This report was prepared by Robert C. Schmitt, State Statistician, with the assistance of Lynn Y. S. Zane, Roy H. Tsumoto, and Sharon Nishi. The camera-ready copy was typed and proofread by Irene S. Fujimori, Judy F. Noda, Helen T. Nagafuchi, and Joanne Nakata. All are members of the DPED's Research and Economic Analysis Division, headed by Dr. Richard Y. P. Joun. The maps were drawn by Stewart A. Wastell, illustrator in the DPED's Planning Division. Editing and printing arrangements were handled by the DPED's Information Office.

Copies of this report may be obtained for \$4.00 each from the Information Office on the 7th floor of the Kamamalu Building, 250 South King Street, Honolulu, or ordered from out of State by sending \$5.00 per copy (postpaid) to the DPED Information Office, P. O. Box 2359, Honolulu, Hawaii 96804.

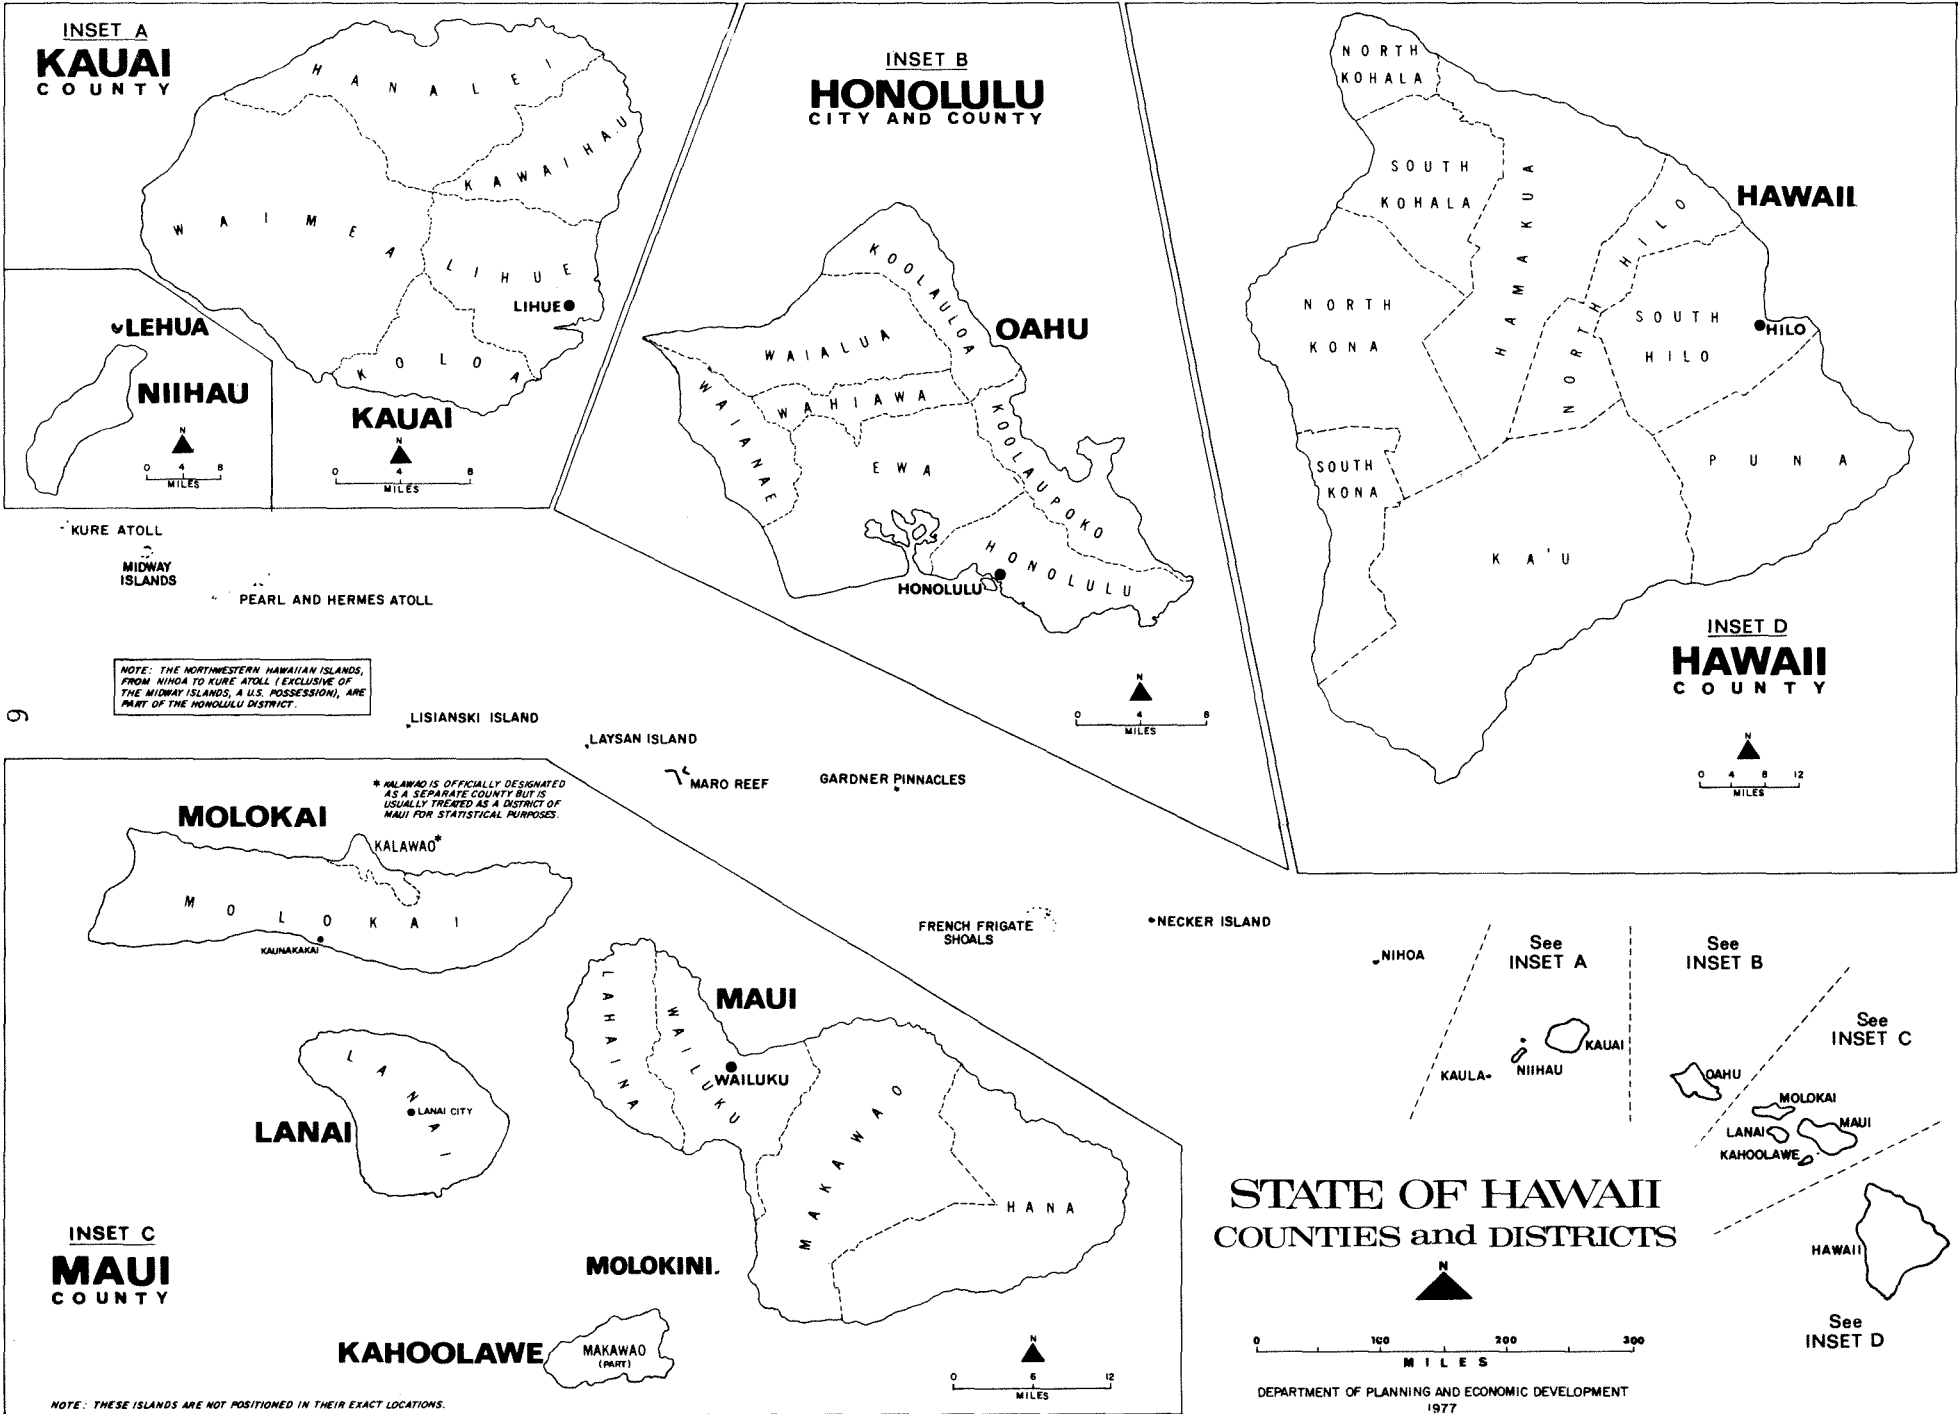

## FOREWORD

By George R. Ariyoshi  
Governor, State of Hawaii

Accurate, timely and substantial information is essential to sound decision-making. The State of Hawaii has long recognized that orderly State growth and planned prosperity require a continuing, efficient organization of statistical data and other information into forms which are easily used and readily available to all who need them. This State of Hawaii Data Book 1979 is the latest example of the State Administration's constant effort to provide and improve this important service to Hawaii's citizens.

The Data Book is invaluable for Government administrators. It is vital to all agencies, companies, organizations and individuals who carry out a great variety of forms of research in the Islands and overseas. It is very useful to other citizens who have only an occasional need for accurate statistics. It is a book which, thanks to the professionalism of its compilers, can be depended upon, and upon which thousands do depend. And it is only one--although perhaps the best one--of a large number of excellent data sources which Hawaii makes available.

Through such reference works, Hawaii is able to go about its myriad tasks with confidence that its information base is sound. This State of Hawaii Data Book 1979 is one of many proofs we have that our people know what they are doing, and where they are going, and are reasonably certain they can achieve their goals.

# INTRODUCTION

By Hideto Kono, Director  
Department of Planning and Economic Development

The State of Hawaii Data Book: A Statistical Abstract is intended to serve as the standard official summary of statistics on the social, economic, and political organization of the State. Like its long-established counterpart, the Statistical Abstract of the United States, it may be used as either a convenient volume of statistical reference or a guide to other statistical publications and sources.

The present volume, containing statistics available in the summer of 1979, is the thirteenth such abstract to be published by the State of Hawaii. Earlier editions appeared in 1962, 1967, 1968, and annually beginning in 1970. All are now out of print, but copies can be seen in many high school, university, and public libraries in Hawaii.

