This report was prepared by Robert C. Schmitt, State Statistician, with the assistance of Roy H. Tsumoto, Sharon Nishi, and Lynn Y. S. Zane. The camera-ready copy was typed and proofread by Irene S. Fujimori, Judy F. Noda, Helen T. Nagafuchi, and Alice Iwasaki. All are members of the DPED's Research and Economic Analysis Division, headed by Dr. Richard Y. P. Joun. The maps were drawn by Stewart A. Wastell, illustrator in the DPED's Planning Division. Editing and printing arrangements were handled by the DPED's Information Office.

Copies of this report may be obtained for \$5.00 each from the Information Office on the 7th floor of the Kamamalu Building, 250 South King Street, Honolulu, or ordered from out of State by sending \$10.00 per copy (postpaid) to the DPED Information Office, P. O. Box 2359, Honolulu, Hawaii 96804.

FOREWORD

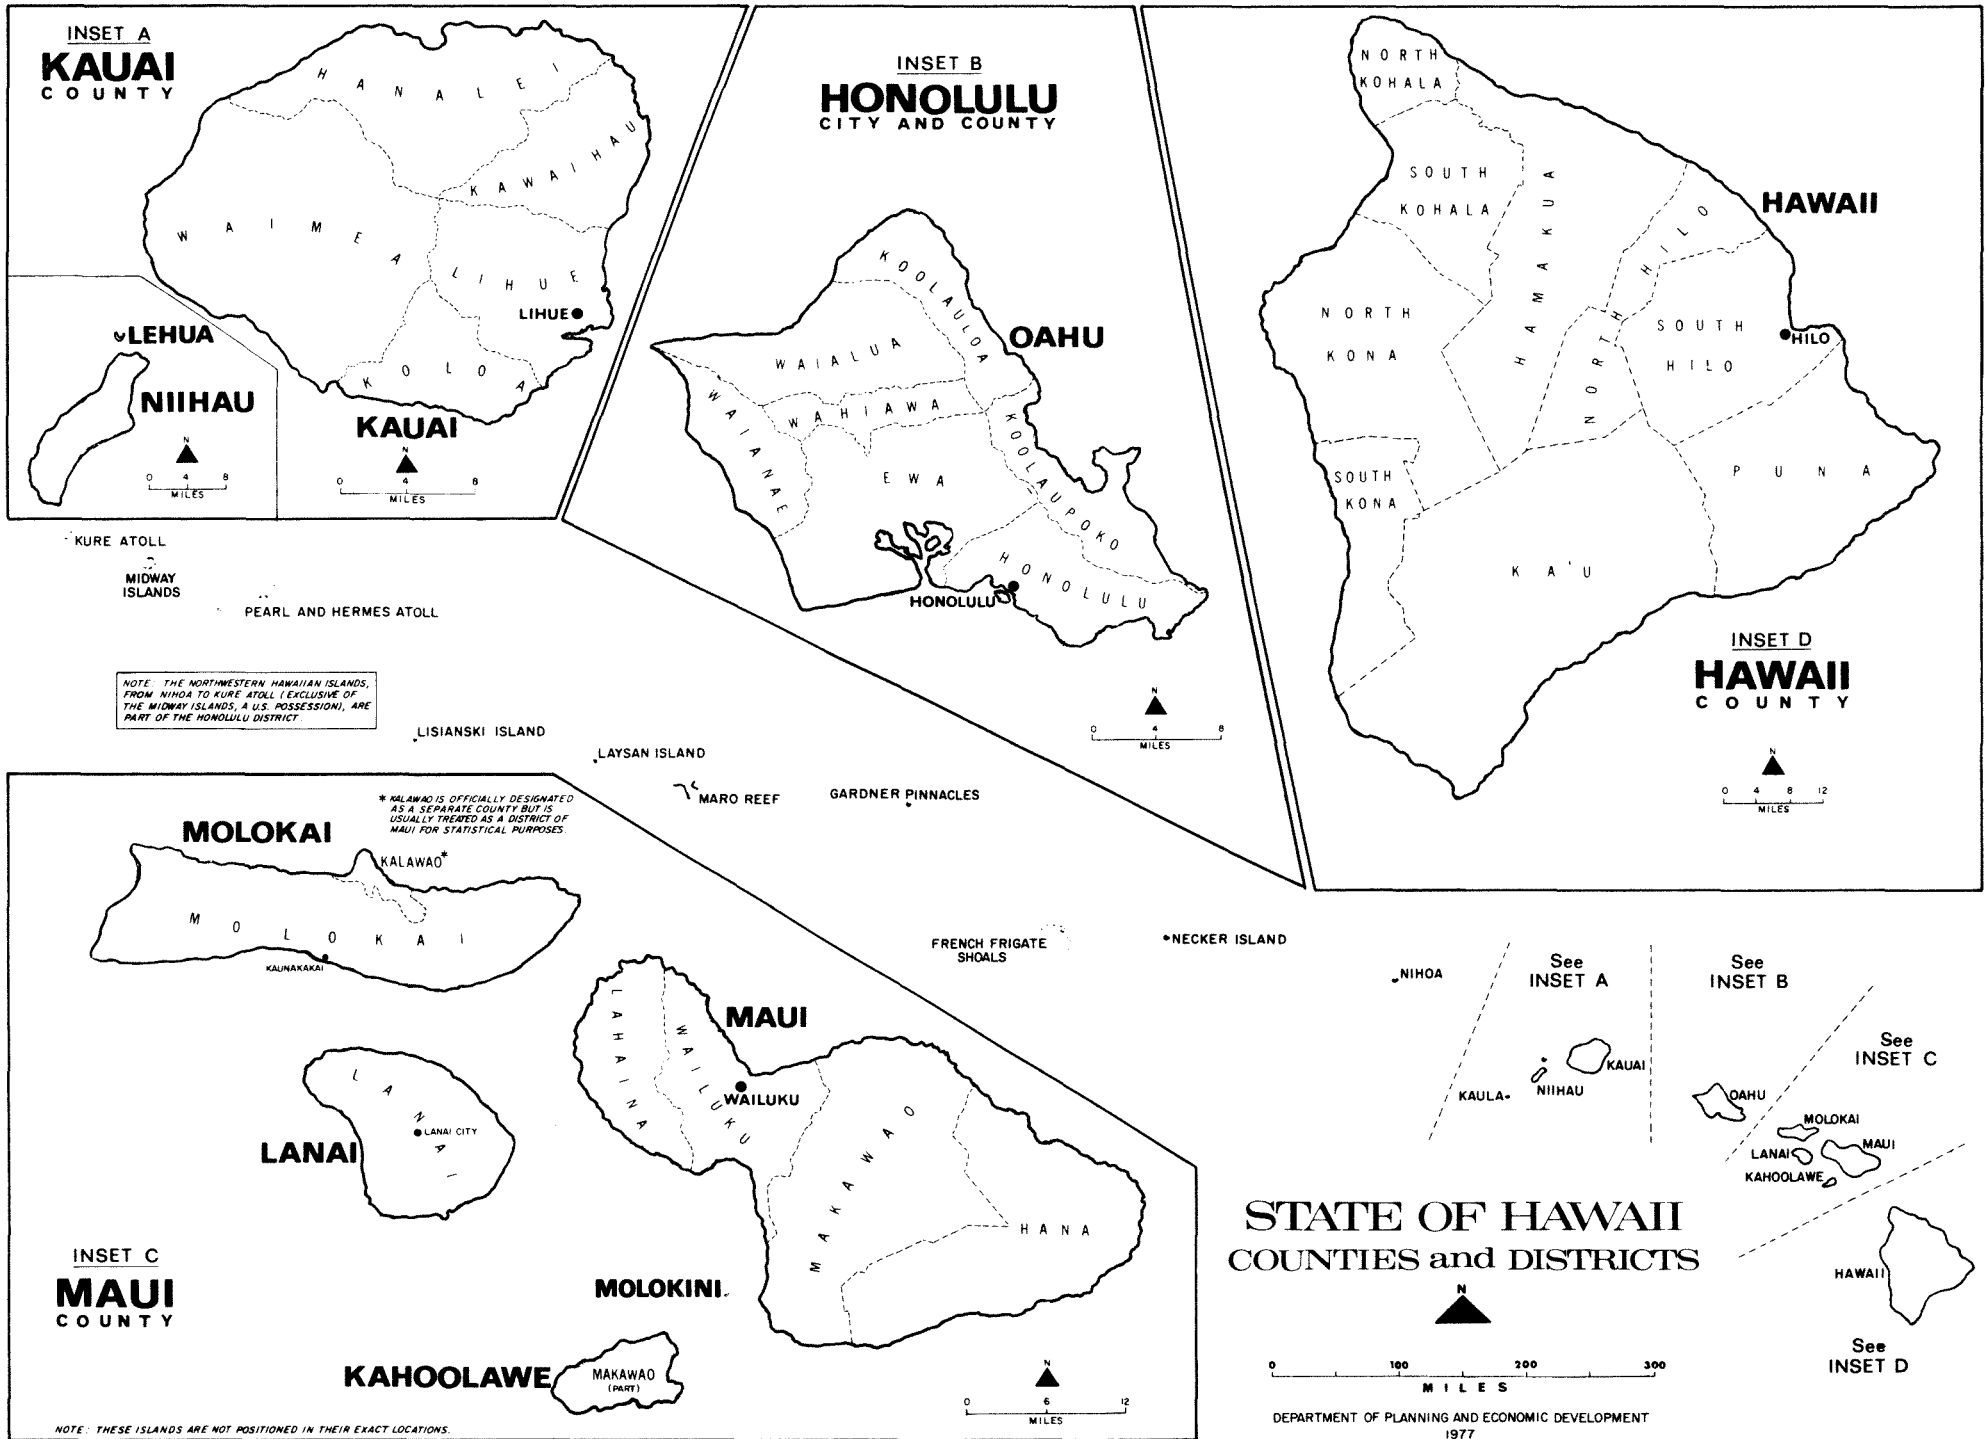

By George R. Ariyoshi
Governor, State of Hawaii

Accurate, timely and substantial information is essential to sound decision-making. The State of Hawaii has long recognized that orderly State growth and planned prosperity require a continuing, efficient organization of statistical data and other information into forms which are easily used and readily available to all who need them. This State of Hawaii Data Book 1982 is the latest example of the State Administration's constant effort to provide and improve this important service to Hawaii's citizens.

