This report was prepared by Robert C. Schmitt, State Statistician, with the assistance of Lynn Y.S. Zane, Research Statistician, both of the Statistics Branch in the DPED's Research and Economic Analysis Division headed by Dr. Richard Y.P. Joun. Editing, proofreading and printing arrangements were handled by the DPED's Information Office. Maps were prepared by the DPED's Planning Division.

Copies of this report may be obtained for \$4.00 each from the Information Office on the 7th floor of the Kamamalu Building, 250 South King Street, Honolulu, or ordered from out of State by sending \$5.00 per copy (postpaid) to the DPED Information Office, P.O. Box 2359, Honolulu, Hawaii 96804.

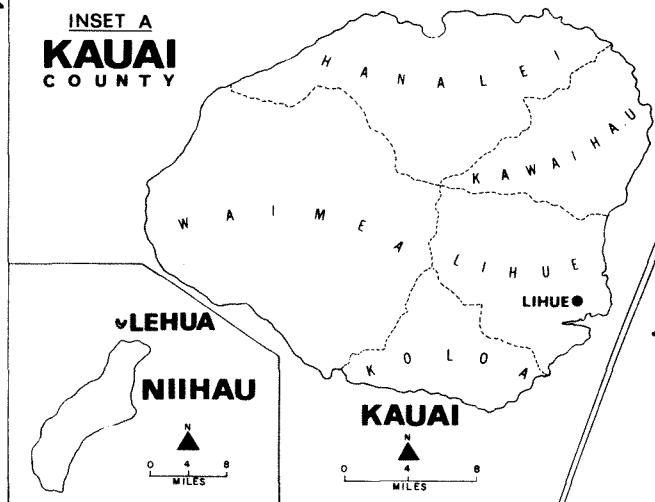

FOREWORD

By George R. Ariyoshi
Governor, State of Hawaii

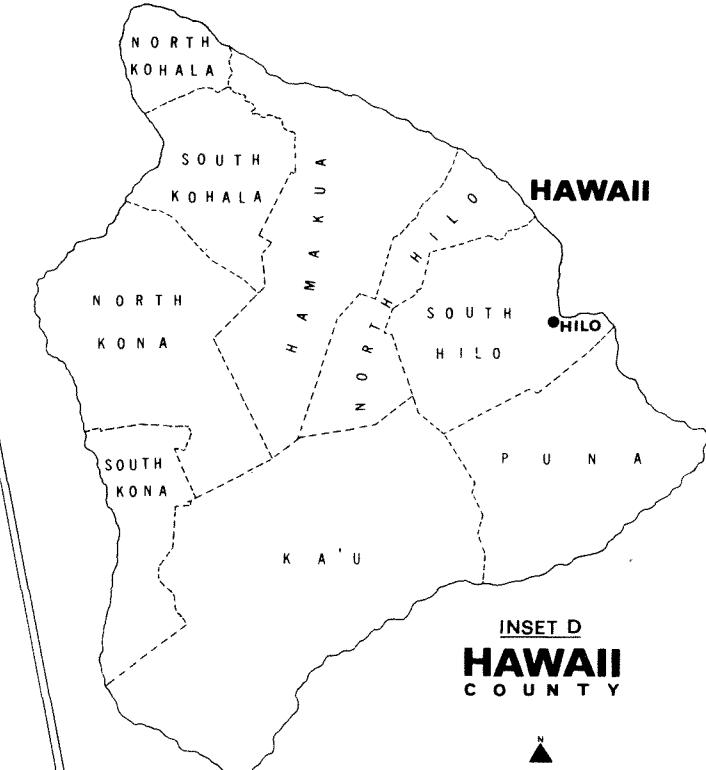

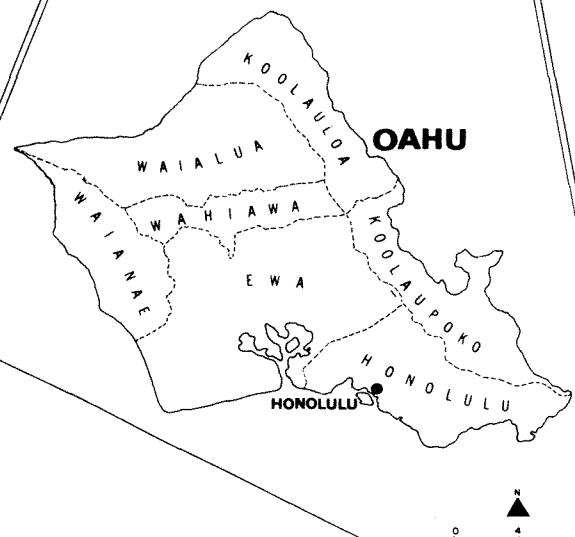

Accurate, timely and substantial information is essential to sound decision-making. The State of Hawaii has long recognized that orderly State growth and planned prosperity require a continuing, efficient organization of statistical data and other information into forms which are easily used and readily available to all who need them. This *State of Hawaii Data Book 1978* is the latest example of the State Administration's constant effort to provide and improve this important service to Hawaii's citizens.

The *Data Book* is invaluable for Government administrators. It is vital to all agencies, companies, organizations and individuals who carry out a great variety of forms of research in the Islands and overseas. It is very useful to other citizens who have only an occasional need for accurate statistics. It is a book which, thanks to the professionalism of its compilers, can be depended upon, and upon which thousands do depend. And it is only one—although perhaps the best one—of a large number of excellent data sources which Hawaii makes available.

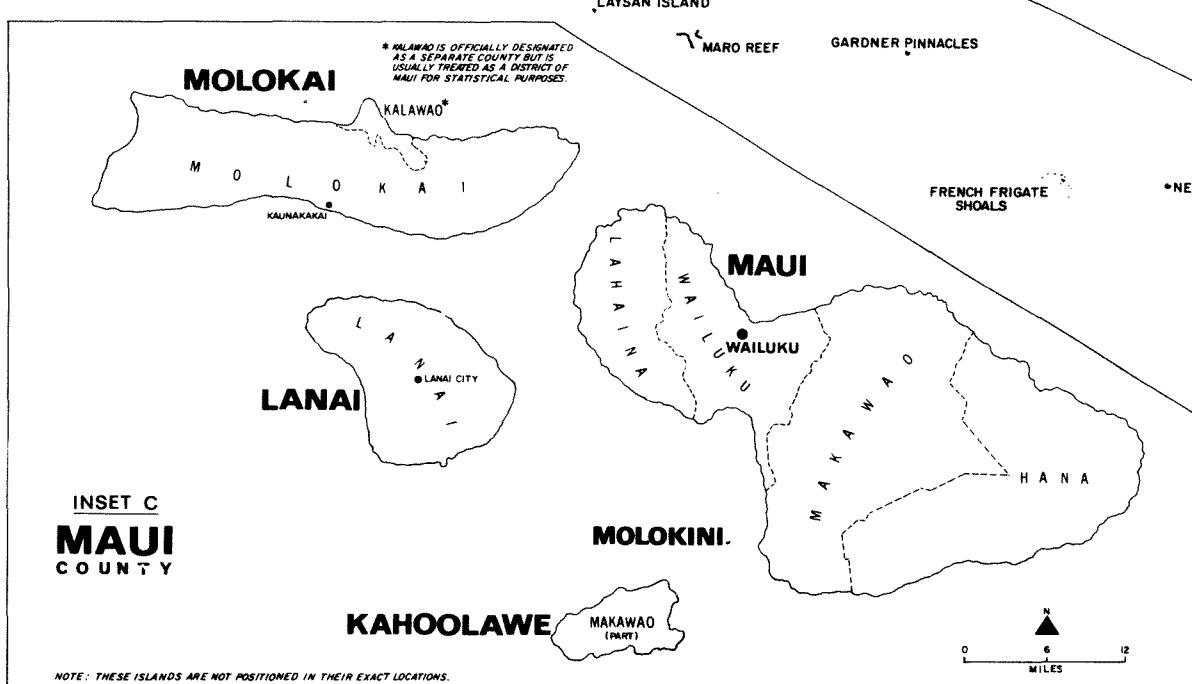

Through such reference works, Hawaii is able to go about its myriad tasks with confidence that its information base is sound. The *State of Hawaii Data Book 1978* is one of many proofs we have that our people know what they are doing, and where they are going, and are reasonably certain they can achieve their goals.

INTRODUCTION

By Hideto Kono, Director
Department of Planning and Economic Development

The State of Hawaii Data Book: A Statistical Abstract is intended to serve as the standard official summary of statistics on the social, economic, and political organization of the State. Like its long-established counterpart, the *Statistical Abstract of the United States*, it may be used as either a convenient volume of statistical reference or a guide to other statistical publications and sources.

The present volume, containing statistics available in the summer of 1978, is the twelfth such abstract to be published by the State of Hawaii. Earlier editions appeared in 1962, 1967, 1968, and annually beginning in 1970. All are now out of print, but copies can be seen in many high school, university, and public libraries in Hawaii.

The *Data Book* closely follows the organization and format of the U.S. *Abstract*, in order to facilitate comparison of Hawaii data with corresponding series for the nation and other jurisdictions.

Emphasis in the *Data Book* is given to the most recent available State data. Historical statistics and information for counties, islands, urban places, and smaller areas receive more limited attention. The publications cited as sources in the introductions to the various sections or at the end of each table usually contain additional statistical detail and a more comprehensive discussion of relevant definitions and concepts than can be presented here. Persons interested in more extensive information should consult these sources or write to the agencies responsible for them.

Many Federal, State, County and private organizations cooperated in the preparation of this report. These agencies are credited in the source references to the tables to which they contributed. Their assistance is gratefully acknowledged.

GUIDE TO TABULAR PRESENTATION

The tables in this report generally follow the principles of tabular presentation used by the U.S. Bureau of the Census in its annual publication, *Statistical Abstract of the United States*, and described in *Bureau of the Census Manual of Tabular Presentation*, published by the Bureau in 1950. These principles have been accepted by the Department of Planning and Economic Development for use in its publications and recommended to all other State agencies for official use.

Elements common to statistical tables include the table number and title, headnote, boxhead (often consisting of both spinner and column heads), stub, field, footnotes and footnote indicators, and source reference. These elements appear in the following example:

Table number and title

Parallel rules

Parallel rules

Footnote ¹ Includes Kalawao County.

Source reference Source: Hawaii State Department of Taxation, *Real Property Tax Valuations and Tax Rates* (annual release).

Headnotes immediately below table titles provide information important for correct interpretation or evaluation of the table as a whole or for a major segment of it.

Unit indicators ("In thousands," "In millions of dollars," etc.) are usually given as the first element of the headnote. In tables where several units are used, the unit indicators are generally given in the stub or in the column headings.

Footnotes below the bottom rule of tables give information relating to specific items or figures within the table.

Parallel vertical rules are used to the right of a total column to indicate—

(1) that the components which follow add to the total;

(2) in the case of derived figures, that the underlying data are additive to their total.

The following symbols, used in the tables throughout this book, are explained in condensed form in footnotes to the tables where they appear:

- Represents zero or rounds to less than half the unit of measurement shown.
- D Figure withheld to avoid disclosure of information pertaining to a specific organization or individual.
- NA Data not enumerated, tabulated, or otherwise available separately.
 - ... Same as NA; used in tables in which a large number of cells lack data.

In many tables, (such as the table illustrated), details will not add to the totals shown because of rounding.

Median: The value which divides the distribution into two equal parts—one-half the cases falling below this value and one-half exceeding it.

Geographic coverage should be understood as Statewide, unless otherwise indicated in the table title, headnote, boxhead, or stub. All annual statistics should be understood as referring to calendar years unless otherwise indicated.

Section 1

POPULATION

This session presents statistics on the growth, geographic distribution, and characteristics of the population of Hawaii, and on the number and characteristics of migrants to and from the State.

Preliminary estimates for mid-1978 indicate a resident population of 896,700. This total includes approximately 58,300 members of the armed forces and 61,100 of their dependents. It excludes an average of 96,500 visitors who were present in 1978, while including an average of 8,300 residents who were temporarily out of the State. The total population has risen from 154,000 in 1900 and 423,000 in 1940 (although a wartime peak of 859,000 was reached in 1944). Approximately 80.9 percent of the 1977 total lived on Oahu, giving that island a density of 1,311 persons per square mile. The population is young — 50 percent were under 25 years of age in 1970 — and racially diversified. The major unmixed groups are Caucasians (27.7 percent of the non-barracks, non-institutional population) and Japanese (26.6 percent). In addition, 25.6 percent are of mixed race, primarily part Hawaiian. Migration has been a major factor in the growth of the population: between 1970 and 1977, there was a net in-migration (excluding military personnel and dependents) of 59,600, accounting for almost half of the total civilian population growth during that time. Intended residents arriving aboard westbound civilian carriers in 1977 numbered 43,600, of whom 25,100 were military personnel and dependents and 18,500 were other civilians. Immigrant arrivals in fiscal 1976 totaled 7,800, mostly from the Philippines and Korea.

The comparison of demographic data from different sources is often complicated by the use of differing definitions and coverage. Some series, for example, refer to resident population, while others pertain to de facto population; the latter includes visitors present but excludes residents temporarily absent. Total population includes armed forces stationed in an area, as well as their dependents in the area; civilian population excludes military personnel but includes their dependents. Perhaps the greatest confusion is that resulting from the arbitrary allocation of persons of mixed race in the 1970 U.S. Census. Such groups were shown separately in earlier censuses, and are still reported separately in data issued by State agencies.

