent Firms by Types of Workers by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. Some nonemployer respondent firms with no administrative employees and payroll reported using full- and part-time paid employees during 2002; however, these firms were not reclassified as employers. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A.]

Table 16. Statistics for Respondent Firms by Types of Workers by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. Some nonemployer respondent firms with no administrative employees and payroll reported using full- and part-time paid employees during 2002; however, these firms were not reclassified as employers. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A.]

Table 16. Statistics for Respondent Firms by Types of Workers by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. Some nonemployer respondent firms with no administrative employees and payroll reported using full- and part-time paid employees during 2002; however, these firms were not reclassified as employers. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A.]

Table 16. Statistics for Respondent Firms by Types of Workers by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. Some nonemployer respondent firms with no administrative employees and payroll reported using full- and part-time paid employees during 2002; however, these firms were not reclassified as employers. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A.]

Table 16. **Statistics for Respondent Firms by Types of Workers by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.**

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. Some nonemployer respondent firms with no administrative employees and payroll reported using full- and part-time paid employees during 2002; however, these firms were not reclassified as employers. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A.]

Table 16. Statistics for Respondent Firms by Types of Workers by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. Some nonemployer respondent firms with no administrative employees and payroll reported using full- and part-time paid employees during 2002; however, these firms were not reclassified as employers. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A.]

Table 16. **Statistics for Respondent Firms by Types of Workers by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.**

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. Some nonemployer respondent firms with no administrative employees and payroll reported using full- and part-time paid employees during 2002; however, these firms were not reclassified as employers. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A.]

See footnotes at end of table.

Table 16. Statistics for Respondent Firms by Types of Workers by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. Some nonemployer respondent firms with no administrative employees and payroll reported using full- and part-time paid employees during 2002; however, these firms were not reclassified as employers. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A.]

Table 16. **Statistics for Respondent Firms by Types of Workers by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.**

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. Some nonemployer respondent firms with no administrative employees and payroll reported using full- and part-time paid employees during 2002; however, these firms were not reclassified as employers. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A.]

Table 16. Statistics for Respondent Firms by Types of Workers by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. Some nonemployer respondent firms with no administrative employees and payroll reported using full- and part-time paid employees during 2002; however, these firms were not reclassified as employers. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A.]

Table 16. Statistics for Respondent Firms by Types of Workers by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. Some nonemployer respondent firms with no administrative employees and payroll reported using full- and part-time paid employees during 2002; however, these firms were not reclassified as employers. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 16. **Statistics for Respondent Firms by Types of Workers by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.**

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. Some nonemployer respondent firms with no administrative employees and payroll reported using full- and part-time paid employees during 2002; however, these firms were not reclassified as employers. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A.]

Table 16. **Statistics for Respondent Firms by Types of Workers by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.**

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. Some nonemployer respondent firms with no administrative employees and payroll reported using full- and part-time paid employees during 2002; however, these firms were not reclassified as employers. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A.]

Table 16. Statistics for Respondent Firms by Types of Workers by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. Some nonemployer respondent firms with no administrative employees and payroll reported using full- and part-time paid employees during 2002; however, these firms were not reclassified as employers. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A.]

Table 16. **Statistics for Respondent Firms by Types of Workers by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—Con.**

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. Some nonemployer respondent firms with no administrative employees and payroll reported using full- and part-time paid employees during 2002; however, these firms were not reclassified as employers. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A.]

¹Data include both respondent firms with paid employees and respondent firms with no paid employees.

²Data do not include crop and animal production (NAICS 111, 112).

³Data do not include large certificated passenger carriers that report to the Office of Airline Information, U.S. Department of Transportation. Railroad transportation and U.S. Postal Service are out of scope for the 2002 Economic Census.

⁴Data do not include funds, trusts, and other financial vehicles (NAICS 525), except real estate investment trusts (NAICS 525930).

⁵Data do not include religious, grantmaking, civic, professional, and similar organizations (NAICS 813) and private households (NAICS 814).

Note: To maintain confidentiality, the Census Bureau suppresses data to protect the identity of any business or individual. The census results in this table contain nonsampling errors. Data users who create their own estimates using data from this table should cite the Census Bureau as the source of the original data only. See also explanation of terms. For the full technical documentation, see Appendix C.

Table 17. Statistics for Respondent Firms by Types of Workers by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. Some nonemployer respondent firms with no administrative employees and payroll reported using full- and part-time paid employees during 2002; however, these firms were not reclassified as employers. Table 17. Statistics for Respondent Firms by Types of Workers by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. Some nonemployer respondent firms with no administrative employees and payroll reported using full- and part-time paid employees during 2002; however, these firms were not reclassified as employers. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A.]

Table 17. Statistics for Respondent Firms by Types of Workers by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. Some nonemployer respondent firms with no administrative employees and payroll reported using full- and part-time paid employees during 2002; however, these firms were not reclassified as employers. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A.]

Table 17. Statistics for Respondent Firms by Types of Workers by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. Some nonemployer respondent firms with no administrative employees and payroll reported using full- and part-time paid employees during 2002; however, these firms were not reclassified as employers. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A.]

Table 17. Statistics for Respondent Firms by Types of Workers by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. Some nonemployer respondent firms with no administrative employees and payroll reported using full- and part-time paid employees during 2002; however, these firms were not reclassified as employers. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A.]

Table 17. Statistics for Respondent Firms by Types of Workers by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. Some nonemployer respondent firms with no administrative employees and payroll reported using full- and part-time paid employees during 2002; however, these firms were not reclassified as employers. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A.]

Table 17. Statistics for Respondent Firms by Types of Workers by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. Some nonemployer respondent firms with no administrative employees and payroll reported using full- and part-time paid employees during 2002; however, these firms were not reclassified as employers. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A.]

Table 17. Statistics for Respondent Firms by Types of Workers by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. Some nonemployer respondent firms with no administrative employees and payroll reported using full- and part-time paid employees during 2002; however, these firms were not reclassified as employers. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A.]

Table 17. Statistics for Respondent Firms by Types of Workers by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. Some nonemployer respondent firms with no administrative employees and payroll reported using full- and part-time paid employees during 2002; however, these firms were not reclassified as employers. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A.]

Table 17. Statistics for Respondent Firms by Types of Workers by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. Some nonemployer respondent firms with no administrative employees and payroll reported using full- and part-time paid employees during 2002; however, these firms were not reclassified as employers. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability Estimates in the introductory text. For explanation of terms, see Appendix A.]

Table 17. Statistics for Respondent Firms by Types of Workers by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. Some nonemployer respondent firms with no administrative employees and payroll reported using full- and part-time paid employees during 2002; however, these firms were not reclassified as employers. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A.]

Table 17. Statistics for Respondent Firms by Types of Workers by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. Some nonemployer respondent firms with no administrative employees and payroll reported using full- and part-time paid employees during 2002; however, these firms were not reclassified as employers. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A.]

Table 17. Statistics for Respondent Firms by Types of Workers by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. Some nonemployer respondent firms with no administrative employees and payroll reported using full- and part-time paid employees during 2002; however, these firms were not reclassified as employers. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A.]

Table 17. Statistics for Respondent Firms by Types of Workers by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. Some nonemployer respondent firms with no administrative employees and payroll reported using full- and part-time paid employees during 2002; however, these firms were not reclassified as employers. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A.]

Table 17. Statistics for Respondent Firms by Types of Workers by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. Some nonemployer respondent firms with no administrative employees and payroll reported using full- and part-time paid employees during 2002; however, these firms were not reclassified as employers. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A.]

Table 17. Statistics for Respondent Firms by Types of Workers by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. Some nonemployer respondent firms with no administrative employees and payroll reported using full- and part-time paid employees during 2002; however, these firms were not reclassified as employers. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A.]

Table 18. Statistics for Respondent Firms With Paid Employees by Types of Workers by Employment Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 18. Statistics for Respondent Firms With Paid Employees by Types of Workers by Employment Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 18. Statistics for Respondent Firms With Paid Employees by Types of Workers by Employment Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 18. Statistics for Respondent Firms With Paid Employees by Types of Workers by Employment Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 18. Statistics for Respondent Firms With Paid Employees by Types of Workers by Employment Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 18. **Statistics for Respondent Firms With Paid Employees by Types of Workers by Employment Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.**

[All estimates are based on firms that responded to the 2002 Survey of Business Owners. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Firms with 500 employees or more				

See footnotes at end of table.