The Data Book is invaluable for Government administrators. It is vital to all agencies, companies, organizations and individuals who carry out a great variety of forms of research in the Islands and overseas. It is very useful to other citizens who have only an occasional need for accurate statistics. It is a book which, thanks to the professionalism of its compilers, can be depended upon, and upon which thousands do depend. And it is only one--although perhaps the best one--of a large number of excellent data sources which Hawaii makes available.

Through such reference works, Hawaii is able to go about its myriad tasks with confidence that its information base is sound. This State of Hawaii Data Book 1982 is one of many proofs we have that our people know what they are doing, and where they are going, and are reasonably certain they can achieve their goals.

INTRODUCTION

By Hideto Kono, Director
Department of Planning and Economic Development

The State of Hawaii Data Book: A Statistical Abstract is intended to serve as the standard official summary of statistics on the social, economic, and political organization of the State. Like its long-established counterpart, the Statistical Abstract of the United States, it may be used as either a convenient volume of statistical reference or a guide to other statistical publications and sources.

The present volume, containing statistics available in the summer of 1982, is the sixteenth such abstract to be published by the State of Hawaii. Earlier editions appeared in 1962, 1967, 1968, and annually beginning in 1970. All are now out of print, but copies can be seen in many high school, university, and public libraries in Hawaii.

The Data Book closely follows the organization and format of the U.S. Abstract, in order to facilitate comparison of Hawaii data with corresponding series for the nation and other jurisdictions.

Emphasis in the Data Book is given to the most recent available State data. Historical statistics and information for counties, islands, urban places, and smaller areas receive more limited attention. The publications cited as sources in the introductions to the various sections or at the end of each table usually contain additional statistical detail and a more comprehensive discussion of relevant definitions and concepts than can be presented here. Persons interested in more extensive information should consult these sources or write to the agencies responsible for them.