The Data Book closely follows the organization and format of the U.S. Abstract, in order to facilitate comparison of Hawaii data with corresponding series for the nation and other jurisdictions.

Emphasis in the Data Book is given to the most recent available State data. Historical statistics and information for counties, islands, urban places, and smaller areas receive more limited attention. The publications cited as sources in the introductions to the various sections or at the end of each table usually contain additional statistical detail and a more comprehensive discussion of relevant definitions and concepts than can be presented here. Persons interested in more extensive information should consult these sources or write to the agencies responsible for them.

Many Federal, State, County and private organizations cooperated in the preparation of this report. These agencies are credited in the source references to the tables to which they contributed. Their assistance is gratefully acknowledged.

# GUIDE TO TABULAR PRESENTATION

The tables in this report generally follow the principles of tabular presentation used by the U.S. Bureau of the Census in its annual publication, Statistical Abstract of the United States, and described in Bureau of the Census Manual of Tabular Presentation, published by the Bureau in 1950. These principles have been accepted by the Department of Planning and Economic Development for use in its publications and recommended to all other State agencies for official use.

Headnotes immediately below table titles provide information important for correct interpretation or evaluation of the table as a whole or for a major segment of it.

Unit indicators ("In thousands," "In millions of dollars," etc.) are usually given as the first element of the headnote. In tables where several units are used, the unit indicators are generally given in the stub or in the column headings.

Footnotes below the bottom rule of tables give information relating to specific items or figures within the table.

Parallel vertical rules are used to the right of a total column to indicate --

- (1) that the components which follow add to the total;
- (2) in the case of derived figures, that the underlying data are additive to their total.

The following symbols, used in the tables throughout this book, are explained in condensed form in footnotes to the tables where they appear:

- Represents zero or rounds to less than half the unit of measurement shown.
- D Figure withheld to avoid disclosure of information pertaining to a specific organization or individual.
- NA Data not enumerated, tabulated, or otherwise available separately.
- ... Same as NA; used in tables in which a large number of cells lack data.

In many tables, details will not add to the totals shown because of rounding.

Median: The value which divides the distribution into two equal parts--one-half the cases falling below this value and one-half exceeding it.

Geographic coverage should be understood as Statewide, unless otherwise indicated in the table title, headnote, boxhead, or stub. All annual statistics should be understood as referring to calendar years unless otherwise indicated.

## Section 1

# POPULATION

This section presents statistics on the growth, geographic distribution, and characteristics of the population of Hawaii, and on the number and characteristics of migrants to and from the State.

Preliminary estimates for mid-1978 indicate a resident population of 896,600. This total includes approximately 56,500 members of the armed forces and 61,100 of their dependents. It excludes an average of 96,000 visitors who were present in 1978, while including an average of 7,900 residents who were temporarily out of the State. The total population has risen from 58,000 in 1878 to 154,000 in 1900 and 423,000 in 1940 (although a wartime peak of 859,000 was reached in 1944). Approximately 79.1 percent of the 1978 de facto total lived on Oahu, giving that island a density of 1,315 persons per square mile. The population is young -- the median age in 1977 was 28.3 years -- and racially diversified. The major unmixed groups in 1977 were Caucasians (27.5 percent of the non-barracks, non-institutional population) and Japanese (25.9 percent). In addition, 25.7 percent were of mixed race, primarily part Hawaiian. Migration has been a major factor in the growth of the population: between 1970 and 1978, there was a net in-migration (excluding military personnel and dependents) of 55,700, accounting for almost half of the total civilian population growth during that time. Intended residents arriving aboard westbound civilian carriers in fiscal 1978 numbered 47,300, of whom 27,600 were military personnel and dependents and 19,700 were other civilians. Immigrant arrivals in fiscal 1977 totaled 7,800, mostly from the Philippines and Korea.

The comparison of demographic data from different sources is often complicated by the use of differing definitions and coverage. Some series, for example, refer to resident population, while others pertain to de facto population; the latter includes visitors present but excludes residents temporarily absent. Total population includes armed forces stationed in an area, as well as their dependents in the area; civilian population excludes military personnel but includes their dependents. Perhaps the greatest confusion is that resulting from the arbitrary allocation of persons of mixed race in the 1970 U. S. Census. Such groups were shown separately in earlier censuses, and are still reported separately in data issued by State agencies.

The principal sources for these data are the decennial censuses (most recently conducted in 1970), the estimates developed annually by the Hawaii State Department of Health and Department of Planning and Economic Development in cooperation with the Bureau of the Census, the Hawaii Health Surveillance Program conducted regularly since 1969 by the Department of Health, the OEO 1975 Census Update Survey, and the ongoing series on migration maintained by the Hawaii Visitors Bureau and U. S. Immigration and Naturali-

zation Service. The Department of Planning and Economic Development summarizes these data in two series of reports, both issued annually: The Population of Hawaii and Hawaii's In-Migrants. Another annual report distributed by DPED contains population estimates by census tracts. Earlier information on population and migration is given in Historical Statistics of Hawaii, Sections 1 and 3. Comparable national statistics on population and migration appear in sections 1 and 3 of Statistical Abstract of the United States: 1978.

1970: April 1 <u>7/</u> ..	769,913	2.0	34	643,222	126,691	16.5

1/ De facto basis through 1896 and resident basis thereafter.

2/ The urban population comprises all persons living in urbanized areas (first defined for Hawaii in 1960) and in places of 2,500 or more outside urbanized areas. Statistical boundaries were first established for Honolulu in 1831, Hilo in 1911 (for 1910 census tabulations), and other urban places beginning in 1930.

3/ The rural population includes all persons living outside urban places.

4/ Annual rate since the preceding census, based on the formula for continuous compounding.

5/ Total population also reported as 130,313.

6/ Total population also reported as 108,393 and 108,579.

7/ Revised.

1/ For county and district boundaries, see the map on page 6.

2/ Independently rounded and may not add exactly to the indicated totals and subtotals.

3/ Computed from unrounded data.

Source: Hawaii State Census Statistical Areas Committee, Estimated Population of Hawaii by Districts, 1978 (Report CTC-42, August 30, 1979).

Table 5 .-- LAND AREA AND POPULATION OF URBAN PLACES: 1970

[These places are among the 93 urban concentrations assigned statistical boundaries under State law. Although designated "cities," "towns" and "villages," all are unincorporated and lack separate governmental identity. Places over 2,500, the largest place on each island if none exceeds 2,500, and a few other other places of special interest are shown.]

Footnotes and source on next page.

1/ By place of work. Data include armed forces as well as civilian workers, and are on a job rather than person basis. Workers with more than one job are accordingly counted more than once.

2/ As defined for statistical purposes under the provisions of Act 25, Session Laws of Hawaii, 1963. This area, extending from Honolulu International Airport to Makapuu Point (plus the Northwestern Hawaiian Islands), is coterminous with Honolulu District. Although Honolulu is the largest urban concentration in the City and County of Honolulu (the legal municipality, which encompasses the entire island), it lacks any separate governmental identity or powers.

3/ The Northwestern Hawaiian Islands, from Nihoa to Kure Atoll (but excluding Midway), which are legally part of the City and County of Honolulu.

## Section 2

# VITAL STATISTICS AND HEALTH

This section presents data on births, deaths, marriages, divorces, morbidity, hospitals, and health personnel.

Vital indexes generally reflect the high health standards of Hawaii. Expectation of life at birth was 74.11 years for males and 77.94 years for females in 1975. The crude death rate in 1978 was only 5.4 per 1,000 resident population. Deaths under one year of age per 1,000 live births numbered 12.3 in 1977. Diseases of the heart have accounted for almost a third of all deaths in recent years; cancer, for one-fifth. The 1978 crude birth rate was 18.7 per 1,000 resident population. The total fertility rate for civilians fell from 3,360 per 1,000 women in 1960 to 2,461 in 1970 and 1,821 in 1975. Over 97 percent of all babies were born in hospitals in 1977, and over one-fifth were born to military couples. One out of seven births was illegitimate. There were 6,685 fetal deaths in 1977, including 5,050 elective abortions. Marriages numbered 10,731 in 1978, with about 23 percent accounted for by nonresidents. Divorces reached a 1978 total of 4,837. The State had 22 acute care civilian hospitals (with 2,241 beds), 32 skilled nursing and intermediate care facilities (with 2,133 beds), and 253 care homes (with 1,666 beds) in 1977. There were 1,500 physicians and surgeons, 594 dentists, 5,127 professional nurses, and 340 pharmacists licensed and living in Hawaii as of July 1978. Acute conditions per 100 persons averaged 199 per year in 1972-1974, with respiratory conditions the most common complaint (at 136 cases per 100 persons). Among chronic conditions reported in the 1972-1974 survey data, the most frequently mentioned were hypertension without heart involvement (5.8 per 100 persons), hay fever (4.4), and asthma (3.6). The most common communicable disease reported to authorities in 1977 was scarlet fever, with 5,919 cases. Dental health was only fair: the average number of decayed, missing or filled teeth when last surveyed was 6.85 for intermediate school students and 10.61 for those in high school.

Major sources for data on vital statistics and health are the annual statistical reports of the Hawaii State Department of Health and various publications of the U.S. Public Health Service. Long-term trends are traced in Historical Statistics of Hawaii, Section 2. Sections 2 and 4 of the Statistical Abstract of the United States: 1978 contain similar data for the nation as a whole.

Table 26 .-- BIRTHS AND DEATHS: 1968 TO 1978

## Section 3

# EDUCATION

This section presents statistics on enrollment in public and private schools, colleges and universities; students graduated and degrees awarded; the highest grade of school completed; illiteracy; school facilities, personnel, and expenditures; and libraries.

Enrollment in elementary, intermediate and high schools in 1978-1979 totaled 206,812, about 1.0 percent less than in the preceding year and 4.0 percent below the all-time high reached in 1971-1972. There were 229 public schools with 7,930 classroom teachers and 170,515 students (17.6 percent of the total). There were also 136 private schools with 1,885 teachers and 36,297 pupils. Students graduating from public and private high schools in 1977-1978 numbered 13,867. Some 49,736 students attended colleges and universities in the State in 1978-1979, including 21,225 on the Manoa Campus of the University of Hawaii, 234 at West Oahu College, 3,053 at UH-Hilo, 19,291 at six community colleges, and 5,933 in four private four-year colleges. Eighty-seven percent of the children 5 and 6 years old were in school in 1970 (compared with 68 percent in 1950), and 53 percent in the 18- and 19-year old group were enrolled (compared with 36 percent twenty years earlier). The expenditure per pupil in public schools rose from \$818 in 1969-1970 to \$1,884 in 1977-1978. Among adults, the illiteracy rate dropped from 8.4 percent in 1950 to 1.9 percent in 1970, and by 1977 approximately 19.4 percent of all residents 25 years of age or more could report having completed four or more years of college. The Hawaii State Library System, with 45 locations in all four counties, had 3.03 million books, film reels, phonorecords, and other collections in 1978, with an annual circulation of 4.86 million; the University of Hawaii libraries in the same year counted 1.92 million volumes.

The principal sources of data on education are the U.S. Bureau of the Census, U.S. Department of Health, Education, and Welfare, Hawaii State Department of Education, University of Hawaii and private colleges and universities. Historical Statistics of Hawaii, Section 9, contains Island data back to 1820. Section 5 of the Statistical Abstract of the United States: 1978 presents comparable information for the nation as a whole.

