## Introduction

This report looks at the current and projected occupational demands of Hawaii's technology sector. It builds upon an earlier study in 2008 prepared collaboratively by the Hawaii Science and Technology Institute (HiSciTech), the Department of Business, Economic Development and Tourism (DBEDT) and a number of other stakeholders. That study redefined the technology sector for Hawaii, identified key occupations, and discussed related educational resources.

In late 2009, DBEDT updated the data for the redefined technology sector and a number of other emerging growth sectors of the economy in the report, Benchmarking Hawaii's Emerging Industries, which is available on the DBEDT website. ${ }^{1}$ However, that report did not address the technology sector's occupational characteristics. In December 2010, DBEDT filled that gap by updating the earlier HiSciTech/DBEDT analysis of technology occupations in the report, Hawaii's Technology Workforce Occupations and Projections. This report updates the DBEDT 2010 report based on more recent data and slightly changed definition of the technology sector due to changes in the North American Industry Classification System (NAICS). The industries included in the technology sector by NAICS code are provided in Appendix A of this report.

Data for this report were from Economic Modeling Services, Inc. (EMSI), which was the primary source of data in the HiSciTech/DBEDT report in 2008, the Emerging Industry Benchmark report by DBEDT in 2009, and the Hawaii’s Technology workforce report by DBEDT in 2010. EMSI's data subscription service combines publicly available labor and economic data from the U.S. Bureau of Labor Statistics and the Bureau of Economic Analysis into data sets covering very detailed industry and occupational areas for the state, counties and nation. The EMSI system allows very large amounts of data to be filtered and extracted in a form that saves hundreds of staff hours over alternative methods for data collection.

## Industry Groups of the Technology Sector

Before looking at occupations in the technology sector, it is helpful to look briefly at the industries in this sector. Most people have heard of the high-profile technology activities of astronomy, digital media, ocean science and maybe even dual use technology. These activities are actually the products of a number of producing industries, each of which contributes to a portion of those activities. For instance, the research and development industry contributes products and services to all of the high-profile activities. The computer services industry also contributes services to these activities, particularly digital media. However, it becomes very difficult to account for the jobs in the high-profile technology activities, but easy to account for jobs in the industries that contribute to the activities. Therefore, most measures of technology by

[^0]states, the federal government, and research organizations are based on job counts and incomes for the producing industries in technology.

Table 1 shows the most recent accounting for jobs in Hawaii's technology sector by industry groups. ${ }^{2}$ Hawaii's technology sector includes eight major industry groups. The eight groups had 24,044 jobs in 2011, accounted for about $3.0 \%$ of all civilian jobs in Hawaii. Between 2002 and 2011, the technology sector in Hawaii posted an average of $2.0 \%$ gain in jobs per year compared with an average annual growth of $1.3 \%$ for total civilian jobs.

Table 1. Industry Groups and Jobs in Hawaii's Technology Sector

| Industry Groups | Jobs 1/ |  | Percent of Total Sector 2011 | $\begin{aligned} & \hline \text { Average Annual } \\ & \text { \% Change } \\ & \text { 2002-2011 } \\ & \hline \end{aligned}$ |
| :---: | :---: | :---: | :---: | :---: |
|  | 2002 | 2011 |  |  |
| State Total Civilian Jobs | 710,548 ${ }^{\prime \prime}$ | 794,998 | NA | 1.3\% |
| Technology Sector | 20,064 ${ }^{\prime \prime}$ | 24,044 | 100.0\% | 2.0\% |
| Computer Services | 5,396 ${ }^{\prime \prime}$ | 6,288 | 26.2\% | 1.7\% |
| Engineering and Related Services | 5,379 ${ }^{\prime \prime}$ | 5,786 | 24.1\% | 0.8\% |
| Technical Consulting Services | 2,695 ${ }^{\prime}$ | 4,431 | 18.4\% | 5.7\% |
| Research \& Development Services | 1,988 ${ }^{\prime}$ | 2,519 | 10.5\% | 2.7\% |
| Research and Development in Biotechnology | $493{ }^{\prime \prime}$ | 614 | 2.6\% | 2.5\% |

| Chemical \& Pharmeceutical Mfg | 172 " | 118 | 0.5\% | -4.1\% |
| Other Technology Manufacturing | $145^{\prime \prime}$ | 109 | 0.5\% | -3.1\% |
| Medical Device Manufacturing | $313^{\prime \prime}$ | 488 | 2.0\% | 5.1\% |