Largely as a result of federal budget reductions, many important statistical series have been suspended or terminated. Examples include the annual counts of aliens (table 20 in this edition), comprehensive long-term meteorological data (table 140), the National Travel Survey (tables 154 and 155 in the 1981 edition), Federal outlays (tables 224-226 in 1982), turnover in manufacturing employment (table 273), union membership (table 281), average food prices (table 258 in 1980), comparative family budgets (tables 293-295 in 1982), broadcast revenues and expenditures (table 362), passenger movements in Honolulu Harbor (table 441), fishery establishments (table 465), unsold housing inventory (tables 487 and 488 in 1981), the annual survey of manufactures (tables 511 and 513), and department stores sales (table 529). Many other statistical reports, particularly those from the 1980 decennial census, have been delayed long beyond their planned release dates.

Many Federal, State, County and private organizations cooperated in the preparation of this report. These agencies are credited in the source references to the tables to which they contributed. Their assistance is gratefully acknowledged.

GUIDE TO TABULAR PRESENTATION

The tables in this report generally follow the principles of tabular presentation used by the U.S. Bureau of the Census in its annual publication, Statistical Abstract of the United States, and described in Bureau of the Census Manual of Tabular Presentation, published by the Bureau in 1950. These principles have been accepted by the Department of Planning and Economic Development for use in its publications and recommended to all other State agencies for official use.

Headnotes immediately below table titles provide information important for correct interpretation or evaluation of the table as a whole or for a major segment of it.

Unit indicators ("In thousands," "In millions of dollars," etc.) are usually given as the first element of the headnote. In tables where several units are used, the unit indicators are generally given in the stub or in the column headings.

Footnotes below the bottom rule of tables give information relating to specific items or figures within the table.

Parallel vertical rules are used to the right of a total column to indicate --

- (1) that the components which follow add to the total;
- (2) in the case of derived figures, that the underlying data are additive to their total.

The following symbols, used in the tables throughout this book, are explained in condensed form in footnotes to the tables where they appear:

- Represents zero or rounds to less than half the unit of measurement shown.
- D Figure withheld to avoid disclosure of information pertaining to a specific organization or individual.
- NA Data not enumerated, tabulated, or otherwise available separately.
- ... Same as NA; used in tables in which a large number of cells lack data.

In many tables, details will not add to the totals shown because of rounding.

Median: The value which divides the distribution into two equal parts--one-half the cases falling below this value and one-half exceeding it.

Geographic coverage should be understood as Statewide, unless otherwise indicated in the table title, headnote, boxhead, or stub. All annual statistics should be understood as referring to calendar years unless otherwise indicated.

Section 1

POPULATION

This section presents statistics on the growth, geographic distribution, and composition of the population of Hawaii, and on the number and characteristics of migrants moving to and from the State.

The 1980 census reported a resident population of 964,691. This total included approximately 57,000 members of the armed forces and 64,000 of their dependents. It excluded more than 97,000 visitors who were present on an average day in 1980, while including around 10,000 residents who were temporarily out of the State. The total population has risen from 58,000 in 1878 to 154,000 in 1900 and 423,000 in 1940. Almost four-fifths of the 1980 de facto total lived on Oahu, giving that island a density of 1,387 persons per square mile. The population is young -- the median age in 1980 was 28.3 years -- and racially diversified. The major unmixed groups in 1980 were Caucasians (26.3 percent of the non-barracks, non-institutional population) and Japanese (23.5 percent). In addition, 27.3 percent were of mixed race, primarily part Hawaiian. The 1980 census reported 299,000 households and 226,000 families in the State. The average household size was 3.15. Migration has been a major factor in the growth of the population: between 1970 and 1980, there was a net in-migration (excluding military personnel and dependents) of 101,000, accounting for 54 percent of the total civilian population growth during that time. Immigrant arrivals in 1979 (the most recent available year) exceeded 8,900, mostly from the Philippines and Korea.