The principal sources for these data are the decennial censuses (most recently conducted in 1970), the estimates developed annually by the Hawaii State Department of Health and Department of Planning and Economic Development in cooperation with the Bureau of the Census, the sample survey conducted monthly since 1969 by the Department of Health, the *OEO 1975 Census Update Survey*, and the ongoing series on migration maintained by the Hawaii Visitors Bureau and U.S. Immigration and Naturalization Service. The Department of Planning and Economic Development summarizes these data in two series of reports, both issued annually: *The Population of Hawaii* and *Hawaii's In-Migrants*. Another annual report distributed by DPED contains population estimates by census tracts. Comparable national statistics on population and migration appear in sections 1 and 3 of *Statistical Abstract of the United States: 1977*.

Per square mile, 1977	151.4	1,304.3	33.5	21.0	64.0	60.7	14.6	86.7
Per square km., 1977	58.4	503.6	13.0	8.1	24.7	23.4	5.6	33.5
								9.1

¹ Includes Kauai, Niihau, Lehua, and Kaula. The total resident population of Niihau was 237 on April 1, 1970, 243 on March 15, 1976, and 247 on March 30, 1977. Kaula and Lehua are uninhabited.

² Population data for county and Molokai include Kalawao County (Kalaupapa Settlement): 172 in 1970, 179 in 1976, and 176 in 1977. Density data include Kahoolawe (uninhabited).

³ Includes armed forces and their dependents.

⁴ Includes military dependents but excludes armed forces.

⁵ Includes armed forces and their dependents and also visitors present, but excludes residents temporarily absent.

¹ For county and district boundaries, see the map preceding the Introduction to this volume.

² Estimates for 1975 and 1976 have been independently rounded to the nearest 100, and may not add exactly to the indicated totals and subtotals. The 1975 estimates are revisions from those in *The State of Hawaii Data Book 1977*, table 5; the 1976 estimates are provisional. For revised State and County 1976 estimates, see the present volume, table 4.

³ Computed from unrounded data.

¹ The revised Oahu total (including the Northwestern Hawaiian Islands) is 381,248 acres.

² Provisional estimates, with accuracy generally limited to two significant figures.

³ Excludes persons living in military barracks and inmates of institutions. Based on a sample survey of 5,368 employed persons. The Oahu total includes 206 workers with unreported places of employment.

⁴ Data differ in some instances from census totals; for discussion, see source.

⁵ Includes the Northwestern Hawaiian Islands, from Nihoa to Kure Atoll but exclusive of the Midway Islands.

Table 9.—POPULATION CENTERS AND MEDIANs: 1920 TO 1975

Measure, area, and year	Location	Movement since preceding date
Center: ¹		
State, 1960	Kaiwi Channel, 7 mi. SE of Makapuu Point
State, 1970	Kaiwi Channel, 3½ mi. SE of Halona Blow Hole	4 mi. WNW
Hawaii Co., 1970	15 mi. W of Hilo, 11 mi. SE of Mauna Kea
Maui Co., 1970	1 mi. N of Iao Needle
Oahu, 1970	Tripler General Hospital
Kauai Co., 1970	7½ mi. N of Koloa, 3½ mi. SSE of Kawaikini
Median for Oahu: ²		
1920	School and Liliha Streets, Honolulu
1930	School St. between Liliha and Lanakila Streets	800 ft. NW
1940	Liliha St. and Kellett Lane	1,000 ft. E
1950	Liliha and Kuakini Streets	200 ft. NE
1960	Alewa Dr. and Aulii St.	3,900 ft. NE
1970	Nihi and Moani Streets, Kalihi	5,300 ft. NW
1975	Southeast end of Kilohana St., Kalihi	1,500 ft. SW

¹ The "center of population" is that point which may be considered the center of population gravity of the State, or that point upon which the State would balance if it were a rigid plane without weight and the population distributed thereon with each individual being assumed to have equal weight and to exert an influence on a central point proportional to his distance from that point. The center of population thus differs from the geographic center, which is based on the distribution of land area rather than population; the geographic center of the State, according to the National Oceanic and Atmospheric Administration, "is about 29 miles west of the village of Honoipu near the northern tip of the Island of Hawaii and 24 miles south of Kanahena Point on the southern shore of the Island of Maui."

² The population median is defined as the intersection of a line bisecting the population north and south with a line bisecting it east and west. This means that half of the population lives north of the point, and half, south; half lives east of the point, and half, west. It is the point which, if everyone living on Oahu made a single trip to it, traveling in a straight line, would require the fewest man-miles of travel. In practice, of course, trip distances are determined by topography and highway locations.

Table 14.—ETHNIC STOCK: 1853 TO 1970
 [Data for 1970 are not comparable to data for earlier years]

Ethnic stock	Old definition ¹						New definition ²	
	1853	1878	1900	1920	1940	1960	1970	Percent
All groups ³	73,137	57,985	154,001	255,912	423,330	632,772	768,559	100.0
Hawaiian	70,036	44,088	29,799	23,723	14,375	11,294	71,274	9.3
Part Hawaiian	983	3,420	9,857	18,027	49,935	91,109
Caucasian ⁴	1,687	3,748	26,819	54,742	112,087	202,230	301,429	39.2
Chinese	364	6,045	25,767	23,507	28,774	38,197	52,375	6.8
Filipino	5	21,031	52,569	69,070	95,354	12.4
Indian	472	1,216	0.2
Japanese	61,111	109,274	157,905	203,455	217,669	28.3
Korean	4,950	6,851	...	9,625	1.3
Negro	233	348	255	4,943	7,517	1.0
Other groups ⁵	62	684	415	310	579	12,002	12,100	1.6

¹ Part Caucasians classified by race of non-Caucasian parent; other persons of mixed race (except Part Hawaiians) classified by race of father. Data for 1853-1900 partly estimated.

² Persons of mixed race classified either by self-identification or by race of father.

³ Final totals (not available by race) were 255,881 in 1920, 422,770 in 1940, and 769,913 in 1970.

⁴ "White" in 1960 and 1970. Includes Puerto Ricans (5,602 in 1920 and 8,296 in 1940).

⁵ Includes Filipinos in 1878 and 1900, Japanese and Negroes before 1900, Koreans in 1960 and before 1920, American Indians before 1960, and Micronesians, Samoans, and other groups not shown separately in all years.

Section 2

VITAL STATISTICS AND HEALTH

This section presents data on births, deaths, marriages, divorces, morbidity, dental health, hospitals, and health personnel.

Vital indexes generally reflect the high health standards of Hawaii. Expectation of life at birth was 71.02 years for males, 76.79 years for females, and 73.60 for both sexes combined in 1969-1971; the latter figure was the highest among all fifty states. The crude death rate in 1977 was only 5.3, half the 1930 level. Deaths under one year of age per 1,000 live births dropped from 82.3 in 1930 to 12.3 in 1977. Diseases of the heart have accounted for a third of all deaths in recent years; cancer, for one-fifth. The 1977 crude birth rate was 19.0, compared with 29.2 two decades earlier. The total fertility rate for civilians fell from 3,360 per 1,000 women in 1960 to 2,461 in 1970 and 1,821 in 1975. Over 97 percent of all babies were born in hospitals in 1976, and almost a fourth were born to military couples. One out of seven births were illegitimate. There were 6,838 fetal deaths in 1976, including 5,163 elective abortions. Marriages numbered 10,266 in 1977, with about 21 percent accounted for by nonresidents. Divorces reached a 1977 total of 4,601. The State had 22 acute care civilian hospitals (with 2,232 beds), 32 skilled nursing and intermediate care facilities (with 2,806 beds), and 252 care homes (with 1,763 beds) in 1976. There were 2,340 physicians and surgeons, 553 dentists, 6,485 professional nurses, and 515 pharmacists when most recently surveyed. Acute conditions per 100 persons averaged 199 per year in 1972-1974, with respiratory conditions the most common complaint (at 136 cases per 100 persons). Among chronic conditions reported in the 1972-1974 survey data, the most frequently mentioned were hypertension without heart involvement (5.8 per 100 persons), hay fever (4.4), and asthma (3.6). The most common communicable disease reported to authorities in 1976 was scarlet fever, with 5,905 cases. Dental health was only fair; the average number of decayed, missing or filled teeth when last surveyed was 6.85 for intermediate school students and 10.61 for those in high school.

Major sources for data on vital statistics and health are the annual statistical reports of the Hawaii State Department of Health and various publications of the U.S. Public Health Service. Sections 2 and 4 of the *Statistical Abstract of the United States: 1977* contain similar data for the nation as a whole.

Table 36.—CHARACTERISTICS OF BIRTHS AND DEATHS: 1966 TO 1976
 [Place of residence basis]

Subject	1966	1975	1976
LIVE BIRTHS			
Number	14,920	15,689	16,292
Percent on Oahu	84.6	80.8	79.9
Males per 100 females	104.8	106.2	107.2
Percent attended by M.D. in hospital ¹	99.4	99.1	97.3
Percent with prenatal visit in first 3 months ¹	50.9	67.9	70.4
Percent of mixed race ^{1,2}	42.4	43.2	44.4
Median age of mother (years) ¹	25.4	25.2	25.5
Percent first births to mother ¹	30.3	36.4	36.6
Median weight of single births (grams) ¹	3,203	3,256	3,260
Percent of births plural ¹	1.8	2.0	1.8
Percent of births premature (under 2,500 grams) ¹	8.2	7.8	7.2
Percent with one or more congenital malformations ¹	1.1	1.0	0.9
DEATHS³			
Number	3,632	4,272	4,349
Percent on Oahu	73.6	73.1	72.4
Males per 100 females ¹	162.5	160.8	152.7
Median age (years).....	64.9	67.8	67.8
Disposition (percent): Burial ¹	55.3	49.4	47.7
Cremation ¹	36.1	38.4	40.1
Removal ¹	7.9	11.5	12.1
Other ¹	0.6	0.7	0.1
INFANT AND FETAL DEATHS¹			
Infant deaths, under 1 year	282	201	172
Infant deaths per 1,000 live births:			
Under 1 day	10.4	5.5	4.2
Under 1 week	14.2	8.1	6.3
Under 1 month	15.7	9.4	7.7
Under 1 year	18.9	12.8	10.6
Fetal deaths, total	899	5,792	6,838
Per 1,000 deliveries	57	270	296
Fetal deaths, 20 or more weeks gestation	172	292	334
Elective abortions	15	4,316	5,163
Per 1,000 live births	1	275	317

¹ Data for 1966 on place of occurrence basis.

² Includes Part Hawaiian. Base excludes births with unknown parentage.

³ Data for 1966 exclude armed forces.

Source: Hawaii State Department of Health, *Statistical Report* (annual) and records.

Table 37.—CAUSE OF DEATH: 1936, 1966, AND 1976
 [Place of residence basis. Includes armed forces.]

Cause of death ¹	Number, 1976	Percent distribution			Rate per 100,000 population		
		1976	1966	1936	1976	1966	1936
All causes	4,719	100.0	100.0	100.0	532.2	541.9	867.0
Diseases of the heart	1,583	33.5	33.6	15.4	178.5	181.9	133.3
Malignant neoplasms	982	20.8	18.2	8.1	110.8	98.5	70.4
Cerebrovascular diseases	413	8.8	7.9	5.5	46.6	42.8	47.7
All accidents	314	6.7	7.6	6.8	35.4	41.4	58.8
Influenza and pneumonia	216	4.6	3.6	9.9	24.4	19.4	86.3
Diabetes mellitus	137	2.9	3.3	2.1	15.5	17.6	17.9
Suicide	98	2.1	1.8	1.8	11.1	9.6	15.9
Certain causes of mortality							
in early infancy	91	1.9	5.2	5.9	10.3	28.3	51.3
Cirrhosis of liver	75	1.6	1.1	1.0	8.5	6.2	8.3
Homicide and legal intervention	57	1.2	0.5	0.7	6.4	2.8	6.3
Congenital anomalies	53	1.1	1.8	1.9	6.0	9.9	16.4
Symptoms and ill-defined conditions	51	1.1	0.0	0.2	5.8	0.1	1.5
Other external causes	51	1.1	0.1	—	5.8	0.3	—
Other diseases of arteries, etc.	45	1.0	1.3	0.1	5.1	7.2	1.0
Bronchitis, emphysema and asthma	37	0.8	2.1	0.7	4.2	11.5	5.8
All other causes	516	10.8	11.9	39.9	57.8	64.3	345.9

¹ The leading causes of death in 1976, listed in order of deaths for that year.

Section 3

EDUCATION

This section presents statistics on enrollment in public and private schools, colleges and universities; students graduated and degrees awarded; the highest grade of school completed; illiteracy; school facilities, personnel, and expenditures; and libraries.

Enrollment in elementary, intermediate and high schools in 1977-1978 totaled 208,830, about 0.9 percent less than in the preceding year and 2.5 percent more than the 1967-1968 total. There were 228 public schools with 7,891 classroom teachers and 172,649 students (about five-sixths of the total). There were also 128 private schools with 2,081 teachers and 36,181 pupils. Students graduating from public and private high schools in 1976-1977 numbered 13,823. Some 49,752 students attended colleges and universities in the State in 1977-1978, including 21,106 on the Manoa Campus of the University of Hawaii, 201 at West Oahu College, 3,280 at UH-Hilo, 19,301 at six community colleges, and 5,864 in four private four-year colleges. Eighty-seven percent of the children 5 and 6 years old were in school in 1970 (compared with 68 percent in 1950), and 53 percent in the 18- and 19-year old group were enrolled (compared with 36 percent twenty years earlier). The expenditure per pupil in public schools rose from \$818 in 1969-1970 to \$1,718 in 1976-1977. Among adults, the illiteracy rate dropped from 8.4 percent in 1950 to 1.9 percent in 1970, and by 1976 almost 33 percent of all residents 25 years of age or more could report having completed one or more years of college. The Hawaii State Library System had 2.7 million books, film reels, phonorecords, and other collections in 1977, with an annual circulation of 4.6 million; the University of Hawaii libraries in the same year counted 1.8 million volumes. About one-fourth of all Island adults visited a library 12 or more times in 1976.

