TheDataWeb

Collaborate With Us

TheDataWeb team has a long history of working with other organizations to answer emerging questions that depend upon data for analysis and fact-based decision-making. Our users rely upon TheDataWeb for data that are accurate and consistent across time and each new dataset release. As TheDataWeb capacity has grown in both content and technical capability, the support that we provide our customers has also grown in its ability to provide meaningful data comparisons and graphic visualizations.

Our engagement with our partners spans organizational focus and purpose. For example:

- Though a collaborative effort to provide community level performance trends and graphic visualizations, we worked with the Environmental Protection Agency, the Department of Housing and Urban Development, and the Department of Transportation to create a Sustainable Communities HotReport
- With information from the Employment and Training Administration and the Economic Development Administration, we developed the Community Economic Development HotReport which profiles diverse community measures
- By providing access to Census Bureau statistical products, we support the data dissemination needs of internal partners, developing cost effective solutions for the repurposing of their data, sourced once, for multiple uses, through multiple mechanisms and for data preparation processes, including efficient, cutting-edge data review tools for data review analysts

Built upon a Service Oriented Architecture (SOA), and supported by a staff of knowledgeable developers, TheDataWeb is uniquely positioned to provide innovative solutions to a variety of customer needs in a timely way. Through our collaborative efforts, we have advanced the capability of a diverse audience to use statistics that are relevant, timely, clearly documented, and easily accessible. Please contact us to discuss our services and explore how we can work together to meet your organization's goals.

Partners

We would like to recognize the following for their cooperation in one or more of our projects.

- Centers for Disease Control
- Institute of Museum and Library Services
- Employment and Training Administration
- Environmental Protection Agency
- Harvard Virtual Data Center
- Australian Bureau of Statistics
- Kenya National Bureau of Statistics