The comparison of demographic data from different sources is often complicated by the use of differing definitions and coverage. Some series, for example, refer to resident population, while others pertain to de facto population; the latter includes visitors present but excludes residents temporarily absent. Total population includes armed forces stationed in an area, as well as their dependents in the area; civilian population excludes military personnel but includes their dependents. Perhaps the greatest confusion is that resulting from the arbitrary allocation of persons of mixed race in the 1970 and 1980 U.S. Censuses. Such groups were shown separately in earlier censuses, and are still reported separately in data issued by State agencies.

The principal sources for these data are the decennial population censuses conducted by the U.S. Bureau of the Census, the estimates developed annually by the Hawaii State Department of Health and Department of Planning and Economic Development in cooperation with the Bureau of the Census, the Hawaii Health Surveillance Program conducted regularly since 1969 by the Department of Health, and the ongoing series on migration maintained by the Hawaii Visitors Bureau and U.S. Immigration and Naturalization Service. The Department of Planning and

Economic Development summarizes these data in two series of reports, both issued annually: The Population of Hawaii and Hawaii's In-Migrants. Another annual report distributed by DPED contains population estimates for Oahu census tracts. Much additional information will become available when the detailed results of the 1980 Census of Population are released. Earlier figures on population and migration are given in Historical Statistics of Hawaii, Sections 1 and 3. Comparable national statistics on population and migration appear in sections 1 and 3 of Statistical Abstract of the United States: 1981.

1/ The urban population comprises all persons living in urbanized areas (first defined for Hawaii in 1960) and in places of 2,500 or more outside urbanized areas. Statistical boundaries were first established for Honolulu in 1831, Hilo in 1911 (for 1910 census tabulations), and other urban places beginning in 1930.

2/ The rural population includes all persons living outside urban places.

3/ Annual rate since the preceding census, based on the formula for continuous compounding.

4/ Total population also reported as 130,313.

5/ Total population also reported as 108,393 and 108,579.

Table 8.-- LAND AREA, 1980, AND RESIDENT POPULATION, 1970
AND 1980, OF ISLANDS, CITIES, TOWNS, AND VILLAGES

[This table presents data for the 101 places defined by the Hawaii State Department of Planning and Economic Development, in cooperation with the Bureau of the Census, for the 1980 decennial census, under authority granted by Sec. 26-18, Hawaii Revised Statutes, 1976 Replacement. Boundaries of a large number of places were significantly altered between 1970 and 1980, and the 1970 and 1980 population counts accordingly refer to different areas. Although described in the legislation as "cities, towns, and villages," none of these places is an independent municipality with separate governmental and taxing powers; the boundaries determined for these places are statistical rather than political.]

1/ Unless otherwise indicated, the 1970 totals shown here refer to the area as bounded for the 1970 census rather than the area defined for 1980.

2/ These places were newly defined for 1980.