The principal sources of data on education are the U.S. Bureau of the Census, U.S. Department of Health, Education, and Welfare, Hawaii State Department of Education, University of Hawaii and private colleges and universities. Section 5 of the *Statistical Abstract of the United States: 1977* presents comparable data for the nation as a whole.

¹ Fall enrollment in credit courses.

² Prior to September 1, 1974, Brigham Young University—Hawaii Campus was called Church College of Hawaii.

³ The name of Chaminade College of Honolulu was changed to Chaminade University of Honolulu as of August 15, 1977. The Fall 1977 enrollment included 2,433 undergraduates and 128 graduates.

⁴ Opened in temporary quarters in Honolulu in September 1967 and moved to permanent campus near Kaneohe in January 1971.

⁵ U.S. International University—Maunaolu Campus was called Mauna Olu College prior to July 1, 1971. Initially a two-year institution, it briefly offered a four-year curriculum, beginning in 1969-1970; after one graduating class (1971), the school returned to a two-year program. Operations were suspended after the 1974-1975 school year. Enrollment figure for 1968-1969 is spring total. For most of these years, variant enrollment data have been reported.

Source: Data obtained by Hawaii State Department of Planning and Economic Development from college officials, except Maunaolu for the following years: 1968-1969, from *World Almanac* for 1970; 1969-1970, 1970-1971, and 1971-1972, from *Honolulu Advertiser*, October 13, 1970 and October 27, 1972.

LAW ENFORCEMENT, COURTS, AND CORRECTIONS

Statistics in this section refer to crime and delinquency, the police, the judiciary system, prisons, and training schools.

Major offenses reported to the police in 1977 numbered 58,000, or twice as many as in 1967. The rate per 1,000 population has increased from 38 in 1967 to 65 in 1977. Eighty percent of the 1977 total occurred on Oahu. For the State as a whole, major offenses known to police in 1977 included 64 murders, 119 cases of negligent manslaughter, 226 rapes, 1,146 robberies, 573 aggravated assaults, 17,100 burglaries, 35,062 cases of larceny, and 4,378 auto thefts. The value of property reported stolen in 1977 amounted to \$18 million, exclusive of motor vehicles; only 8.4 percent was recovered. Asked "Have you or your immediate family been a victim of crime (burglary, assault, etc.) in Hawaii since 1970?," forty percent of all Oahu adults and a fourth of all Neighbor Island adults answered affirmatively. Approximately, 24 percent of the major offenses and 68 percent of the minor offenses were cleared by arrest or otherwise in 1977. Fifty-two percent of the persons arrested for major crimes and 21 percent of those arrested for lesser offenses in 1976 were less than eighteen years of age. Inmates of the ten State correctional institutions averaged 543 during 1977; of this number, 330 were serving time for felonies. The State Supreme Court, four circuit courts, and four district courts and their divisions handled 685,000 cases in fiscal 1977, almost double the case load a decade earlier. Filings in the Federal District Court included 462 civil cases, 1,035 criminal cases, and 564 bankruptcy cases. The last legal execution in Hawaii took place in 1944.

Statistics on law enforcement, courts, and corrections in Hawaii appear in the annual reports of the county police departments, the State Judiciary, the Department of Social Services and Housing, the Hawaii Criminal Justice Statistical Analysis Center, and the Administrative Office of the United States Courts. National data are summarized in the *Statistical Abstract of the United States: 1977*, Section 6.

Section 5

GEOGRAPHY AND ENVIRONMENT

This section relates to area, climatologic, topographic, hydrologic, noise and other geographic and environmental measurements of Hawaii.

The State consists of eight major islands and 124 minor islands with a total land area of 6,425 square miles and a general coastline of 750 miles. Honolulu is 214 miles from Hilo, 1,367 miles from Kure Atoll (the westernmost end of the State), and 2,397 miles from San Francisco. The highest peak in the State is Mauna Kea, 13,796 feet above sea level; the longest stream is Kaukonahua Stream, Oahu, 33 miles in length; the biggest lake is Halalii, on Niihau, 841 acres; and the highest named waterfall is Kahiwa, Molokai, a 1,750-foot cascade. Various measures of air pollution, such as suspended particulate matter, indicate that Honolulu is one of the cleanest cities in the nation. There is also relatively little water pollution: 24 out of 26 major Oahu beaches were rated "A" in 1977 (coliform not exceeding 50 per 100 ml.), only two were rated "B" (51-500), and none was rated "C" (501 or more). Climatically, Hawaii is marked by remarkably balmy temperatures and wide variations in rainfall. The all-time temperature range in downtown Honolulu, for example, is from 57° to 88°F. Normal precipitation, however, ranges from 5.7 inches near Kawaihae, South Kohala, to 486 inches atop Waialeale. The longest volcanic eruption in Island history lasted 867 days, the worst earthquake attained 7.5 on the Richter scale, and the highest tsunami wave reached 56 feet. Water withdrawn for use in 1975 averaged 2.5 billion gallons per day, compared with 2.7 billion in 1970, 2.0 billion in 1965 and 1.5 billion in 1960. Among thirty neighborhoods on Oahu, median noise levels ranged from 44.7 decibels (in Pearl City) to 61.5 decibels (in Waikiki).

Important sources of data include the U.S. Geological Survey, National Ocean Survey, National Weather Service, U.S. Bureau of the Census Geography Division, the Division of Water and Land Development of the State Department of Land and Natural Resources, the State Department of Health, and the University of Hawaii Institute of Geophysics. Detailed information is given in *Hawai'i, the Natural Environment*, published by the Department of Planning and Economic Development in 1974. National data are reported in *Statistical Abstract of the United States: 1977*, Section 7.

¹ The great circle distance from Cape Kumukahi to Kure Atoll—the points farthest apart in the Hawaiian Archipelago and State of Hawaii—is 1,523 statute miles (2,451 kilometers). The distance from Kure Atoll to other extreme points in the United States is: West Quoddy Head, Maine, 5,788 miles (9,313 kilometers); Log Point, Elliot Key, Florida, 5,852 miles or 9,416 kilometers (Kure and Log Point are the points farthest apart in the fifty States). Kure is 2,486 miles (4,000 kilometers) from Tokyo, Japan.

² Hilo is 2,315 statute miles (3,725 kilometers) from San Francisco and 2,447 miles (3,937 kilometers) from Los Angeles.

³ Ghanzi, Botswana is Honolulu's antipode, that is, the point precisely opposite to it on the globe.

On Oahu	85.5	221	83.6	217	1.9	5	—	—	—	—

¹ Dry land and land temporarily or partially covered by water, as marshland, swamps, etc.; streams and canals under one-eighth statute mile wide; and lakes, reservoirs, and ponds under 40 acres of area.

² Permanent inland water surface, such as lakes, reservoirs, and ponds having 40 acres or more of area; streams, sloughs, estuaries, and canals one-eighth of a statute mile or more in width; deeply indented embayments and sounds, and other coastal waters behind or sheltered by headlands or islands separated by less than 1 nautical mile of water; and islands having less than 40 acres of area.

³ Figures are lengths of general outline of seacoast. Measurements were made with a unit measure of 30 minutes of latitude on charts as near the scale of 1:1,200,000 as possible. Coastline of bays is included to a point where they narrow to width of unit measure, and includes the distance across at such point. Figures for the four islands of Maui County are not consistent with the published county total.

⁴ Figures obtained in 1939-1940 with a recording instrument on the largest-scale charts and maps then available. Shoreline of outer coast, offshore islands, bays, rivers, and creeks is included to the head of tidewater or to a point where tidal waters narrow to a width of 100 feet.

⁵ The area of Molokini is 18.6 acres (0.03 square miles or 7.5 hectares).

⁶ The Northwestern Hawaiian Islands, from Nihoa to Kure Atoll, but exclusive of the Midway Islands (which are part of the Hawaiian Archipelago but not legally part of the State of Hawaii).

⁷ As defined in Hawaii Revised Statutes, Sec. 70-1. As defined for statistical purposes under provisions of Sec. 26-18, Hilo has a land area of 56.1 square miles or 145 square kilometers.

⁸ As defined for statistical purposes under HRS, Sec. 26-18. Includes the Northwestern Hawaiian Islands from Nihoa to Kure Atoll, exclusive of the Midway Islands.

			Kingman Reef ³	3	1
			Palmyra Islands ³	6	2

¹ Includes 19 cones over 11,000 feet, five of them over 13,000.

² Two distinct peaks. The lower has an elevation of 3,105 feet.

³ Not part of the State of Hawaii.

Source: U.S. Geological Survey data cited in the Hawaii State Department of Planning and Economic Development, *Elevations of Major Mountains in Hawaii* (Statistical Report 52, November 7, 1967), as revised by the U.S. National Cartographic Information Center, October 11, 1978.

Table 82.—MAJOR STREAMS, BY ISLANDS

Island	Feature or stream	Length or ave. discharge
Longest water feature (miles):		
Hawaii	Wailuku River	32.0
Maui	Kalialinui-Waiale Gulch	18.0
Kahoolawe	Ahupu Gulch	4.0
Lanai	Maunalei-Waialala Gulch	12.9
Molokai	Wailau-Pulena Stream	6.5
Oahu	Kaukonahua Stream (So. Fork)	33.0
Kauai	Waimea River-Poomau Stream	19.5
Niihau	Keanaulii-Puniopo Valley	5.9
Largest perennial stream (miles): ¹		
Hawaii	Wailuku River	22.7
Maui	Palikea Stream	7.8
Molokai	Wailau-Pulena Stream	6.5
Oahu	Kaukonahua Stream	30.0
Kauai	Waimea River	19.7
Streams with greatest average discharge (million gal./day):		
Hawaii	Wailuku River	184.0
Maui	Iao Stream	54.1
Molokai	Pulena Stream	22.1
Oahu	Waikolo Stream	25.7
Kauai	Hanalei River	151.0

¹ Estimated on basis of drainage area rather than stream runoff. Other major streams include Honokohau Stream, Maui (9.4 miles long); Halawa Stream (6.4), Waikolu Stream (4.7), and Pelekunu (2.3), all on Molokai; Waikolo Stream (15.3), Kipapa Stream (12.8), and Waiakakalaua Stream (11.8), all on Oahu; and the Makaweli River (15.1), Wainiha River (13.8), Hanapepe River (13.3), and Wailua River (11.8), all on Kauai.

Source: Lengths from Hawaii State Department of Planning and Economic Development, *Hawai'i, the Natural Environment* (1974), p. 15; discharges from Hawaii State Department of Land and Natural Resources, Division of Water and Land Development, data supplied May 27, 1977.

Table 83.—MAJOR DAMS: 1977

Name	Location	Height (ft.)	Length (ft.)	Volume (cubic yds.)	Completed (year)	Volume of water impounded (acre ft.)
Wahiawa Dam	Wahiawa, Oahu	98	460	167,000	1906	7,776

Table 85.—LARGEST LAKES, BY ISLANDS

Island	Name of largest lake ¹	Category	Maximum depth (feet)	Altitude (feet)	Area (acres)	Shoreline (miles)
Hawaii	Waiakea Pond	Natural	(NA)	Sea level	27	2
	Lake Waiau ²	Natural	10	13,020	1.5	0.2
Maui	Kanaha Pond	Natural	(NA)	Sea level	41	2
Kahoolawe	None					
Lanai	None					
Molokai	Meyer Lake	Natural	5	2,021	6	1
Oahu	Wahiawa Reservoir	Man-made	85	842	333	11
Kauai	Waita Reservoir ...	Man-made	23	233	422	3
Niihau	Halulu Lake	Natural	(NA)	Sea level	182	3

NA Not available.

¹ Excludes shoreline fish ponds and areas filled only during floods. The largest intermittent lake is Halalii Lake, Niihau (840.7 acres).

² Highest lake in the State and third highest in the United States.

Source: Hawaii State Department of Land and Natural Resources, Division of Water and Land Development, records.

Table 86.—MAJOR NAMED WATERFALLS, BY ISLANDS

Island	Waterfall ¹	Height (feet)		Horizontal distance (feet)	Average discharge (million gal./day)
		Sheer drop	Cascade		
Hawaii	Kaluahine	620	400	...
	Akaka	442
	Waiilikahi	320	6
	Hilawae (3 falls)	300	200	...
	Rainbow	80	150	182
Maii	Honokohau	1,120	500	25
	Waihiumalu	400	150	...
	Waimoku	40	50	37
Molokai	Kahiwa	1,750	1,000	...
	Papalaua	1,200	500	...
	Wailele	500	150	...
	Haloku	500	200	...
	Hipuapua ²	500	300	...
	Olupena	300	150	...
	Moaula ²	250	200	20
Oahu	Kaliuwaa (Sacred) ³	80	1,520	3,000	...
	Waihee (Waimea)	80	8
	Manoa	200	250	2
Kauai	Waipoo (2 falls)	800	600	...
	Awini	480	500	...
	Hinalele	280
	Kapakanui	280
	Manawaiopuna	280
	Wailua	80	76
	Opaekaa	40
	Puwainui	20	92

¹ Includes the largest named waterfall in each major island, either in height or average discharge; all other named falls 250 feet high or over; and well-known smaller falls. Many unnamed falls have sheer drops of 200 feet or more.

² Average discharge shown for Moaula includes flow from Hipuapua.

