

SECTION 14

WELFARE SERVICES

This section presents data on government and private programs for social insurance and public welfare.

Total public welfare costs reached \$67,645,000 in fiscal 1971, compared with \$9,489,000 in 1961 and \$1,401,000 in 1941. About 59 percent of the 1971 total came from State funds and the remainder from the Federal government. The average monthly payment for public assistance was \$198. Among workers receiving unemployment compensation, weekly benefits averaged \$50. More than 66,000 Hawaii residents received Social Security benefits as of the end of 1970. Expenditures of the Aloha United Fund amounted to \$4.6 million in 1971.

Major data sources include reports of the U.S. Department of Health, Education, and Welfare, the U.S. Department of Labor, the Hawaii State Department of Social Services and Housing, and the Hawaii State Department of Labor and Industrial Relations. Section 10 of the *Statistical Abstract of the United States: 1971* presents comparable Mainland data.

¹Based on civilian population at beginning of fiscal year; for example, per capita costs for 1940 are based on estimated civilian population as of July 1, 1939. Population from the Hawaii State Department of Planning and Economic Development, Statistical Reports 81 (table 2) and 86 (table 2).

²Expenditures by the Department of Public Welfare or Department of Social Services and Housing. Beginning in 1944, the Department's program was limited to payment of hospital care, dental care and burial, and County departments were authorized to provide medical care. In 1952 responsibility for medical care was transferred to the Department of Health and the Department of Public Welfare participated in "Premium Payment Plan" for indigents only for hospital care in order to obtain Federal funds. Effective January 1960, the Medical Care Program for Indigents and Medically Indigents was established under the Department of Social Services, and the Department of Health and County departments were no longer responsible.