1/ Includes wage \& salary, sole proprietors \& self employed.
Source: DBEDT based on data from Economic Modeling Specialists, Inc. (EMSI).
The Computer Services group accounted for the largest share of technology jobs in Hawaii with about $26.2 \%$ of the total technology jobs in 2011; followed by the Engineering and Related Services group, the Technical Consulting Services group, and the Research \& Development Services group. Together, these four industry groups accounted for almost $80 \%$ of the technology jobs in Hawaii. The smallest industry group in technology is the Technology Equipment Distribution group, followed by the Technology Manufacturing group.

From 2002 to 2011, the Technical Consulting Services group experienced the fastest growth among the eight technology groups, increased $5.7 \%$ per year on average. The Technology Manufacturing group increased $5.4 \%$ per year, mainly due to rapid growth in the sub-groups of Alternative Power Generation and Medical Device Manufacturing, which increased $14.7 \%$ and $5.1 \%$ per year, respectively. The Information and Telecommunications Technology group experienced the largest negative growth,

[^1]decreased $2.3 \%$ per year; followed by the Technology Equipment Distribution group, decreased $1.8 \%$ per year.

## Occupational Profile of the Technology Sector

EMSI's on line database provides detailed job data by NAICS code and by Standard Occupational Classification (SOC) code. For all of the industries by NAICS, jobs by detailed SOC code (about 766 detailed occupations) are provided. ${ }^{3}$ The jobs of all the technology industries by SOC code can be calculated using the EMSI on-line database. The 766 detailed occupations are grouped into 24 condensed occupations, including 23 civilian occupations and a military occupation, to better identify major characteristics of the technology labor force. Data for the detailed occupations (by SOC code) are provided in Appendix B of this report.

Figure 1 shows Hawaii’s technology jobs by major occupation groups in 2011.

[^2]Not surprisingly, the Computer and Mathematical Occupation group is the single largest group, accounted for $18.4 \%$ of all technology jobs in 2011. The technology sector also employed a larger proportion of Architecture and Engineering occupations (14.4\%), Business and Financial Operations occupations (12.4\%), Office and Administrative Support occupations (11.0\%), and Management occupations (10.0\%). The occupation groups that employed very limited technology jobs include the Farming, Fishing, and Forestry group, the Food Preparation and Serving Related group, the Legal group, the Personal Care and Service group, and the Protective Service group.

To better appreciate the uniqueness of the occupational mix in technology, the jobs in technology were compared to the civilian economy as a whole. Figure 2 shows that comparison.

## Figure 2. Percent of State and Tech Sector Jobs by Occupation in 2011

Total Jobs ■ Tech Sector

Occupationally, the technology sector is quite different from Hawaii's economy as a whole. About $45.1 \%$ of the technology jobs are in the three major occupational areas -- Computer \& Mathematical, Architecture \& Engineering, and Business and Financial Operations. By comparison, these occupations make up only about 6.9 of the total workforce statewide.

In addition to the top three technology occupation groups, the technology sector has a notably higher proportion of Office and Administrative Support occupations and Managers.

The high proportion of technology jobs in the Computer \& Mathematical group and the Architecture \& Engineering group is not a surprise given the nature of these groups, which are focused on providing commercial products based on the results of cutting-edge technologies. What may be surprising is the higher-than-average proportion of the Business \& Financial Operations occupations, the Office and Administrative Support occupations, and the Management occupations in technology. This suggests that while the core of the technology sector may be technical occupations, the technology sector is also highly dependent on administrative and managerial support occupations.