³ Sheer drop refers to northernmost fall of a cascade of six falls.

Source: Heights from Map Information Office, U.S. Geological Survey, July-October 1969; average discharges from Division of Water and Land Development, Hawaii State Department of Land and Natural Resources, July 1977.

Table 87.—MISCELLANEOUS GEOGRAPHIC STATISTICS, BY ISLANDS

Island	Extreme length (miles)	Extreme width (miles)	Miles of sea cliffs with heights of —		Miles from coast of most remote point	Percent of area within 5 miles of coast
			100 to 999 ft.	1,000 ft. or more		
The State	145	33	28.5	48.0

² Also surveyed for carbon monoxide, 1 hour (minimum of 0 milligrams per cubic meter and maximum of 19.6) and photochemical oxidants (minimum of 4 micrograms per cubic meter and maximum of 61).

Source: Hawaii State Department of Health, Pollution Investigation and Enforcement Branch, records.

Table 97.—NOISE LEVELS IN VARIOUS NEIGHBORHOODS ON OAHU: 1974

[Noise measurements were taken at 578 stations distributed over the populated areas on Oahu, except Waialua, Haleiwa and small communities along the north shoreline. Noise readings were not taken in these areas because previous noise measurements in these communities were similar to noise levels in Waimanalo and Olomana areas. The noise measurement stations were randomly distributed over the communities.]

Since one of the objectives of this noise survey was to establish the existing ambient and residual noise levels of each community, the noise readings at each station were taken as far as possible away from all heavily used roads and freeways. Loud identifiable noise from nearby traffic, airplane passing overhead, dogs barking and noise from other sources were also measured. The noise readings at any location were taken on three or more widely separated days. This was done to avoid any abnormal noise conditions. In densely populated areas, the noise survey was conducted between the hours of 4:00 a.m. to 10:00 a.m., 9:00 a.m. to 5:00 p.m. and 4:00 p.m. to 2:00 a.m. In less populated areas west of Pearl City, Wahiawa and Mililani Town, the noise readings were taken during the daytime only.]

**Table 106.—HAWAII AUDUBON SOCIETY BIRD COUNTS OF THE HONOLULU AREA:
1958 TO 1977**
[Counts are made in late December, in a circle, 15 miles in diameter, centered near Nuuanu Pali.]

Year	Species	Individual birds	Species ¹	Individual birds
1958	34	7,457	Endemic species:	
1959	34	4,076	'Apapane	145
1960	34	4,656	Oahu 'Amakihi	128
1961	39	3,954	Hawaiian Stilt	106
1962	39	2,969		
1963	35	7,963	Indigenous species:	
1964	34	10,139	Red-footed Booby	1,647
1965	46	11,820+	Great Frigatebird	571
1966	51	12,557		
1967	51	22,641	Introduced species:	
1968	49	11,024	Barred Dove	2,201
1969	53	13,236	Common Myna	2,173
1970	51	10,454	Cattle Egret	1,316
1971	50	13,218	House Sparrow	1,112
1972	52	14,559	Japanese White-eye	953
1973	48	9,574	Spotted Dove	780
1974	44	10,263		
1975	54	12,008	Migratory species:	
1976	55	16,393	Golden Plover	993
1977	52	15,542	Ruddy Turnstone	134

¹ Endemic birds numbering more than 50 individuals, indigenous birds more than 100, introduced birds more than 750, and migratory species and stragglers more than 100. Endemic birds are those peculiar to a particular region, in this case Hawaii, and therefore found nowhere else in the world; indigenous birds are those native to a given region, in this case Hawaii, but with a total range of distribution encompassing a much wider area. The classification is that reported in Andrew J. Berger, *Hawaiian Birdlife* (1972).

Source: Hawaii Audubon Society, *The Elepaio* for February 1968-1978.

Table 107.—ENDANGERED, THREATENED, AND EXTINCT SPECIES OF NATIVE HIGHER PLANTS: 1974

Status	Species, subspecies, and varieties	Percent
Total native flora	2,200	100.0
Endangered, threatened, or extinct ¹	1,088	49.5
Endangered ²	639	29.0
Threatened	194	8.8
Extinct	255	11.6
Not endangered, threatened, or extinct	1,112	50.5

¹ For the other 49 States, 2,099 (or 10.5 percent) of all 20,000 native higher plants are endangered, threatened, or extinct.

² A revised inventory, published June 16, 1976, listed 894 endangered Hawaiian species, out of a national total of 1,782 endangered species; see *Federal Register*, Vol. 41, No. 117 (June 16, 1976), pp. 24523-24572, and Harry Whitten, "Endangered Plants," *Honolulu Star-Bulletin*, September 5, 1977, p. A-15.

Source: 94th Congress, 1st Session, House Document No. 94-51, *Report on Endangered and Threatened Plant Species of the United States*, presented to the Congress of the United States of America by the Secretary, Smithsonian Institution, 15 December 1974, p. 11 (percentages recalculated by DPED).

Section 6

LAND USE AND OWNERSHIP

General statistics on the use, ownership, and tenure of land appear in this section. Information on specific use or ownership categories is given elsewhere: parks in section 7, military land in section 10, farms in section 19, and forests in section 20.

Out of the 4,128,000 acres in the State, fully 2,490,000 are in unused open space. Other major categories include agriculture, with 1,220,000 acres, services (including military installations), with 116,000, and recreation, with 94,000. In the Honolulu Standard Metropolitan Statistical Area (which is coterminous with Oahu), land in residential use increased from 16,500 acres in 1964 to 26,500 in 1974; during the same ten-year span, agricultural land declined from 94,500 to 76,100 acres. For the State as a whole, the Land Use Commission has zoned 151,000 acres as "urban," 1,977,000 as "conservation," 1,974,000 as "agricultural," and 9,000 as "rural."

Recent data on land ownership indicate that the Federal government owns 7.3 percent of all land, the State and counties own 34.7 percent, and private owners (chiefly large estates) have 58.0 percent. Total Federal holdings come to 405,500 acres, exclusive of leased land (48,100 acres); most of the Federal land is in park and military use. The State Department of Hawaiian Home Lands holds about 190,000 acres, divided among 2,738 lessees. Total land parcels number 335,411.

Considerable caution is necessary in comparing statistics from different sources on land use, ownership, or tenure. Variations in definitions and survey dates seriously affect comparability in many instances, even where terminology is relatively unambiguous and misinterpretation seems unlikely. An example of such difficulties is the wide range in estimates of Federal land, with Federal totals ranging from 297,000 acres to 408,000. Recent statistics on military land use are likewise confusing, going as high as 174,000 acres and as low as 56,000.

Reports of the U.S. General Services Administration, Hawaii State Department of Hawaiian Home Lands, Department of Land and Natural Resources, Department of Planning and Economic Development, Department of Taxation, Department of Transportation, and Land Use Commission, the Land Study Bureau of the University of Hawaii, and county planning departments provided the data for this section. Greater detail appears in DPED Statistical Report 98, *Land Use and Ownership Trends in Hawaii*, issued December 28, 1973. Statistics for the nation as a whole are available in Sections 8 and 24 of the *Statistical Abstract of the United States: 1977*.

Section 7

RECREATION AND TOURISM

Statistics on tourism, recreation, cultural activities, and parks appear in this section. Information on transportation is given in Section 18; on hotels, in Section 23.

Tourism has shown impressive growth in recent decades. Approximately 3,434,000 visitors stayed overnight or longer in Hawaii during 1977, compared with 1,125,000 in 1967 and only 169,000 in 1957. The average number present at any given time during 1977 was 86,800, more than three times the 1967 average. Total visitor expenditures (exclusive of trans-Pacific fares) in 1977 amounted to more than \$1.8 billion, compared with \$380 million a decade earlier. The 1977 visitor total included 2,360,000 from other States, 300,000 from Canada, and 440,000 from Japan. Expenditures per visitor day in 1977 averaged \$54.62 for westbound visitors and \$146.85 for the Japanese. Among westbound visitors destined for Hawaii, one-fourth were Californians, half were at least 43.2 years old, median family income before taxes was \$21,200, 41 percent were repeat visitors, four-fifths were on a pleasure trip, their average intended length of stay was close to 11 days, two-thirds visited at least one Neighbor Island, and 90 percent upon returning home rated Hawaii as either "above average" or "far superior" to other vacation areas they have visited.

Both visitors and residents have access to a wide range of recreational and cultural facilities. The State has four national parks, 58 State parks, 603 County parks, 45 golf courses, 241 tennis courts, 1,883 small-boat moorages, 1,600 recognized surfing sites, and 24.4 mile of safe, sandy, accessible beach. Recreational and cultural facilities reporting more than a million annual visitors include six National or State parks, the National Memorial Cemetery of the Pacific, U.S.S. Arizona Memorial, the Honolulu Zoo, and Polynesian Cultural Center. Total visits to 34 museums, state monuments, and similar attractions in 1977 numbered 10.3 million. Over 179,000 Hawaii residents traveled to the Mainland in 1977 and half of them were absent more than 13.5 days. Nine theatrical groups on Oahu reported 1,123 performances of 134 productions for the 1976-1977 season, with a combined audience of 331,000. During the same period, the Honolulu Symphony Orchestra gave 136 concerts, with a total attendance of 200,000. Professional baseball drew 368,000 fans in 1977, and, during the 1977-1978 school year, attendance at UH-Manoa varsity basketball and football home games exceeded 339,000. Approximately 85,000 dogs and 66,000 cats were owned in 1970.

Information on recreation and tourism is issued periodically by the Hawaii Visitors Bureau (chiefly in its monthly and annual research reports), the State Parks Division of the Department of Land and Natural Resources, the U.S. National Park Service, U.S. Passport Office, County park and recreation departments, and other organizations. An extensive compilation of statistics on recreational facilities and behavior was issued by DPED in December 1975 in its *State Comprehensive Outdoor Recreation Plan Technical Report*. National statistics are given in Section 8 of *Statistical Abstract of the United States: 1977*.

¹ Because many visitors visit more than one island, county data sum to total greater than the State total shown in the preceding table. Data cover westbound visitors destined to or beyond Hawaii, and include one-day (non-overnight) Neighbor Island visits by these passengers.

² For State totals, see preceding table.

³ Not available, but at least 90 percent of overnight and longer visitors to the State are thought to spend at least one night on Oahu.

⁴ Includes Molokai and Lanai.

¹ Base includes estimated number of visitors arriving directly from Canada and usually omitted from the Hawaii Visitors Bureau Basic Data Survey. Because of this adjustment, data on place of residence in the present report differ somewhat from previously published data for 1969 and earlier years.

² Party heads only. Calculated as the number of professional, technical, business, managerial and official workers as a percent of all party heads responding to this question.

³ Party heads only.

⁴ Computed from total visitor days and total visitor arrivals for westbound visitors destined for Hawaii. These data differ somewhat from corresponding data in the source, because of different computation procedures.

⁵ Base includes passengers who did not answer this question.

⁶ Pacific and Mountain States.

Section 8

GOVERNMENT FINANCES AND EMPLOYMENT

This section presents statistics relating to the financial structure and civilian employment of Federal, State and County governments in Hawaii.

Local government is vested in one combined city-county (Honolulu, consisting of the Island of Oahu and several outlying islets), three non-metropolitan counties (Hawaii, Kauai, and Maui), and one area (Kalawao County) administered by the State Department of Health. Separate municipal governments do not exist. The counties establish real property tax rates but, except for licenses, permits and fees, tax collections are the responsibility of the State.

Tax collections by Federal, State and County governments in fiscal 1977 reached \$2,034 million, more than triple the level reported ten years earlier. The 1977 total included \$1.1 billion in U.S. taxes, \$906 million in State taxes, and \$25 million in County licenses and fees. Individual income taxes accounted for 84 percent of Federal collections and 22 percent of State collections in Hawaii in 1977. State revenue receipts totaled \$1,315 million, chiefly from the General Excise and Use Tax (\$341 million) and Federal grants-in-aid (\$328 million). The largest expenditure item in the State accounts for 1977 was education, with \$425 million (out of \$1,391 million) going to the University of Hawaii and public schools and libraries. The counties in contrast, depended largely on the real property tax (assessed and collected by the State) for their revenues, and reported police and fire protection as their largest single expenditure item. The estimated tax burden for a four-person family with per capita personal income equal to the State average in 1976 was \$10,081, including both direct taxes (\$8,132) and employment taxes paid by employers (\$2,693).

Assessed valuation of the State tripled between 1966 and 1977. Public bonded debt outstanding at the end of 1977 exceeded \$1 ¾ billion. Average government employment reported for 1977 was 85,700, about 29 percent over the 1967 average. The 1977 total included 29,300 Federal workers, 42,650 persons employed by the State, and 13,800 persons on County payrolls. State civil service employees as of mid-1977 numbered 16,318.

Important sources for statistics on government in Hawaii include the U.S. Census of Governments and various annual publications of the Bureau of the Census, reports of the U.S. Treasury Department, Hawaii State Departments of Accounting and General Services, Budget and Finance, and Taxation, and the County auditors and finance directors, and an annual compilation issued by the Tax Foundation of Hawaii, *Government in Hawaii: A Handbook of Financial Statistics*. Comparable Mainland statistics appear in the *Statistical Abstract of the United States: 1977*, Sections 9 and 10.

Section 9

SOCIAL INSURANCE AND WELFARE SERVICES

This section presents data related to governmental programs for old-age, survivors, disability and health insurance; public employee retirement; unemployment insurance; aid to the needy; and maternal, child, and other welfare services. Also included here are selected statistics on private charity and welfare programs.