## Section 4

# LAW ENFORCEMENT, COURTS, AND CORRECTIONS

Statistics in this section refer to crime and delinquency, the police, the judiciary system, prisons, and youth correctional facilities.

Major offenses reported to the police in 1978 numbered 64,000, or almost twice as many as in 1968. The rate per 1,000 population has increased from 47 in 1968 to 71 in 1978. Eighty-one percent of the 1978 total occurred on Oahu. For the State as a whole, major offenses known to police in 1978 included 60 murders or cases of non-negligent manslaughter, 231 rapes, 1,556 robberies, 572 aggravated assaults, 17,369 burglaries, 39,027 cases of larceny, and 5,119 auto thefts. Organized crime accounted for 55 murders in a ten-year period. The value of property reported stolen in 1978 amounted to \$22 million, exclusive of motor vehicles; only 9.8 percent was recovered. Asked "Have you or your immediate family been a victim of crime (burglary, assault, etc.) in Hawaii since 1970?," forty percent of all Oahu adults and a fourth of all Neighbor Island adults answered affirmatively. Thirty-four percent of the major offenses known to police were cleared by arrest or otherwise in 1978. Fifty percent of the persons arrested for major crimes and 21 percent of those arrested for lesser offenses in 1978 were less than eighteen years of age. Inmates of the ten State correctional institutions averaged 594 during 1978; of this number, 365 were adults serving time for felonies. Cases filed in the State Supreme Court, four circuit courts, and four district courts and their divisions during fiscal 1978 numbered 751,000, including 665,000 traffic cases. Filings in the United States District Court for Hawaii included 535 civil cases, 1,120 criminal cases, and 547 bankruptcy cases. The last legal execution in Hawaii took place in 1944.

Statistics on law enforcement, courts, and corrections in Hawaii appear in the annual reports of the county police departments, the State Judiciary, the Department of Social Services and Housing, and the Administrative Office of the United States Courts. The Hawaii Criminal Justice Statistical Analysis Center issues quarterly and annual reports titled Crime in Hawaii. Figures on crime, the courts, and corrections in earlier years appear in Historical Statistics of Hawaii, Section 10. National data are summarized in the Statistical Abstract of the United States: 1978, Section 6.

## Section 5

# GEOGRAPHY AND ENVIRONMENT

This section relates to area, climatologic, topographic, hydrologic, noise and other geographic and environmental measurements of Hawaii.

The State consists of eight major islands and 124 minor islands with a total land area of 6,425 square miles and a general coastline of 750 miles. Honolulu is 214 miles from Hilo, 1,367 miles from Kure Atoll (the westernmost end of the State), 2,397 miles from San Francisco, and 4,829 miles from Washington, D.C. The highest peak in the State is Mauna Kea, 13,796 feet above sea level; the longest stream is Kaukonahua Stream, Oahu, 33 miles in length; the biggest lake is Halalii, on Niihau, 841 acres; and the highest named waterfall is Kahiwa, Molokai, a 1,750-foot cascade. Various measures of air pollution, such as suspended particulate matter, indicate that Honolulu is one of the cleanest cities in the nation. There is also relatively little water pollution: seventeen major Oahu beaches surveyed in 1978 were found to have coliform levels per 100 ml. ranging from 2.0 to 84.9, and all were well within EPA standards. Climatically, Hawaii is marked by remarkably balmy temperatures and wide variations in rainfall. The all-time temperature range at Honolulu International Airport, for example, was from 53° to 92°F. Normal precipitation, however, ranges from 5.7 inches near Kawaihae, South Kohala, to 486 inches atop Waialeale. The longest volcanic eruption in Island history lasted 867 days, the worst earthquake attained 7.5 on the Richter scale, and the highest tsunami wave reached 56 feet. Water withdrawn for use in 1975 averaged 2.5 billion gallons per day, compared with 2.7 billion in 1970 and 2.0 billion in 1965. Among thirty neighborhoods on Oahu, median noise levels ranged from 44.7 decibels (in Pearl City) to 61.5 decibels (in Waikiki).

Important sources of data include the U.S. Geological Survey, National Ocean Survey, National Weather Service, U.S. Bureau of the Census Geography Division, the Division of Water and Land Development of the State Department of Land and Natural Resources, the State Department of Health, and the University of Hawaii Institute of Geophysics. Detailed information is given in Hawai'i, the Natural Environment, published by the Department of Planning and Economic Development in 1974. National data are reported in Statistical Abstract of the United States: 1978, Section 7.

Table 67.-- GENERAL COASTLINE AND TIDAL SHORELINE OF COUNTIES AND ISLANDS -- Cont.

1/ Figures are lengths of general outline of seacoast. Measurements were made with a unit measure of 30 minutes of latitude on charts as near the scale of 1:1,200,000 as possible. Coastline of bays is included to a point where they narrow to width of unit measure, and includes the distance across at such point. Figures for the islands of Maui County are not consistent with the published county total.

2/ Figures obtained in 1939-1940 with a recording instrument on the largest-scale charts and maps then available. Shoreline of outer coast, offshore islands, bays, rivers, and creeks is included to the head of tidewater or to a point where tidal waters narrow to a width of 100 feet.

3/ Derived from data expressed in statute miles; independently rounded and accordingly may not add exactly to indicated totals and subtotals. 1 mi. = 1.609 km.

4/ Among the States and Territories, Hawaii ranks fourth in general coastline and seventeenth in tidal shoreline.

5/ Excludes the Midway Islands, which are part of the Hawaiian Archipelago but not legally part of the State of Hawaii. Midway has a general coastline of 20 miles and a tidal shoreline of 33 miles.

Table 69.-- LAND AND WATER AREA OF COUNTIES AND ISLANDS -- Cont.

1/ Areas in square kilometers and acres were calculated directly from the figures shown for square miles (except for Molokini, Lehua, Kaula, and the Northwestern Hawaiian Islands, for which square miles calculated to three decimal places were used); these equivalents were independently rounded, and hence may not add exactly to the indicated totals and subtotals. 1 sq. mi. = 640 A. = 2.58999 sq. km.

2/ Dry land and land temporarily or partially covered by water, as marshland, swamps, etc.; streams and canals under one-eighth statute mile wide; and lakes, reservoirs, and ponds under 40 acres of area.

3/ Permanent inland water surface, such as lakes, reservoirs, and ponds having 40 acres or more of area; streams, sloughs, estuaries, and canals one-eighth of a statute mile or more in width; deeply indented embayments and sounds, and other coastal waters behind or sheltered by headlands or islands separated by less than one nautical mile of water; and islands having less than 40 acres of area.

4/ More exactly, the area of Molokini is 18.6 acres (equivalent to 0.03 square miles or 0.075 square kilometers).

5/ Exclusive of the Midway Islands, which are part of the Hawaiian Archipelago but not legally part of the State of Hawaii. Islands included in the State and their land areas in square miles are: Nihoa, 0.298; Necker Island, 0.091; French Frigate Shoals, 0.088; Gardner Pinnacles, 0.004; Maro Reef, awash; Laysan Island, 1.312 (plus 0.220 of inland water, for a total area of 1.533); Lisianski Island, 0.675; Pearl and Hermes Atoll, 0.122; and Kure Atoll, 0.371.

			Kingman Reef <u>2/</u> .....	3	1
			Palmyra Islands <u>2/</u> .....	6	2

1/ Two distinct peaks. The lower has an elevation of 3,105 feet.

2/ Not part of the State of Hawaii.

Source: U.S. Geological Survey data cited in the Hawaii State Department of Planning and Economic Development, Elevations of Major Mountains in Hawaii (Statistical Report 52, November 7, 1967), as revised by U.S. National Cartographic Information Center, October 11, 1978.

Table 71.-- MAJOR STREAMS, BY ISLANDS

Island	Feature or stream	Length or ave. discharge
Longest water feature (miles):		
Hawaii .....	Wailuku River .....	32.0
Maui .....	Kaliialinui-Waiale Gulch ....	18.0
Kahoolawe .....	Ahupu Gulch .....	4.0
Lanai .....	Maunalei-Waiialala Gulch ....	12.9
Molokai .....	Wailau-Pulena Stream .....	6.5
Oahu .....	Kaukonahua Stream (So. Fork)	33.0
Kauai .....	Waimea River-Poomau Stream .	19.5
Niihau .....	Keanaulii-Puniopo Valley ...	5.9
Largest perennial stream (miles): <u>1/</u>		
Hawaii .....	Wailuku River .....	22.7
Maui .....	Palikea Stream .....	7.8
Molokai .....	Wailau-Pulena Stream .....	6.5
Oahu .....	Kaukonahua Stream .....	30.0
Kauai .....	Waimea River .....	19.7
Streams with greatest average discharge (million gal./day):		
Hawaii .....	Wailuku River .....	184.0
Maui .....	Iao Stream .....	54.1
Molokai .....	Pulena Stream .....	22.1
Oahu .....	Waikele Stream .....	25.7
Kauai .....	Hanalei River .....	151.0

1/ Estimated on basis of drainage area rather than stream runoff. Other major streams include Honokohau Stream, Maui (9.4 miles long); Halawa Stream (6.4), Waikolu Stream (4.7), and Pelekunu (2.3), all on Molokai; Waikele Stream (15.3), Kipapa Stream (12.8), and Waiakakalaua Stream (11.8), all on Oahu; and the Makaweli River (15.1), Wainiha River (13.8), Hanapepe River (13.3), and Wailua River (11.8), all on Kauai.

Source: Lengths from Hawaii State Department of Planning and Economic Development, Hawai'i, the Natural Environment (1974), p. 15; discharges from Hawaii State Department of Land and Natural Resources, Division of Water and Land Development, data supplied May 27, 1977.

Table 72.-- LARGEST LAKES, BY ISLANDS

Island	Name of largest lake <u>1/</u>	Category	Maximum depth (feet)	Altitude (feet)	Area (acres)	Shoreline (miles)
Hawaii .....	Waiakea Pond .....	Natural	(NA)	Sea level	27	2
	Lake Waiiau <u>2/</u> .....	Natural	10	13,020	1.5	0.2
Maui .....	Kanaha Pond .....	Natural	(NA)	Sea level	41	2
Kahoolawe ..	None					
Lanai .....	None					
Molokai ....	Meyer Lake .....	Natural	5	2,021	6	1
Oahu .....	Wahiawa Reservoir ....	Man-made	85	842	333	11
Kauai .....	Waita Reservoir .....	Man-made	23	233	422	3
Niihau .....	Halulu Lake .....	Natural	(NA)	Sea level	182	3

NA Not available.

1/ Excludes shoreline fish ponds and areas filled only during floods. The largest intermittent lake is Halalii Lake, Niihau (840.7 acres).

2/ Highest lake in the State and third highest in the United States.

Table 94.— HAWAII AUDUBON SOCIETY BIRD COUNTS OF THE HONOLULU AREA: 1977 AND 1978

[Counts are made in late December, in a circle, 15 miles in diameter, centered near Nuuanu Pali.]