## Occupations that Depend on Technology

Figure 2 shows how much or little technology depends on certain occupations like computer services, architecture \& engineering, and business administration. What about the opposite relationship? That is, how important is the technology sector as a source of employment for the major occupations in the broader economy?

Figure 3 shows the percentages of the technology jobs in the state total jobs by major occupation groups. In 2011, Hawaii’s total technology jobs accounted for only about $2.8 \%$ of state total jobs. Given its small relative size, it is not surprising that the technology sector accounted for only a small proportion of most of Hawaii's occupations. Even for some occupations upon which technology is highly dependent, such as office and administrative support and management jobs, the technology sector accounted for only a modest proportion of the total state jobs of those occupations.

However, for some key occupational groups, the technology sector is a major source of employment. For instance, the technology sector accounted for $44.9 \%$ of state total jobs in the Computer and Mathematical occupations, $36.0 \%$ total jobs in the Architecture \& Engineering occupations, and 13.5\% total jobs in the Life, Physical and Social Science occupations.

This is important information for planning how the future occupational needs of technology can be met without unduly competing with other industries for key occupations. If growth in the technology sector accelerates in the future, Figure 3 suggests that filling most occupational positions should not be difficult. For most occupations, technology could attract workers from other industries without the overall supply of those occupations being affected much. However, in the highly skilled areas of

Computer \& Mathematical, Architecture \& Engineering, and Life \& Physical \& Social Sciences, the technology sector's labor demands could come into sharp competition with other industries if the supply of new workers in these professions cannot keep up with higher demand.

## Occupational Projections and Wages for Technology

In order to better understand the potential demand for occupations in the technology sector, we need to start with the projected growth for technology in the coming years. The EMSI database provides these occupations based on underlying projections by the U.S. Bureau of Labor Statistics (BLS).

As Table 2 shows, the BLS based projections expect a very modest $1.0 \%$ average annual growth in Hawaii's civilian jobs count, including self-employed and proprietors, over the 2011 to 2021 period. Because the projections are very modest they can be seen as a minimum baseline projection for purposes of this illustration.

Table 2. Projected Growth in Technology Occupation, 2011 to 2021

| Occupation | $\begin{gathered} \hline 2011 \\ \text { Jobs } \\ \hline \end{gathered}$ | 2021 Projected | Change in Jobs | Ave. Ann. \% Growth | Ave. Hourly Wages 2011 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Total Civilian Jobs | 794,997 | 874,588 | 79,591 | 1.0\% | \$19.25 |
| Total Technology Jobs | 24,044 | 27,411 | 3,367 | 1.3\% | \$26.16 |
| Business and Financial Operations | 2,975 | 3,776 | 801 | 2.4\% | \$26.82 |
| Computer and Mathematical | 4,413 | 4,992 | 579 | 1.2\% | \$30.43 |
| Management | 2,396 | 2,786 | 390 | 1.5\% | \$30.27 |
| Office and Administrative Support | 2,638 | 2,994 | 356 | 1.3\% | \$16.42 |
| Healthcare Practitioners and Technical | 991 | 1,248 | 257 | 2.3\% | \$41.03 |
| Life, Physical, and Social Science | 1,255 | 1,473 | 218 | 1.6\% | \$29.38 |
| Production | 625 | 827 | 202 | 2.8\% | \$15.95 |
| Sales and Related | 1,269 | 1,468 | 199 | 1.5\% | \$15.29 |
| Unclassified | 217 | 352 | 135 | 5.0\% | \$13.59 |
| Arts, Design, Entertainment, Sports, and Media | 728 | 814 | 86 | 1.1\% | \$18.37 |
| Architecture and Engineering | 3,456 | 3,533 | 77 | 0.2\% | \$33.23 |
| Healthcare Support | 404 | 474 | 70 | 1.6\% | \$14.56 |
| Protective Service | 47 | 64 | 17 | 3.1\% | \$18.90 |
| Construction and Extraction | 575 | 589 | 14 | 0.2\% | \$24.61 |
| Community and Social Services | 88 | 99 | 11 | 1.2\% | \$21.73 |
| Food Preparation and Serving Related | 25 | 33 | 8 | 2.8\% | \$11.96 |
| Transportation and Material Moving | 193 | 198 | 5 | 0.3\% | \$16.13 |
| Installation, Maintenance, and Repair | 508 | 512 | 4 | 0.1\% | \$21.15 |
| Legal | 30 | 33 | 3 | 1.0\% | \$35.32 |
| Farming, Fishing, and Forestry | 0 | 0 | 0 | NA | \$13.74 |
| Building and Grounds Cleaning and Maintenance | 395 | 393 | -2 | -0.1\% | \$13.13 |
| Personal Care and Service | 40 | 37 | -3 | -0.8\% | \$11.50 |
| Education, Training, and Library | 776 | 716 | -60 | -0.8\% | \$22.39 |

