

**Table 13.02-- GROSS DOMESTIC PRODUCT, TOTAL AND PER CAPITA
AND RESIDENT POPULATION: 1963 TO 2021**

[The Standard Industrial Classification (SIC) 1972 is the basis for 1963 to 1986 and the 1987 for 1987 to 1997. The North American Industry Classification System (NAICS) 2012 is the basis for 1997 to 2020. Gross Domestic Product and per capita 1997 to 2020 and population 2010 to 2020 estimates are revised from previous *Data Book*]

Year and category	Total		Per capita		Resident population 2/
	Current dollars (\$M.)	Chained 1997 dollars (\$M.) 1/	Current dollars 2/	Chained 1997 dollars 1/

2021	90,059	73,880	62,474	51,250	1,441,553

NA Not available.

1/ Real GDP is an inflation-adjusted measure of each state's gross product that is based on national prices for the goods and services produced within that state.

2/ U.S. Census Bureau midyear population estimates as available as of December 2021. BEA produced intercensal annual state population statistics for 2010 to 2019 that are tied to the Census Bureau decennial counts for 2010 and 2020 as the Census Bureau has not yet produced these data. 2020 and 2021 are Census-released state population data which are based on the 2020 decennial counts.

3/ There is a discontinuity in the GDP time series at 1997, where the data change from Standard Industrial Classification (SIC) industry definitions to North American Industry Classification System (NAICS) industry definitions. This discontinuity results from many sources, including differences in source data and different estimation methodologies. This data discontinuity may affect both the levels and the growth rates of the GDP estimates. Users of the GDP estimates are strongly cautioned against appending the two data series in an attempt to construct a single time series of GDP estimates for 1963 to 2021.