Table 18. Statistics for Respondent Firms With Paid Employees by Types of Workers by Employment Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Note: To maintain confidentiality, the Census Bureau suppresses data to protect the identity of any business or individual. The census results in this table contain nonsampling errors. Data users who create their own estimates using data from this table should cite the Census Bureau as the source of the original data only. See also explanation of terms. For the full technical documentation, see Appendix C.

Table 19. Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**

Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

See footnotes at end of table.

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 19. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Kind of Business, Hispanic or Latino Origin, Race, and Gender: 2002—**
Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

¹Data include both respondent firms with paid employees and respondent firms with no paid employees.

²Data do not include crop and animal production (NAICS 111, 112).

³Data do not include large certificated passenger carriers that report to the Office of Airline Information, U.S. Department of Transportation. Railroad transportation and U.S. Postal Service are out of scope for the 2002 Economic Census.

⁴Data do not include funds, trusts, and other financial vehicles (NAICS 525), except real estate investment trusts (NAICS 525930).

⁵Data do not include religious, grantmaking, civic, professional, and similar organizations (NAICS 813) and private households (NAICS 814).

Note: To maintain confidentiality, the Census Bureau suppresses data to protect the identity of any business or individual. The census results in this table contain nonsampling errors. Data users who create their own estimates using data from this table should cite the Census Bureau as the source of the original data only. See also explanation of terms. For the full technical documentation, see Appendix C.

Table 20. Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 20. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002**
— Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 20. Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002

— Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 20. Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002
— Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 20. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002**

— Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 20. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002**
— Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 20. Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002
— Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 20. Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002
— Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 20. Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002
— Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 20. Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002
— Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 20. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002**
— Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 20. Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002
— Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 20. Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002

— Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 20. Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002

— Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

— Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 20. Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002
— Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 20. Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002
— Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 20. Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002
— Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 20. Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002

— Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 20. Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002
— Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 20. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002**
— Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 20. Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002
— Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 20. Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002
— Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 20. **Statistics for Respondent Sole Proprietorships by Self-Employment or Business Activity by Receipts Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002**
— Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners, both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

¹Data include both respondent firms with paid employees and respondent firms with no paid employees.

Note: To maintain confidentiality, the Census Bureau suppresses data to protect the identity of any business or individual. The census results in this table contain nonsampling errors. Data users who create their own estimates using data from this table should cite the Census Bureau as the source of the original data only. See also explanation of terms. For the full technical documentation, see Appendix C.

Table 21. Statistics for Respondent Sole Proprietorships With Paid Employees by Self-Employment or Business Activity by Employment Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002

[All estimates are based on firms that responded to the 2002 Survey of Business Owners. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 21. Statistics for Respondent Sole Proprietorships With Paid Employees by Self-Employment or Business Activity by Employment Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 21. Statistics for Respondent Sole Proprietorships With Paid Employees by Self-Employment or Business Activity by Employment Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

[All estimates are based on firms that responded to the 2002 Survey of Business Owners. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 21. Statistics for Respondent Sole Proprietorships With Paid Employees by Self-Employment or Business Activity by Employment Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 21. Statistics for Respondent Sole Proprietorships With Paid Employees by Self-Employment or Business Activity by Employment Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 21. Statistics for Respondent Sole Proprietorships With Paid Employees by Self-Employment or Business Activity by Employment Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 21. Statistics for Respondent Sole Proprietorships With Paid Employees by Self-Employment or Business Activity by Employment Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 21. Statistics for Respondent Sole Proprietorships With Paid Employees by Self-Employment or Business Activity by Employment Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 21. Statistics for Respondent Sole Proprietorships With Paid Employees by Self-Employment or Business Activity by Employment Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Table 21. Statistics for Respondent Sole Proprietorships With Paid Employees by Self-Employment or Business Activity by Employment Size of Firm, Hispanic or Latino Origin, Race, and Gender: 2002—Con.

[All estimates are based on firms that responded to the 2002 Survey of Business Owners. A respondent firm is defined as a business that returned the survey form, and provided the gender, Hispanic or Latino origin, or race characteristics for the owner(s) or indicated that the firm was publicly held (see Appendix C for information on survey methodology and sampling error). Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Data in the "Percent" columns represent the percentage of firms reporting in the designated categories. For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of relative standard errors (RSE columns) and standard errors (SE columns), see Reliability of Estimates in the introductory text. For explanation of terms, see Appendix A]

Appendix A.

Explanation of Terms

HOME-BASED, FAMILY-OWNED, OR FRANCHISED FOR RESPONDENT FIRMS

Business operated primarily from somebody's home; owned exclusively by members of the same family (referring to spouses, parents/guardians, brothers, sisters, or close relatives); and/or operated as a franchise during 2002 for businesses that completed the survey.

NUMBER OF EMPLOYER RESPONDENT FIRMS

The number of respondent firms with paid employees. A respondent firm is defined as a business that completed the survey and provided the owner characteristics or indicated that the firm was publicly held. A firm is a business organization or entity consisting of one domestic establishment (location) or more under common ownership or control. A firm with paid employees includes workers on the payroll excluding sole proprietors and partners. All establishments of subsidiary firms are included as part of the owning or controlling firm. For the economic census, the terms "firm" and "company" are synonymous.

NUMBER OF NONEMPLOYER RESPONDENT FIRMS

The number of respondent firms with no paid employees. A respondent firm is defined as a business that completed the survey and provided the owner characteristics or indicated that the firm was publicly held. A firm is a business organization or entity consisting of one domestic establishment (location) or more under common ownership or control. A firm without paid employees includes sole proprietors and partners of unincorporated businesses that do not have any other employees on the payroll. All establishments of subsidiary firms are included as part of the owning or controlling firm. For the economic census, the terms "firm" and "company" are synonymous.

NUMBER OF RESPONDENT FIRMS

The number of respondent firms, including both firms with paid employees and firms with no paid employees. A respondent firm is defined as a business that completed the survey and provided the owner characteristics or indicated that the firm was publicly held. A firm is a business organization or entity consisting of one domestic establishment (location) or more under common ownership or control. All establishments of subsidiary firms are included as part of the owning or controlling firm. For the economic census, the terms "firm" and "company" are synonymous.

PERCENT OF EMPLOYER RESPONDENT FIRMS

The percent of respondent firms with paid employees.

PERCENT OF NONEMPLOYER RESPONDENT FIRMS

The percent of respondent firms with no paid employees.

PERCENT OF RESPONDENT FIRMS

The percent of respondent firms, including both firms with paid employees and firms with no paid employees.

RESPONDENT FIRMS BY HISPANIC OR LATINO ORIGIN, RACE, AND/OR GENDER OWNERSHIP

The respondent firm's classification by Hispanic or Latino origin, race, and/or gender of the person(s) owning 51 percent or more of the stock or equity of the firm.

SELF-EMPLOYMENT OR BUSINESS ACTIVITY FOR OWNERS OF RESPONDENT SOLE PROPRIETORSHIPS

Characteristics of self-employment or business activity during 2002 for sole proprietorships that completed the survey, including the following characteristics: operated less than 40 hours per week; operated less than 12 months; hobby which generated income; seasonal business; supplemental source of income; husband/wife jointly owned business, but operated primarily by husband; husband/wife jointly owned business, but operated primarily by wife; operated occasionally; used electronic medium as a primary tool for conducting business; or none of the above.

SOURCES OF CAPITAL NEEDED TO START OR ACQUIRE THE BUSINESS FOR RESPONDENT FIRMS

Sources of capital needed to start or acquire the business for businesses that completed the survey, including personal/family savings and/or other assets of the owner(s); personal or business credit card of the owner(s); business loan from the federal/state/local government or bank/financial institution; government-guaranteed business loan from a bank or financial institution; outside investors; or none needed.

SOURCES OF CAPITAL USED TO FINANCE EXPANSION OR CAPITAL IMPROVEMENTS FOR RESPONDENT FIRMS

Sources of capital used to finance expansion or capital improvements during 2002 for businesses that completed the survey, including personal/family savings and/or other assets of the owner(s); personal or business credit card of the owner(s); business loan from the federal/state/local government or bank/financial institution; government-guaranteed business loan from a bank or financial institution; outside investors; or none needed.

TYPES OF CUSTOMERS FOR RESPONDENT FIRMS

Types of customers accounting for 10 percent or more of the total sales of goods/services during 2002 for businesses that completed the survey, including federal, state, and/or local government; export sales of goods/services; other businesses and/or organizations; household consumers and individual users; and all other types.