Source: DBEDT; Data from EMSI.
The projections indicate that the technology sector will likely out-perform overall jobs growth in the economy, with an average 1.3\% increase per year. From 2011 to 2021, the technology sector is projected to add 3,367 new jobs. The Business and Financial Operations group is expected to add the most jobs (801 jobs), followed by the Computer and Mathematical group ( 579 jobs), the Management group ( 390 jobs), the Office and Administrative Support group (356 jobs), and the Healthcare Practitioners and

Technical group. The Education, Training and Library group is expected to lose technology jobs.

Average hourly wages in the technology sector were significantly higher on average than for the economy as a whole by about 35.9\%. The technology occupations such as Healthcare Practitioners \& Technical, Legal, Architecture \& Engineering, Computer \& Mathematical, Management, and Life \& Physical \& Social Sciences were above average for the technology sector as a whole.

As indicated, the projections for the technology sector occupational demand in Table 2 due to growth in the sector appear very modest. However, these job gains represent less than half of the total demand for workers that technology will actually place on the occupations market. What is missing in Table 2 is the demand for workers needed to replace those leaving these occupations due to retirement and other factors. The combination of workforce demand from growth shown in Table 2 and the replacement needs sum up to the total job openings in the economy over the 2011 to 2021 period. Total openings are a better way to measure how many additional workers Hawaii's industries will need to remain healthy - and what educational and workforce efforts must address.

Table 3. Effect of Replacement Needs on Occupational Demand in Technology, 2011 to 2021

| Occupation | Growth <br> Needs | $\begin{aligned} & \text { Replace- } \\ & \text { ment } \\ & \text { Needs } \\ & \hline \end{aligned}$ | Total Openings | Replacement as \% of Openings | \% Change <br> Due to <br> Total Openings |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Total Civilian Jobs | 79,591 | 189,636 | 269,227 | 70.4\% | 3.0\% |

| Farming, Fishing, and Forestry | 0 | 0 | 0 | NA | NA |

Source: DBEDT; Data from EMSI.
BLS and EMSI also project these replacement needs and total openings. Those are shown in Table 3 for the technology sector and Hawaii's overall civilian economy.

The magnitude of the total workforce demand over the next decade when replacement needs are included is startling. The number of new workers in the economy needed just to replace those leaving the labor force is more than two times the number needed for expected growth. That is: about two-thirds of the openings over the next decade will likely be for replacement workers. ${ }^{4}$

The driving force behind the high replacement rate in the coming years is the expected retirement of the huge, baby boom generation (born between 1946 and 1964). The leading edge of this group became eligible for early retirement under social security in 2008 and the trailing edge of the generation will not reach full retirement age until

[^3]about 2030 under current rules. Over this period, a disproportionate share of the workforce could need replacing.

For the technology sector the replacement needs will be less severe than for the economy as a whole, but still significant. About $60 \%$ of the openings in the technology sector will be for replacements. This still means that in addition to the 3,367 new workers needed for growth in technology, another 5,196 workers will be needed to replace those leaving the occupation.