Total public welfare costs reached \$194 million in fiscal 1977, compared with \$46.6 million in 1970 and \$9.3 million in 1960. About 59 percent of the 1977 total came from State funds and the remainder from the Federal government. The monthly average number of persons served by major welfare programs in 1977 was 81,938, or 9.3 percent of the population of the State at the beginning of the year. Almost two-thirds of all public assistance payments and one-half of all recipient cases were accounted for by aid to families with dependent children. Five percent of all welfare cases early in 1978 were recent migrants to Hawaii. The average monthly payment per case for public assistance was \$308, or twice as much as in 1969. Participation in the food stamp program included 37,000 households and 108,000 persons. Among workers receiving unemployment compensation in 1977, weekly benefits averaged \$88.68. More than 96,000 Hawaii residents were receiving Social Security benefits as of the end of 1976, and about 60,000 were enrolled for Medicare. There were also 10,099 State and County government pensioners in 1977, with annual benefits in excess of \$59 million. The Aloha United Way spent \$6.5 million on Oahu during 1977.

Major data sources include reports and records of the U.S. Department of Health, Education, and Welfare, the Hawaii State Department of Social Services and Housing, the Hawaii State Department of Labor and Industrial Relations, the Hawaii State Employees' Retirement System, and the Aloha United Way. Section 11 of the *Statistical Abstract of the United States: 1977* presents comparable Mainland data.

Section 10

NATIONAL DEFENSE

This section presents statistics relating to the armed forces and their dependents, civilian employment in national defense, veterans, military housing and land ownership, and expenditures by the armed forces.

There were approximately 58,500 officers and enlisted men (including 12,700 aboard ships homeported in Hawaii) and 65,000 military dependents in the Islands as of July 1, 1977. This number has been relatively stable in recent years, but at the height of World War II more than 400,000 uniformed personnel were present. The Navy alone accounts for about two-fifths of the current total. More than 10,600 Hawaii residents were in the armed forces worldwide in 1977. The importance of national defense in Hawaii can be further measured by total expenditures (\$1,087,000,000), military prime contracts awards (\$224 million), civilian employment (19,000), veterans in civil life (93,000), military personnel receiving retired or retainer pay (8,300 men, receiving \$71 million), federally-connected pupils in public schools (42,000), military housing (17,500 units), and land controlled by the armed forces (223,000 acres). Defense expenditures are second only to tourism as a source of income to Hawaii.

The Department of Planning and Economic Development has, since 1959, issued periodic reports on *Military Personnel and Dependents in Hawaii*. Other published sources include reports of the Bureau of the Census, the Administrator of Veterans Affairs, the Department of Defense, the Hawaii State Department of Labor and Industrial Relations, the Hawaii State Census Statistical Areas Committee, and the Honolulu Department of Housing and Community Development. Definitions used by these sources frequently differ to some degree, and care is accordingly necessary in comparing data issued by two or more agencies. In mid-1976, for example, the number of armed forces in Hawaii was reported as 53,783 by DOD, 57,784 by the Bureau of the Census, 44,838 by the Bureau of Economic Analysis (which excludes ships crews), and 59,737 by the local commanding officers reporting to DPED. Section 12 of the *Statistical Abstract of the United States: 1977* presents data on national defense and veterans affairs for other States and the entire nation.

Table 179.—ARMED FORCES AND DEPENDENTS: 1970 TO 1977

[Includes Navy personnel in Hawaiian waters, regardless of home port, and excludes all Coast Guard personnel; for these reasons, data differ somewhat from those in the following table.]

Year	Active-duty military personnel in Hawaii, June 30				Dependents located in Hawaii, March 31 ¹

LABOR FORCE, EMPLOYMENT, AND EARNINGS

This section presents statistics on the size and composition of the labor force, employment by age, sex, occupation, and industry, and wage rates, payrolls, hours, turnover, safety, and unionization of workers.

The number of employed persons (including armed forces) almost doubled between 1940 and 1970, reaching 338,000 in the latter year. Agricultural employment fell from 55,000 to 13,000 during this period, while nonagricultural workers (excluding armed forces) rose from 99,000 to 275,000. The civilian job count rose from 283,200 in 1967 to 395,500 a decade later, an increase of 40 percent. (The job count differs from employment because the latter counts multiple jobholders — "moonlighters" — only once.) The unemployment rate averaged 7.4 percent in 1977, with island levels ranging from 6.5 to 10.3 percent. The labor force contains above-average proportions of younger persons and women: the 1970 Census reported that 49 percent of all females 16 years of age or more were either employed or seeking work, a proportion higher than that of any other State and second only to the District of Columbia. By occupation, one out of six civilian workers is classified as professional or technical. Activities with especially large numbers of employees include government (85,700 in 1977, about 34 percent of them in federal jobs), services (84,750), retail trade (74,450), finance, insurance, and real estate (24,550), and manufacturing (23,350). Wage and salary levels are high: the average annual earnings of private wage and salary workers under the Hawaii Employment Security Law reached \$9,557 in 1976 (twice the 1964 average), and in some categories exceeded \$15,000. Average weekly hours in 1977 ranged from 31.6 (for retail trade) to 42.7 (for communications and utilities). Labor union membership was estimated at 129,000 in 1974. Work stoppages in 1975 numbered 13, and involved 1,900 workers.

Analyzing labor force trends is greatly complicated by recent shifts in sources and estimating methods. Prior to 1970, the number of employed civilians was estimated from data on the number of jobs covered by the Hawaii State Employment Security Law; workers holding more than one job were accordingly counted more than once. From 1970 to 1975, the same source was used, but the totals were adjusted to exclude the double-counting thought to be present. Then, beginning in 1976, the labor force estimates were based on the Current Population Survey, a relatively small household survey subject to considerable sampling variation. The 1970-1975 estimates were recently revised for greater comparability with the 1976-1977 data.

Principal sources for the data on labor force, employment, hours, earnings, unions and strikes are the decennial reports of the U.S. Bureau of the Census, various studies by the U.S. Bureau of Labor Statistics, monthly and annual tabulations by the Hawaii State Department of Labor and Industrial Relations, annual surveys by the Hawaii Employers Council, and occasional sample surveys by public and private agencies. Statistics for the nation as a whole are published in Section 13 of the *Statistical Abstract of the United States: 1977*.

Table 185.—JOBCOUNT, BY COUNTIES: ANNUAL AVERAGES, 1967 TO 1977

Year	State total	City and County of Honolulu	Hawaii County	Kauai County	Maui County			
					Total	Maui	Lanai	Molokai

186.—UNEMPLOYMENT PEAKS: 1936 TO 1977

[Survey definitions and methods vary from year to year. Data prior to 1940 are limited to the few dates for which statistics are available; since World War II, based on monthly estimates.]

Month and year	Number unemployed	Percent unemployed ¹
Dec. 1936 - Feb. 1937 ²	5,822	10.5
Dec. 1939 ³	8,006	9.1
Nov. 1949	28,434	15.0
June 1954	15,359	7.8
March 1976	40,450	10.3

¹ Based on civilian labor force.

² Data limited to city of Honolulu. Excludes persons on public emergency work; inclusion of this group would raise the unemployment rate to 12.4 percent.

³ Data limited to Oahu. Excludes persons on public emergency work; their inclusion would raise the unemployment rate to 10.6 percent.

Section 12

INCOME, EXPENDITURES, AND WEALTH

This section presents statistics on two different aspects of income and expenditures, one relating to the State income and product system and the other to the distribution of income to families and individuals. Specifically, information is given on gross state product, industrial income, personal income, family income, poverty, personal wealth, and family expenditures. Data on workers' earnings and payrolls appear in Section 11; on taxable income, in Section 8.

Gross state product in 1976 amounted to approximately \$7.4 billion, or about triple the 1965 total. The major sources of income to Hawaii in 1977 were defense expenditures (\$1.09 billion), pineapple production (\$162 million), sugar production (\$227 million), and visitor expenditures (\$1.8 billion). Personal income in 1977 was \$6.8 billion, compared with \$2.5 billion only ten years earlier, and per capita personal income was \$7,681, more than twice the 1967 level. The per capita figure for Hawaii exceeded the national average by 9 percent, and thus failed to compensate for the Islands' 21-27 percent higher cost of living. The median annual income of families, based on data for 1975, was \$18,228 on Oahu, \$15,923 on the Neighbor Islands, and \$17,770 Statewide; for unrelated individuals, the all-island median was \$6,180. The official poverty threshold for a 4-person nonfarm family in Hawaii was set in May 1978 at \$7,130. Top wealthholders in Hawaii — those with gross assets of \$60,000 or more — numbered 11,323 in 1962 and 53,700 in 1972. Total assets of this group in the latter year amounted to \$7.9 billion, 40 percent of which was in real estate. The most recent family expenditure survey, taken in 1972 and 1973, reported that the largest items in the family budget on Oahu were housing (accounting for 33.8 percent of spending for current consumption), food (20.4 percent) and transportation (19.1 percent).

The chief sources of data shown in this section are the U.S. Bureau of Economic Analysis, U.S. Bureau of the Census, U.S. Bureau of Labor Statistics, Community Services Administration, Internal Revenue Service, Hawaii State Department of Agriculture, Hawaii State Department of Planning and Economic Development, Hawaii Visitors Bureau, Bank of Hawaii and First Hawaiian Bank. Comparable data for the country as a whole are given in *Statistical Abstract of the United States: 1977*, Section 14.

Section 13

PRICES

This section presents indexes of consumer prices for Honolulu, average prices for selected foods, and a comparison of Honolulu family budgets with those in other metropolitan areas. Other statistics on prices are reported in Sections 16, 17, 18, 20, 21, 22 and 23.

In June 1978, the Honolulu all-items "unrevised" consumer price index stood at 182.1, with the 1967 level equal to 100. The index had increased 6.8 percent in the preceding 12 months, 42.8 percent since June 1973, and 76.1 percent since June 1968. Prices have risen most rapidly since 1967 for gas and electricity (126.3 percent), medical care (120.0 percent) and restaurant meals (up 114.8 percent), and least for public transportation (up 24.9 percent).

A "moderate" or "intermediate" budget for a four-person family living on Oahu was estimated at \$20,883 as of the Autumn of 1977. This family budget was 22 percent higher than the corresponding urban United States average, and was second only to Anchorage among major American metropolitan areas. Hawaii-Mainland differentials were greatest for rents and personal income taxes and least for clothing, social security payments, and transportation. An "intermediate" budget for a retired couple in Honolulu came to \$7,691 in the Autumn of 1976, 14 percent above the U.S. urban average.

The Honolulu consumer price index has been compiled by the United States Bureau of Labor Statistics at three-month intervals since December 1963. This index measures the average change in prices of goods and services purchased by urban families and single persons living alone. Prices are expressed as a percent of the average levels reported in 1967, the base date. Current data for Honolulu and other cities are published in the *Monthly Labor Review* and *CPI Detailed Report*, issued monthly by BLS. A similar series for Honolulu was maintained by the Hawaii State Department of Labor and Industrial Relations from March 1943 to December 1963, using March 1943 as the base data.

Important changes were made in the consumer price index at the beginning of 1978. The existing index, covering urban wage earner and clerical families and single persons living alone, had been based on spending patterns observed in a 1961 survey and had been issued at three-month intervals. This index was discontinued after June 1978. Beginning in February 1978, two new indexes were published, both based on the findings of a 1972-1973 survey and both issued at two-month intervals. The first of these new indexes covered the same population as the older index, that is, urban wage earner and clerical families and individuals; the second covered all urban consumers. The new indexes were linked to the December 1977 existing index and, like the latter, expressed as a percent of the 1967 annual average. The June 1978 all-items index was 182.1 according to the old coverage and weights, 184.1 based on the previous coverage and revised weights, and 183.9 with the expanded coverage and new weights.

Comparisons of family budgets between Honolulu and various Mainland communities have most recently been made for the Fall of 1977. These data were

Section 13 (continued)

compiled and published by the U.S. Bureau of Labor Statistics. Similar comparisons go back a number of years, and include a Honolulu-Los Angeles comparison for 1945, Honolulu-Washington comparisons for 1951 and 1955-1977, and a 40-area comparison for various dates since Autumn 1966. Budget costs for a retired couple have been prepared by BLS for Honolulu and the Mainland as of 1966, 1967, and annually since 1969.

In addition to these data, the Bureau of Labor Statistics publishes monthly and annual data on average prices for a wide variety of foods, and occasional data on a number of non-food items (most recently in *Average Retail Prices of Selected Commodities and Services, Fall 1971*, issued in 1973). Still another useful source is *Prices Paid by Hawaii Farmers: 1970-1974*, issued by the Hawaii State Department of Agriculture in November 1975.

No composite wholesale price index, comparable to the all-items consumer price index, is available for Hawaii. Average wholesale prices of agricultural products are reported in *Statistics of Hawaiian Agriculture*, issued by the Hawaii Agricultural Reporting Service, and *Honolulu Prices: Wholesale Eggs, Poultry, Pork, Beef and Rice*, a publication of the State Department of Agriculture, Market News Service. Wholesale price statistics of other commodities are less readily available, and in most cases totally lacking.

Data on prices and living costs are summarized in *Statistical Abstract of the United States: 1977*, Section 15.

Table 222.—CONSUMER PRICE INDEX (ALL ITEMS COMBINED), FOR HONOLULU: QUARTERLY, 1967 TO 1978

[Unrevised index for urban wage earners and clerical workers. Annual average for 1967=100.]