TYPES OF WORKERS FOR RESPONDENT FIRMS

Types of workers employed by the business during 2002 for businesses that completed the survey, including full- and part-time employees; paid day laborers; temporary staffing; leased employees; and contractors, subcontractors, independent contractors or outside consultants.

YEAR OWNER ESTABLISHED, PURCHASED, OR ACQUIRED THE BUSINESS FOR OWNERS OF RESPONDENT FIRMS

The year the firm was originally established, purchased, or acquired by the owner(s) for businesses that completed the survey. If a business had more than one owner and the owners purchased or acquired the business in different years, the respondent was instructed to select the earliest year.

Appendix B.

NAICS Codes, Titles, and Descriptions

00 TOTAL FOR ALL SECTORS

This NAICS code reflects the sum of all the economic activity for all sectors published in the 2002 Economic Census of Island Areas, the 2002 Survey of Business Owners, and the 2002 Nonemployer Statistics report. (Note that this total is not published as part of the 2002 Economic Census.) The definitions for all the individual sectors that comprise this total are shown separately. Finally, the sectors that comprise this total vary for each of the programs just listed; these are shown below:

- For the **2002 Economic Census of Island Areas**, this total includes establishments classified in NAICS sector 21 (Mining), 22 (Utilities), 23 (Construction), 31-33 (Manufacturing), 42 (Wholesale trade), 44-45 (Retail trade), 48-49 (Transportation and warehousing), 51 (Information), 52 (Finance and insurance), 53 (Real estate and rental and leasing), 54 (Professional, scientific, and technical services), 55 (Management of companies and enterprises), 56 (Administrative and support and waste management and remediation services), 61 (Educational services), 62 (Health care and social assistance), 71 (Arts, entertainment, and recreation), 72 (Accommodation and food services), and 81 (Other services (except public administration)).
- For the **2002 Survey of Business Owners**, this total includes establishments classified in the same sectors as the 2002 Economic Census of Island Areas plus those classified in NAICS sector 11 (Forestry, fishing and hunting, and agricultural support services (NAICS 113-115)) and 99 (Industries not classified).
- For the **2002 Nonemployer Statistics report**, this total includes establishments classified in the same sectors as the 2002 Economic Census of Island Areas except sector 55. It also includes establishments classified in NAICS sector 11.

11 FORESTRY, FISHING AND HUNTING, AND AGRICULTURAL SUPPORT SERVICES

The Agriculture, Forestry, Fishing and Hunting sector comprises establishments primarily engaged in growing crops, raising animals, harvesting timber, and harvesting fish and other animals from a farm, ranch, or their natural habitats.

The establishments in this sector are often described as farms, ranches, dairies, greenhouses, nurseries, orchards, or hatcheries. A farm may consist of a single tract of land or a number of separate tracts which may be held under different tenures. For example, one tract may be owned by the farm operator and another rented. It may be operated by the operator alone or with the assistance of members of the household or hired employees, or it may be operated by a partnership, corporation, or other type of organization. When a landowner has one or more tenants, renters, croppers, or managers, the land operated by each is considered a farm.

The sector distinguishes two basic activities: agricultural production and agricultural support activities. Agricultural production includes establishments performing the complete farm or ranch operation, such as farm owner-operators, tenant farm operators, and sharecroppers. Agricultural support activities include establishments that perform one or more activities associated with farm operation, such as soil preparation, planting, harvesting, and management, on a contract or fee basis.

Excluded from the Agriculture, Forestry, Hunting and Fishing sector are establishments primarily engaged in agricultural research and establishments primarily engaged in administering programs for regulating and conserving land, mineral, wildlife, and forest use. These establishments are classified in Industry 54171, Research and Development in the Physical, Engineering, and Life Sciences; and Industry 92412, Administration of Conservation Programs, respectively.

21 MINING

The Mining sector comprises establishments that extract naturally occurring mineral solids, such as coal and ores; liquid minerals, such as crude petroleum; and gases, such as natural gas. The term mining is used in the broad sense to include quarrying, well operations, beneficiating (e.g., crushing, screening, washing, and flotation), and other preparation customarily performed at the mine site, or as a part of mining activity.

The Mining sector distinguishes two basic activities: mine operation and mining support activities. Mine operation includes establishments operating mines, quarries, or oil and gas wells on their own account or for others on a contract or fee basis. Mining support activities include establishments that perform exploration (except geophysical surveying) and/or other mining services on a contract or fee basis (except mine site preparation and construction of oil/gas pipelines).

Establishments in the Mining sector are grouped and classified according to the natural resource mined or to be mined. Industries include establishments that develop the mine site, extract the natural resources, and/or those that beneficiate (i.e., prepare) the mineral mined. Beneficiation is the process whereby the extracted material is reduced to particles that can be separated into mineral and waste, the former suitable for further processing or direct use. The operations that take place in beneficiation are primarily mechanical, such as grinding, washing, magnetic separation, and centrifugal separation. In contrast, manufacturing operations primarily use chemical and electrochemical processes, such as electrolysis and distillation. However, some treatments, such as heat treatments, take place in both the beneficiation and the manufacturing (i.e., smelting/refining) stages. The range of preparation activities varies by mineral and the purity of any given ore deposit. While some minerals, such as petroleum and natural gas, require little or no preparation, others are washed and screened, while yet others, such as gold and silver, can be transformed into bullion before leaving the mine site.

Mining, beneficiating, and manufacturing activities often occur in a single location. Separate receipts will be collected for these activities whenever possible. When receipts cannot be broken out between mining and manufacturing, establishments that mine or quarry nonmetallic minerals, beneficiate the nonmetallic minerals into more finished manufactured products are classified based on the primary activity of the establishment. A mine that manufactures a small amount of finished products will be classified in Sector 21, Mining. An establishment that mines whose primary output is a more finished manufactured product will be classified in Sector 31-33, Manufacturing.

22 UTILITIES

The Utilities sector comprises establishments engaged in the provision of the following utility services: electric power, natural gas, steam supply, water supply, and sewage removal. Within this sector, the specific activities associated with the utility services provided vary by utility: electric power includes generation, transmission, and distribution; natural gas includes distribution; steam supply includes provision and/or distribution; water supply includes treatment and distribution; and sewage removal includes collection, treatment, and disposal of waste through sewer systems and sewage treatment facilities.

Excluded from this sector are establishments primarily engaged in waste management services classified in Subsector 562, Waste Management and Remediation Services. These establishments also collect, treat, and dispose of waste materials; however, they do not use sewer systems or sewage treatment facilities.

23 CONSTRUCTION

The construction sector comprises establishments primarily engaged in the construction of buildings or engineering projects (e.g., highways and utility systems). Establishments primarily engaged in the preparation of sites for new construction and establishments primarily engaged in subdividing land for sale as building sites also are included in this sector.

Construction work done may include new work, additions, alterations, or maintenance and repairs. Activities of these establishments generally are managed at a fixed place of business, but they usually perform construction activities at multiple project sites. Production responsibilities for establishments in this sector are usually specified in (1) contracts with the owners of construction projects (prime contracts) or (2) contracts with other construction establishments (subcontracts).

Establishments primarily engaged in contracts that include responsibility for all aspects of individual construction projects are commonly known as general contractors, but also may be known as design-builders, construction managers, turnkey contractors, or (in cases where two or more establishments jointly secure a general contract) joint-venture contractors. Construction managers that provide oversight and scheduling only (i.e., agency) as well as construction managers that are responsible for the entire project (i.e., at risk) are included as general contractor type establishments. Establishments of the “general contractor type” frequently arrange construction of separate parts of their projects through subcontracts with other construction establishments.

Establishments primarily engaged in activities to produce a specific component (e.g., masonry, painting, and electrical work) of a construction project are commonly known as specialty trade contractors. Activities of specialty trade contractors are usually subcontracted from other construction establishments, but especially in remodeling and repair construction, the work may be done directly for the owner of the property.

Establishments primarily engaged in activities to construct buildings to be sold on sites that they own are known as operative builders, but also may be known as speculative builders or merchant builders. Operative builders produce buildings in a manner similar to general contractors, but their production processes also include site acquisition and securing of financial backing. Operative builders are most often associated with the construction of residential buildings. Like general contractors, they may subcontract all or part of the actual construction work on their buildings.

There are substantial differences in the types of equipment, work force skills, and other inputs required by establishments in this sector. To highlight these differences and variations in the underlying production functions, this sector is divided into three subsectors.