The balance between new and replacement needs is better for some occupations such as Business \& Financial Operations, Healthcare, Practitioners and Technical, Healthcare Support, Production, and Protective Service occupations where less than half of the openings will be due to replacement needs. However, some key occupations such as Computer and Mathematical, Office and Administrative Support, Architecture and Engineering, and Life, Physical and Social Science occupations have a higher (more than 60\%) replacement rate.

Adding replacement workers into the equation also means that the workforce as a whole must grow fast enough to ensure that the demand for both growth and replacement workers is met. For instance, while the total civilian workforce needed to meet growth requirements under the EMSI projections need only grow $1.0 \%$ per year, to fill all openings, the number of new workforce entrants will need to expand by around $3.0 \%$ per year. This is potentially around 27,000 positions that will need to be filled each year over the next decade.

For the technology sector as a whole, the annual average growth rate of total openings increased to $3.1 \%$. Some key occupations such as Business \& Financial Operations, Life, Physical and Social Science, Healthcare, Practitioners and Technical, Production, and Sales Related occupations may need to grow even faster to fill replacements.

Table 4 intends to identify potential bottlenecks in the supply of occupations by comparing the openings expected in technology with the demand for those same occupations in the civilian economy as a whole between 2011 and 2021.

The table shows that the technology sector will likely be a major source of employment in the economy for certain, core technical occupations. In particular, the technology sector may absorb $48.3 \%$ of the openings for Computer and Mathematical, 36.6\% for Architecture \& Engineering, and 15.7\% for Life, Physical and Social Science occupations.

Table 4. Technology Share of Occupational Demand, 2011 to 2021

| Occupation | Total Openings 2011 to 2021 |  |  |
| :---: | :---: | :---: | :---: |
|  | Technology Sector | Civilian <br> Economy 1/ | \% of Total <br> Demand from Tech. <br> Sector |
| Total | 8,563 | 267,074 | 3.2\% |
| Computer and Mathematical | 1,480 | 3,067 | 48.3\% |
| Architecture and Engineering | 834 | 2,277 | 36.6\% |
| Unclassified | 135 | 623 | 21.7\% |
| Life, Physical, and Social Science | 617 | 3,922 | 15.7\% |
| Business and Financial Operations | 1,352 | 14,462 | 9.3\% |
| Production | 344 | 5,473 | 6.3\% |
| Management | 910 | 17,809 | 5.1\% |
| Healthcare Practitioners and Technical | 459 | 9,796 | 4.7\% |
| Office and Administrative Support | 957 | 27,403 | 3.5\% |
| Arts, Design, Entertainment, Sports, and Media | 270 | 8,812 | 3.1\% |
| Healthcare Support | 118 | 5,702 | 2.1\% |

| Education, Training, and Library | 110 | 18,111 | 0.6\% |
| Transportation and Material Moving | 57 | 13,385 | 0.4\% |
| Building and Grounds Cleaning and Maintenance | 64 | 15,765 | 0.4\% |
| Protective Service | 30 | 10,274 | 0.3\% |
| Food Preparation and Serving Related | 17 | 30,008 | 0.1\% |
| Personal Care and Service | 7 | 17,169 | 0.0\% |

1/ Includes only the occupations for each openings are also found in the technology sector.
Source: DBEDT; Data from EMSI.

For other occupations upon which technology relies, like Business and Financial Operations, Production, and Management occupations, the technology sector will account for only about $5-10 \%$ of the total openings. These occupations are important to a wide range of industries in the economy, so the demand by technology will be proportionately smaller than for the more specialized technical and scientific occupations.

## Stem Occupations in the Technology Sector

This overview report of occupations in the technology sector is concluded with a discussion of occupations in STEM, which stands for Science, Technology, Engineering and Math. STEM occupations are those that heavily utilize workers with education and skills in science, technology, engineering, and/or mathematics. These occupations require specialized post-secondary education and often bachelors and advanced degrees.

The occupations requiring programs in STEM education have been identified in detail by the Occupational Information Network (O*NET). The program is sponsored by the U.S. Department of Labor, Employment and Training Administration. The O*NET STEM occupations list is extensive and detailed, and includes not only areas of science and technology, but also key jobs in health care, business and even construction and agriculture. The list is an evolving work in progress, with additional occupations added over time. ${ }^{5}$

Table 5 shows the STEM occupations in the technology sector and compares them with STEM occupations in the economy as a whole as well as with all other technology occupations.

