THE DEPARTMENT OF BUSINESS, ECONOMIC DEVELOPMENT & TOURISM
S T A T E O F H A W A I I

*Quarterly
Statistical &
Economic
Report*

December 2002

This *Quarterly Statistical and Economic Report* has been prepared by the staff of the Research and Economic Analysis Division of the State Department of Business, Economic Development & Tourism (DBEDT). The report provides concise statistical information and analyses on Employment, Income and Prices, Taxes, Tourism, and Construction, as well as an overview of the State of Hawaii and the four counties.

This report was prepared under the direction of the division administrator, Dr. Pearl Imada Iboshi.

Technical notes and source descriptions have been kept to a minimum. However, the staff of the Research and Economic Analysis Division would be happy to respond to any inquiries of a technical nature that readers may have (586-2466). The quarterly information contained in this report reflects data received by the Research Division on or before December 6, 2002.

On-line availability of *Quarterly Statistical and Economic Report*

Since 1988, the Hawaii Department of Business, Economic Development & Tourism has had the *State of Hawaii Data Book* available on-line to anyone with a personal computer and a modem. Since 1997, the *Quarterly Statistical and Economic Report*, *State of Hawaii Data Book* and other DBEDT publications and information have been made available over the Internet at <http://www.hawaii.gov/dbedt/>.

Beginning in March 2000, the printing of the entire *QSER* had been discontinued. The full version will be available on-line at <http://www.hawaii.gov/dbedt/qser/> and a *QSER Executive Summary* at <http://www.hawaii.gov/dbedt/latest.html> and is available on request by fax or e-mail.

For further information about available data and sources, users should call the Research and Economic Analysis Division Library at (808) 586-2424.

This report has been catalogued as follows:

STATE OF THE ECONOMY

Economic data show that Hawaii is continuing to recover from the trials of the past year, but it is not yet over the hump. Based on year-over-year growth rates for the third quarter 2002, Hawaii is improving in terms of planned and completed construction, general fund tax revenues, and visitor arrivals compared to the growth rates for the third quarter of 2001. However, the third quarter 2002 growth rates for labor force, civilian employment, wage and salary jobs, and income tax collections are down from their third quarter 2001 levels.

Hawaii's labor force and civilian employment were both down in the third quarter of 2002, 1.7 percent and 1.4 percent respectively. This is the second straight quarterly decline for each. On average, for the third quarter, 570,500 people were employed in Hawaii, 8,000 fewer than the year before. The unemployment rate was down in the third quarter of 2002 from 4.6 to 4.3 percent in the same period 2001.

The number of wage and salary jobs was down 1.0 percent measured year-to-year for the third quarter. Three industries continue to account for most of the job losses: Transportation, Retail Trade, and Hotel jobs. These amounted to 9.9 percent, 3.3 percent and 5.4 percent decreases in those industries. Increases were seen in Construction (4.9 percent); Finance, Insurance and Real Estate; (0.9 percent); Health Services (2.3 percent); Business Services (1.4 percent); Agriculture (8.8 percent) and Government (1.8 percent).

Nominal personal income rose 3.9 percent in the second quarter of 2002 compared to the second quarter of 2001, the period for which the most recent data are available. Transfer payments showed the

highest rate of increase (8.8 percent) followed by other labor income (8.7 percent), wages and salaries (3.3 percent), proprietors' income (2.8 percent) and dividends, interest, and rent (1.6 percent). Most industries saw year-to-year quarterly increases in earnings with the exception of Manufacturing, Transportation and Public Utilities, and Retail Trade.

Tax revenues distributed to the State general fund were up 4.0 percent for the third quarter of 2002 compared to 2001. The general excise and use tax (GET) revenues increased by 16.4 percent in the third quarter of 2002. Transient Accommodations Tax (TAT) revenues increased 7.3 percent. Revenues from the individual income tax decreased 8.0 percent over the third quarter's 2001 to 2002 period.

The number of visitors arriving by air increased 2.4 percent comparing the third quarter of 2001 to that in 2002. This is the first positive year-over-year quarterly growth in total visitor arrivals since the fourth quarter of 2000. Average daily visitor census numbers increased 6.3 percent in the third quarter. Hotel occupancy rates were also up, increasing from 70.3 percent in the third quarter of 2001 to 72.4 percent in the third quarter of 2002.

Hawaii construction industry activity continued to grow in the third quarter of 2002. The contracting tax base increased by 35.9 percent while total private authorizations increased 18.2 percent. As previously mentioned, construction jobs were up 4.9 percent.

Hawaii bankruptcy filings decreased by 4.8 percent in the third quarter of 2002. U.S. filings were at record numbers.

OUTLOOK FOR THE ECONOMY

At the end of the third quarter of 2002, the year-to-date indicators of the State of Hawaii's economy continued to be generally positive. Visitor arrivals continue to climb back toward pre-2001 levels, tax revenues are improving, and construction and home sales remain strong. These hopeful signs must, however, be weighed in conjunction with the sluggish conditions prevailing in the Mainland and Japan economies.

This set of Hawaii forecasts attempts to recognize current security uncertainties and concerns, but it was assumed that no new catastrophic event will occur to further retard the economic recovery.