Species <u>1/</u>	1977	1978
All species:		
Species .....	52	55
Individual birds .....	15,542	16,204
Endemic species:		
Hawaiian Stilt .....	106	116
'Apapane .....	145	114
Oahu 'Amakihi .....	128	74
Indigenous species:		
Red-footed Booby .....	1,647	1,669
Great Frigatebird .....	571	585
Introduced species:		
Common Myna .....	2,173	2,616
Barred Dove .....	2,201	2,389
Cattle Egret .....	1,316	1,445
House Sparrow .....	1,112	1,216
Spotted Dove .....	780	1,044
Japanese White-eye .....	953	723
Spotted Munia (Ricebird) .....	747	702
Migratory species:		
Golden Plover .....	993	1,422
Ruddy Turnstone .....	134	223

1/ Separate data shown for endemic birds numbering more than 70 individuals in 1978, indigenous birds more than 100, introduced birds more than 600 and migratory species and stragglers more than 100. Endemic birds are those peculiar to a particular region, in this case Hawaii, and therefore found nowhere else in the world; indigenous birds are those native to a given region, in this case Hawaii, but with a total range of distribution encompassing a much wider area. The classification is that reported in Andrew J. Berger, Hawaiian Birdlife (1972).

Source: Hawaii Audubon Society, The 'Elepaio for March 1979.

## Section 6

# LAND USE AND OWNERSHIP

General statistics on the use, ownership, and tenure of land appear in this section. Information on specific use or ownership categories is given elsewhere: parks in section 7, military land in section 10, farms in section 19, and forests in section 20.

Out of the 4,128,000 acres in the State, almost 2,200,000 are in unused open space. Other major categories include agriculture, with 1,356,000 acres, services (including military installations), with 125,000, and recreation, with 273,000. In the Honolulu Standard Metropolitan Statistical Area (which is coterminous with Oahu), land in residential use increased from 16,500 acres in 1964 to 26,300 in 1975; during the same eleven-year span, agricultural land declines from 94,500 to 76,700 acres. For the State as a whole, the Land Use Commission has zoned 152,000 acres as "urban," 1,976,000 as "conservation," 1,974,000 as "agricultural," and 9,000 as "rural."

Recent data on land ownership indicate that the Federal government owns 7.3 percent of all land, the State and counties own 34.7 percent, and private owners (chiefly large estates) have 58.0 percent. Total Federal holdings come to 407,900 acres, exclusive of leased land (47,300 acres); most of the Federal land is in park and military use. The State Department of Hawaiian Home Lands holds about 190,000 acres, divided among 3,052 lessees. Total land parcels in the State number 352,000.

Considerable caution is necessary in comparing statistics from different sources on land use, ownership, or tenure. Variations in definitions and survey dates seriously affect comparability in many instances, even where terminology is relatively unambiguous and misinterpretation seems unlikely. An example of such difficulties is the wide range in estimates of Federal land, with Federal totals ranging from 297,000 acres to 408,000. Recent statistics on military land use are likewise confusing, going as high as 175,000 acres and as low as 56,000.

Reports of the U.S. General Services Administration, Hawaii State Department of Hawaiian Home Lands, Department of Land and Natural Resources, Department of Planning and Economic Development, Department of Taxation, Department of Transportation, and Land Use Commission, and county planning departments provided the data for this section. Greater detail appears in DPED Statistical Report 98, Land Use and Ownership Trends in Hawaii, issued December 28, 1973. Historical Statistics of Hawaii, Section 12, contains limited information for earlier years. Statistics for the nation as a whole are available in Sections 8 and 24 of the Statistical Abstract of the United States: 1978.

Table 95.-- LAND USE, BY COUNTY AND ISLAND: 1972-1976

[In acres]

## Section 7

# RECREATION AND TOURISM

Statistics on tourism, recreation, cultural activities, and parks appear in this section. Information on recreational land use is given in Section 6; on transportation, in Section 18; on hotels, in Section 23.

Tourism has shown impressive growth in recent decades. Approximately 3,670,000 visitors stayed overnight or longer in Hawaii during 1978, compared with 1,315,000 in 1968 and only 172,000 in 1958. The average number present at any given time during 1978 was 96,000, almost three times the 1968 average. Total visitor expenditures (exclusive of trans-Pacific fares) in 1978 amounted to \$2.2 billion, compared with \$440 million a decade earlier. The 1978 visitor total included 2,500,000 from other States, 315,000 from Canada, and 470,000 from Japan. Expenditures per visitor day in 1977 averaged \$54.62 for westbound visitors and \$146.85 for the Japanese.

Both visitors and residents have access to a wide range of recreational and cultural facilities. The State has five national parks, 61 State parks, 590 County parks, 46 golf courses, 241 tennis courts, 1,883 small-boat moorages, 1,600 recognized surfing sites, and 24.4 miles of safe, sandy, accessible beach. Recreational and cultural facilities reporting more than a million annual visitors include six National or State parks, the National Memorial Cemetery of the Pacific, U.S.S. Arizona Memorial, the Honolulu Zoo, and Polynesian Cultural Center. Total visits to 32 museums, state monuments, and similar attractions in 1978 numbered 9.5 million. Over 179,000 Hawaii residents traveled to the Mainland in 1977 and half of them were absent more than 13.5 days. Eleven theatrical groups on Oahu reported 1,331 performances of 151 productions for the 1977-1978 season, with a combined audience of 345,000. During the same period, the Honolulu Symphony Orchestra gave 109 concerts, with a total attendance of 194,000. Professional baseball drew 155,000 fans in 1978, and during the 1978-1979 school year, attendance at UH-Manoa varsity baseball, basketball and football home games exceeded 480,000. Approximately 85,000 dogs and 66,000 cats were owned in 1970.

Information on recreation and tourism is issued periodically by the Hawaii Visitors Bureau (chiefly in its monthly and annual research reports), the State Parks Division of the Department of Land and Natural Resources, the U.S. National Park Service, U.S. Passport Office, County park and recreation departments, and other organizations. An extensive compilation of statistics on recreational facilities and behavior was issued by DPED in December 1975 in its State Comprehensive Outdoor Recreation Plan Technical Report. Long-term trends are summarized in Historical Statistics of Hawaii, Section 11. National statistics are given in Section 8 of Statistical Abstract of the United States: 1978.

Table 103.-- MODE OF TRAVEL AND VISITOR STATUS OF PASSENGERS ARRIVING  
IN HAWAII: 1970 TO 1978

## Section 8

# GOVERNMENT FINANCES AND EMPLOYMENT

This section presents statistics relating to the financial structure and civilian employment of Federal, State and County governments in Hawaii.

Local government is vested in one combined city-county (Honolulu, consisting of the Island of Oahu and several outlying islets), three non-metropolitan counties (Hawaii, Kauai, and Maui), and one area (Kalawao County) administered by the State Department of Health. Separate municipal governments do not exist.

Tax collections by Federal, State and County governments in fiscal 1978 reached \$2,229 million, almost triple the level reported ten years earlier. The 1978 total included \$1.2 billion in U.S. taxes, \$996 million in State taxes, and \$34 million in County taxes, licenses and fees. Individual income taxes accounted for 85 percent of Federal collections and 23 percent of State collections in Hawaii in 1978. State revenue receipts totaled \$1,421 million, chiefly from the General Excise and Use Tax (\$368 million) and Federal grants-in-aid (\$376 million). The largest expenditure item in the State accounts for 1978 was education, with \$450 million (out of \$1,460 million) going to the University of Hawaii and public schools and libraries. The counties, in contrast, depended largely on the real property tax (assessed and collected by the State) and grants-in-aid for their revenues, and reported police and fire protection as their largest single expenditure item. The estimated tax burden for a four-person family with per capita personal income equal to the State average in 1978 was \$12,308, including both direct taxes (\$8,921) and employment taxes paid by employers (\$3,596).

Assessed valuation of the State tripled between 1969 and 1979, reaching \$19.4 billion by the end of the decade; of this total, \$6.4 billion was exempt from taxation. Public bonded debt outstanding at the end of 1978 exceeded \$1.9 billion. Average government employment reported for 1978 was 87,050, about 26 percent over the 1968 average. The 1978 total included 29,350 Federal workers, 43,350 persons employed by the State, and 14,350 persons on County payrolls. State civil service employees as of mid-1978 numbered 16,577.

Important sources for statistics on government in Hawaii include the U.S. Census of Governments and various annual publications of the Bureau of the Census, reports of the U.S. Treasury Department, Hawaii State Departments of Accounting and General Services, Budget and Finance, and Taxation, and the County auditors and finance directors, and an annual compilation issued by the Tax Foundation of Hawaii, Government in Hawaii: A Handbook of Financial Statistics. Data extending back to the middle of the 19th century are summarized in Historical Statistics of Hawaii, Section 25. Comparable Mainland statistics appear in the Statistical Abstract of the United States: 1978, Sections 9 and 10.

Table 131.-- FEDERAL, STATE, AND COUNTY TAX COLLECTIONS: 1968 TO 1978

Footnotes and source on next page.

1/ Collective bargaining for public employees was authorized by a 1968 Constitutional amendment (State Constitution, Art. XII, Sec. 2) and implemented by S.L.H. 1970, Act 171. Employees on regular salary schedules were subsequently organized into six bargaining units, as follows: 3, white collar; 4, white collar supervisors; 9, nurses; 10, hospital and institutional; 11, firefighters; and 13, professional and scientific. Employees in the remaining bargaining units (blue collar, blue collar supervisors, teachers, educational officers, University faculty and non-faculty, and police) are not classified in the SR system.

2/ Lowest SR (salary range) level at which State employees were hired.

3/ Or equivalent, representing lowest step at which State employees were hired at the specified SR level.

4/ Last longevity step.

5/ Also applicable in 1977 and 1978. Employees who were employed on June 30, 1977 were granted a pay increase of \$50 or an amount equivalent to a step increase, whichever was greater. Employees who were employed on June 30, 1978 were granted a pay raise equivalent to a step increase.

## Section 9

# SOCIAL INSURANCE AND WELFARE SERVICES

This section presents data related to governmental programs for old-age, survivors, disability and health insurance; public employee retirement; unemployment insurance; aid to the needy; and maternal, child, and other welfare services. Also included here are selected statistics on private charity and welfare programs.

Total public welfare costs reached \$230 million in fiscal 1978, compared with \$30 million a decade earlier. About 59 percent of the 1978 total came from State funds and the remainder from the Federal government. The monthly average number of persons served by major welfare programs in 1978 was 75,485, or 8.5 percent of the resident population of the State at the beginning of the year. Almost two-thirds of all public assistance payments and one-half of all recipient cases were accounted for by aid to families with dependent children. About 4.4 percent of all welfare cases early in 1979 were recent migrants to Hawaii. The average monthly payment per case for public assistance was \$322, almost twice as much as in 1970. Participation in the food stamp program included 34,500 households and 93,300 persons. Among workers receiving unemployment compensation in 1978, weekly benefits averaged \$91. Almost 102,000 Hawaii residents were receiving Social Security benefits as of the end of 1977, and about 63,000 were enrolled for Medicare. There were also 10,772 State and County government pensioners in 1978, with annual benefits in excess of \$61 million. The Aloha United Way spent \$6.95 million on Oahu during 1978.

Major data sources include reports and records of the U.S. Department of Health, Education, and Welfare, the Hawaii State Department of Social Services and Housing, the Hawaii State Department of Labor and Industrial Relations, the Hawaii State Employees' Retirement System, and the Aloha United Way. Historical Statistics of Hawaii, Section 8, contains data for earlier years. Section 11 of the Statistical Abstract of the United States: 1978 presents comparable Mainland data.

