

U.S. Census Bureau

Data Tools and Resources

Discover **YOUR** Community
with the
**American Community Survey
(ACS)**

QuickFacts

The best online tool to find interesting facts fast. View charts, maps, and statistics about your community from the ACS and other data sources. Want to know the median household income for your city? The mean travel time to work for your hometown? Access QuickFacts today to get started.

American FactFinder (AFF)

An online data access tool developed by the Census Bureau for the public. Data users of all skill levels use AFF to search billions of ACS and other Census Bureau statistics. AFF allows users to drill down to needed statistics for many geography levels, download data files, and create customized maps.

Application Programming Interface (API) and the Developers Forum

APIs and the Developers Forum are available to help improve access to public datasets and to encourage innovative use of data products. We invite developers to use these APIs, join our Developers Forum, and provide feedback to help the Census Bureau move forward with continued API development. The API includes the ACS 1-year, 3-year, and 5-year Summary Files and Data Profiles, as well as other datasets.