About $40.5 \%$ of the jobs in the technology sector fall into the O*NET, STEM classification. All Computer and Mathematical jobs are considered STEM occupations. However, even in very technical areas like Architecture \& Engineering, and Life, Physical and Social Sciences, a proportion of the jobs are not in STEM categories.

The technology sector accounted for about $15.8 \%$ of all STEM jobs in Hawaii's civilian economy in 2011, even though it only accounted for $2.8 \%$ of all civilian jobs. The technology sector accounted for $45.0 \%$ of STEM jobs in Computer and Mathematical, and $35.0 \%$ of STEM jobs in Architecture and Engineering. The technology sector accounted for just 12.0\% of statewide STEM jobs in Life, Physical and Social Science. Most STEM jobs in this last occupational area are probably located in State and Federal governments, and in post-secondary education institutions, for which separate data are not available.

At $\$ 31.65$, the average hourly wage for STEM occupations in the technology sector was well above the average of $\$ 26.16$ for technology occupations as a whole, shown in Table 2. STEM occupations in most of the major occupational areas also exceeded the corresponding non-STEM average with the exception of Healthcare, Practitioners and Technical, Architecture \& Engineering, Arts \& Design \& Entertainment \& Sports \& Media, and Installation \& Maintenance \& Repair.

[^4]Table 5. Hawaii STEM Occupations, 2011

Source: DBEDT; Data from EMSI.
The relatively moderate proportion of STEM occupations in the technology sector $(40.5 \%)$ does not mean that the remaining jobs in the sector are of less skill level. Many jobs in administration, management, financial, legal and other areas require as much or perhaps more training than the STEM jobs. STEM occupations are more focused on the scientific and engineering aspects of technology and this is an area in which the U.S. has been gradually lagging behind. It is therefore a priority for the education and workforce community.

## Conclusion

With the development of better data for the industry side of the technology sector, this report has sought to extend research on this sector to the occupational side. The purpose of this study was to identify the technology sector's occupational profile and see how that profile compares to the larger civilian workforce in Hawaii. Another purpose was to look at the expected demand for occupations by the technology sector over the next decade and how that also compares with demand in the larger economy for the same occupations. In particular, the occupational demand analysis went beyond the aspect of net growth in the sector to look also at the demand for replacement workers as retirements from the labor force accelerates in the years to come.

This study did not address the supply side of the occupational equation - that is, the output of trained workers from the educational system that would fill these jobs.

With reliable data on educational and workforce completions, it would be possible to help shed light on the capacity of the education and training community to meet the expected occupational demands.

Sources of data do exist that may permit such an analysis in the future. However, more work must be done to validate those data and ensure that reliable supply and demand comparisons are being made. In the meantime, it is hoped that this occupational data will help the industry and development organizations better plan for future occupational needs.