Subsector 236, Construction of Buildings, comprises establishments of the general contractor type and operative builders involved in the construction of buildings. Subsector 237, Heavy and Civil Engineering Construction, comprises establishments involved in the construction of engineering projects. Subsector 238, Specialty Trade Contractors, comprises establishments engaged in specialty trade activities generally needed in the construction of all types of buildings.

Force account construction is construction work performed by an enterprise primarily engaged in some business other than construction for its own account and use, using employees of the enterprise. This activity is not included in the construction sector unless the construction work performed is the primary activity of a separate establishment of the enterprise. The installation and the ongoing repair and maintenance of telecommunications and utility networks is excluded from construction when the establishments performing the work are not independent contractors. Although a growing proportion of this work is subcontracted to independent contractors in the Construction Sector, the operating units of telecommunications and utility companies performing this work are included with the telecommunications or utility activities.

31-33 MANUFACTURING

The Manufacturing sector comprises establishments engaged in the mechanical, physical, or chemical transformation of materials, substances, or components into new products. The assembling of component parts of manufactured products is considered manufacturing, except in cases where the activity is appropriately classified in Sector 23, Construction.

Establishments in the Manufacturing sector are often described as plants, factories, or mills and characteristically use power-driven machines and materials-handling equipment. However, establishments that transform materials or substances into new products by hand or in the worker’s home and those engaged in selling to the general public products made on the same premises

from which they are sold, such as bakeries, candy stores, and custom tailors, may also be included in this sector. Manufacturing establishments may process materials or may contract with other establishments to process their materials for them. Both types of establishments are included in manufacturing.

The materials, substances, or components transformed by manufacturing establishments are raw materials that are products of agriculture, forestry, fishing, mining, or quarrying as well as products of other manufacturing establishments. The materials used may be purchased directly from producers, obtained through customary trade channels, or secured without recourse to the market by transferring the product from one establishment to another, under the same ownership. The new product of a manufacturing establishment may be finished in the sense that it is ready for utilization or consumption, or it may be semifinished to become an input for an establishment engaged in further manufacturing. For example, the product of the alumina refinery is the input used in the primary production of aluminum; primary aluminum is the input to an aluminum wire drawing plant; and aluminum wire is the input for a fabricated wire product manufacturing establishment.

The subsectors in the Manufacturing sector generally reflect distinct production processes related to material inputs, production equipment, and employee skills. In the machinery area, where assembling is a key activity, parts and accessories for manufactured products are classified in the industry of the finished manufactured item when they are made for separate sale. For example, a replacement refrigerator door would be classified with refrigerators and an attachment for a piece of metal working machinery would be classified with metal working machinery. However, components, input from other manufacturing establishments, are classified based on the production function of the component manufacturer. For example, electronic components are classified in Subsector 334, Computer and Electronic Product Manufacturing and stampings are classified in Subsector 332, Fabricated Metal Product Manufacturing.

Manufacturing establishments often perform one or more activities that are classified outside the Manufacturing sector of the North American Industry Classification System (NAICS). For instance, almost all manufacturing has some captive research and development or administrative operations, such as accounting, payroll, or management. These captive services are treated the same as captive manufacturing activities. When the services are provided by separate establishments, they are classified to the NAICS sector where such services are primary, not in manufacturing.

The boundaries of manufacturing and the other sectors of the classification system can be somewhat blurry. The establishments in the manufacturing sector are engaged in the transformation of materials into new products. Their output is a new product. However, the definition of what constitutes a new product can be somewhat subjective. As clarification, the following activities are considered manufacturing in NAICS: Milk bottling and pasteurizing; Water bottling and processing; Fresh fish packaging (oyster shucking, fish filleting); Apparel jobbing (assigning of materials to contract factories or shops for fabrication or other contract operations) as well as contracting on materials owned by others; Printing and related activities; Ready-mixed concrete production; Leather converting; Grinding of lenses to prescription; Wood preserving; Electroplating, plating, metal heat treating, and polishing for the trade; Lapidary work for the trade; Fabricating signs and advertising displays; Rebuilding or remanufacturing machinery (i.e., automotive parts) Ship repair and renovation; Machine shops; and Tire retreading. Conversely, there are activities that are sometimes considered manufacturing, but which for NAICS are classified in another sector (i.e., not classified as manufacturing).

They include: (1) Logging, classified in Sector 11, Agriculture, Forestry, Fishing and Hunting is considered a harvesting operation; (2) The beneficiating of ores and other minerals, classified in Sector 21, Mining, is considered part of the activity of mining; (3) The construction of structures and fabricating operations performed at the site of construction by contractors, is classified in Sector 23, Construction; (4) Establishments engaged in breaking of bulk and redistribution in smaller lots, including packaging, repackaging, or bottling products, such as liquors or chemicals; the customized assembly of computers; sorting of scrap; mixing paints to customer order; and cutting metals to customer order, classified in Sector 42, Wholesale Trade or Sector 44-45, Retail Trade, produce a modified version of the same product, not a new product; and (5) Publishing and

the combined activity of publishing and printing, classified in Sector 51, Information, perform the transformation of information into a product where as the value of the product to the consumer lies in the information content, not in the format in which it is distributed (i.e., the book or software diskette).

42 WHOLESALE TRADE

The Wholesale Trade sector comprises establishments engaged in wholesaling merchandise, generally without transformation, and rendering services incidental to the sale of merchandise.

The wholesaling process is an intermediate step in the distribution of merchandise. Wholesalers are organized to sell or arrange the purchase or sale of —

1. goods for resale (i.e., goods sold to other wholesalers or retailers),
2. capital or durable nonconsumer goods, or
3. raw and intermediate materials and supplies used in production.

Wholesalers sell merchandise to other businesses and normally operate from a warehouse or office. These warehouses and offices are characterized by having little or no display of merchandise. In addition, neither the design nor the location of the premises is intended to solicit walk-in traffic. Wholesalers do not normally use advertising directed to the general public. Customers are generally reached initially via telephone, in-person marketing, or by specialized advertising that may include Internet and other electronic means. Follow-up orders are either vendor-initiated or client-initiated, generally based on previous sales, and typically exhibit strong ties between sellers and buyers. In fact, transactions are often conducted between wholesalers and clients that have long-standing business relationships.

This sector comprises two main types of wholesalers: those that sell goods on their own account and those that arrange sales and purchases for others generally for a commission or fee.

1. Establishments that sell goods on their own account are known as wholesale merchants, distributors, jobbers, drop shippers, and import/export merchants. Also included as wholesale merchants are sales offices and sales branches (but not retail stores) maintained by manufacturing, refining, or mining enterprises apart from their plants or mines for the purpose of marketing their products. Merchant wholesale establishments typically maintain their own warehouse, where they receive and handle goods for their customers. Goods are generally sold without transformation, but may include integral functions, such as sorting, packaging, labeling, and other marketing services.
2. Establishments arranging for the purchase or sale of goods owned by others or purchasing goods, generally on a commission basis, are known as business-to-business electronic markets, agents and brokers, commission merchants, import/export agents and brokers, auction companies, and manufacturers' representatives. These establishments operate from offices and generally do not own or handle the goods they sell.

Some wholesale establishments may be connected with a single manufacturer and promote and sell the particular manufacturers' products to a wide range of other wholesalers or retailers. Other wholesalers may be connected to a retail chain or a limited number of retail chains and only provide a variety of products needed by the retail operation(s). These wholesalers may obtain the products from a wide range of manufacturers. Still other wholesalers may not take title to the goods, but act as agents and brokers for a commission.

Although wholesaling normally denotes sales in large volumes, durable nonconsumer goods may be sold in single units. Sales of capital or durable nonconsumer goods used in the production of goods and services, such as farm machinery, medium and heavy duty trucks, and industrial machinery, are always included in wholesale trade.

44-45 RETAIL TRADE

The Retail Trade sector comprises establishments engaged in retailing merchandise, generally without transformation, and rendering services incidental to the sale of merchandise.

The retailing process is the final step in the distribution of merchandise; retailers are, therefore, organized to sell merchandise in small quantities to the general public. This sector comprises two main types of retailers: **store** and **nonstore retailers**.

Store retailers operate fixed point-of-sale locations, located and designed to attract a high volume of walk-in customers. In general, retail stores have extensive displays of merchandise and use mass-media advertising to attract customers. They typically sell merchandise to the general public for personal or household consumption, but some also serve business and institutional clients. These include establishments, such as office supply stores, computer and software stores, building materials dealers, plumbing supply stores, and electrical supply stores. Catalog showrooms, gasoline service stations, automotive dealers, and mobile home dealers are treated as store retailers.