Hawaii's recovery is expected to be related to the recovery of its visitor markets and of U. S. and international economic performance. The consensus projections of U.S. economic performance have continued to weaken during the last few months. The Blue Chip Economic Forecast, which is based on an average of 50 major U.S. forecasts, adjusted the forecast for growth in real U.S. GDP in 2002 downward in August from 2.8 percent to 2.3 percent and has maintained it at the 2.3 to 2.4 percent level through November. The Blue Chip Forecast for real U.S. GDP in 2003 has been reduced even more severely from 3.6 percent in July to 2.8 percent in November.

Expectations are for Japan's economy to remain weak. Japan's real GDP declined at a 0.2 percent rate in 2001. For 2002, the Blue Chip Forecast expects Japan's economy to show a further 0.7 percent decline in GDP recovering to a 0.9 percent increase in real GDP in 2003.

Even in light of slowing economic conditions, Hawaii visitor counts are expected to improve. In 2002, total visitor arrivals are predicted to grow 1.8 percent and visitor expenditures are forecast to increase 2.2 percent from their depressed state during 2001. The positive growth in visitor arrivals comes from the strong recovery of tourism from the Western U.S. Mainland offsetting reduced levels of visitors from Japan. Visitor arrivals are projected to approach 2000 levels in 2003 with a further 6.1 percent increase over 2002 and then return to their historical growth range of 2.1 to 2.5 percent per year in the 2004-2005 period.

Total wage and salary jobs in the State are now expected to finish 2002 at 0.5 percent below the 2001 total. This a reduction from the previous quarter's projection based on a weaker than expected third quarter employment rebound. Job growth is expected to be positive again in 2003 with a 1.6 percent growth rate.

After inflation, real personal income is forecast to show a 2.5 percent increase in 2002 and a 2.4 percent increase in 2003. This projection is up from the September forecast in response to a higher than expected second quarter estimate reported by the Bureau of Economic Analysis.

Honolulu's CPI is projected to remain low with a 1.2 percent increase in 2002 climbing to a 1.7 percent inflation rate in 2003. The projection for 2003 has been increased from the second quarter projection, because national price projections by Blue Chip and Anderson UCLA have been raised in recent months.

COUNTY ECONOMIC CONDITIONS

In the third quarter of 2002, the four counties showed some similarities related to their labor force and employment condition, but notable differences occurred with respect to job gains and losses by industry, visitor arrivals, and transient accommodations tax collections.

Among the general similarities is the ongoing labor force decline in all four counties. For the third quarter 2002 over the third quarter of 2001, the drop in Kauai County is the most pronounced at 2.5 percent (Table 5) followed by the City and County of Honolulu with a labor force decline of 1.9 percent (Table 2). The number of persons in the labor force in Hawaii County decreased by 1.4 percent (Table 3) and Maui County's labor force decreased by 0.4 percent (Table 4).

Civilian employment also remains down in all four counties in the third quarter of 2002. Employment declined the most on Oahu with a 1.8 percent decrease. Civilian employment showed more moderate declines in the other three counties in the third quarter falling by 0.9 percent in Kauai County, by .5 percent in Hawaii County and by 0.4 percent in Maui County.

The counties, like the state, all have higher unemployment rates in the third quarter of 2002 than they did in the third quarter of 2001. Unemployment was up significantly in Maui County, 1.7 percentage points to 6.4 percent. The other three counties' rates were up more moderately: Honolulu up 0.7 percentage points to 4.8 percent, Kauai County's rate up 0.5 percent to 7.0 percent, and Hawaii County's rate up 0.3 percent to 6.8 percent.

The counties are on different paths when it comes to job growth. Hawaii County has 300 more jobs in the third quarter of 2002 than it did in the third quarter of 2001. That is an increase of 0.5 percent. Increases in Construction, State government, FIRE, Health Services and Agriculture more than offset a large decline in Hotel jobs. Uniquely among the counties, Hawaii County had more Retail jobs than it did in the third quarter of 2001. Kauai County also saw an increase in total jobs. It was up 0.2 percent or 50 jobs. Construction, State and Local Government and Health Services gained more than was lost in Retail and Hotels.

Maui County was down about 250 jobs or 0.4 percent in the third quarter. Agriculture, Construction, S&L Government, and Health Services stayed positive for Maui. The City and County of Honolulu remains the hardest hit by the tourism slowdown losing almost 5800 jobs mostly in the Transportation, Retail and Hotel industries.

Visitor arrivals by air were above their third quarter 2001 levels in all counties except Honolulu during the third quarter of 2002. Arrivals increased Maui, Hawaii, and Kauai Counties (10.1, 4.1, and 0.9 percent respectively) and declined in the City and County of Honolulu (0.9 percent). Hotel occupancy rates were up in all counties.

General excise tax revenue growth was positive in all counties lead by the City and County of Honolulu at 18.1 percent. It should be noted, however, that the GET is reported by company headquarters and may not reflect economic activity in the county. Individual income tax collections were negative in all counties. The transient accommodations tax was up in all counties except Hawaii.