## Section 10

# NATIONAL DEFENSE

This section presents statistics relating to the armed forces and their dependents, civilian employment in national defense, veterans, military housing, and expenditures by the armed forces.

There were approximately 58,100 officers and enlisted men (including 12,100 aboard ships homeported in Hawaii) and 61,100 military dependents in the Islands as of July 1, 1978. This number has been relatively stable in recent years, but at the height of World War II more than 400,000 uniformed personnel were present. The Navy alone accounts for about two-fifths of the current total. More than 10,700 Hawaii residents were in the armed forces worldwide in 1978. The importance of national defense in Hawaii can be further measured by total expenditures (1.16 billion), military prime contract awards (\$224 million), civilian employment (19,000), veterans in civil life (93,000), military personnel receiving retired or retainer pay (8,700 men, receiving \$80 million), federally-connected pupils in public schools (40,500), military housing (18,500 units), and land controlled by the armed forces (223,000 acres). Defense expenditures are second only to tourism as a source of income to Hawaii.

The Department of Planning and Economic Development has, since 1959, issued periodic reports on Military Personnel and Dependents in Hawaii. Other published sources include reports of the U.S. Bureau of the Census, the Administrator of Veterans Affairs, the U.S. Department of Defense, the Hawaii State Department of Labor and Industrial Relations, Department of Defense, and Department of Education, the Hawaii State Census Statistical Areas Committee, and the Honolulu Department of Housing and Community Development. Definitions used by these sources frequently differ to some degree, and care is accordingly necessary in comparing data issued by two or more agencies. In mid-1977, for example, the number of armed forces in Hawaii was reported as 53,902 by DOD, 56,486 by the Bureau of the Census, 44,000 by the Bureau of Economic Analysis (which excludes ships crews), and 58,466 by the local commanding officers reporting to DPED. Historical Statistics of Hawaii, Section 26, includes series dating back to 1795. Section 12 of the Statistical Abstract of the United States: 1978 presents data on national defense and veterans affairs for other States and the entire nation.

Table 161.-- ARMED FORCES AND DEPENDENTS: 1970 TO 1978

## Section 11

# LABOR FORCE, EMPLOYMENT, AND EARNINGS

This section presents statistics on the size and composition of the labor force, employment by sex, occupation, and industry, work disability, wage rates, payrolls, hours, turnover, industrial safety, and unionization.

The civilian labor force averaged 398,000 in 1978; of this total, 367,000 persons were employed and 31,000 were unemployed and seeking work. The civilian jobcount rose from 298,000 in 1968 to 414,000 a decade later, an increase of 39 percent. (The jobcount differs from employment because the latter counts multiple jobholders -- "moonlighters" -- only once.) The unemployment rate averaged 7.8 percent in 1978, with island levels ranging from 6.9 to 11.6 percent. In 1976, 57.9 percent of all females 16 years old and over were in the civilian labor force -- the third highest ratio in the nation. By occupation, one out of six civilian workers is classified as professional or technical. Activities with especially large numbers of employees include government (87,000 in 1978, about 34 percent of them in federal jobs), services (89,000), and retail trade (79,000). The average annual earnings of wage and salary workers under the Hawaii Employment Security Law reached \$10,903 in 1977, almost twice the 1967 average. Average weekly hours in 1978 ranged from 31.4 (for retail trade) to 44.4 (for communications and utilities). Labor union membership was estimated at 140,000 in 1976. Work stoppages in 1978 involved 1,800 workers.

Analyzing labor force trends is greatly complicated by recent shifts in sources and estimating methods. Prior to 1970, the number of employed civilians was estimated from data on the number of jobs covered by the Hawaii State Employment Security Law; workers holding more than one job were accordingly counted more than once. From 1970 to 1975, the same source was used, but the totals were adjusted to exclude the double-counting thought to be present. Then, beginning in 1976, the labor force estimates were based on the Current Population Survey, a relatively small household survey subject to considerable sampling variation. The 1970-1975 estimates were later revised for greater comparability with the 1976-1978 data.

Principal sources for the data on labor force, employment, hours, earnings, unions and strikes are the decennial reports of the U.S. Bureau of the Census, the same agency's 1976 Survey of Income and Education, various studies by the U.S. Bureau of Labor Statistics, monthly and annual tabulations by the Hawaii State Department of Labor and Industrial Relations, the OEO 1975 Census Update surveys, and annual surveys by the Hawaii Employers Council. Historical Statistics of Hawaii, Section 4, includes figures for earlier years. Statistics for the nation as a whole are published in Section 13 of the Statistical Abstract of the United States: 1978.

Table 169.-- EMPLOYMENT STATUS, BY SEX: SPRING 1976

[Excludes inmates of institutions and members of the armed forces in military barracks or aboard ships. Because of these omissions, the 1976 data are not comparable with results of the 1970 census.]

Sex	Popula- tion, 16 years and over <u>1/</u>	Civilian labor force		Em- ployed	Unem- ployed: per- cent <u>2/</u>
		Number	Per- cent <u>3/</u>

## Section 12

# INCOME, EXPENDITURES, AND WEALTH

This section presents statistics on two different aspects of income and expenditures, one relating to the State income and product system and the other to the distribution of income to families and individuals. Specifically, information is given on gross state product, industrial income, personal income, family income, poverty, personal wealth, and family expenditures. Data on wage rates appear in Section 11; on industrial payrolls, in Sections 11, 15, 22 and 23; on taxable income, in Section 8.

Gross state product in 1976 amounted to approximately \$7.4 billion, or about triple the 1965 total. The major sources of outside income to Hawaii in 1978 were defense expenditures (\$1.2 billion), pineapple production (\$157 million), sugar production (\$285 million), and visitor expenditures (\$2.2 billion). Personal income in 1978 was \$7.5 billion, compared with \$2.7 billion only ten years earlier, and per capita personal income was \$8,437 more than twice the 1968 level. The per capita figure for Hawaii exceeded the national average by 8 percent, and thus failed to compensate for the Islands' 24-30 percent higher cost of living. The median annual income of families, based on data for 1975, was \$18,228 on Oahu, \$15,923 on the Neighbor Islands, and \$17,770 Statewide; for unrelated individuals, the all-island median was \$6,180. The official poverty threshold for a 4-person nonfarm family in Hawaii was set in June 1979 at \$7,710. Top wealthholders in Hawaii -- those with gross assets of \$60,000 or more -- numbered 11,323 in 1962 and 53,700 in 1972. Total assets of this group in the latter year amounted to \$7.9 billion, 40 percent of which was in real estate. The most recent family expenditure survey, taken in 1972 and 1973, reported that the largest items in the family budget on Oahu were housing (accounting for 33.8 percent of spending for current consumption), food (20.4 percent) and transportation (19.1 percent).

The chief sources of data shown in this section are the U.S. Bureau of Economic Analysis, U.S. Bureau of the Census, U.S. Bureau of Labor Statistics, Community Services Administration, Internal Revenue Service, Hawaii State Department of Agriculture, Hawaii State Department of Planning and Economic Development, Hawaii Visitors Bureau, Bank of Hawaii and First Hawaiian Bank. Sections 6 and 7 of Historical Statistics of Hawaii present data for earlier years. Comparable data for the country as a whole are given in Statistical Abstract of the United States: 1978, Section 14.

Table 192.-- DIRECT INCOME FROM MAJOR EXPORT INDUSTRIES:  
1968 TO 1978

[In millions of dollars.]

Year	Total for four major industries	Value of sales		Defense expenditures	Visitor expenditures <u>1/</u>

Mean income .....	19,789	20,218	18,119	7,950	8,577	5,581	11,282	5,182

<sup>1/</sup> Reported for persons in households, 14 years old and over as of Spring 1976, with income in 1975. Persons 14 years old and over as of Spring 1976 but without income in 1975 numbered approximately 107,000 (27,000 males and 80,000 females).

<sup>2/</sup> For persons, refers to incomes of \$1 to \$1,999 or loss.

<sup>3/</sup> Corresponding medians for 1969 income, reported by the 1970 census, were as follows: for families, \$11,554 Statewide, \$12,035 on Oahu, and \$9,756 on the other islands; for unrelated individuals, \$2,981 Statewide, \$3,013 on Oahu, and \$2,702 on the other islands; for persons, \$6,528 for males and \$3,222 for females. The 1970 data, unlike those for 1976, included persons living in military barracks.

## Section 13

### PRICES

This section presents indexes of consumer prices for Honolulu, average prices for selected foods, and a comparison of Honolulu family budgets with those in other metropolitan areas. Other statistics on prices are reported in Sections 16, 17, 18, 20, 21, 22, and 23.

In April 1979, the Honolulu all-items consumer price index for all urban consumers stood at 200.7, with the 1967 level equal to 100. The index had increased 10.6 percent in the preceding 12 months, 45.8 percent since April 1974, and 87.2 percent since April 1969. Prices have risen most rapidly since 1967 for gas and electricity (143.1 percent), food at home (139.7 percent), medical care (136.8 percent) and restaurant meals (up 133.0 percent), and least for public transportation (up 32.2 percent).

An "intermediate" budget for a four-person family living on Oahu was estimated at \$23,099 as of the Autumn of 1978. This family budget was 24 percent higher than the corresponding urban United States average, and was second only to Anchorage among major American metropolitan areas. The "lower" budget was 29 percent above the national figure; the "higher" budget, 30 percent. Hawaii-Mainland differentials were greatest for rents and personal income taxes and least for clothing and transportation. An "intermediate" budget for a retired couple in Honolulu came to \$8,107 in the Autumn of 1977, 13 percent above the U.S. urban average.

The Honolulu consumer price index has been compiled by the United States Bureau of Labor Statistics at three-month intervals since December 1963. This index measures the average change in prices of goods and services purchased by urban families and single persons living alone. Prices are expressed as a percent of the average levels reported in 1967, the base date. Current data for Honolulu and other cities are published in the Monthly Labor Review and CPI Detailed Report, issued monthly by BLS. A similar series for Honolulu was maintained by the Hawaii State Department of Labor and Industrial Relations from March 1943 to December 1963, using March 1943 as the base date.

Important changes were made in the consumer price index at the beginning of 1978. The existing index, covering urban wage earner and clerical families and single persons living alone, had been based on spending patterns observed in a 1961 survey and had been issued at three-month intervals. This index was discontinued after June 1978. Beginning in February 1978, two new indexes were published, both based on the findings of a 1972-1973 survey and both issued at two-month intervals. The first of these new indexes covered the same population as the older index, that is, urban wage earner and clerical families and individuals; the second covered all urban consumers. The new indexes were linked to the December 1977 existing index (174.9) and, like the latter, expressed as a percent of the 1967 annual

average. The June 1978 all-items index was 182.1 according to the old coverage and weights, 184.1 based on the previous coverage and revised weights, and 183.9 with the expanded coverage and new weights.

Comparisons of family budgets between Honolulu and various Mainland communities have most recently been made for the Fall of 1978. These data were compiled and published by the U.S. Bureau of Labor Statistics. Similar comparisons go back a number of years, and include a Honolulu-Los Angeles comparison for 1945, Honolulu-Washington comparisons for 1951 and 1955-1978, and a 40-area comparison for various dates since Autumn 1966. Budget costs for a retired couple have been prepared by BLS for Honolulu and the Mainland as of 1966, 1967, and annually since 1969. Cost of living adjustments for Federal employees in Hawaii are based on the Honolulu-Washington comparisons.