In addition to retailing merchandise, some types of store retailers are also engaged in the provision of after-sales services, such as repair and installation. For example, new automobile dealers, electronics and appliance stores, and musical instrument and supplies stores often provide repair services. As a general rule, establishments engaged in retailing merchandise and providing after-sales services are classified in this sector.

The first eleven subsectors of retail trade are store retailers. The establishments are grouped into industries and industry groups typically based on one or more of the following criteria:

1. The merchandise line or lines carried by the store; for example, specialty stores are distinguished from general-line stores.
2. The usual trade designation of the establishments. This criterion applies in cases where a store type is well recognized by the industry and the public, but difficult to define strictly in terms of merchandise lines carried; for example, pharmacies, hardware stores, and department stores.
3. Capital requirements in terms of display equipment; for example, food stores have equipment requirements not found in other retail industries.
4. Human resource requirements in terms of expertise; for example, the staff of an automobile dealer requires knowledge in financing, registering, and licensing issues that are not necessary in other retail industries.

Nonstore retailers, like store retailers, are organized to serve the general public, but their retailing methods differ. The establishments of this subsector reach customers and market merchandise with methods, such as the broadcasting of "infomercials," the broadcasting and publishing of direct-response advertising, the publishing of paper and electronic catalogs, door-to-door solicitation, in-home demonstration, selling from portable stalls (street vendors, except food), and distribution through vending machines. Establishments engaged in the direct sale (nonstore) of products, such as home heating oil dealers and home delivery newspaper routes are included here.

The buying of goods for resale is a characteristic of retail trade establishments that particularly distinguishes them from establishments in the agriculture, manufacturing, and construction industries. For example, farms that sell their products at or from the point of production are not classified in retail, but rather in agriculture. Similarly, establishments that both manufacture and sell their products to the general public are not classified in retail, but rather in manufacturing. However, establishments that engage in processing activities incidental to retailing are classified in retail. This includes establishments, such as optical goods stores that do in-store grinding of lenses, and meat and seafood markets.

Wholesalers also engage in the buying of goods for resale, but they are not usually organized to serve the general public. They typically operate from a warehouse or office and neither the design nor the location of these premises is intended to solicit a high volume of walk-in traffic. Wholesalers supply institutional, industrial, wholesale, and retail clients; their operations are, therefore, generally organized to purchase, sell, and deliver merchandise in larger quantities. However, dealers of durable nonconsumer goods, such as farm machinery and heavy duty trucks, are included in wholesale trade even if they often sell these products in single units.

48-49 TRANSPORTATION AND WAREHOUSING

The Transportation and Warehousing sector includes industries providing transportation of passengers and cargo, warehousing and storage for goods, scenic and sightseeing transportation, and support activities related to modes of transportation. Establishments in these industries use transportation equipment or transportation related facilities as a productive asset. The type of equipment depends on the mode of transportation. The modes of transportation are air, rail, water, road, and pipeline.

The Transportation and Warehousing sector distinguishes three basic types of activities: subsectors for each mode of transportation, a subsector for warehousing and storage, and a subsector for establishments providing support activities for transportation. In addition, there are subsectors for establishments that provide passenger transportation for scenic and sightseeing purposes, postal services, and courier services.

A separate subsector for support activities is established in the sector because, first, support activities for transportation are inherently multimodal, such as freight transportation arrangement, or have multimodal aspects. Secondly, there are production process similarities among the support activity industries.

One of the support activities identified in the support activity subsector is the routine repair and maintenance of transportation equipment (e.g., aircraft at an airport, railroad rolling stock at a railroad terminal, or ships at a harbor or port facility). Such establishments do not perform complete overhauling or rebuilding of transportation equipment (i.e., periodic restoration of transportation equipment to original design specifications) or transportation equipment conversion (i.e., major modification to systems). An establishment that primarily performs factory (or shipyard) overhauls, rebuilding, or conversions of aircraft, railroad rolling stock, or a ship is classified in Subsector 336, Transportation Equipment Manufacturing according to the type of equipment.

Many of the establishments in this sector often operate on networks, with physical facilities, labor forces, and equipment spread over an extensive geographic area.

Warehousing establishments in this sector are distinguished from merchant wholesaling in that the warehouse establishments do not sell the goods.

Excluded from this sector are establishments primarily engaged in providing travel agent services that support transportation and other establishments, such as hotels, businesses, and government agencies. These establishments are classified in Sector 56, Administrative and Support, Waste Management, and Remediation Services. Also, establishments primarily engaged in providing rental and leasing of transportation equipment without operator are classified in Subsector 532, Rental and Leasing Services.

51 INFORMATION

The Information sector comprises establishments engaged in the following processes: (a) producing and distributing information and cultural products, (b) providing the means to transmit or distribute these products as well as data or communications, and (c) processing data.

The main components of this sector are the publishing industries, including software publishing, and both traditional publishing and publishing exclusively on the Internet; the motion picture and sound recording industries; the broadcasting industries, including traditional broadcasting and those broadcasting exclusively over the Internet; the telecommunications industries; the industries known as Internet service providers and Web search portals, data processing industries and the information services industries.

The expressions “information age” and “global information economy” are used with considerable frequency today. The general idea of an “information economy” includes both the notion of industries primarily producing, processing, and distributing information, as well as the idea that every industry is using available information and information technology to reorganize and make themselves more productive.

For the purpose of developing NAICS, it is the transformation of information into a commodity that is produced and distributed by a number of growing industries that is at issue. The Information sector groups three types of establishments: (1) those engaged in producing and distributing information and cultural products; (2) those that provide the means to transmit or distribute these products as well as data or communications; and (3) those that process data. Cultural products are those that directly express attitudes, opinions, ideas, values, and artistic creativity; provide entertainment; or offer information and analysis concerning the past and present. Included in this definition are popular, mass-produced, products as well as cultural products that normally have a more limited audience, such as poetry books, literary magazines, or classical records.

The unique characteristics of information and cultural products, and of the processes involved in their production and distribution, distinguish the Information sector from the goods-producing and service-producing sectors. Some of these characteristics are:

1. Unlike traditional goods, an “information or cultural product,” such as a newspaper on-line or television program, does not necessarily have tangible qualities, nor is it necessarily associated with a particular form. A movie can be shown at a movie theater, on a television broadcast, through video-on-demand or rented at a local video store. A sound recording can be aired on radio, embedded in multimedia products, or sold at a record store.
2. Unlike traditional services, the delivery of these products does not require direct contact between the supplier and the consumer.
3. The value of these products to the consumer lies in their informational, educational, cultural, or entertainment content, not in the format in which they are distributed. Most of these products are protected from unlawful reproduction by copyright laws.
4. The intangible property aspect of information and cultural products makes the processes involved in their production and distribution very different from goods and services. Only those possessing the rights to these works are authorized to reproduce, alter, improve, and distribute them. Acquiring and using these rights often involves significant costs. In addition, technology is revolutionizing the distribution of these products. It is possible to distribute them in a physical form, via broadcast, or on-line.
5. Distributors of information and cultural products can easily add value to the products they distribute. For instance, broadcasters add advertising not contained in the original product. This capacity means that unlike traditional distributors, they derive revenue not from sale of the distributed product to the final consumer, but from those who pay for the privilege of adding information to the original product. Similarly, a directory and mailing list publisher can acquire the rights to thousands of previously published newspaper and periodical articles and add new value by providing search and software and organizing the information in a way that facilitates research and retrieval. These products often command a much higher price than the original information.

The distribution modes for information commodities may either eliminate the necessity for traditional manufacture, or reverse the conventional order of manufacture-distribute: A newspaper distributed on-line, for example, can be printed locally or by the final consumer. Similarly, it is anticipated that packaged software, which today is mainly bought through the traditional retail channels, will soon be available mainly on-line. The NAICS Information sector is designed to make such economic changes transparent as they occur, or to facilitate designing surveys that will monitor the new phenomena and provide data to analyze the changes.

Many of the industries in the NAICS Information sector are engaged in producing products protected by copyright law, or in distributing them (other than distribution by traditional wholesale and retail methods). Examples are traditional publishing industries, software and directory and mailing list publishing industries, and film and sound industries. Broadcasting and telecommunications industries and information providers and processors are also included in the Information sector, because their technologies are so closely linked to other industries in the Information sector.