A. LABOR FORCE AND JOBS

Hawaii's civilian employment declined by 1.4 percent in the third quarter of 2002 from the third quarter of 2001 (Table A-2) or about 8,000 fewer persons employed. This third quarter decline followed a 1.0 percent decline in the second quarter of 2002. Hawaii's civilian employment is now at the same level it was in the third quarter of 2000.

Civilian labor force was also down, decreasing by 1.7 percent or 10,150 persons over the third quarter of 2001 (Table A-1). This was the second quarterly decrease in Hawaii's labor force. It is possible that part of the labor force increase observed during 2001 was related to Federal Welfare Reform. In November 2001, the 60-month limit on welfare benefits expired for those people who were receiving benefits at the December 1996 effective date of the reform program. Several thousand Hawaii residents would have been required to enter the labor force in advance of November 2001.

The number of unemployed was 2,100 or 7.5 percent fewer than the third quarter of 2001 (Table A-3). As a result of the number of unemployed declining by a greater percentage than the decline in the labor force, the unemployment rate declined from 4.6 percent to 4.3 percent from the third quarter of 2001 to the third quarter 2002 (Table A-4).

Total wage and salary jobs were down 1.0 percent measured year-to-year for the third quarter (Table A-5). The same three

industries that have accounted for most of the job losses since September 2001 continue to lead the overall decline in jobs. Between the third quarters of 2002 and 2001, Retail Trade is down 3,850 jobs (Table A-12), Transportation is down 3,250 jobs (Table A-9), and Hotel jobs are down 2,100 (Table A-16). These amounted to 3.3 percent, 9.9 percent and 5.4 percent decreases respectively from third quarter 2001, but all three industries have improved from the second quarter of 2002.

Several other industries showed negative job growth in the third quarter of 2002 compared to the same period in 2001. Jobs declined in Manufacturing (-2.2 percent, Table A-8); Communication (-6.3 percent, Table A-10); Utilities (-2.9 percent, Table A-11); and Wholesale Trade (-1.4 percent, Table A-13).

Private sector jobs increased in Construction, 4.9 percent (Table A-7); Finance, Insurance and Real Estate, 0.9 percent (Table A-14); Health Services, 2.3 percent; Business Services, 1.4 percent (Table 1); and Agriculture, 8.8 percent (Table A-20). Jobs increased in all three government sectors in the third quarter of 2002. Federal government jobs rose 1.0 percent from the third quarter of 2001 (Table A-17), State government jobs increased by 2.5 percent (Table A-18), and local government jobs increased by 0.9 percent (Table A-19).

1/ Second quarter data was revised by DLIR.

Source: Hawaii State Department of Labor and Industrial Relations, Unemployment Insurance Research Section.

B. INCOME AND PRICES

Personal income continued to grow at a moderate rate during the second quarter of 2002 (the period for which the latest data are available from the Bureau of Economic Analysis) measured over the second quarter of 2001. Transfer payments and other labor income showed the highest rates of increase followed by wages and salaries; proprietors' income; and dividends, interest, and rent. There were year-to-year quarterly increases in earnings for most industries, but Manufacturing; Transportation and Public Utilities; and Retail Trade showed decreases (Table B-1).

Nominal personal income, not adjusted for inflation, rose \$1.4 billion or 3.9 percent in the second quarter of 2002 compared to the second quarter of 2001 (Table B-2). The wage and salary component grew by about 650 million dollars or 3.3 percent in the second quarter of 2002 (Table B-3). Wages and salaries accounted for about 56 percent of personal income.

Other labor income, consisting of employer payments to retirement plans, private group health insurance plans, private workers compensation plans, and other such benefits, increased by 260 million dollars or 8.7 percent in the second quarter of 2002 compared to 2001 (Table B-4).

Proprietors' income, the income most closely related to entrepreneurial activity,

grew by \$79 million or 2.8 percent in the second quarter of 2002 compared to the second quarter of 2001 (Table B-5).

Dividends, interest, and rent rose by \$110 million or 1.6 percent in the second quarter of 2002 (Table B-6). Transfer payments, consisting largely of retirement and medical payments, grew by \$380 million or 8.8 percent for the quarter (Table B-7).

Private sector earnings increased across most industries. In dollar terms, the largest increases came in Services followed by Finance, Insurance and Real Estate and Construction (Table B-1). Earnings declined by 1.2 percent in Manufacturing; by 4.8 percent in Transportation and Public Utilities; and by 1.2 percent in Retail Trade. Earnings increased by 9.1 percent in the public sector, largely as a result of the 14.3 percent increase in the State and local government component.

The increases in personal income are enhanced by the low rate of inflation which exists in the Hawaii economy. The Honolulu consumer price index rose by only 1.1 percent in the first half of 2002 compared to the same period in 2001 (Table B-9). This was lower than was expected for Honolulu and also somewhat lower than the 1.3 percent inflation experienced on the Mainland during the period.

C. TAX REVENUES

State general fund tax revenues increased in the third quarter of 2002 over the third quarter of 2001, reversing the trend of declines in the first and second quarters. A substantial increase in general excise and use tax collections offset the continued slide in net individual income tax and net corporate income tax.