Year	Annual average	March	June	September	December
1967	100.0	98.9	99.7	100.6	101.8
1968	103.8	102.8	103.4	104.6	105.7

At home	3,482	4,218	5,058	127	123	124
Away from home	444	714	1,268	99	106	117
Housing ²	2,894	4,939	7,700	139	123	127
Shelter ³	2,292	3,951	5,719	147	126	136
Renter costs ⁴	2,292	2,885	4,219	147	143	132
Homeowner costs ⁵	—	4,306	5,984	—	123	136
Housefurnishings & operations	602	988	1,770	116	111	105
Transportation ⁶	814	1,541	2,051	101	105	107
Automobile owners	1,164	1,541	2,051	108	100	107
Clothing	860	1,185	1,665	104	100	96
Personal care	334	440	623	118	117	116
Medical care ⁷	1,072	1,077	1,123	109	109	109
Other family consumption ⁸	537	989	1,665	110	109	111
Other items ⁹	525	836	1,449	111	110	112
Social security & disability payments	835	1,022	1,022	132	106	104
Personal income taxes	1,483	3,922	8,273	206	167	166

¹ Among the 40 metropolitan areas for which separate indexes were reported, Honolulu ranked second in total budget costs at all three levels, exceeded only by Anchorage.

² Housing includes shelter, housefurnishings and household operations. The higher budget also includes an allowance for lodging away from Oahu.

³ The average costs of shelter were weighted by the following proportions: lower budget, all families living in rented dwellings; intermediate budget, 25 percent in rented dwellings; higher budget, 15 percent renters.

⁴ Includes average contract rent, heating fuel, gas, electricity, water, specified equipment, and insurance on household contents.

⁵ Includes interest and principal payments plus taxes; insurance on house and contents; water, refuse disposal, heating fuel, gas, electricity, and specified equipment; and home repair and maintenance costs.

⁶ Based on 65 percent of the lower budget families and all of the intermediate and higher budget families owning automobiles.

⁷ Based on 30 percent of all families paying full cost of medical insurance, 26 percent paying half cost, and 44 percent covered by noncontributory insurance plans (paid by employer).

⁸ Includes reading, recreation, tobacco products, alcoholic beverages, education, and miscellaneous expenditures.

⁹ Includes gifts and contributions, life insurance and occupational expenses.

Clothing	211	350	506	99	97	91
Personal care	165	241	353	113	113	113
Medical care	644	650	657	103	103	103
Other family consumption ⁷	235	390	803	112	112	117
Other items ⁸	246	488	895	113	113	110

¹ Among the 40 metropolitan areas for which separate indexes were reported, Honolulu ranked second at the lower level and fourth at the intermediate and higher levels. Anchorage ranked first at all three levels.

² Housing includes shelter, housefurnishings and household operations. The higher budget also includes an allowance for lodging away from Oahu.

³ The average costs of shelter were weighted by the following proportions: lower budget, 40 percent living in rented dwellings; intermediate budget, 35 percent in rented dwellings; higher budget, 30 percent in rented dwellings.

⁴ Includes average contract rent, heating fuel, gas, electricity, water, specified equipment, and insurance on household contents.

⁵ Includes property taxes; insurance on house and contents; water, refuse disposal, heating fuel, gas, electricity, and specified equipment; and home repair and maintenance costs. Assumes all mortgage payments have been completed prior to retirement.

⁶ Based on 45 percent of the lower budget families, 60 percent of the intermediate budget families, and all of the higher budget families owning automobiles.

⁷ Includes reading, recreation, tobacco products, alcoholic beverages, and miscellaneous expenditures.

⁸ Includes gifts and contributions. The higher level also includes an allowance for life insurance.

Table 229.—COST OF LIVING FOR FEDERAL EMPLOYEES IN HAWAII RELATIVE TO WASHINGTON, D.C.: 1977

Cost of living allowance category ¹	Index (Washington, D.C.=100), by islands				
	Oahu	Hawaii	Kauai	Maui and Lanai	Molokai
Local retail, private housing	118.4	113.6	117.2	112.2	115.4
Local retail, federal housing	102.3	99.8	107.2	99.7	108.2
Commissary, PX, private housing	103.8	...	116.7
Commissary, PX, federal housing.....	87.7	...	106.7
Commissary, PX, military housing	73.9	...	89.0
Local retail, military housing	88.1	...	86.2	90.7

¹ Based on access to military commissary and exchange facilities and type of housing occupied. "Local retail" refers to federal employees who purchase goods and services only from private retail establishments, while "Commissary, PX" includes those who have unlimited access to military commissary and exchange facilities. "Private housing" includes federal employees who occupy housing units that are privately owned or leased; "federal housing," those who occupy units owned or leased by a federal agency; and "military housing," those in either on-base military units or off-base housing for which a housing allowance is paid under the military housing program.

Section 14

ELECTIONS

This section presents data on the number and characteristics of registered voters, votes cast, elected officials, and legislative bills.

More than 395,000 persons were registered to vote in the general election of November 1978, and more than 292,000 actually voted. The number voting amounted to 40 percent of the 637,000 Hawaii residents of voting age at that time. The latter figure included numerous aliens, inmates of mental and penal institutions, and members of the armed forces and their dependents, groups that are either ineligible or unlikely to vote in Island elections. Among eligible voters, females slightly outnumbered males, persons of Japanese ancestry outnumbered Caucasians, and Democrats were far more numerous than Republicans.

A constitutional convention was convened on July 5, 1978. In the election for delegates to this convention, 119,250 persons cast ballots out of 344,953 registered to vote. The number of delegates elected numbered 102, compared with 82 in the 1968 constitutional convention and 63 in 1950.

Elective offices in Hawaii include the President, two U.S. Senators, two U.S. Representatives, the Governor, 25 State Senators, 51 State Representatives, and various county officials. The minimum voting age is 18 years.

The 1977 State Legislature, with 76 members, included 67 males, 26 persons under 40 years of age, 34 persons of Japanese ancestry, and 59 Democrats.

In its 1978 session, the State Legislature considered 5,501 bills; 248 were passed and 239 became law. The Legislature also considered 1,521 resolutions, of which 875 were approved.

Official election results are published by the Office of the Lieutenant Governor. Additional information is often available from the various County Clerks. Characteristics of individual precincts are described in *1976 Hawaii Voting Behavior*, compiled by Daniel W. Tuttle, Jr., and published by the Public Affairs Advisory Services, Inc., on May 31, 1978. National statistics appear in the *Statistical Abstract of the United States: 1977*, Section 16.

**Table 230.—REGISTERED VOTERS AND VOTES CAST, FOR PRIMARY, GENERAL,
AND SPECIAL ELECTIONS: 1968 TO 1978**

Type and date of election	Registered voters ¹			Votes cast		Percent of civilian population ²

Section 15

BANKING, INSURANCE, AND BUSINESS ENTERPRISE

Statistics in this section relate to banks and other financial institutions, stocks and bonds, insurance, fires, and business firms.

There were eight banks with 166 branches, 11 savings and loan associations with 112 branches, three trust companies, and 242 industrial loan or small loan licensees in Hawaii as of June 30, 1977. Deposits in Island banks reached \$3.0 billion in 1977, compared with \$1.56 billion in 1970 and \$673 million in 1960. Assets of savings and loan associations stood at \$2.3 billion in 1977, triple their 1970 level and eleven times as great as in 1960. Eighty-four percent of the households on Oahu had savings accounts in 1972 and 78 percent had checking accounts. There were 158 credit unions with assets of \$600 million at the end of 1977.

The market value of stocks and bonds traded on the Honolulu Stock Exchange in 1977 amounted to \$298,000, the lowest total on record, and the Exchange discontinued operations at the end of the year. The all-time high was \$25.4 million in 1961. Approximately 58,000 Hawaii residents held shares in U.S. public corporations or investment companies in 1975.

Life insurance in force in Hawaii at the end of 1976 amounted to \$13.6 billion, triple the figure reported ten years earlier. For all 542 insurance companies doing business in the Islands, Hawaii premiums amounted to \$422 million in 1976 and losses, claims, and benefits paid came to only \$193 million. Oahu fire losses amounted to \$7.0 million in fiscal 1977. Persons covered by the two major prepaid health insurance plans as of December 31, 1977, numbered 615,000, with membership dues of \$139 million.

By mid-1977, 26,636 corporations and partnerships were registered to do business in Hawaii: 18,175 local ("domestic") corporations, 2,755 out-of-State ("foreign") corporations, and 5,706 partnerships. Business units with one or more employees in 1975 numbered 17,095; 95 had 250 or more employees. During fiscal 1978, 2,718 new local corporations were formed and 1,879 existing local corporations were dissolved or merged. Business receipts of corporations exceeded \$9.4 billion in 1975; business receipts of proprietorships in 1973 amounted in \$696 million. Hawaii's largest corporation, Amfac, Inc., reported 1977 sales of \$1.3 billion.

Sources for statistics on these subjects include the Hawaii State Department of Regulatory Agencies (specifically its Bank Examination, Insurance, Fire Marshal and Business Registration Divisions), the State Department of Taxation, the Honolulu Fire Department, the New York and Honolulu Stock Exchanges, the Health Insurance Institute and two major local health insurance plans, the Hawaii Credit Union League, and the annual report on *County Business Patterns* issued by the U.S. Bureau of the Census. Comparable Mainland data appear in Sections 17 and 18 of *Statistical Abstract of the United States: 1977*.

COMMUNICATIONS

This section presents statistics on the various communications media: postal service, telephone, telegraph, radio, television, newspapers, and books.

Hawaii is served by all major communications media. In 1977 it had 76 post offices handling 249 million pieces of mail and accounting for postal receipts in excess of \$43 million. There were 628,000 telephones in service (double the number ten years earlier), 274,000 telephone homes, 1.6 billion local calls originated, 7.0 million completed interisland calls, and 17.1 million incoming and outgoing transpacific calls. Telegraph messages to and from Hawaii in 1976 totaled 307,000. The thirty-four commercial and educational radio stations in the Islands early in 1978 included 26 on the regular broadcast band and eight FM stations. The State also had 15 television stations (13 commercial and two educational), including satellites but excluding translators. Ten cable TV companies served 87,000 subscribers. More than 96 percent of all households had television sets, and half of the adults surveyed watched three or more hours daily. Island publishers printed seven daily newspapers, numerous magazines and other periodicals, and a wide diversity of books. Newspaper circulation reported by the three English-language dailies averaged 211,500 in 1976, compared with 190,700 a decade earlier.

The major sources for statistics on communications are the reports and records of the U.S. Postal Service, Federal Communications Commission, CATV Division of the Hawaii State Department of Regulatory Agencies, Hawaiian Telephone Company, and Audit Bureau of Circulations, and *Hawaii Media Guide*. Data on communications for other States and for the nation as a whole are carried in *Statistical Abstract of the United States: 1977*, Section 19.

Section 17

ENERGY AND SCIENCE

This section presents statistics relating to electrical, gas and petroleum power and energy, and to scientific resources.

Electricity sales exceeded 5.8 billion kilowatt-hours in 1977, or 7,500 per residential customer. The total has doubled since 1967. Manufactured gas sales reached 34.8 million therms in 1977, 55 percent above the figure ten years earlier. Residential rates in 1977 averaged 5.2 cents per kilowatt-hour and 86 cents per therm, both well above the corresponding rates several years earlier.

The liquid fuel tax base for 1977 was approximately 888 million gallons, compared with 825 million in 1974 and 572 million in 1967. The 1977 total included 311 million gallons of gasoline, 473 million of aviation fuel, and 99 million of diesel oil. The average price for premium gasoline rose from 48.7 cents per gallon in October 1973 to 77.7 cents in April 1978.

Total energy consumption in 1974 amounted to 185 trillion British thermal units, compared with 104 trillion BTU a decade earlier. Transportation accounted for 58 percent of the 1974 total.

The State is well served with scientific resources. A 1976 inventory reported 384 companies and agencies with research or scientific capabilities. Employment in these organizations was more than 34,000. Forty-three patents were granted to Hawaii residents in 1977.

Information on communications, energy and science can be obtained from reports and records of the U.S. Bureau of Mines, Federal Energy Administration, Federal Power Commission, Hawaii State Department of Taxation, Hawaii State Department of Regulatory Agencies, Public Utilities Division, and individual utility companies. Detailed statistics on energy consumption, with special emphasis on petroleum products, appear in *Energy Use in Hawaii*, published by the State Energy Office of the Department of Planning and Economic Development in November 1977. *Hawaii's Scientific Resources, 1977 Directory*, issued by DPED in 1977, contains information on scientific organizations and facilities in the Islands. Data for the nation as a whole can be found in the *Statistical Abstract of the United States: 1977*, Sections 20 and 21.

Section 18

TRANSPORTATION

This section presents statistics relating to public roads, motor vehicles, bicycles, traffic accidents, local public transit, civil aviation, harbors, and water traffic.

Most local travel in Hawaii is by private automobile. Motor vehicle registration increased from 335,000 in 1967 to 446,000 in 1972 and 562,000 in 1977. Vehicle miles rose during the same period from 2.7 billion to 4.5 billion. Hawaii residents purchased 46,500 new passenger cars in 1977 and scrapped or shipped out approximately 25,000. By the end of 1977, 541,000 licensed drivers had access to 3,828 miles of streets and highways throughout the State. There was a corresponding rise in the use of local bus service: passengers carried by the Honolulu Mass Transit Lines increased from 19.4 million in 1971 to 66.3 million in 1977. Registered bicycles numbered 108,000 in 1974 and 84,000 in 1977.