52 FINANCE AND INSURANCE

The Finance and Insurance sector comprises establishments primarily engaged in financial transactions (transactions involving the creation, liquidation, or change in ownership of financial assets) and/or in facilitating financial transactions. Three principal types of activities are identified:

1. Raising funds by taking deposits and/or issuing securities and, in the process, incurring liabilities. Establishments engaged in this activity use raised funds to acquire financial assets by making loans and/or purchasing securities. Putting themselves at risk, they channel funds from lenders to borrowers and transform or repackage the funds with respect to maturity, scale and risk. This activity is known as financial intermediation.
2. Pooling of risk by underwriting insurance and annuities. Establishments engaged in this activity collect fees, insurance premiums, or annuity considerations; build up reserves; invest those reserves; and make contractual payments. Fees are based on the expected incidence of the insured risk and the expected return on investment.
3. Providing specialized services facilitating or supporting financial intermediation, insurance, and employee benefit programs.

In addition, monetary authorities charged with monetary control are included in this sector.

The subsectors, industry groups, and industries within the NAICS Finance and Insurance sector are defined on the basis of their unique production processes. As with all industries, the production processes are distinguished by their use of specialized human resources and specialized physical capital. In addition, the way in which these establishments acquire and allocate financial capital, their source of funds, and the use of those funds provides a third basis for distinguishing characteristics of the production process. For instance, the production process in raising funds through deposit-taking is different from the process of raising funds in bond or money markets. The process of making loans to individuals also requires different production processes than does the creation of investment pools or the underwriting of securities.

Most of the Finance and Insurance subsectors contain one or more industry groups of (1) intermediaries with similar patterns of raising and using funds and (2) establishments engaged in activities that facilitate, or are otherwise related to, that type of financial or insurance intermediation. Industries within this sector are defined in terms of activities for which a production process can be specified, and many of these activities are not exclusive to a particular type of financial institution. To deal with the varied activities taking place within existing financial institutions, the approach is to split these institutions into components performing specialized services. This requires defining the units engaged in providing those services and developing procedures that allow for their delineation. These units are the equivalents for finance and insurance of the establishments defined for other industries.

The output of many financial services, as well as the inputs and the processes by which they are combined, cannot be observed at a single location and can only be defined at a higher level of the organizational structure of the enterprise. Additionally, a number of independent activities that represent separate and distinct production processes may take place at a single location belonging to a multilocation financial firm. Activities are more likely to be homogeneous with respect to production characteristics than are locations, at least in financial services. The classification defines activities broadly enough that it can be used both by those classifying by location and by those employing a more top-down approach to the delineation of the establishment.

Establishments engaged in activities that facilitate, or are otherwise related to, the various types of intermediation have been included in individual subsectors, rather than in a separate subsector dedicated to services alone because these services are performed by intermediaries, as well as by specialist establishments, and the extent to which the activity of the intermediaries can be separately identified is not clear.

The Finance and Insurance sector has been defined to encompass establishments primarily engaged in financial transactions; that is, transactions involving the creation, liquidation, or change in ownership of financial assets or in facilitating financial transactions. Financial industries

are extensive users of electronic means for facilitating the verification of financial balances, authorizing transactions, transferring funds to and from transactors' accounts, notifying banks (or credit card issuers) of the individual transactions, and providing daily summaries. Since these transaction processing activities are integral to the production of finance and insurance services, establishments that principally provide a financial transaction processing service are classified to this sector, rather than to the data processing industry in the Information sector.

Legal entities that hold portfolios of assets on behalf of others are significant and data on them are required for a variety of purposes. Thus for NAICS, these funds, trusts, and other financial vehicles are the fifth subsector of the Finance and Insurance sector. These entities earn interest, dividends, and other property income, but have little or no employment and no revenue from the sale of services. Separate establishments and employees devoted to the management of funds are classified in Industry Group 5239, Other Financial Investment Activities.

53 REAL ESTATE AND RENTAL AND LEASING

The Real Estate and Rental and Leasing sector comprises establishments primarily engaged in renting, leasing, or otherwise allowing the use of tangible or intangible assets, and establishments providing related services. The major portion of this sector comprises establishments that rent, lease, or otherwise allow the use of their own assets by others. The assets may be tangible, as is the case of real estate and equipment, or intangible, as is the case with patents and trademarks.

This sector also includes establishments primarily engaged in managing real estate for others, selling, renting and/or buying real estate for others, and appraising real estate. These activities are closely related to this sector's main activity, and it was felt that from a production basis they would best be included here. In addition, a substantial proportion of property management is self-performed by lessors.

The main components of this sector are the real estate lessors industries; equipment lessors industries (including motor vehicles, computers, and consumer goods); and lessors of nonfinancial intangible assets (except copyrighted works).

Excluded from this sector are real estate investment trusts (REITS) and establishments primarily engaged in renting or leasing equipment with operators. REITS are classified in Subsector 525, Funds, Trusts, and Other Financial Vehicles, because they are considered investment vehicles. Establishments renting or leasing equipment with operators are classified in various subsectors of NAICS depending on the nature of the services provided (e.g., transportation, construction, agriculture). These activities are excluded from this sector because the client is paying for the expertise and knowledge of the equipment operator, in addition to the rental of the equipment. In many cases, such as the rental of heavy construction equipment, the operator is essential to operate the equipment.

54 PROFESSIONAL, SCIENTIFIC, AND TECHNICAL SERVICES

The Professional, Scientific, and Technical Services sector comprises establishments that specialize in performing professional, scientific, and technical activities for others. These activities require a high degree of expertise and training. The establishments in this sector specialize according to expertise and provide these services to clients in a variety of industries and, in some cases, to households. Activities performed include: legal advice and representation; accounting, bookkeeping, and payroll services; architectural, engineering, and specialized design services; computer services; consulting services; research services; advertising services; photographic services; translation and interpretation services; veterinary services; and other professional, scientific, and technical services.

This sector excludes establishments primarily engaged in providing a range of day-to-day office administrative services, such as financial planning, billing and record keeping, personnel, and physical distribution and logistics. These establishments are classified in Sector 56, Administrative and Support and Waste Management and Remediation Services.

55 MANAGEMENT OF COMPANIES AND ENTERPRISES

The Management of Companies and Enterprises sector comprises (1) establishments that hold the securities of (or other equity interests in) companies and enterprises for the purpose of owning a controlling interest or influencing management decisions or (2) establishments (except government establishments) that administer, oversee, and manage establishments of the company or enterprise and that normally undertake the strategic or organizational planning and decision making role of the company or enterprise. Establishments that administer, oversee, and manage may hold the securities of the company or enterprise.

Establishments in this sector perform essential activities that are often undertaken, in-house, by establishments in many sectors of the economy. By consolidating the performance of these activities of the enterprise at one establishment, economies of scale are achieved.

Government establishments primarily engaged in administering, overseeing, and managing governmental programs are classified in Sector 92, Public Administration. Establishments primarily engaged in providing a range of day-to-day office administrative services, such as financial planning, billing and record keeping, personnel, and physical distribution and logistics are classified in Industry 56111, Office Administrative Services.

56 ADMINISTRATIVE AND SUPPORT AND WASTE MANAGEMENT AND REMEDIATION SERVICES

The Administrative and Support and Waste Management and Remediation Services sector comprises establishments performing routine support activities for the day-to-day operations of other organizations. These essential activities are often undertaken in-house by establishments in many sectors of the economy. The establishments in this sector specialize in one or more of these support activities and provide these services to clients in a variety of industries and, in some cases, to households. Activities performed include: office administration, hiring and placing of personnel, document preparation and similar clerical services, solicitation, collection, security and surveillance services, cleaning, and waste disposal services.

The administrative and management activities performed by establishments in this sector are typically on a contract or fee basis. These activities may also be performed by establishments that are part of the company or enterprise. However, establishments involved in administering, overseeing, and managing other establishments of the company or enterprise, are classified in Sector 55, Management of Companies and Enterprises. These establishments normally undertake the strategic and organizational planning and decision making role of the company or enterprise. Government establishments engaged in administering, overseeing, and managing governmental programs are classified in Sector 92, Public Administration.

61 EDUCATIONAL SERVICES

The Educational Services sector comprises establishments that provide instruction and training in a wide variety of subjects. This instruction and training is provided by specialized establishments, such as schools, colleges, universities, and training centers. These establishments may be privately owned and operated for profit or not for profit, or they may be publicly owned and operated. They may also offer food and accommodation services to their students.

