

**Table 1.04-- RESIDENT AND DE FACTO POPULATION, BY RESIDENCE
STATUS: 2010 TO 2023**

[As of July 1. The de facto population is defined as the number of persons physically present in an area, regardless of usual place of residence. It includes visitors present but excludes residents temporarily absent, both calculated as an average daily census. The estimates in this table may differ from earlier figures due to revised population and visitor estimates released during the year]

1/ The resident population is defined as the number of persons whose usual place of residence is in an area, regardless of physical location on the estimate or census date. It includes military personnel stationed or homeported in the area and residents temporarily absent, but excludes visitors present.

2/ Average daily census of visitors who came by air or by ship.

Source: De facto population are DBEDT estimates based on population estimates by the U.S. Census Bureau (the intercensal population estimates for 2010-2019 and the Vintage 2023 population estimates for 2020-2023), and visitor data from *Annual Visitor Research Report and records, DBEDT tourism research*.