Tax revenues distributed to the State general fund were up 4.0 percent for the third quarter of 2002 over the third quarter of 2001 (Tables C-1 and C-2). Year-to-date (the first three quarters of 2002), total general fund revenues were down 3.8 percent from the comparable period in 2001.

It is likely that some of the year-to-date revenue decrease can be attributed to the increased filing thresholds for withholding, GET, transient accommodations (TAT), and rental motor vehicle and tour vehicle surcharge tax returns granted by Act 8 of the 2001 Special Session. The Tax Department estimated that Act 8 would allow 38,000 GET taxpayers, 8,000 withholding taxpayers, and 2,700 TAT taxpayers to file less frequently.

During the third quarter of 2002, GET revenues increased by 16.4 percent over the third quarter of 2001 (Table C-3). The \$473 million GET total was the most ever collected in a single quarter. Three of the GET tax base categories increased in the third quarter. Contracting was up by 35.9 percent (Table C-16), the Services tax base increased 13.2 percent (Tables C-15), and the Hotel Rentals tax base showed a 6.3 percent increase (Table C-17). The Retailing Tax base was the only GET category to decline. It fell 1.9 percent (Table C-14).

Revenues from the individual income tax decreased 8.0 percent in the third quarter

of 2002 over the same quarter in 2001 (Table C-4). Net individual income tax revenue is the sum of four components. The overall decline was the result of a decline in all three payment categories and an increase in refunds. The largest component, Withholding Tax on Wages, decreased by 2.9 percent (Table C-7) compared to the third quarter of 2001, Declaration of Estimated Taxes decreased 9.1 percent (Table C-5), and Payment with Returns decreased by 2.1 percent (Table C-6). A 59.8 percent increase in Refunds further contributed to the reduction in individual income tax collections (Table C-8).

Net corporate income tax revenue decreased by 62.0 percent in the third quarter of 2002 compared to the year-earlier quarter (Table C-9). This reflects a 28.6 percent decrease in Declaration of Estimated Taxes - Corporate (Table C-10) and a 2.5 percent decrease in Payment with Returns - Corporate (Table C-11). These declines were compounded by a 20.7 percent increase in Refunds (Table C-12).

TAT revenue increased 7.3 percent in the third quarter of 2002 (Table C-13). This increase is related both to a rise in the average daily visitor census, which was up 6.3 percent in the third quarter of 2002, (Table D-1) and an improvement in average room revenue per available room.

The current projection of the State General Fund by the Council on Revenues (COR), as of September 6, 2002, is for a 6.1 percent increase in fiscal 2003 over fiscal 2002. This projection is for lower fiscal 2003 general fund revenues than were forecast by the COR in May 2002.

D. TOURISM

In the third quarter of 2002, Hawaii's visitor industry continued its recovery from the effects of the September 11, 2001 attacks. Both the number of visitor arrivals and the average daily visitor census were up from the third quarter 2001. These quarterly increases resulted from the large increases that occurred in September 2002 compared with the reduced visitor levels of September 2001. Hotel occupancy rates also showed improvement for the quarter.

The number of visitor arriving by air was up 2.4 percent in the third quarter of 2002 from the third quarter of 2001 (Tables D-1 and D-2). This is about 40,000 more visitors than in the third quarter of 2001.

The overall quarterly increase was produced by a healthy increase in domestic arrivals. The number of travelers on domestic flights increased by 6.8 percent, while arrivals on international flights fell by 6.2 percent comparing the third quarter of 2002 to the third quarter of 2001 (Tables D-3 and D-4).

When the different major market areas are compared, the positive influence again comes from the domestic markets. The greatest increase was from the U.S. West that increased by about 47,000 visitors or 7.3 percent from the third quarter 2001 to the third quarter 2002 (Table D-5). Arrivals from the U.S. East were also up, increasing 3.6 percent or a little over 13,000 (Table D-6).

Visitors from Japan continued to decrease. In the third quarter of 2002, arrivals

from Japan were down by over 35,000 or by 8.1 percent from the third quarter of 2001 (Table D-7). Visitor arrivals from Japan have been declining for several years already as a result of the recession in the Japanese economy and the weakening Yen. That decline was accelerated by the events of September 11, 2001.

Average daily visitor census numbers followed the same pattern as visitor arrivals in the third quarter of 2002. For domestic visitors, those arriving on flights from U.S. mainland airports, average daily visitor census was up 9.7 percent, but it was down 3.5 percent for international visitors (Tables D-9 and D-10). This produced an increase in total visitor census of 6.3 percent (Table D-8). The average daily census reflects both arrivals and length of stay. Average length of stay increased slightly for domestic visitors and international visitors in the third quarter (DBEDT Monthly Visitor Statistics).

Hotel occupancy rates rose slightly from 70.3 percent in the third quarter of 2001 to 72.4 percent in the third quarter of 2002 (Table D-11).

Readers interested in reviewing visitor statistics on a monthly basis can find them at <http://www.hawaii.gov/dbedt/monthly/index.html>.

Readers interested in reviewing the most recent daily passenger arrival data can find them at <http://www.hawaii.gov/dbedt/special/index.html>.