## Appendix B: Detailed Data

| STEM |  |  | Tech Sector |  |  |  |  | $\begin{gathered} 2011 \text { Avg } \\ \text { Hourly } \\ \text { Wage } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Status | SOC |  |  |  | Growth | Replace. | Opening |  |
| STEM=1 | Code | Description | 2011 | 2021 | 2011-21 | 2011-21 | 2011-21 |  |
| 0 | 53-3031 | Driver/Sales Workers | - | - | - | - | - | \$13.35 |
| 0 | 53-3032 | Truck Drivers, Heavy and Tractor-Trailer | 11 | 10 | (1) | 2 | 1 | \$19.22 |
| 0 | 53-3033 | Truck Drivers, Light or Delivery Services | 16 | 18 | 2 | 3 | 5 | \$14.70 |
| 0 | 53-3041 | Taxi Drivers and Chauffeurs | 12 | 13 | 1 | 2 | 3 | \$11.84 |
| 0 | 53-3099 | Motor Vehicle Operators, All Other | 1 | 1 | - | - | - | \$21.04 |
| 0 | 53-4011 | Locomotive Engineers | - | - | - | - | - | \$27.50 |
| 0 | 53-4021 | Railroad Brake, Signal, and Switch Operators | - | - | - | - | - | \$18.96 |
| 0 | 53-4031 | Railroad Conductors and Yardmasters | 1 | 1 | - | - | - | \$24.56 |
| 0 | 53-5011 | Sailors and Marine Oilers | - | - | - | - | - | \$14.25 |
| 0 | 53-5021 | Captains, Mates, and Pilots of Water Vessels | - | - | - | - | - | \$28.23 |
| 0 | 53-5022 | Motorboat Operators | 1 | 1 | - | - | - | \$18.17 |
| 0 | 53-5031 | Ship Engineers | - | - | - | - | - | \$27.13 |
| 0 | 53-6021 | Parking Lot Attendants | - | - | - | - | - | \$9.81 |
| 0 | 53-6031 | Service Station Attendants | 2 | 2 | - | 1 | 1 | \$12.60 |
| 0 | 53-6041 | Traffic Technicians | 6 | 6 | - | 2 | 2 | \$24.62 |
| 1 | 53-6051 | Transportation Inspectors | 2 | 2 | - | - | - | \$28.92 |
| 0 | 53-6099 | Transportation Workers, All Other | - | - | - | - | - | \$14.53 |
| 0 | 53-7011 | Conveyor Operators and Tenders | 5 | 5 | - | 2 | 2 | \$14.68 |
| 0 | 53-7021 | Crane and Tower Operators | - | - | - | - | - | \$33.79 |
| 0 | 53-7032 | Excavating and Loading Machine and Dragline Operators | - | - | - | - | - | \$19.76 |
| 0 | 53-7051 | Industrial Truck and Tractor Operators | 13 | 12 | (1) | 4 | 3 | \$18.44 |
| 0 | 53-7061 | Cleaners of Vehicles and Equipment | 8 | 5 | (3) | 3 | - | \$11.06 |
| 0 | 53-7062 | Laborers and Freight, Stock, and Material Movers, Hand | 65 | 73 | 8 | 24 | 32 | \$14.83 |
| 0 | 53-7063 | Machine Feeders and Offbearers | 2 | 1 | (1) | 1 | - | \$10.61 |
| 0 | 53-7064 | Packers and Packagers, Hand | 19 | 19 | - | 4 | 4 | \$10.69 |
| 0 | 53-7072 | Pump Operators, Except Wellhead Pumpers | - | - | - | - | - | \$20.94 |
| 0 | 53-7073 | Wellhead Pumpers | - | - | - | - | - | \$20.00 |
| 0 | 53-7081 | Refuse and Recyclable Material Collectors | - | - | - | - | - | \$16.83 |
| 0 | 53-7199 | Material Moving Workers, All Other | 5 | 5 | - | 1 | 1 | \$21.23 |
|  | 55-0000 | Military | - | - | - | - | - | \$15.82 |
| 0 | 55-9999 | Military Occupations | - | - | - | - | - | \$15.82 |
|  | 99-0000 | Unclassified | 217 | 352 | 135 | - | 135 | \$13.59 |
| 0 | 99-9999 | Unclassified Occupation | 217 | 352 | 135 | - | 135 | \$13.59 |

[^0]:    ${ }^{1}$ http://hawaii.gov/dbedt/info/economic/data_reports/emerging-industries.

[^1]:    ${ }^{2}$ Include proprietor and self-employed.

[^2]:    ${ }^{3}$ Jobs in some small occupations are not available in EMSI's on-line database. For these occupations, the job data are estimated by DBEDT.

[^3]:    ${ }^{4}$ Of course, the extent to which workers choose or are encouraged to delay retirement or reenter the workforce after retirement could reduce the demand for new workforce entrants. In fact, this may be a key policy approach in dealing with potential labor shortages.

[^4]:    ${ }^{5}$ The list may be found at: http://online.onetcenter.org/.