In addition to these data, the Bureau of Labor Statistics until recently published monthly and annual data on average prices for a wide variety of foods, and occasional data on a number of non-food items. The food price series were suspended after June 1978 but may be resumed at a later time.

No composite wholesale price index, comparable to the all-items consumer price index, is available for Hawaii. Average wholesale prices of agricultural products are reported in Statistics of Hawaiian Agriculture, issued by the Hawaii Agricultural Reporting Service, and Honolulu Prices: Wholesale Eggs, Poultry, Pork, Beef and Rice and Wholesale Prices: Wholesale Fresh Fruits and Vegetables, publications of the State Department of Agriculture, Market News Service. Wholesale price statistics of other commodities are less readily available, and in most cases totally lacking.

Data on prices and living costs for the nation as a whole and other areas are summarized in Statistical Abstract of the United States: 1978, Section 15. Long-term trends for Hawaii are traced in Historical Statistics of Hawaii, Section 5.

Footnotes and source on next page.

1/ Among the 40 metropolitan areas for which separate indexes were reported, Honolulu ranked second in total budget costs at all three levels, exceeded only by Anchorage.

2/ Housing includes shelter, housefurnishings and household operations. The higher budget also includes an allowance for lodging away from Oahu.

3/ The average costs of shelter were weighted by the following proportions: lower budget, all families living in rented dwellings; intermediate budget, 25 percent in rented dwellings; higher budget, 15 percent renters.

4/ Includes average contract rent, heating fuel, gas, electricity, water, specified equipment, and insurance on household contents.

5/ Includes interest and principal payments plus taxes; insurance on house and contents; water, refuse disposal, heating fuel, gas, electricity, and specified equipment; and home repair and maintenance costs.

6/ Based on 65 percent of the lower budget families and all of the intermediate and higher budget families owning automobiles.

7/ Based on 30 percent of all families paying full cost of medical insurance 26 percent paying half cost, and 44 percent covered by noncontributory insurance plans (paid by employer).

8/ Includes reading, recreation, tobacco products, alcoholic beverages, education, and miscellaneous expenditures.

9/ Includes gifts and contributions, life insurance and occupational expenses.

## Section 14

# ELECTIONS

This section presents data on the number and characteristics of registered voters, votes cast, elected officials, and legislative bills.

More than 395,000 persons were registered to vote in the general election of November 7, 1978, and more than 292,000 actually voted. The number voting amounted to 46 percent of the 637,000 Hawaii residents of voting age at that time. The latter figure included numerous aliens, inmates of mental and penal institutions, and members of the armed forces and their dependents, groups that are either ineligible or unlikely to vote in Island elections. Among registered voters, females slightly outnumbered males and Democrats were far more numerous than Republicans.

A constitutional convention was convened on July 5, 1978. In the election for delegates to this convention, about 119,000 persons cast ballots out of 345,000 registered to vote. All of the constitutional amendments proposed by the convention were subsequently approved by the electorate.

Elective offices in Hawaii include the President, two U. S. Senators, two U. S. Representatives, the Governor, 25 State Senators, 51 State Representatives, and various county officials. The minimum voting age is 18 years.

The 1979 State Legislature, with 76 members, included 66 males, 25 persons under 40 years of age, 36 persons of Japanese ancestry, 11 persons born in places other than Hawaii, and 60 Democrats.

In its 1978 session, the State Legislature considered 5,501 bills; 248 were passed and 239 became law. The Legislature also considered 1,521 resolutions, of which 875 were approved.

The official results of primary, general, and special elections are published by the Office of the Lieutenant Governor. Additional information is often available from the various County Clerks. In October 1978, the Department of Planning and Economic Development issued its Statistical Report 127, Potential Voters in Hawaii, November 1978. Characteristics of individual precincts are described in 1976 Hawaii Voting Behavior, compiled by Daniel W. Tuttle, Jr., and published by the Public Affairs Advisory Services, Inc., on May 31, 1978. Earlier figures for Hawaii appear in Historical Statistics of Hawaii, Section 24. National statistics appear in the Statistical Abstract of the United States: 1978, Section 16.

Table 216.-- POPULATION OF VOTING AGE AND PERCENT VOTING: NOVEMBER  
1960 TO 1978

[Resident population 20 years old and over through 1970 and 18 years  
and over in 1972 and later years. Includes armed forces stationed  
in Hawaii.]

## Section 15

# BANKING, INSURANCE, AND BUSINESS ENTERPRISE

Statistics in this section relate to banks and other financial institutions, stocks and bonds, insurance, fires, and business firms.

There were eight banks with 171 branches, ten savings and loan associations with 115 branches, three trust companies, and 238 industrial loan or small loan licensees in Hawaii as of June 30, 1978. Deposits in Island banks reached \$3.6 billion in 1978, compared with \$1.56 billion in 1970 and \$673 million in 1960. Assets of savings and loan associations stood at \$2.9 billion in mid-1978, almost four times their 1970 level. There were 158 credit unions with combined assets of \$704 million at the end of 1978.

The market value of stocks and bonds traded on the Honolulu Stock Exchange in 1977 amounted to \$298,000, the lowest total on record, and the Exchange discontinued operations at the end of the year. The all-time high was \$25.4 million in 1961. Approximately 58,000 Hawaii residents held shares in U.S. public corporations or investment companies in 1975.

Life insurance in force in Hawaii at the end of 1977 amounted to \$14.7 billion, triple the figure reported ten years earlier. For all 546 insurance companies doing business in the Islands, Hawaii premiums amounted to \$488 million in 1977 and losses, claims, and benefits paid came to only \$226 million. Oahu fire losses amounted to \$10.0 million in fiscal 1978. Persons covered by the two major prepaid health insurance plans as of December 31, 1978 numbered 630,000, with membership dues of \$157 million.

By mid-1978, more than 28,400 corporations and partnerships were registered to do business in Hawaii: 19,000 local ("domestic") corporations, 3,100 out-of-State ("foreign") corporations, and 6,400 partnerships. Business units with one or more employees in 1976 numbered 17,271; 87 had 250 or more employees. During fiscal 1978, 2,718 new local corporations were formed and 1,879 existing local corporations were dissolved or merged. Business receipts of corporations approached \$9.1 billion in 1975; business receipts of proprietorships in the same year amounted to \$660 million. Hawaii's largest corporation, Amfac, Inc., reported 1978 sales of \$1.5 billion, with a net profit of \$42 million.

Sources for statistics on these subjects include the Hawaii State Department of Regulatory Agencies (specifically its Bank Examination, Insurance, and Business Registration Divisions), the State Department of Taxation, the Honolulu Fire Department, the New York and Honolulu Stock Exchanges, the Health Insurance Institute and two major local health insurance plans, the Hawaii Credit Union League, and the annual report on County Business Patterns issued by the U.S. Bureau of the Census. Historical Statistics of Hawaii, Sections 22 and 23, provides information for earlier periods. Comparable Mainland data appear in Sections 17 and 18 of Statistical Abstract of the United States: 1978.

## Section 16

# COMMUNICATIONS

This section presents statistics on the various communications media: postal service, telephone, telegraph, radio, television, newspapers, and books.

Hawaii is served by all major communications media. In 1978 it had 76 post offices handling 267 million pieces of mail and accounting for postal receipts in excess of \$49 million. There were 659,000 telephones in service (double the number eleven years earlier), 286,000 telephone homes, 1.7 billion local calls originated, 8.3 million completed inter-island calls, and 22.5 million incoming and outgoing transpacific calls. Telegraph messages to and from Hawaii in 1977 totaled 278,000. The thirty-four commercial and educational radio stations in the Islands early in 1979 included 25 on the regular broadcast band and nine FM stations. The State also had 15 television stations (13 commercial and two educational), including satellites but excluding translators. Ten cable TV companies served 97,000 subscribers. More than 96 percent of all households had television sets, and half of the adults surveyed watched three or more hours daily. Island publishers printed seven daily newspapers, numerous magazines and other periodicals, and a wide diversity of books. Newspaper circulation reported by the three English-language dailies averaged 215,400 in 1978, compared with 197,500 a decade earlier.

The major sources for statistics on communications are the reports and records of the U.S. Postal Service, Federal Communications Commission, CATV Division of the Hawaii State Department of Regulatory Agencies, Hawaiian Telephone Company, and Audit Bureau of Circulations, and Hawaii Media Guide. Earlier figures appear in Historical Statistics of Hawaii, Section 18. Data on communications for other States and for the nation as a whole are carried in Statistical Abstract of the United States: 1978, Section 19.

Table 246.-- POSTAL SERVICE: 1977 AND 1978

[For fiscal years ended September 30]

Year	Number of post offices at end of period <u>1/</u>	Gross postal receipts (\$1,000)	Pieces of mail handled (millions)
1977 .....	76	43,790	249
1978 .....	76	49,198	267

1/ Revised from 1978 edition, table 262. According to the Hawaiian Telephone Company, "Prior to 1972, our service equipment tallied terminating or completed calls, but after that date, originating calls were counted. The number of originating calls is significantly higher than the number of terminating calls since originating calls include unsuccessful calling attempts. One series can be roughly estimated from the other, and in the past, completed calls were computed as a constant 75% of originating calls.

"For pre-1972 data, if a call reached the called party's terminal equipment, it was classed as a completed call, whether any one actually picked up the receiver or not. Under this definition, busy and non-answering numbers resulted in completed calls. Certain calls terminating on toll switchboards, such as calls to the Operator and to certain large subscribers, were excluded. For the post-1972 series, a call is considered a completed call only if it is answered by a second party. Busy, non-answering, and disconnected numbers, trunk overflows, and equipment irregularities result in incompleting calls, although wrong numbers might not. Furthermore, the conversion factors are based on initial attempts to reach a given number for all years except 1972 and part of 1973, which reflect all attempts. The use of total attempts produces a completion ratio which is 2 to 3 percentage points higher than for initial attempts. As a result, the 1972 to 1973 period represents a break in both the call completion and originating call series which cannot be adjusted for."

2/ Excludes uncollectables.

## Section 17

# ENERGY AND SCIENCE

This section presents statistics relating to electrical, gas and petroleum power and energy, and to scientific resources.

Electricity sales exceeded six billion kilowatt-hours in 1978, or 7,347 per residential customer. The total has doubled since 1968. Manufactured gas sales reached 34.9 million therms in 1978, 48 percent above the figure ten years earlier. Residential rates in 1978 averaged 5.9 cents per kilowatt-hour and 92 cents per therm, both well above the corresponding rates several years earlier.

The liquid fuel tax base for 1978 was approximately 917 million gallons, compared with 825 million in 1974 and 620 million in 1968. The 1978 total included 325 million gallons of gasoline, 473 million of aviation fuel, and 115 million of diesel oil. The average price for leaded premium gasoline rose from 48.7 cents per gallon in October 1973 to 93.1 cents in May 1979.

Total energy consumption in 1975 amounted to 209 trillion British thermal units, compared with 134 trillion BTU a decade earlier. Transportation accounted for 60 percent of the 1975 total.

The State is well served with scientific resources. A 1976 inventory reported 384 companies and agencies with research or scientific capabilities. Employment in these organizations was more than 34,000. Forty-one patents were granted to Hawaii residents in 1978.