E. CONSTRUCTION

Indicators of Hawaii construction industry activity were generally positive in the third quarter of 2002. The contracting tax base and the value of government contracts awarded increased dramatically. Although less pronounced, private building authorizations also showed a healthy increase in the third quarter of 2002 compared to last year's third quarter level.

The contracting tax base, which measures construction activity subject to the general excise tax, increased by 35.9 percent from the third quarter of 2001 to the third quarter of 2002 (Table E-1). GET was paid on \$1,213.7 million worth of construction in the third quarter of 2002.

Government contracts awarded were up a substantial 126.1 percent from the third quarter of 2001 to the third quarter of 2002 (Table E-1). State Capital Improvement Project expenditures (CIP) were up for the third quarter by 6.6 percent over the third quarter of 2001 (Table E-11). Most of the CIP expenditure was from General Obligation bond funds, but large shares were also from Special Funds and Federal Funds.

The value of residential building permit authorizations was up 35.3 percent statewide for the third quarter of 2002 (Table E-1). The number of single-family unit authorizations was up 24.2 percent (Table E-2). Multi-family units authorized were up 16.7 percent, but they account for a small share of the current residential construction market (Table E-3). Total private building permit authorizations for the State are up 18.2 percent for the third quarter of 2002. (Beginning in the first

quarter of 2002, Kauai permit-value data are only for residential.) Honolulu's total private authorizations are up by 42.3 percent from the third quarter of 2001, Hawaii County authorizations increased 8.7 percent, Maui County was down 3.2 percent and Kauai residential was down 20.1 percent (Table E-6).

Median sale price for single family and condominium resales in Honolulu both continued to increase in the third quarter of 2002 over the third quarter of 2001. Single-family median value was up 12.4 percent to \$345,000 (Table E-7) and the median Honolulu condo price was up 15.7 percent to \$155,000 (Table E-8). The number of single-family units resold increased by 11.2 percent (Table E-9) while the number of condo unit resales was up 29.8 percent (Table E-10).

Wage and salary jobs in the construction industry increased statewide in the third quarter compared to 2001. Construction jobs were up 4.9 percent from the third quarter of 2001 to the third quarter of 2002 (Table 1, Table A-7). Construction jobs continued to grow in all counties: Hawaii County (9.7 percent, Table 3), Kauai County (9.5 percent, Table 5), Maui County (6.9 percent, Table 4), and the City and County of Honolulu (3.0 percent, Table 2).

In the third quarter of 2002, the Honolulu Construction Cost Index for Single Family Residences increased by 5.0 percent over the third quarter of 2001 (Table E-4). The comparable index for high-rise buildings rose by 3.7 percent (Table E-5).

F. OTHER INDICATORS

Hawaii bankruptcy filings declined in the third quarter of 2002 over the third quarter of 2001. This decrease continued the direction set in the first quarter of 2002 which had the first decline in bankruptcies in a year. For the second straight quarter, filings declined in all three Chapters.

The total number of bankruptcy filings decreased by 4.8 percent in the third quarter 2002 compared to the third quarter of 2001 (Table F-1).

Chapter 7 filings, the largest category, are up slightly in Hawaii from the second quarter of 2002, but they are down from the previous third quarter by 2.4 percent. Chapter 7 filings are intended to liquidate assets and discharge debt to provide the debtor with a fresh start. Individuals are allowed to keep certain exempt property while the remaining property is sold to pay creditors.

Chapter 11 filings decreased from 11 filings in the third quarter of 2001 to 4 filings

in the third quarter of 2002 for a decrease of 63.6 percent. Chapter 11 filings involve the structuring of repayment plans for companies.

Chapter 13 filings decreased 20.8 percent in the third quarter of 2002 over the third quarter of 2001. Chapter 13 bankruptcy allows debtors to work out repayment arrangements with creditors.

The decrease in Hawaii bankruptcy filings ran counter to the increase in filings for the nation as a whole. U.S. bankruptcy filings were up 11.6 percent for the third quarter of 2002 compared with the third quarter 2001. This increase made it a historic high for filings in any quarter, surpassing the previous quarter which had set the all-time high. The twelve-month period ending September 30, 2002 was the worst twelve-month period on record for U.S. bankruptcies, up 7.7 percent to 1.55 million. Quarterly U.S. bankruptcy statistics can be found at:

http://www.uscourts.gov/Press_Releases/cy302bk.pdf.

III. TERMS AND DEFINITIONS

Agriculture Wage and Salary Jobs – Full- and part-time jobs for which payment was made by the employer in the survey week containing the 12th of the month. Includes farm jobs and machinery operators. Closely related management and services jobs are included for sugar and pineapple but are excluded for other types of agriculture.

Average Daily Visitor Census- By Air – Average number of visitors present daily in the state. Figures are computed monthly by the Research & Economic Analysis Division, DBEDT based on arrival and departure dates from ground and in-flight surveys.

Average Length of Stay- By Air – Number of days visitors are in the State including the day of arrival and of departure.

Bankruptcy Filings –

Chapter 7 – Is available to both individuals and business debtors. Its purpose is to achieve a fair distribution to creditors of whatever non-exempt property the debtor has and to give the individual debtor a fresh start through the discharge in bankruptcy.