Educational services are usually delivered by teachers or instructors that explain, tell, demonstrate, supervise, and direct learning. Instruction is imparted in diverse settings, such as educational institutions, the workplace, or the home through correspondence, television, or other means. It can be adapted to the particular needs of the students, for example sign language can replace verbal language for teaching students with hearing impairments. All industries in the sector share this commonality of process, namely, labor inputs of instructors with the requisite subject matter expertise and teaching ability.

62 HEALTH CARE AND SOCIAL ASSISTANCE

The Health Care and Social Assistance sector comprises establishments providing health care and social assistance for individuals. The sector includes both health care and social assistance because it is sometimes difficult to distinguish between the boundaries of these two activities.

The industries in this sector are arranged on a continuum starting with those establishments providing medical care exclusively, continuing with those providing health care and social assistance, and finally finishing with those providing only social assistance. The services provided by establishments in this sector are delivered by trained professionals. All industries in the sector share this commonality of process, namely, labor inputs of health practitioners or social workers with the requisite expertise. Many of the industries in the sector are defined based on the educational degree held by the practitioners included in the industry.

Excluded from this sector are aerobic classes in Subsector 713, Amusement, Gambling and Recreation Industries, and nonmedical diet and weight reducing centers in Subsector 812, Personal and Laundry Services. Although these can be viewed as health services, these services are not typically delivered by health practitioners.

71 ARTS, ENTERTAINMENT, AND RECREATION

The Arts, Entertainment, and Recreation sector includes a wide range of establishments that operate facilities or provide services to meet varied cultural, entertainment, and recreational interests of their patrons. This sector comprises: (1) establishments that are involved in producing, promoting, or participating in live performances, events, or exhibits intended for public viewing; (2) establishments that preserve and exhibit objects and sites of historical, cultural, or educational interest; and (3) establishments that operate facilities or provide services that enable patrons to participate in recreational activities or pursue amusement, hobby, and leisure time interests.

Some establishments that provide cultural, entertainment, or recreational facilities and services are classified in other sectors. Excluded from this sector are: (1) establishments that provide both accommodations and recreational facilities, such as hunting and fishing camps and resort and casino hotels, are classified in Subsector 721, Accommodation; (2) restaurants and night clubs that provide live entertainment in addition to the sale of food and beverages are classified in Subsector 722, Food Services and Drinking Places; (3) motion picture theaters, libraries and archives, and publishers of newspapers, magazines, books, periodicals, and computer software are classified in Sector 51, Information; and (4) establishments using transportation equipment to provide recreational and entertainment services, such as those operating sightseeing buses, dinner cruises, or helicopter rides, are classified in Subsector 487, Scenic and Sightseeing Transportation.

72 ACCOMMODATION AND FOOD SERVICES

The Accommodation and Food Services sector comprises establishments providing customers with lodging and/or preparing meals, snacks, and beverages for immediate consumption. The sector includes both accommodation and food services establishments because the two activities are often combined at the same establishment.

Excluded from this sector are civic and social organizations; amusement and recreation parks; theaters; and other recreation or entertainment facilities providing food and beverage services.

81 OTHER SERVICES (EXCEPT PUBLIC ADMINISTRATION)

The Other Services (except Public Administration) sector comprises establishments engaged in providing services not specifically provided for elsewhere in the classification system. Establishments in this sector are primarily engaged in activities such as equipment and machinery repairing, promoting or administering religious activities, grantmaking, advocacy, and providing dry-cleaning and laundry services, personal care services, death care services, pet care services, photofinishing services, temporary parking services, and dating services.

Private households that engage in employing workers on or about the premises in activities primarily concerned with the operation of the household are included in this sector.

Excluded from this sector are establishments primarily engaged in retailing new equipment and also performing repairs and general maintenance on equipment. These establishments are classified in Sector 44-45, Retail Trade.

99 INDUSTRIES NOT CLASSIFIED

This sector comprises establishments where no NAICS coding information is available.

Appendix C.

Methodology

SOURCES OF THE DATA

The 2002 Survey of Business Owners (SBO) was conducted by mail. One of two census forms was mailed to a random sample of businesses selected from a list of all firms operating during 2002 with receipts of \$1,000 or more, except those classified in the following NAICS industries:

- crop and animal production (NAICS 111, 112)
- scheduled air transportation (NAICS 4811, part)
- rail transportation (NAICS 482)
- postal service (NAICS 491)
- funds, trusts, and other financial vehicles (NAICS 525), except real estate investment trusts (NAICS 525930)
- religious, grantmaking, civic, professional, and similar organizations (NAICS 813)
- private households (NAICS 814), and
- public administration (NAICS 92).

The lists of all firms (or universe) are compiled from a combination of business tax returns and data collected on other economic census reports. The Census Bureau obtains electronic files from the Internal Revenue Service (IRS) for all companies filing IRS Form 1040, Schedule C (individual proprietorship or self-employed person); 1065 (partnership); any one of the 1120 corporation tax forms; and 941 (Employer's Quarterly Federal Tax Return). The IRS provides certain identification, classification, and measurement data for businesses filing those forms.

For most firms with paid employees, the Census Bureau also collected employment, payroll, receipts, and kind of business for each plant, store, or physical location during the 2002 Economic Census.

The report forms used to collect information are available at www.census.gov/csd/sbo/index.html.

The SBO is conducted on a company or firm basis rather than an establishment basis. A company or firm is a business consisting of one or more domestic establishments that the reporting firm specified under its ownership or control at the end of 2002. Firms were instructed to return their completed report form by mail. Two report form remails were conducted at one-month intervals to all delinquent respondents. A telephone follow-up was conducted to obtain a subset of information from selected firms that failed to return their report form. The returned forms underwent extensive review and computer processing. All reports were geographically coded, data-keyed, and edited. The editing process identified records with significant problems and firms were contacted for correction resolution. Corrections were performed interactively using standard procedures.

The data were then tabulated by NAICS, subjected to further data analysis, and the resulting corrections applied to individual computer records. Corrected tabulations were then produced for the final published reports.

A more detailed examination of census methodology is presented in the *History of the 2002 Economic Census* at www.census.gov/econ/www/history.html.

INDUSTRY CLASSIFICATION OF FIRMS

The classification for all establishments are based on the *North American Industry Classification System, United States, 2002*, manual. The kind-of-business or industry classification codes for the SBO are obtained from the 2002 Economic Census. More information on the industry classification codes is included in the Industry Classifications and Relationship to Historical Industry Classifications sections in the Introductory Text.

SAMPLING AND ESTIMATION METHODOLOGIES

Sampling. To design the 2002 SBO sample, the Census Bureau used the following sources of information to estimate the probability that a business was minority- or women-owned:

- Administrative data from the Social Security Administration.
- Lists of minority- and women-owned businesses published in syndicated magazines, located on the Internet, or disseminated by trade or special interest groups.
- Word strings in the company name indicating possible minority ownership (derived from 1997 survey responses).
- Racial distributions for various state-industry classes (derived from 1997 survey responses) and racial distributions for various ZIP Codes.
- Gender, race, and Hispanic or Latino origin responses of a single-owner business to an SBO previous survey or to the 2000 Decennial Census.

These probabilities were then used to place each firm in the SBO universe in one of nine frames for sampling:

- American Indian
- Asian
- Black or African American
- Hispanic
- Non-Hispanic white men
- Native Hawaiian and Other Pacific Islander
- Other (a different race was supplied as a write-in to another source)
- Publicly owned
- Women

The SBO universe was stratified by state, industry, frame, and whether the company had paid employees in 2002. The Census Bureau selected large companies, including those operating in more than one state, with certainty. These companies were selected based on volume of sales, payroll, or number of paid employees. All certainty cases were sure to be selected and represented only themselves (i.e., had a selection probability of one and a sampling weight of one). The certainty cutoffs varied by sampling stratum, and each stratum was sampled at varying rates, depending on the number of firms in a particular industry in a particular state. The remaining universe was subjected to stratified systematic random sampling.

A firm selected into the sample was mailed one of two questionnaires. The Census Bureau sent the SBO-1 questionnaire to partnerships and corporations. The businesses were asked to report the percentage of ownership, gender, Hispanic or Latino origin, race, and several characteristic questions (e.g., age, education level) for each of the three largest percentage owners. The SBO-2 questionnaire was used for sole proprietors and self-employed individuals. The businesses were asked essentially the same information as asked on the SBO-1, but limited to two owners.