Information on communications, energy and science can be obtained from reports and records of the U.S. Department of Energy, Federal Power Commission, Hawaii State Department of Taxation, Hawaii State Department of Regulatory Agencies, Public Utilities Division, and individual utility companies. Detailed statistics on energy consumption, with special emphasis on petroleum products, appear in Energy Use in Hawaii, published by the State Energy Office of the Department of Planning and Economic Development in November 1977. Hawaii's Scientific Resources, 1977 Directory, issued by DPED in 1977, contains information on scientific organizations and facilities in the Islands. Historical Statistics of Hawaii, Section 19, presents data for earlier years. Data for the nation as a whole can be found in the Statistical Abstract of the United States: 1978, Sections 20 and 21.

## Section 18

# TRANSPORTATION

This section presents statistics relating to public roads, motor vehicles, bicycles, traffic accidents, local public transit, civil aviation, harbors, and water traffic.

Motor vehicle registration in Hawaii increased from 354,000 in 1968 to 477,000 in 1973 and 580,000 in 1978. Vehicle miles rose during the same period from 2.9 billion to 4.7 billion. Hawaii residents purchased 46,000 new passenger cars in 1978 and scrapped or shipped out approximately 34,000. By the end of 1978, 541,000 licensed drivers had access to 3,862 miles of streets and highways throughout the State. Bus passengers carried by the Honolulu Mass Transit Lines increased from 19.4 million in 1971 to 67.7 million in 1978. Registered bicycles numbered 108,000 in 1974 and 81,000 in 1978.

All scheduled interisland travel is now by air. Interisland steamer service was discontinued in 1949; hydrofoil service was initiated between Honolulu and other Island ports in 1975 and suspended early in 1978. In 1978, the two scheduled airlines and a number of air taxis reported 7.3 million interisland passengers, more than three times their 1968 total, and carried 41,000 tons of cargo. The State has 11 commercial airports, 49 general aviation, military or private airports, 14 civilian heliports, 3,586 active pilots, and 541 active civil aircraft.

Rapid growth is similarly evident in transpacific travel. Although surface passenger arrivals dropped from 54,000 in 1959 to 4,800 in 1978, air passengers increased during the same 19-year span from 224,000 to 9.04 million. Overseas cargo received in the State in 1977 amounted to 66,000 tons by air and 9.5 million tons by ship.

Undocumented State-registered vessels as of December 31, 1978 numbered 13,695, compared with 8,042 in 1970. Median length was 17-1/2 feet, and four-fifths were stored on land. There were also 987 documented vessels in the State in 1978, almost double the 1970 total.

The chief source for transportation statistics is the Hawaii State Department of Transportation and its Land, Water, and Air Transportation Facilities Divisions. Other sources include the U.S. Coast Guard, Civil Aeronautics Board, Federal Aviation Administration, Army Corps of Engineers, Hawaii State Public Utilities Commission, Honolulu Department of Transportation Services, County finance departments, Cardinal Mailing Services, and individual transportation companies. Data for the entire period of record appear in Historical Statistics of Hawaii, Section 17. Similar statistics for other areas are reported in Statistical Abstract of the United States: 1978, Sections 22 and 23.

Table 278.-- MILEAGE OF STREETS AND HIGHWAYS, PAVED AND UNPAVED:  
1970 TO 1978

1976 .....	350	15,547,127	64,585,334	25	10
1977 .....	350	16,242,537	66,311,882	25	10
1978 .....	350	15,991,798	67,746,396	25	10

1/ All categories of service.

2/ Passenger total excludes 2,277,502 zone fares. Under HRT, service was limited largely to Honolulu and Halawa. Service was suspended during a one-day strike in August 1970.

3/ Bus service by HRT was terminated by a strike that began January 1, 1971. MTL commenced service March 1, 1971, with routes extending from Kalihi to Hawaii Kai.

4/ Service provided from Pearl Harbor to Hawaii Kai; extended to Windward Oahu and North Shore on August 13, 1972.

5/ Service extended to Waianae coast in April 1973.

6/ Islandwide service after March 15, 1974, when MTL began operation of Leeward Bus Company lines.

NA Not available.

1/ Scheduled interisland passenger service by hydrofoil vessels was begun on June 15, 1975 and terminated January 15, 1978.

2/ Excludes nonrevenue passengers before 1970. Air taxi service seriously underreported before 1977.

3/ Port of Honolulu only. Excludes through passengers. For years ended June 30.

4/ Includes nonrevenue passengers beginning in 1970. Treatment of through passengers was apparently changed after 1959 and again after 1969.

## Section 19

# AGRICULTURE

This section presents statistics on agricultural land, farms, and specific crops, livestock, dairy products, and poultry. Related information appears in Section 6 (on land use), 11 and 15 (agricultural employment and earnings), and 22 (food processing).

There were 4,100 farms in Hawaii as of 1978, with a total area of 2,290,000 acres. Both figures have declined during the past decade. The value of crop sales in 1978 was \$306 million, or 86 percent higher than the total for 1968. Livestock sales amounted to \$73 million, or 91 percent more than the 1968 level. Combined crop and livestock sales ranged from \$45 million in Kauai County to \$125 million on the Big Island. Net farm income in 1977 was \$69.7 million, the lowest annual total since 1971. Major crops in 1978 were sugar (\$183 million in sales, up 64 percent over the decade), pineapple (\$63 million, or 75 percent over the 1968 total), and flowers and nursery products (\$17 million, or 482 percent more than in 1968). Diversified agriculture, defined as all crops other than sugar and pineapple, rose from \$18 million in 1968 to \$61 million in 1978, or approximately 236 percent. About 600 farms sold \$17 million of flowers and nursery products in 1978, chiefly anthuriums, potted foliage, orchids, and ornamentals and trees. Important products of livestock farms as of 1978 included cattle (\$24 million in sales), hogs (\$8 million), milk (\$24 million), and eggs (\$13 million). Coffee sales have fluctuated sharply during the past decade, but macadamia nuts and horticultural specialties have increased rapidly. In 1978, Hawaii produced 41 percent of the fresh market vegetables consumed locally, 28 percent of the fresh market fruits, 36 percent of the beef and veal, 24 percent of the chickens, none of the rice, and 90 percent of the eggs.

Statistics on Hawaiian agriculture exclude pakalōlō (marijuana) and other illicit plants. Some authorities have speculated that the income from such illegal production may exceed that from more traditional forms of diversified agriculture.

Important sources for data on agriculture include the United States Census of Agriculture, most recently conducted at the end of 1974, the annual report on Statistics of Hawaiian Agriculture issued by the Hawaii Agricultural Reporting Service, and publications of the Hawaii Agricultural Experiment Station, Hawaiian Sugar Planters' Association, and Pineapple Growers Association of Hawaii. Agricultural data for earlier years are summarized in Historical Statistics of Hawaii, Section 13. National statistics appear in Section 24 of the Statistical Abstract of the United States: 1978.

1971 ...	4,400	2,300	221,692	115,800	40,300	22,539	43,053
1972 ...	4,300	2,300	232,497	117,300	43,900	25,055	46,242
1973 ...	4,100	2,300	266,161	141,900	39,600	29,392	55,269
1974 ...	4,100	2,300	575,473	442,300	40,300	34,964	57,909
1975 ...	4,100	2,300	377,552	237,000	41,600	40,688	58,264
1976 ...	4,100	2,300	327,830	164,700	53,000	47,815	62,315
1977 ...	4,100	2,300	325,459	144,200	62,500	53,751	65,008
1978 ...	4,100	2,290	378,922	182,700	63,000	60,689	72,533

<sup>1/</sup> Includes land not in crop and pasture, such as farm house lots, roads, etc.

<sup>2/</sup> Excludes illegal crops, which are thought by some authorities to have sales greater than those of all legal crops. Shipments of pakalōlō (marijuana) from Hawaii County alone have been estimated at 250,000 pounds annually, with annual sales from these shipments running between \$250 million and \$750 million; see Honolulu Advertiser, August 15, 1978, p. A-4.

## Section 20

# FORESTS, FISHERIES, AND MINING

This section presents data on forests and forest products, commercial fishing, and mining and mineral products.

The most recent available statistics show 1.2 million acres of forest and water reserve and 948,000 acres of commercial forest in the State, most of it on the Big Island. More than 49,000 acres had been planted in eucalyptus and other species of trees by mid-1978. Forest products harvested in 1977 had a value of \$3.5 million. More than 400 forest and brushland fires burned 17,000 acres in 1978. According to a 1974 compilation, the tallest tree in the State is a 203-foot eucalyptus saligna.

The commercial fish catch in fiscal 1978 was 13.7 million pounds and had a value of \$11.2 million. Aku (Skipjack) accounted for 35 percent of the total value. Other important species are ahi, akule, opelu, and opakapaka. Commercial fishermen numbered 2,574; they operated 1,437 fishing vessels, serving 44 fishery wholesaling and processing establishments.

The value of mineral production reached \$44 million in 1977, most of it in cement and stone. The all-time high was \$49.7 million, recorded in 1975.

Important sources of data on these subjects are the United States Census of Agriculture, United States Census of Mineral Industries, and reports and records of the U.S. Bureau of Mines, National Marine Fisheries Service, and Hawaii State Department of Land and Natural Resources, Fish and Game Division and Forestry Division. Historical Statistics of Hawaii, Section 14, summarizes the data for earlier periods. Comparable Mainland statistics are reported in the Statistical Abstract of the United States: 1978, Sections 25, 26 and 27.

## Section 21

# CONSTRUCTION AND HOUSING

This section presents statistics on construction activity and costs, the size and composition of the housing inventory, occupancy of housing, sales, and residential financing.

There were 25,807 building permits issued in 1978, with an estimated value of \$757 million. The total included \$438 million for private residential construction and \$233 million for private nonresidential structures. The value of government construction contracts awarded was \$290 million. Construction put in place, as indicated by the contracting tax base, totaled \$452 million in 1968 and \$1.06 billion in 1978. The value of land transfers in fiscal 1978 was \$1.3 billion. Mortgage loans outstanding at the end of 1977 amounted to \$4.5 billion. The March 1979 construction cost index for Honolulu (1967=100) was 262.1 for single-family residences and 260.3 for high-rise buildings.

The number of housing units in the State increased from 210,000 in 1969 to 287,000 in 1979. Owner occupied units numbered 84,000 in 1969 and 133,000 in 1979; the latter total included 96,000 on land owned in fee simple and 37,000 on leased land. Condominium units, first authorized in 1961, exceeded 63,000 at the end of 1978. Military and public housing accounted for 26,000 units as of 1979. Housing was in short supply throughout most of the past decade: on Oahu, the 1978 vacancy rate was only 1.5 percent. The average selling price of single family homes on Oahu during the year ended February 28, 1979, based on Multiple Listing Service data, was \$114,000. The median gross monthly rent for Oahu rose from \$140 in 1970 to \$234 in 1976, and the median value of owner occupied units in the latter year was well above \$75,000.