Chapter 11 – Is available for both consumer and business debtors. Its purpose is to rehabilitate a business as a going concern or reorganize an individual's finances through a court-approved reorganization plan.

Chapter 12 – Is designed to give special debt relief to a family farmer with regular income from farming.

Chapter 13 – Is available for an individual with regular income whose debts do not exceed specific amounts, typically used to budget some of the debtor's future earnings under a plan through which creditors are paid in whole or in part.

Additional information may be found at the American Bankruptcy Institute "Bankruptcy Chapters" website <http://www.abiworld.org/media/chapters.html>

Chained (1996) dollar Gross State Product (GSP) series are calculated (using national chain-type implicit price deflators) as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive; that is, state totals usually do not add to regional totals or to U.S. totals, and regional totals usually do not add to U.S. totals.

Civilian Employment – Persons 16 years of age or older who, during the survey week containing the 12th of the month, were either at work for pay or profit, or worked without pay for 15 hours or more on a family farm or business, or were with a job but not at work. Both permanent and temporary employees and those who are working either full- or part-time are included.

Civilian Labor Force – Total of employed and unemployed persons, excluding those in the armed forces and 16 years of age or under. U.S. Census Bureau does surveys for the U.S. Bureau of Labor Statistics.

Civilian Unemployment – Persons 16 years of age or older who (1) did not work at all during the survey week but were actively seeking work and were available for work; or (2) did not work at all, were available for work, and were waiting to be called back from layoff or were waiting to report to a new wage or salary job within 30 days.

Condominium Resales: Consists of resales of condominium, duplexes and townhomes that are entered in the Multiple Listing Service. It does not include apartments.

Consumer Price Index: Honolulu or U.S. – Measure of the average change in prices over time for a fixed market basket of goods and services. It is compiled by the U.S. Bureau of Labor Statistics. The index measures changes from a reference date, i.e., 1982-84, which is designated as 100.0. For example, a Honolulu CPI-U (where U refers to All Urban Consumers), All Items, of 171.5 as the annual average for 1998 indicates the average prices of that group's basket was 71.5 percent higher than the weighted average of those same goods and services in 1982-84. Data are published monthly for the U.S. and semi-annually for Honolulu. As of January 1998, BLS changed the reference basket based on 1982-84 consumer expenditures to a 1993-95 basket, but the base remains 1982-84 = 100.0. The BLS Internet site has more information about the CPI at <http://www.bls.gov/cpi/home.htm>.

Contract Construction Jobs – Jobs held by any person engaged in construction, repairing, erecting, or improving buildings or structures of any type or description, and any installations therein. Such construction includes not only residential and non-residential building projects, both private and public, but also highway and road construction, street and

sidewalk construction, repair, excavations, bridges, docks, and other heavy construction projects.

Contracting Tax Base – The total receipts of businesses engaged in contracting to erect, construct, repair, or improve buildings or structures of any kind or description, or to make any installation therein. Attributed to any business engaging in the practice of architecture, engineering, land surveying, landscape architecture, and the practice of pest control or fumigation.

Dividends, Interest, and Rent – U.S. Bureau of Economic Analysis presents the State Personal Income estimates of these components together. It consists of income received by individuals and on behalf of individuals by private and government employee retirement plans and by quasi-individuals, including non-profit institutions and private trust funds administered by fiduciaries. Personal dividend income is payments in cash or other assets by corporations in the U.S. or abroad to noncorporate stockholders who are Hawaii residents. Personal interest income is the interest income (monetary and imputed) from all sources that is received by individuals, by private and government employee retirement plans, by nonprofit institutions, and by estates and trusts. Rental income of persons with capital consumption adjustment is the net current-production income of persons from the rental of real property except for the income of persons primarily engaged in the real estate business; the imputed net rental income received by owner-occupants of farm-dwellings; and the royalties received by persons from patents, copyrights, and rights to natural resources. The estimates include BEA adjustments for uninsured losses to real estate caused by disasters, such as hurricanes (e.g. Iniki in 1992) and floods. See [Personal Income](#).

Earnings – This BEA aggregate is the sum of three components of personal income: wages and salary disbursements, other labor income, and proprietors' income. BEA presents earnings because it can be used in analyses of regional economies as a proxy for the income generated from participation in current production. See [Personal Income](#).

Federal Government Jobs – Includes those in the civilian agencies, i.e. Department of Defense, Agriculture, United States Postal Service and the various armed services exchange systems.

General Excise (Gross Income) Tax – Tax charged to businesses on gross sales or gross income. The tax rate is 0.5 percent on wholesaling and intermediary services, blind vendors, producing, manufacturing,

sugar processing and pineapple canning; all other activities (retailing, business and professional services, contracting, theater, amusement, radio, interest, commissions, rentals) are taxed at 4.0 percent, except insurance commissions to general agents, subagents and solicitors, who are taxed at 0.15 percent.

General Excise and Use Tax Base – The value of all goods and services sold, including the value of tangible personal property imported into Hawaii for own use or consumption. One of the most comprehensive measures of business activity in the state.

General Fund Tax Revenues – Receipts of the general excise and use tax, and net individual and corporate income taxes. The general government fund used to account for all financial resources except those required to be accounted for in another fund, such as the highway, airport or capital improvement fund.

