

SECTION 6

Land Use and Ownership

General statistics on the use and ownership of land appear in this section. Information on specific use or ownership categories, such as farms, parks, or military land, is given elsewhere.

Out of 4,050,176 acres on the six largest islands of the State, only 155,705 are in urban use. The largest uses are grazing (1,150,534 acres), forest reserve (1,190,954), and *pali* or other barren land (503,308).

Approximately half of the 55,000 acres in Honolulu were unused open space when last surveyed in 1964; the second largest category at that time was residential use, with over 7,700 acres. Approximately 10 percent of the land in the State is owned by the Federal government, 39 percent by State government, 47 percent by major private owners (those with 1,000 or more acres), and less than 6 percent by small landowners.

Reports of the Congressional Committee on Government Operations, University of Hawaii Land Study Bureau and Legislative Reference Bureau, and Oahu Transportation Study provided the data for this section. Statistics for the Mainland are available in Sections 7 and 23 of the *Statistical Abstract of the United States: 1969*.