Most scheduled interisland travel is now by air. As recently as 1941, interisland steamers carried 163,000 passengers, while the single airline then operating carried 49,000. Interisland steamer service was discontinued in 1949; hydrofoil service was initiated between Honolulu and other Island ports in 1975 and suspended early in 1978. In 1977, the two scheduled airlines and a number of air taxis reported 6.4 million interisland passengers, more than three times their 1967 total, while hydrofoil passengers numbered 270,000. The State has 11 commercial airports, 45 general aviation, military, or private airports, 18 civilian heliports, 3,241 active pilots, and 386 active civil aircraft.

Rapid growth is similarly evident in transpacific travel. Although surface passenger arrivals dropped from 54,000 in 1959 to 5,900 in 1977, air passengers increased during the same 18-year span from 224,000 to 3.7 million. Between 1936 and 1978, sharp declines occurred in both scheduled flight time between California and Hawaii (from 20 to 5 hours) and minimum roundtrip fare (from \$712 to \$242). Overseas cargo received in the State in 1976 amounted to 68,000 tons by air and 9.2 million tons by ship.

Undocumented State-registered vessels as of December 31, 1977, numbered 13,165, compared with 8,042 in 1970. Median length was 17 feet, and four-fifths were stored on land. There were also 924 documented vessels in the State in 1977, more than triple the 1965 total.

The chief source for transportation statistics is the Hawaii State Department of Transportation and its Land, Water, and Air Transportation Facilities Divisions. Other sources include the U.S. Coast Guard, Civil Aeronautics Board, Federal Aviation Administration, Army Corps of Engineers, Hawaii State Public Utilities Commission, Honolulu Department of Transportation Services, County finance departments, Cardinal Mailing Services, and individual transportation companies. Similar statistics for other areas are reported in *Statistical Abstract of the United States: 1977*, Sections 22 and 23.

**Table 292.—MILEAGE OF STREETS AND HIGHWAYS, PAVED AND UNPAVED:
1970 TO 1977**

Year (December 31)	Total	Paved	Unpaved
1970	3,529.10	3,047.10	482.00
1971	3,598.95	3,098.51	500.44

¹ Includes mileage for regular public bus lines, school subsidies, and chartered services.

² Under HRT, chartered services were provided for both public and private groups, including special events, excursions and field trips. Under MTL, service is provided for intercity functions.

³ Passenger total excludes 2,277,502 zone fares; total revenue passengers (adult, student, and chartered) numbered 23,693,547. Under HRT, service was limited largely to Honolulu and Halawa. Service was suspended during a one-day strike in August 1970.

⁴ Bus service by HRT was terminated by a strike that began January 1, 1971 and is still in progress. MTL commenced service on March 1, 1971, with routes extending from Kalihi to Hawaii Kai.

⁵ Service provided from Pearl Harbor to Hawaii Kai; extended to Windward Oahu and North Shore on August 13, 1972.

⁶ Service extended to Waianae coast in April 1973.

⁷ Islandwide service after March 15, 1974, when MTL began operation of Leeward Bus Company lines.

Source: City and County of Honolulu, Department of Transportation Services, Bus Systems Division, records.

Footnotes and source on next page.

¹ For single fares. Multiple fares similar to token or ticket fares were available 1928-1946 and 1951-1961.

² Pioneer Omnibus Line operated a single horse-drawn vehicle around central Honolulu "for a few years" beginning in Spring 1868.

³ Hawaiian Tramways, Ltd., operated a mule-car service in central Honolulu (and eventually to Waikiki) between December 28, 1888 and December 23, 1903.

⁴ Honolulu Rapid Transit and Land Company operated electric street cars (1901-1941), motor buses (1915-1970), and trolley buses (1938-1958) in Honolulu (and eventually to Pearl Harbor), beginning service August 31, 1901 and terminating it December 31, 1970. Special fares were charged for the Pearl Harbor service: 20¢ effective June 16, 1951, 25¢ on April 1, 1952, and 30¢ on September 10, 1953. Zone fares, charged briefly, were eliminated in 1961. There was also a cash transfer fare.

⁵ Mass Transit Lines (City Bus Service) began operation March 1, 1971, initially serving areas between Kalihi and Hawaii Kai but by March 15, 1974 providing Islandwide service. In addition to the fares listed, MTL offered special fares for children (10¢, effective June 30, 1971), blind persons (free from the start of service), and senior citizens (also free, but until September 18, 1972 only in off-peak periods).

⁶ Zone fares initiated.

¹ Scheduled interisland passenger service by hydrofoil vessels was begun on June 15, 1975, and terminated January 15, 1978.

² Excludes nonrevenue passengers before 1970. Air taxi service seriously underreported before 1977.

³ Port of Honolulu only. Excludes through passengers. For years ended June 30.

⁴ Includes nonrevenue passengers beginning in 1970. Treatment of through passengers was apparently changed after 1959 and again after 1969.

AGRICULTURE

This section presents statistics on agricultural land, farms, and specific crops, livestock, dairy products, and poultry. Related information appears in Section 6 (on land use), 11 and 15 (agricultural employment and earnings), 17 (energy used on farms), and 22 (food processing).

There were 4,100 farms in Hawaii as of 1977, with a total area of 2,300,000 acres. Both figures have declined during the past decade. The value of crop sales in 1977 was \$259 million, or 61 percent higher than the total for 1967. Livestock sales amounted to \$65 million, or 74 percent more than the 1967 level. Combined crop and livestock sales ranged from \$37 million in Kauai County to \$105 million on Oahu. Net farm income in 1976 was \$58.7 million, the lowest annual total since 1970. Major crops in 1977 were sugar (\$144 million in sales, up 36 percent over the decade), pineapple (\$62 million, or 62 percent over the 1967 total), and vegetables and melons (\$15 million, or 131 percent more than in 1967). Diversified agriculture, defined as all crops other than sugar and pineapple, rose from \$16 million in 1967 to \$53 million in 1977, or approximately 223 percent. About 550 farms sold \$14 million of flowers and nursery products in 1977, chiefly anthuriums, orchids, potted foliage, and ornamentals and trees. Important products of livestock farms as of 1977 included cattle (19 million in sales), hogs (\$7 million), milk (\$23 million), and eggs (12 million). Coffee sales have fluctuated sharply during the past decade, but macadamia nuts and horticultural specialities have increased rapidly. In 1977, Hawaii produced 43 percent of the fresh market vegetables consumed locally, 30 percent of the fresh market fruits, 35 percent of the beef veal, 22 percent of the chickens, none of the rice, butter, and oleomargarine, all of the milk, and 92 percent of the eggs.

Statistics on Hawaiian agriculture exclude *pakalōlō* (marijuana) and other illicit plants. Some authorities have speculated that the income from such illegal production may exceed that from more traditional forms of diversified agriculture.

Important sources for data on agriculture include the *United States Census of Agriculture*, most recently conducted at the end of 1974, the annual report on *Statistics of Hawaiian Agriculture* issued by the Hawaii Agricultural Reporting Service, and publications of the Hawaii Agricultural Experiment Station, Hawaiian Sugar Planters' Association, and Pineapple Growers Association of Hawaii. National statistics appear in Section 24 of the *Statistical Abstract of the United States: 1977*.

Table 326.—AGRICULTURAL SUMMARY: 1950 TO 1974

Year	Number of farms, by size (in acres)					Farm acreage (thousands)			
	All farms	1 to 9	10 to 49	50 to 259	260 and over	Total acreage	In farms of 260 or more acres	Harvested cropland	Irrigated
1950	5,750	3,558	1,669	339	184	2,432	2,350	159.5	117.4
1959	6,242	3,569	1,988	432	253	2,461	2,364	176.4	141.2
1964	4,864	2,603	1,594	416	251	2,354	2,266	167.5	143.9
1969	3,896	2,024	1,281	389	202	2,058	1,982	178.7	145.6
1974	3,020	1,633	872	317	198	2,119	2,060	151.4	141.7
Year	Average age of farm operators (years)	Tenant farmers		Regular hired workers ¹	Average value of land and buildings		Market value of agricultural products sold		
		Percent of all operators	Percent of farm acreage		Per farm (\$1,000)	Per acre (dollars)	Total (\$1,000)	Average per farm (\$1,000)	Percent of farms over \$2,500
1950	47.8	57.5	1.7	21,597	34.0	80	164,554	28.6	(NA)
1959	49.5	38.7	1.6	14,403	(NA)	(NA)	152,334	24.4	(NA)

Kauai	300	282	37,352	32,200	—	2,911	2,241

¹ Includes land not in crop and pasture, such as farm house lots, roads, etc.

² Excludes illegal crops, which are thought by some authorities to have sales greater than those of all legal crops. Shipments of *paka/ølø* (marijuana) from Hawaii County alone have been estimated at 250,000 pounds annually, with annual sales from these shipments running \$250 million and \$750 million; see *Honolulu Advertiser*, August 15, 1978, p. A-4.

Section 20

FORESTS, FISHERIES, AND MINING

This section presents data on forests and forest products, commercial fishing, and mining and mineral products.

The most recent available statistics show 1.2 million acres of forest reserve and 948,000 acres of commercial forest in the State, most of it on the Big Island. More than 49,000 acres had been planted in eucalyptus and other species of trees by 1977. Primary forest products harvested in 1969 (the most recent year available) had a value of \$331,000. Almost 900 forest and brushland fires burned 6,500 acres in 1977. According to a 1974 compilation, the tallest tree in the State is a 203-foot *eucalyptus saligna*.

The commercial fish catch in fiscal 1977 was 15.3 million pounds and had a value of \$9.4 million. *Aku* (Skipjack) accounted for 41 percent of the total value. Other important species were *ahi*, *akule*, *opelu*, and *mahimahi*. Commercial fishermen numbered 2,367; they operated 1,437 fishing vessels, serving 44 fishery wholesaling and processing establishments.

The value of mineral production reached \$44 million in 1977, most of it in cement and stone. The all-time high was \$49.7 million, recorded in 1975.

Important sources of data on these subjects are the United States Census of Agriculture, United States Census of Mineral Industries, and reports and records of the U.S. Bureau of Mines, National Marine Fisheries Service, and Hawaii State Department of Land and Natural Resources, Fish and Game Division and Forestry Division. Comparable Mainland statistics are reported in the *Statistical Abstract of the United States: 1977*, Sections 25, 26, and 27.

**Table 338.—FOREST RESERVE, TREES PLANTED, AND FOREST FIRES:
1967 TO 1977**

Year	Forest reserve ¹ (1,000 acres)	Acres planted in trees ²	Forest and brushland fires ³	
			Number ⁴	Acres burned
1967	1,196	2,404	16	6,572
1968	1,196	2,039	25	13,339
1969	1,196	1,499	34	45,523
1970	1,196	1,539	62	14,245
1971	1,196	776	49	1,951
1972	1,196	361	67	8,190
1973	1,196	162	75	17,968
1974	1,196	88	36	2,640
1975	1,196	137	45	3,438
1976	1,196	324	64	6,881
1977	1,196	20	888	6,495

¹ As of June 30. Effective July 10, 1961, the area previously known as the forest and water reserve was designated the forest and water reserve within the conservation district. Data include both governmental and private land.

² Years ended June 30. Data refer to acreage planted in forest reserves.

³ Calendar years.

⁴ Increase after 1976 reflects improved reporting of smaller forest and brushland fires.

Source: Hawaii State Department of Land and Natural Resources, Division of Forestry, records.

Table 339.—AREA OF FOREST LAND, 1970, AND PLANTED FOREST, 1977, BY ISLAND
[In acres.]

Island	Forest land, 1970		Area of planted forest, to 1977 ³
	Total ¹	Commercial ²	
State total	1,986,400	947,800	49,309
Niihau	31,100	—	—
Kauai	219,900	145,900	5,280
Oahu	205,300	126,500	7,218
Molokai	78,100	34,000	2,847
Lanai	43,900	4,500	512
Kahoolawe	15,800	—	—
Maui	239,800	67,500	10,670
Hawaii	1,152,500	569,400	22,782

¹ Includes commercial (938,300 acres), unproductive (933,700), and productive-reserved (114,400).

² Includes Federal military (12,300), State (428,100), miscellaneous corporate (294,900), and miscellaneous individual (203,000). Data revised since publication in *Data Book 1977*, table 301.

³ Chiefly Eucalyptus, other hardwoods, and conifers. Includes arboretum plantings.

1974 ⁶	1,992	97	1,066	42	10,990	6,028
1975	2,197	109	1,278	42	9,208	6,312
1976	2,367	101	1,336	44	14,761	8,879

¹ Persons licensed as commercial fishermen by the Hawaii State Department of Land and Natural Resources, Fish and Game Division. Data refer to June 30 of the following year.

² A vessel is defined as a craft having a capacity of five net tons or over; a boat, as a craft having a capacity of less than five net tons. Data on vessels and boats refer to June 30 of the following year.

³ Data include all fishery wholesaling and processing establishments in the State. All totals are as of June 30 of the year indicated.

⁴ Data may differ from corresponding totals reported by the State Fish and Game Division, which, unlike the NMFS series shown here, include unsold fish.

⁵ Fishery operating units not reported by NMFS before 1959.

⁶ Methods of collecting data on operating units were changed in 1974.

Section 21

CONSTRUCTION AND HOUSING

This section presents statistics on construction activity and costs, the size and composition of the housing inventory, occupancy of housing, sales, and residential financing.

There were 23,406 building permits issued in 1977, with an estimated value of \$534 million. The total included \$311 million for private residential construction and \$154 million for private nonresidential structures. The estimated value of construction put in place, as indicated by the contracting tax base, was \$1.16 billion in 1975 and \$1.01 billion in 1976. The value of land transfers in fiscal 1978 was \$1.3 billion. Mortgage loans outstanding amounted to \$3.96 billion. The May 1978 construction cost index for Honolulu was 239.3 for single-family residences and 238.9 for high-rise buildings, with the 1967 average equal to 100. By the end of 1977, 2,881 elevators were in operation in the Islands.