Gross State Product (GSP) – GSP is the value added in production by the labor and property located in a state. GSP for a state is derived as the sum of the GSP originating in all industries in the state. The estimates of real GSP are derived by applying national implicit price deflators by detailed industry to the current-dollar GSP estimates by detailed industry. Then, in order to capture the differences across states that reflect the relative differences in the mix of goods and services that the states produce, the same chain-type index formula used in the national accounts is used to calculate the estimates of total real GSP and real GSP by major industry.

Honolulu Construction Cost Indexes: High-Rise or Single Family – As compiled, by First Hawaiian Bank, and currently by DBEDT, these indexes measure changes in contractors' costs for building materials and labor. For discussion of Methodology, see [Hawaii's Economy May 2000](#) at <http://www.hawaii.gov/dbedt/hecon/he5-00/index.html>.

Hotel Jobs – Jobs in hotels, rooming houses, camps, and other lodging places.

Hotel Occupancy Rate – The percentage of occupied rooms in a hotel. Hotel occupancy rates depend not only on the number of visitors and their length of stay, but also on the hotel room inventory, e.g., a large increase in new hotel units results in a drop in occupancy rates, until such time as visitor traffic builds up enough to fill them. Rates are obtained from a sample survey conducted on a monthly basis.

Hotel Rental Tax Base – is the economic base from which all hotel business activity is taxed. It includes the furnishing of temporary accommodations in a hotel, or other place in which lodgings are regularly furnished to transients for compensation.

Implicit Price Deflator – The implicit price deflator is calculated as the ratio of the current-dollar value to the corresponding chained-dollar value multiplied by 100. **OR** Implicit price deflators are weighted averages of the detailed price indexes used to prepare each aggregate and component and are calculated as the ratio of current- to chained-dollar output multiplied by 100.

Initial Agent Claims – Notices of unemployment filed against another state by its workers who have moved to Hawaii.

Initial Liable Claims – Notices of unemployment filed against Hawaii by Hawaii workers who have moved to another state.

Local Government Jobs – Includes those in the county governments.

Manufacturing Jobs – Jobs in manufacturing industries, or those activities by any person or establishment that buys materials, performs work on such materials, and changes such materials into a finished or semi-finished product. Includes compounding, canning, preserving, packing, printing, publishing, mailing, processing, refining, or preparing for sale, profit, or commercial use, either directly or through the activity of others, in whole or in part, any article, substance, or commodity such as textiles, apparel, printing, publishing, food processing, and durable goods

Net Earnings – BEA also calculates this measure as Earnings less Personal Contributions for Social Insurance. Net earnings is used in the presentation of State and local area personal income as the sum of net earnings, transfer payments, and personal dividend income, personal interest income, and rental income of persons. It can be used as a proxy for income before taxes. See [Personal Income](#).

Net Individual or Corporation Income Tax Revenue – For individuals, it is calculated as declaration of estimated taxes plus payments with returns plus withholding tax on wages less refunds. Net corporate income tax revenue is calculated as declarations of estimated taxes plus payments with returns less refunds.

Non-Agriculture Wage and Salary Jobs – Derived monthly from a sample survey of employers reporting the number of persons who received pay for any part of the pay period containing the 12th of the month. Includes all full- and part-time non-agricultural workers, permanent and temporary workers, and workers on paid sick leave and paid vacation.

Other Goods and Services – Honolulu Consumer Price Index component detail. Prior to the CPI 1998 Revision, it measured the change in average prices of tobacco products, personal care goods and services, and personal and educational expenditures. Beginning with January 1998 data, this category includes tobacco, personal care, and miscellaneous goods and services. Other components, for example, schoolbooks and tuition, moved to the new “Education and Communication” and recreational reading to “Recreation”. BLS’ *Monthly Labor Review* (December 1996), and BLS’ Internet site have more information about the CPI at <http://www.bls.gov/cpi/>.

Other Labor Income – This component of BEA Personal income consists of employers’ payments to private and government employee retirement plans, private group health and life insurance plans, privately administered workers’ compensation plans, and supplemental unemployment benefit plans; and of several other minor categories, including judicial fees to jurors and witnesses, compensation of prison inmates, and marriage fees to justices of the peace. See [Personal Income](#).

Personal Contributions for Social Insurance – This BEA aggregate which is subtracted in the calculation of personal income consists of the contributions, or payments, by employees, by the self-employed, and by other individuals who participate in the following government programs: Old-age, survivors, and disability insurance (social security); hospital insurance; supplementary medical insurance; unemployment insurance; railroad retirement; veterans life insurance; and temporary disability insurance. See [Personal Income](#).