Treatment of Nonresponse. Approximately 81 percent of the 2.3 million businesses in the SBO sample responded to the survey. Data from the 1997 survey were used for businesses in both the 1997 and 2002 samples. For the remaining nonrespondents, gender, Hispanic or Latino origin, and race were imputed from donor respondents with similar characteristics (state, industry, employment status, size, and sampling frame).

Tabulation. Business ownership is defined as having 51 percent or more of the stock or equity in the business and is categorized by:

- Gender: Male; Female; or Equally Male-/Female-Owned
- Ethnicity: Hispanic or Latino Origin; Not Hispanic or Latino Origin
- Race: White; Black or African American; American Indian or Alaska Native; Asian; Native Hawaiian or Other Pacific Islander

Firms equally male-/female-owned were counted and tabulated as a separate category.

Businesses could be tabulated in more than one racial group. This can result because:

- a. the sole owner reported more than one race;
- b. the majority owner reported more than one race;
- c. a majority combination of owners reported more than one race.

The detail may not add to the total or subgroup total because a Hispanic or Latino firm may be of any race, and because a firm could be tabulated in more than one racial group. For example, if a firm responded as both Chinese and Black majority owned, the firm would be included in the detailed Asian and Black estimates, but would only be counted once toward the higher level all firms' estimates.

The sum of the detailed Hispanic or Latino origin may not add to the total because no one Hispanic subgroup (i.e., Mexican, Puerto Rican, Cuban, or Other Spanish/Hispanic/Latino) owned a majority of the firm, but a combination of these subgroups did own a majority. For example, if a firm had two owners each with equal ownership, one responding Puerto Rican and the other responding Cuban, there is no one subgroup with a majority ownership, but the firm is Hispanic-owned. This firm would be tabulated in the Hispanic or Latino estimate, but would not appear in any of the subgroup estimates.

Also, the subgroup detail for both Asians and Native Hawaiians and Other Pacific Islanders may not add to the total for similar reasons as explained above.

In the Characteristics of Businesses and the Characteristics of Business Owners reports, the tabulations of demographic and economic business and owner characteristics included only those firms that returned the survey form and provided the gender, Hispanic or Latino origin, and race for the owner(s) or indicated the firm was publicly held. These tabulations also included the owners who identified with more than one race. For example, an Asian Hispanic male veteran owner would have his information tabulated in each of those four categories. However, such a record was counted only once in the "All owners of respondent firms" line of the publication.

For the tabulations by gender, Hispanic or Latino origin, and race, the data for each firm in the SBO sample were weighted by the reciprocal of the firm's probability of selection. The data for each owner are inflated using the sampling weight assigned to the owner's corresponding firm record.

RELIABILITY OF ESTIMATES

The figures shown in this report are, in part, estimated from a sample and will differ from the figures which would have been obtained from a complete census. Two types of possible errors are associated with estimates based on data from sample surveys: sampling errors and nonsampling errors. The accuracy of a survey result depends not only on the sampling errors and nonsampling

errors measured, but also on the nonsampling errors not explicitly measured. For particular estimates, the total error may considerably exceed the measured errors. The following is a description of the sampling and nonsampling errors associated with this tabulation.

Sampling variability. The particular sample used for this survey is one of a large number of all possible samples of the same size that could have been selected using the same sample design. Estimates derived from the different samples would differ from each other. The relative standard error is a measure of the variability among the estimates from all possible samples. The estimated relative standard errors presented in the tables estimate the sampling variability, and thus measure the precision with which an estimate from the particular sample selected for this survey approximates the average result of all possible samples. Relative standard errors are applicable only to those published cells in which sample cases are tabulated. A relative standard error is an expression of the standard error as a percent of the quantity being estimated.

The sample estimate and an estimate of its relative standard error can be used to estimate the standard error and then construct interval estimates with a prescribed level of confidence that the interval includes the average results of all samples. To illustrate, if all possible samples were surveyed under essentially the same condition, and estimates calculated from each sample, then:

1. Approximately 68 percent of the intervals from one standard error below the estimate to one standard error above the estimate would include the average value of all possible samples.
2. Approximately 90 percent of the intervals from 1.6 standard errors below the estimate to 1.6 standard errors above the estimate would include the average value of all possible samples.

Thus, for a particular sample, one can say with specified confidence that the average of all possible samples is included in the constructed interval.

Example of a confidence interval. Suppose the estimate is 51,707 and the estimated relative standard error is 2 percent. The standard error is then 2 percent of 51,707 or 1,034. An approximate 90-percent confidence interval is found by first multiplying the standard error by 1.6 and then adding and subtracting that result from the estimate to obtain the upper and lower bounds. Since $1.6 \times 1,034 = 1,654$, the confidence interval in this example is $51,707 + \text{or} - 1,654$ or the range 50,053 to 53,361.

For the Characteristics of Businesses and Characteristics of Business Owners reports, much of the data is expressed as percentages with standard errors rather than relative standard errors as indicated above. This saves a step in the construction of the confidence interval as illustrated by the following example.

Example of a confidence interval for percentage data. Suppose the estimate is 76.9 percent and the estimated standard error is 0.4 percent. An approximate 90-percent confidence interval is found by first multiplying the standard error by 1.6 and then adding and subtracting that result from the estimate to obtain the upper and lower bounds. Since $1.6 \times 0.4 = 0.64$, the confidence interval in this example is $76.9 + \text{or} - 0.64$ or the range 76.26 to 77.54.

Nonsampling errors. All surveys and censuses are subject to nonsampling errors. Nonsampling errors are attributable to many sources, including the inability to obtain information for all cases in the universe, imputation for missing data, data errors and biases, mistakes in recording or keying data, errors in collection or processing, and coverage problems.

Explicit measures of the effects of these nonsampling errors are not available. However, it is believed that most of the important operational and data errors were detected and corrected through an automated data edit designed to review the data for reasonableness and consistency. Quality control techniques were used to verify that operating procedures were carried out as specified.

COMPARABILITY OF 2002 CB/CBO AND 1992 CBO DATA

Particular care should be taken in comparing estimates from 2002 to 1992 due to the following changes in survey methodology in 2002 which affect comparability:

1. In 2002, the SBO sample of 2.3 million businesses included all corporations in addition to partnerships and sole proprietorships. Businesses were asked to report the percentage of interest and the gender, Hispanic or Latino origin, and race of up to three individuals with the largest share of ownership; additional owners were not surveyed regarding characteristics. Selected economic and demographic characteristics were also asked of the businesses and business owners. Wording of questions and/or response categories may be new or different from those used in the past. The CB data are presented by business ownership determined by the gender, Hispanic or Latino origin, and race of the person(s) owning majority interest in the business. The CBO data are presented for all interest owners, as well as majority, equal, and nonmajority interest owners. Each owner is classified by their gender, Hispanic or Latino origin, and race. Each owner could self-identify with more than one racial group; therefore it was possible for a business and its owner(s) to be classified and tabulated in more than one racial group.

In 1992, a sample of 78,000 businesses was selected from the Surveys of Minority- and Women-Owned Business Enterprises (SMOBE/SWOBE) sample of 1.2 million businesses. Only subchapter S corporations in addition to partnerships and sole proprietorships were included in the SMOBE/SWOBE. Businesses were asked to report the gender, Hispanic or Latino origin, and race of the majority of the owners, as well as the number of owners. Business ownership was determined based on the majority of the number of owners, without regard to percentage of interest owned. Based on the number of owners provided, a CBO questionnaire was then mailed to as many as 10 owners of a business to collect selected economic and demographic characteristics to yield a sample size of approximately 116,000 owners. The subsequent CBO respondents, both the firms and the owner(s), were then considered as belonging to the same gender, Hispanic or Latino origin, and race as that of the business determined from the SMOBE/SWOBE.

2. In 2002, all estimates were based on firms that responded to the 2002 SBO. A respondent firm is defined as a business that returned the survey form and provided the gender, Hispanic or Latino origin, or race for the owner(s) or indicated that the firm was publicly held. The data for owners of respondent firms exclude businesses which were publicly held. In 1992, responding firms were reweighted to compensate for those businesses which had not returned the survey form.
3. In 2002, separate estimates for American Indian- and Alaska Native-, Asian-, Native Hawaiian- and Other Pacific Islander-owned firms are provided. However, in 1992, estimates for these businesses were published under the category of "Other minority-owned businesses."