The principal sources for these data are the 1970 U.S. Census of Housing, the 1975 OEO Census Update Survey, the 1976 Honolulu Housing Survey, postal vacancy surveys issued by the Federal Home Loan Bank, various series compiled by State and County agencies (primarily the Hawaii Housing Authority, Hawaii State Department of Land and Natural Resources, Department of Planning and Economic Development, Department of Regulatory Agencies, and Department of Taxation, Honolulu Department of Housing and Community Development, and the County building departments), the construction cost indexes prepared by the First Hawaiian Bank, and the Honolulu Board of Realtors reports on Multiple Listing Service activity. Many of these series are summarized in reports published by the Honolulu Department of Housing and Community Development (chiefly its Housing and Community Development Research, now issued annually), the Bank of Hawaii (particularly Construction in Hawaii, also annual), and the First Hawaiian Bank (in its monthly Economic Indicators). Persons interested in figures for earlier periods should consult Historical Statistics of Hawaii, Section 15. Mainland statistics appear in Section 28 of Statistical Abstract of the United States: 1978.

1/ As of April 1.

2/ As indicated by the number of taxpayers claiming home exemptions.

The number of owner occupied housing units reported by the U.S. Census of Housing is somewhat higher than the corresponding number based on taxpayer home exemptions, chiefly because of differences in definitions. Data for 1977-1979 refer to January 1; data for 1969-1976, to July 1.

3/ Data for both Federal and State agencies include housing units leased by these agencies from private owners. All data are as of April 1.

4/ Calculated as a residual after accounting for the known components, some of which pertain to dates other than April 1, and thus not attributable to any specific date.

5/ Revised.

## Section 22

# MANUFACTURES

This section presents statistics on the manufacturing segment of the economy, including sugar processing and pineapple canning.

The number of manufacturing establishments in Hawaii increased from 618 in 1958 to 697 in 1967 and 773 in 1972. The value added by manufacture rose from \$326 million in 1967 to \$410 million in 1972, and \$700 million in 1976. About 72 percent of all manufacturing activity in the State was on Oahu in 1976. Food processing -- mostly sugar and pineapple -- accounted for more than half of the value added by manufacture in that year. Between 1968 and 1978, the general excise and use tax base increased 58 percent for sugar processing, 15 percent for pineapple canning, and 111 percent for all other manufacturing. There were three pineapple canneries and 13 sugar mills in Hawaii in mid-1978, in each case only half as many as ten years earlier. The production of canned pineapple fruit and juices in 1977-1978 amounted to 21 million actual cases, well below the levels of earlier years, but fresh pineapple sales rose sharply. Sugar production in 1978 amounted to 1.03 million short tons, about the same level as in other recent years. The value of production (including raw sugar and commercial molasses) was \$285 million, well below the record set in 1974 but still the third best year in Island history.

Sources for data on this subject include the United States Census of Manufactures, most recently conducted for 1977, the Annual Survey of Manufactures, and publications of the Hawaii State Department of Agriculture and Department of Taxation, Hawaiian Sugar Planters' Association, and Pineapple Growers Association of Hawaii. Historical Statistics of Hawaii, Section 16, reviews the figures for earlier years. Statistics for the nation as a whole appear in Section 29 of the Statistical Abstract of the United States: 1978.

## Section 23

# DOMESTIC TRADE AND SERVICES

This section presents statistics relating to retail and wholesale trade; hotels; and selected personal, business, automotive, repair, and amusement services.

These activities have undergone rapid growth in recent decades. Retail sales increased from \$751 million in 1963 to \$1.9 billion in 1972 and \$3.3 billion in 1977. Wholesale sales rose from \$735 million in 1963 to \$1.54 billion in 1972. Hotels, amusements, and other services reported receipts of \$683 million in 1972, compared with \$163 million in 1963. General excise and use tax base data for more recent years indicate continued increases; between 1972 and 1978, the retailing tax base rose 116 percent, the wholesaling base by 115 percent, and the base for services by 111 percent. Major retail concentrations include Ala Moana Center, Pearlridge Center, Waikiki, and downtown Honolulu. The 19 department stores on Oahu reported sales of \$373 million in 1978, double their 1970 volume. In addition to civilian retail outlets, there are 78 commissaries, exchanges, clubs, and food services maintained by the armed forces; these facilities had sales of \$261 million in 1978.

Growth has been especially rapid for hotels. The number of units in the State rose from 6,800 in 1959 to 24,000 in 1969 and 51,000 in June 1979. There were 384 hotels, motels and apartment-hotels in the State on the latter date, including 228 on the Neighbor Islands. Occupancy rates averaged 82.1 percent in Waikiki and 75.5 percent on the Neighbor Islands during 1978. The average daily room rate was \$38.49 in 1978. The hotel payroll in 1977 totaled \$176 million, compared with \$35 million ten years earlier.

Sixty feature motion pictures and television specials and series were filmed in Hawaii in 1978, accounting for local expenditures of \$22 million.

The major source of these data is the United States Census of Business, most recently conducted at the end of 1977. Statistics on the retailing, wholesaling, and services tax bases are available from the Hawaii State Department of Taxation. Data on hotel room counts, occupancy and other characteristics are published by the Hawaii Visitors Bureau and the firm of Harris, Kerr, Forster and Company. A summary of figures on trade and services in earlier years appears in Historical Statistics of Hawaii, Section 20. The Statistical Abstract of the United States: 1978, Section 30, presents similar data for other states and the nation as a whole.

## Section 24

# FOREIGN AND INTERSTATE COMMERCE

This section includes data on the flow of goods, services, and capital between Hawaii and the rest of the world, with particular emphasis on trade and investment involving foreign countries.

Imports to Hawaii from foreign nations rose from \$139 million in 1968 to \$1.1 billion in 1978. Exports to foreign countries amounted to only \$49 million in 1968, but by 1978 exceeded \$137 million. (These figures, it should be noted, refer to merchandise imports for consumption and exports of domestic merchandise through the Honolulu Customs District. They do not necessarily represent exports of commodities originating in Hawaii, nor imports for direct consumption within the State.)

Trade with the Mainland United States has similarly risen in the past decade. Merchandise received from the Mainland increased from \$689 million in 1966 to \$1.8 billion in 1976, the most recent year available. Merchandise exported to the Mainland rose from \$311 million in 1966 to \$817 million in 1974, then slipped back to \$415 million in 1976.

Among the foreign nations, Hawaii's leading trading partners in 1977 were Indonesia for imports and Australia for exports. Imports from Indonesia amounted to \$257 million, or 26 percent of the total, while exports to Australia reached \$23 million, or 24 percent of all foreign exports. The Indonesian imports consisted mostly of crude oil.

The Honolulu Foreign Trade Zone received merchandise valued at \$14.6 million in fiscal 1978. Merchandise forwarded was valued at \$14.5 million.

Foreign-owned U.S. firms in Hawaii operated 138 establishments in 1976, and employed 7,729 persons with an annual payroll of \$71 million. Out of 39,782 hotel rooms in the State as of July 1978, 8,381 (or 21.1 percent) were foreign owned.

Sources for statistics on interstate and foreign commerce include the U.S. Bureau of the Census (for foreign trade), the Bank of Hawaii (for interstate trade and balance of payments), Foreign Trade Zone No. 9, the Hawaii International Services Agency, and recent studies of Foreign Direct Investment in the United States and Selected Characteristics of Foreign-Owned U.S. Firms issued by the U.S. Department of Commerce. Further information appears in cargo data by origin and destination, compiled by the Army Corps of Engineers and cited in Section 18.

Comparable data for the nation as a whole appear in Section 31 of Statistical Abstract of the United States: 1978. Long-term Island trends are summarized in Historical Statistics of Hawaii, Section 21.

Table 395.-- INTERSTATE TRADE: 1967 TO 1977  
 [In millions of dollars]

Year	Imports	Exports
1967 .....	822.4	325.3
1968 .....	886.7	329.1

Based on data from a variety of private and governmental sources, including published reports, interviews, answers to letters, and related procedures. Excluded are capital movement items such as the flow of investment funds, deposits of financial institutions, loans and repayment of loans, securities, and currency.

## BIBLIOGRAPHY

This volume is the thirteenth in a series published by the Hawaii State Department of Planning and Economic Development and its predecessor agencies. The first was Statistical Abstract of Hawaii, 1962, issued by the Department of Planning and Research in 1962. After a four-year hiatus, updated versions titled The State of Hawaii Data Book were published by the Department of Planning and Economic Development in 1967, 1968, and annually beginning in 1970. Most of the volumes issued prior to the present edition are now out of print, but copies can be consulted in the DPED Library, Hawaii State Library, University of Hawaii and community college libraries, Honolulu Municipal Reference Library, and other collections throughout the State.

Additional information regarding specific statistical sources can be found in the introductory statements to each section of the Data Book, in footnotes and source references to the various tables, and in other DPED publications. Three of these DPED reports cover statistical sources in considerable detail: Statistics in Hawaii: 34 Papers Prepared for the Hawaii Statistical Reporting System Workshop, February 18-20, 1970, at Waikiki (1970), Proceedings of the Conference on Socio-Environmental Indicators, March 15-17, 1971, Honolulu, Hawaii (1971), and Inventory of Hawaii Planning Information (1973). The first two are reports of statistical symposia. The third is a 164-page reference work prepared for the Hawaii Urban Planning Information Center, containing detailed geographic and subject-matter indexes and source listings. These reports are now out of print, but copies can be consulted in most Hawaii libraries.

Although most of the series in the Data Book are shown only for recent years, earlier figures in many cases can be found in Historical Statistics of Hawaii, by Robert C. Schmitt. This book, published by the University Press of Hawaii in 1977, contains 711 pages of narrative and tables on the development of statistics in Hawaii since the 18th century. Copies are available from the University Press and various book stores for \$25.

Privately published works of general statistical reference include Hawaii Facts and Figures and All About Business in Hawaii. Hawaii Facts and Figures is a publication of the Chamber of Commerce of Hawaii, first issued (under a different title) more than forty years ago. The most recent edition appeared early in 1979, with statistics through 1978; copies are available from the Chamber for \$2.00. All About Business in Hawaii, 1979 Edition, is the seventh in an annual series published by Crossroads Press. The current edition costs \$2.50.

Two other privately published reports containing useful statistics are the annual economic reviews of the two largest banks in the State. The current editions are Hawaii '78, published by the Bank of Hawaii in August 1978, and Hawaii in 1978, issued by the First Hawaiian Bank as a supplement to its monthly Economic Indicators for April 1979.

The County of Hawaii, Department of Research and Development, has published its own Data Book 1978, presenting 232 pages of statistics for the Big Island.

Persons interested in comparisons between Hawaii and other States or the nation as a whole should consult the Statistical Abstract of the United States and its companion volume, the County and City Data Book. The Abstract is an annual publication of the U.S. Bureau of the Census, initiated in 1878. The current edition is the 99th, dated 1978; copies are available for \$10.50 (cloth) or \$6.75 (paper) from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. The County and City Data Book, most recently issued for 1977, is sold by the same agency for \$19.50. Both volumes are on the shelves of most libraries.

Table A.-- PRINTING HISTORY OF THE STATE OF HAWAII DATA  
BOOK: 1962 TO 1978

Edition	Number of pages	Number of tables	Price (dollars)		Printing cost (dollars)	Number of copies printed
			Hawaii	Outside State		
1962 <u>1/</u> ..	128	243	1.00	1.00	(NA)	(NA)
1967 .....	66	95	(NA)	(NA)	1,969.45	3,000
1968 .....	69	99	1.00	1.00	2,969.20	3,000
1970 .....	136	135	1.00	1.00	2,470.92	2,030