The number of housing units in the State increased from 166,000 in 1960 to 217,000 in 1970 and 281,000 in 1978. Owner occupied units numbered 56,000 in 1960 and 129,000 in 1978; the latter total included 93,000 on land owned in fee and 36,000 on leased land. Condominium units, first authorized in 1961, approached 60,000 at the end of 1977. Military and public housing accounted for 25,000 units as of 1978. Housing was in short supply throughout most of the past decade: on Oahu, the 1978 vacancy rate was only 1.5 percent, although a fifth of all units turned over at least once during the year. The average selling price of single family homes on Oahu in the first half of 1977, based on Multiple Listing Service data, was \$90,700. Median monthly rent for the State rose from \$64 in 1960 to \$120 in 1970 and \$204 (the mean) in 1976, and the average value of owner occupied units in the latter year was \$61,000. The average property value of new homes insured by the Federal Housing Administration in Hawaii was \$21,600 in 1960 and \$48,600 in 1975 — both figures well over national averages.

The principal sources for these data are the United States Census of Housing, and annual report on *FHA Homes, Data for States and Selected Areas*, postal vacancy surveys issued by the Federal Home Loan Bank, the Hawaii Health Surveillance Program survey, the Honolulu Department of Housing and Community Development's *Housing and Community Development Research*, reports of the county building departments, the First Hawaiian Bank's monthly *Economic Indicators*, the Bank of Hawaii's annual *Construction in Hawaii*, and the semi-annual *Multiple Listing Service Statistical Review*. Mainland statistics appear in Section 28 of *Statistical Abstract of the United States: 1977*.

1978	280,622	92,989	35,869	126,837	18,653	6,274

¹ As of April 1.² As indicated by the number of taxpayers claiming home exemptions. The number of owner occupied housing units reported by the U.S. Census of Housing is somewhat higher than the corresponding number based on taxpayer home exemptions, chiefly because of differences in definitions. Data for 1968, 1977 and 1978 refer to January 1; data for 1969-1976, to July 1.³ Data for both Federal and State agencies include housing units leased by these agencies from private owners. All data are as of April 1.⁴ Calculated as a residual after accounting for the known components, some of which pertain to dates other than April 1, and thus not attributable to any specific date.Source: Honolulu Redevelopment Agency, *Redevelopment and Housing Research*, No. 33 (July 1973) and No. 34 (July 1974); Honolulu Department of Housing and Community Development, *Housing and Community Development Research*, Nos. 35-38 (July 1975-July 1978).

Section 22

MANUFACTURES

This section presents statistics on the manufacturing segment of the economy, including sugar processing and pineapple canning.

The number of manufacturing establishments in Hawaii increased from 618 in 1958 to 697 in 1967 and 773 in 1972. The value added by manufacture rose from \$165 million in 1958 to \$326 million in 1967, \$410 million in 1972, and \$700 million in 1976. About 72 percent of all manufacturing activity in the State was on Oahu in 1976. Food processing—mostly sugar and pineapple—accounted for more than half of the value added by manufacture in that year. Between 1966 and 1976, the general excise and use tax base increased 54 percent for sugar processing, dropped 10 percent for pineapple canning, and rose 101 percent for all other manufacturing. There were three pineapple canneries and 16 sugar mills in Hawaii in mid-1977. The production of canned pineapple fruit and juices in 1976-1977 dropped to 19 million actual cases, well below the levels of earlier years, but fresh pineapple sales rose sharply. Sugar production in 1977 amounted to 1.03 million short tons, about the same level as in other recent years. The value of production (including raw sugar and commercial molasses) was \$227 million, well below the record set in 1974 but still the fourth best year in Island history.

Sources for data on this subject include the United States Census of Manufactures, most recently published for 1972, the Annual Survey of Manufactures, and publications of the Hawaii State Department of Agriculture and Department of Taxation, Hawaiian Sugar Planters' Association, and Pineapple Growers Association of Hawaii. Statistics for the nation as a whole appear in Section 29 of the *Statistical Abstract of the United States: 1977*.

Section 23

DOMESTIC TRADE AND SERVICES

This section presents statistics relating to retail and wholesale trade; hotels; and selected personal, business, automotive, repair, and amusement services.

These activities have undergone rapid growth in recent decades. Retail sales increased from \$522 million in 1958 to \$1,083 million in 1967 and \$1,865 million in 1972. Wholesale sales rose from \$618 million to \$1.54 billion in the same 14-year period. Hotels, amusements, and other services reported receipts of \$683 million in 1972, compared with \$295 million in 1967 and only \$101 million in 1958. General excise and use tax base data for more recent years indicate continued increases; between 1972 and 1976, the retailing tax base rose 68 percent, the wholesaling base by 69 percent, and the base for services by 71 percent. Major retail concentrations included Ala Moana Center (\$219 million in sales in 1972), Waikiki (\$169 million), and downtown Honolulu (\$65 million). The 19 department stores on Oahu reported sales of \$347 million in 1977, double their 1970 volume. The wholesale value of liquor and tobacco sold in 1977 exceeded \$112 million. In addition to civilian retail outlets, there are 79 commissaries, exchanges, clubs, and food services maintained by the armed forces; these facilities had sales of \$231 million in 1977.

Growth has been especially rapid for hotels. The number of units in the State rose from 5,500 in 1958 to 21,200 in 1968 and 47,000 in February 1978. There were 353 hotels, motels and apartment-hotels in the State on the latter date, including 214 on the Neighbor Islands. Occupancy rates averaged 81.2 percent in Waikiki and 71.7 percent on the Neighbor Islands during 1977. The average daily room rate was \$34.28 in 1977. The hotel payroll in 1976 totaled \$155 million, compared with \$35 million ten years earlier.

The major source for these data is the United States Census of Business, most recently published for 1972. Statistics on the retailing, wholesaling, and services tax bases are available through 1976 from the Hawaii State Department of Taxation; these series were discontinued in January 1977 and resumed early in 1978. Data on hotel room counts, occupancy and other characteristics are published by the Hawaii Visitors Bureau and the firm of Harris, Kerr, Forster and Company. The *Statistical Abstract of the United States: 1977*, Section 30, presents similar data for other states and the nation as a whole.

Section 24

FOREIGN AND INTERSTATE COMMERCE

This section includes data on the flow of goods, services, and capital between Hawaii and the rest of the world, with particular emphasis on trade and investment involving foreign countries.

Imports to Hawaii from foreign nations rose from \$120 million in 1967 to \$993 million in 1977. Exports to foreign countries amounted to only \$47 million in 1967, but by 1977 exceeded \$98 million. (These figures, it should be noted, refer to merchandise imports for consumption and exports of domestic merchandise through the Honolulu Customs District. They do not necessarily represent exports of commodities originating in Hawaii, nor imports for direct consumption within the State.)

Trade with the Mainland United States has similarly risen in the past decade. Merchandise received from the Mainland increased from \$689 million in 1966 to \$1.8 billion in 1976, the most recent year available. Merchandise exported to the Mainland rose from \$311 million in 1966 to \$817 million in 1974, then slipped back to \$415 million in 1976.

Among the foreign nations, Hawaii's leading trading partners in 1976 were Indonesia for imports and Japan for exports. Imports from Indonesia amounted to \$249 million, or 28 percent of the total, while exports to Japan reached \$13 million, or 21 percent of all foreign exports. The Indonesian imports consisted mostly of crude oil.

The Honolulu Foreign Trade Zone received merchandise valued at \$14 million in 1977. Merchandise forwarded was valued at \$12 million.

Hawaii residents had out-of-State assets estimated at \$2,676 million in 1971. Assets of non-residents in the State at the same time amounted to approximately \$3,439 million.

Hawaii affiliates of foreign firms owned 51,000 acres (and leased another 60,000) in the Islands as of December 1974, reported property, plant, and equipment worth \$716 million, and employed 13,095 persons with an annual payroll of \$91 million. Major Japanese firms operating in Hawaii in September 1976 numbered 109.

Sources for statistics on interstate and foreign commerce include the U.S. Bureau of the Census (for foreign trade), the Bank of Hawaii (for interstate trade and balance of payments), Foreign Trade Zone No. 9, the Hawaii International Services Agency, a study of *Foreign Direct Investment in the United States* issued by the U.S. Department of Commerce in 1976, and a 1973 study by the University of Hawaii Economic Research Center on *The Economic and Social Impact of Foreign Investment in Hawaii*. Further information appears in cargo data by origin and destination, compiled by the Army Corps of Engineers and cited in Section 18.

Comparable data for the nation as a whole appear in Section 31 of *Statistical Abstract of the United States: 1977*.

BIBLIOGRAPHY

This volume is the twelfth in a series published by the Hawaii State Department of Planning and Economic Development and its predecessor agencies. The first was *Statistical Abstract of Hawaii, 1962*, prepared by Robert C. Schmitt and issued by the Department of Planning and Research in 1962. After a four-year hiatus, updated versions titled *The State of Hawaii Data Book* were published by the Department of Planning and Economic Development in 1967, 1968, and annually beginning in 1970. The 1967 and 1968 editions were compiled by Nancy C. Fowler for the DPED Information and Public Service Office. The 1970 and succeeding editions were prepared by Robert C. Schmitt and Lynn Y.S. Zane of the Research and Economic Analysis Division. Most of the volumes issued prior to the present edition are now out of print, but copies can be consulted in the DPED Library, Hawaii State Library, University of Hawaii and community college libraries, Honolulu Municipal Reference Library, and other collections throughout the State.

Additional information regarding specific statistical sources can be found in the introductory statements to each section of the *Data Book*, in footnotes and source references to the various tables, and in other DPED publications. Three of these DPED reports cover statistical sources in considerable detail: *Statistics in Hawaii: 34 Papers Prepared for the Hawaii Statistical Reporting System Workshop, February 18-20, 1970, at Waikiki* (1970), *Proceedings of the Conference on Socio-Environmental Indicators, March 15-17, 1971, Honolulu, Hawaii* (1971), and *Inventory of Hawaii Planning Information* (1973). The first two are the reports of statistical symposia organized by Dr. Richard Y.P. Joun. The third is a 164-page reference work prepared for the Hawaii Urban Planning Information Center by Nancy Fowler, containing detailed geographic and subject-matter indexes and source listings. These reports are now out of print, but copies can be consulted in most Hawaii libraries.

Although most of the series in the *Data Book* are shown only for recent years, earlier figures in many cases can be found in *Historical Statistics of Hawaii*, by Robert C. Schmitt. This book, published by the University Press of Hawaii in 1977, contains 711 pages of narrative and tables on the development of statistics in Hawaii since the 18th century. Copies are available from the University Press and various book stores for \$25.

Privately published works of general statistical reference include *Hawaii Facts and Figures, All About Hawaii, Combined with Thrum's Hawaiian Almanac and Standard Guide*, and *All About Business in Hawaii*.

Hawaii Facts and Figures is a publication of the Chamber of Commerce of Hawaii. First issued in 1935 as *Business Statistics*, it was renamed *General Information About Honolulu, Hawaii, U.S.A. and the Territory* in 1938 and was given its present title in 1946. Since then it has appeared at annual or biennial intervals. The most recent version is the 1978 edition, with statistics through 1977; copies are available from the Chamber for \$2.00.

The current edition of *All About Hawaii* is the ninety-first, published in 1974 by SB Printers, Inc., at \$2.95. *All About Hawaii* began in 1928 as a tourist guide published by the Honolulu Star-Bulletin. Late in 1940 it was combined with the *Hawaiian Almanac and Annual*, which had appeared regularly since its founding by Thomas G. Thrumb in 1875. Issued annually at first, this series has in recent years appeared at much more widely spaced intervals.

All About Business in Hawaii, 1978 Edition, is the sixth in an annual series published by Crossroads Press. The current edition costs \$2.00.

Two other privately published reports containing useful statistics are the annual economic reviews of the two largest banks in the State. The current editions are *Hawaii 78*, published by the Bank of Hawaii in August 1978, and *Hawaii in 1977*, issued by the First Hawaiian Bank as a supplement to its monthly *Economic Indicators* for April 1978.

The County of Hawaii, Department of Research and Development, has published its own *Data Book 1978*, presenting 232 pages of statistics for the Big Island.

The major official source for general statistical information during the Territorial period was the *Report of the Governor of Hawaii to the Secretary of the Interior*, issued annually (sometimes with variant titles) from 1900 to 1959. No comparable work was published by either the Kingdom or Republic of Hawaii, although Thrumb's *Hawaiian Almanac and Annual* served much the same function.

Persons interested in comparisons between Hawaii and other States or the nation as a whole should consult the *Statistical Abstract of the United States* and its companion volume, the *County and City Data Book*. The *Abstract* is an annual publication of the U.S. Bureau of the Census, initiated in 1878. The current edition is the 98th, dated 1977; copies are available for \$11.00 (cloth) or \$8.50 (paper) from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. The *County and City Data Book*, most recently issued for 1977, is sold by the same agency for \$19.50. Both volumes are on the shelves of most libraries.

Table B.—PRINTING HISTORY OF THE STATE OF HAWAII DATA BOOK: 1962 TO 1977

¹ The 1962 edition was titled *Statistical Abstract of Hawaii, 1962*. In addition, a 41-page, 57-table supplement, *Historical Statistics of Hawaii, 1778-1962*, was published and distributed without extra charge to persons receiving the regular edition.

² A 19-page supplement, *State of Hawaii Census Tract Maps and Directory of Hawaii Map Sources*, was included with each copy of the regular edition, and was not sold separately.