Personal Income –Income received by persons for participation in production, from government and business transfer payments, and from government interest (treated like a transfer payment by the Bureau of Economic Analysis). It is calculated as the sum of wage & salary disbursements, other labor income, proprietors’ income with inventory valuation and capital consumption adjustments, rental income of persons with capital consumption adjustment, personal dividend income, personal interest income, and transfer payments to persons, less personal

contributions for social insurance. For additional information see <http://www.bea.doc.gov/bea/regional/spi/>

Proprietors' Income – This component of BEA Personal income is the current-production income (including income in kind) of sole proprietorships, partnerships and cooperatives. Corporate directors' fees and the imputed net rental income of owner-occupants of farm dwellings is included in proprietors' income but the imputed net rental income of owner-occupants of nonfarm dwellings is included in rental income of persons. Proprietors' income excludes dividends and monetary interest received by nonfinancial business and rental incomes by persons not primarily engaged in the real estate business; these incomes are included in dividends, net interest, and rental income of persons, respectively. See [Personal Income](#).

Retail Tax Base – includes the general excise tax base on retailing. Retail sales include sales for consumption or use by the purchaser and not for resale. The general excise tax at the retail level (4%) is sometimes loosely called a sales tax. However, it differs from a typical sales tax in two respects: (1) it is a tax on the gross income of the seller rather than a tax on the purchase price of the buyer; (2) the retail excise tax in Hawaii applies to all retail sales (both goods and services) whereas most Mainland sales taxes exempt some commodities such as food and services.

Retail Trade Jobs – Jobs in those establishments that are engaged in sales of tangible personal property to the customer for use or consumption and not for resale.

Services Jobs – Jobs in those activities that are engaged in for other persons for a consideration that involve the rendering of a service as distinguished from the sale of tangible property or the production and sale of tangible property. Includes all professional services.

Services Tax Base – includes tax base data on establishments primarily engaged in providing a wide variety of services for individuals, business and government establishments, and other organizations; hotels and other lodging places; establishments providing personal, business, repair, and amusement services; health, legal, engineering, and other professional services; educational institutions; membership organizations and other miscellaneous services.

Single Family Home Resales: Consists of resales of single family homes that are entered in the Multiple Listing Service.

State Government Jobs – Education includes all employees under the Department of Education (DOE) and the University of Hawaii System. This includes public library personnel, substitute teachers who received pay during the pay period including the 12th of the month, and support personnel such as cafeteria workers, classroom cleaners, and school security attendants. Also included are part-time employees in special programs such as the A+ After School.

State Government Jobs – Non-Education - Includes all other executive branch departments (i.e. Agriculture, Transportation, etc.), the legislative and judicial branches, and the Research Corporation of the University of Hawaii (RCUH).

Total Wage and Salary Jobs – includes nonagricultural wage and salary workers and agriculture wage and salary workers. Persons on the payroll of more than one establishment during the pay period are counted in each establishment that reports them.

Transfer Payments – As a component of Personal Income, these are payments for which no current services are performed. It consists of payments to individuals and to nonprofit institutions by Federal, State and local governments and by businesses. Government transfer payments to individuals includes retirement and disability insurance payments (mainly Medicare and Medicaid), income maintenance benefits, unemployment insurance benefits, veterans benefits, and Federal grants and loans to students. Government transfer payments to nonprofit institutions excludes payments by Federal Government for work under research and development contracts. Business transfer payments to persons for personal injury and of corporate gifts to nonprofit institutions. See [Personal Income](#).

Transient Accommodations Tax – Tax levied on resort time-share vacation units and the furnishing of a room, apartment, suite which is customarily occupied by a person or group for fewer than 180 consecutive days by a hotel, apartment, motel, or cooperative apartment, rooming house, or other place in which lodgings are generally furnished to transients. The tax as of January 1, 1999 is imposed at the rate of 7.25 percent and the tax base includes time-share units.

Unallocated General Excise & Use Tax Revenues – General excise and use tax revenues that could not be allocated to specific activities of the general excise & use tax. It also includes collections from penalty and interest, assessments and corrections, delinquent collections, refunds, protested payments, settlements, etc.

Unemployment Rate – Ratio of unemployed persons to the civilian labor force expressed as a percentage.

Use Tax – Excise tax levied on tangible personal property that is imported or purchased from an unlicensed seller for use in the state. The tax is based upon the purchase price or value of the tangible personal property purchased or imported, whichever is applicable. Rates: 0.5 percent, if for resale at retail; 4.0 percent, if for use or consumption.

Visitor Arrivals- By Air, Total – All persons who stayed in Hawaii for a period between one night and one year.

Domestic Visitor Arrivals – Visitors who stayed in Hawaii for at least one night but less than one year, arriving on flights from Mainland U.S. A foreign resident arriving in Hawaii on a flight directly from the U.S. Mainland is counted as a domestic visitor.

International Visitor Arrivals – Visitors who stayed in Hawaii for at least one night but less than one year arriving on flights from foreign countries. An U.S. resident arriving in Hawaii on a flight directly from a foreign country is counted as an international visitor.

Wages and Salary Disbursements– This component of Personal Income consists of the monetary remuneration of employees, including the compensation of corporate officers; commissions, tips, and bonuses; and receipts in kind, or pay-in-kind, such as the meals furnished to the employees of restaurants. It reflects the amount of wages and salaries disbursed, but not necessarily, earned during the year. See [Personal Income](#).

Wholesale Trade Jobs – Jobs in those establishments whose sales of tangible personal property is to licensed persons for resale or incorporation into a product or project, and sales to certain leasing companies.