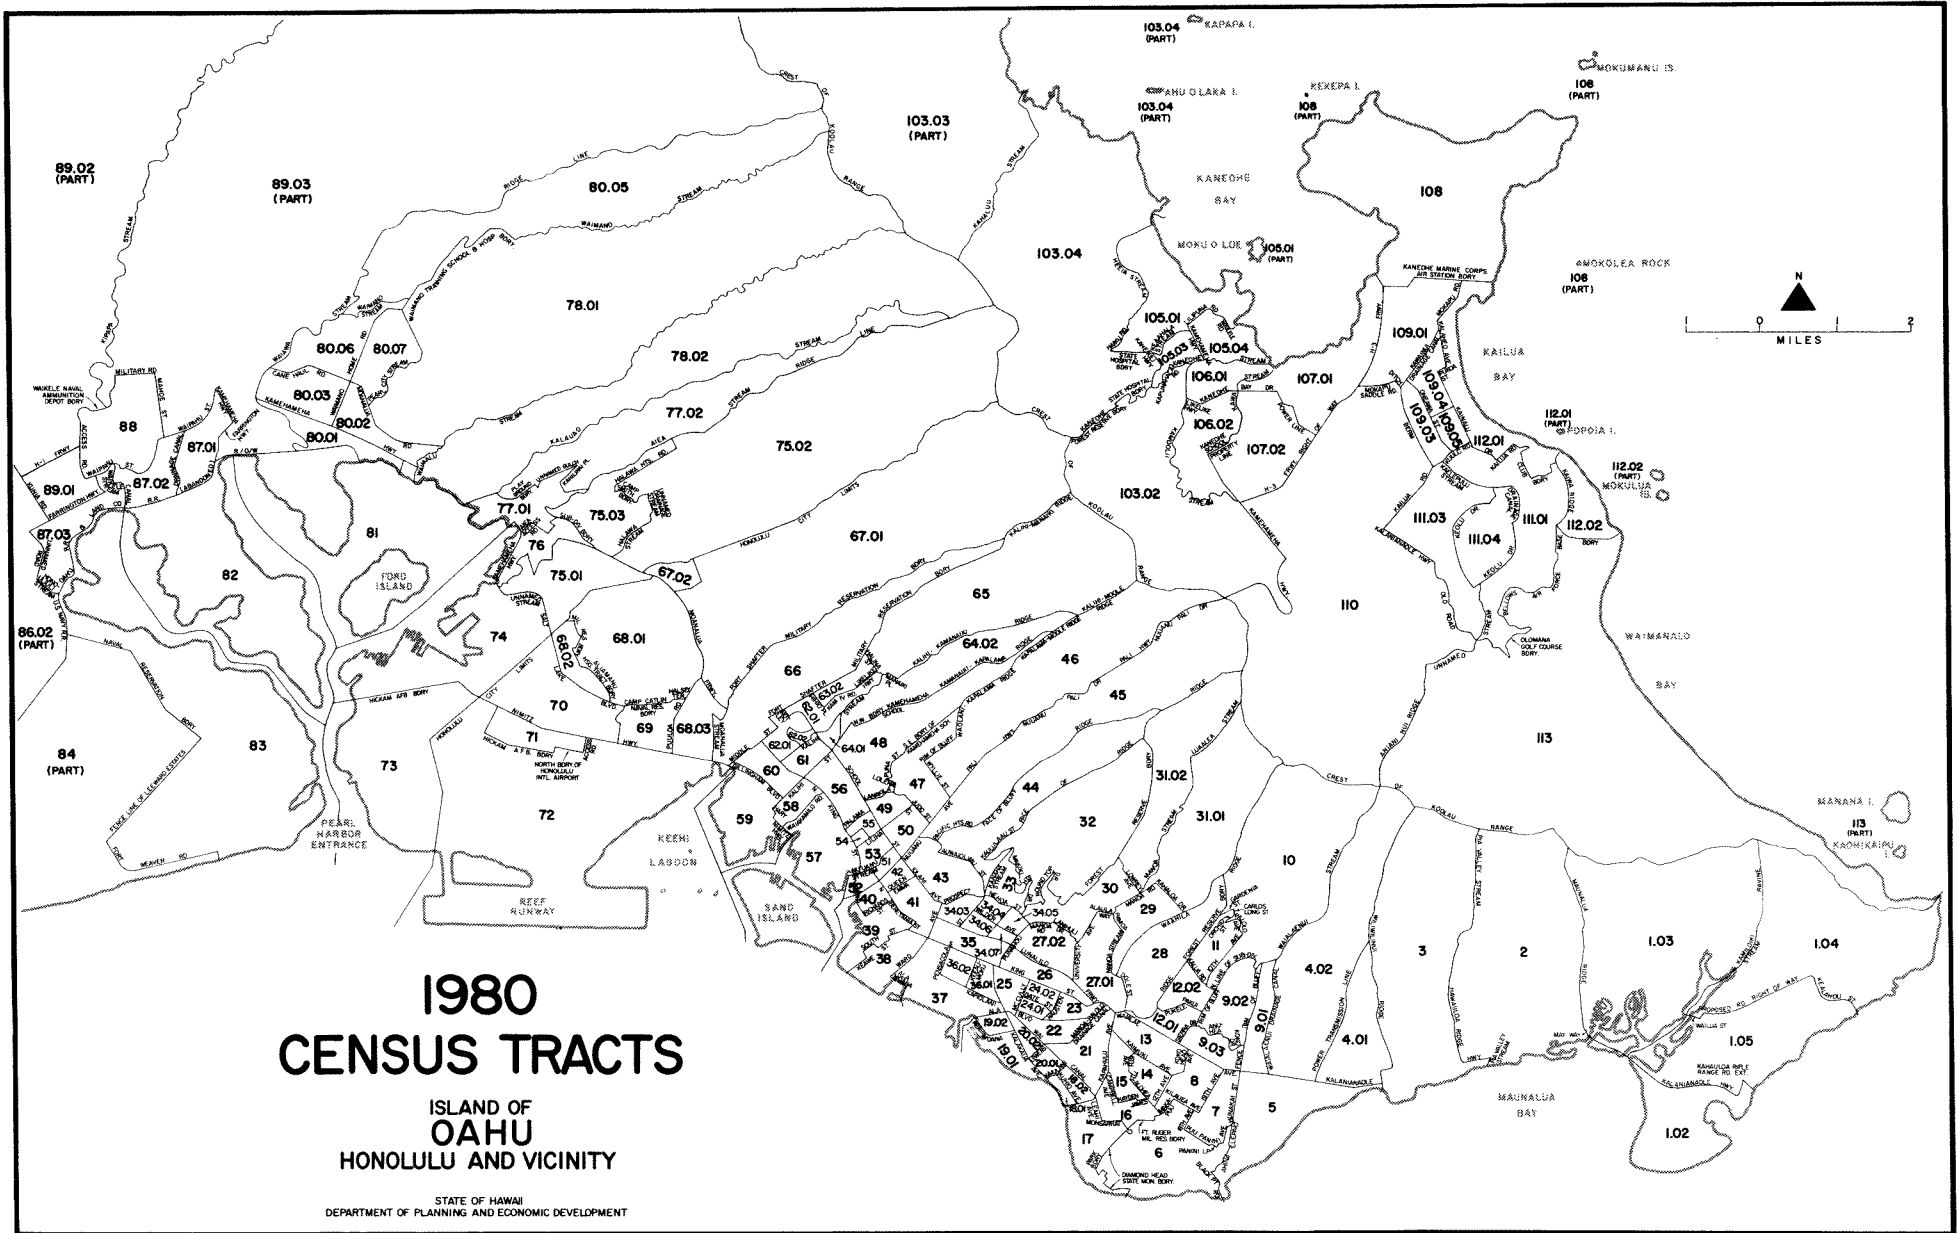

3/ Aiea was redefined for 1980 to include four places shown separately in 1970: Aiea (12,560), Foster Village (3,755), Halawa Heights (5,809), and Waimalu (2,982). The 1970 population shown here is the sum of the figures for the separate places.

4/ Excluding the Northwestern Hawaiian Islands (1,895 acres; 31 inhabitants in both 1970 and 1980), legally part of Honolulu. Including the Northwestern Hawaiian Islands, Honolulu had a land area of 53,723 acres and a population of 324,871 in 1970 and 365,048 in 1980.

5/ Heeia (5,432 in 1980) included with Kaneohe in 1970 but not in 1980. The 1970 population within the 1980 boundaries of Kaneohe was 26,998. The 1980 population within the 1970 boundaries of Kaneohe was 35,351.

6/ Pearl City was redefined for 1980 to include two places shown separately in 1970: Pacific Palisades (7,846) and Pearl City (19,552). The 1970 population shown here is the sum of the figures for those two places.

1/ Most tract boundaries either remained unchanged between 1970 and 1980 or underwent only minor changes. In cases where the 1970 tracts were split or merged for 1980, however, the 1980 tract designation is followed in parentheses by the 1970 designations.

2/ Area of census tracts fails to add to county total, because of different data sources.

3/ The ".99" census tracts consist of vessels anchored off the indicated tract; for example, persons living aboard ships in Kewalo Basin, adjacent to tract 38, are assigned to tract 38.99.

1/ The Honolulu Urbanized Area consists of Honolulu District (the area southwest of the crest of the Koolau Mountains, between Red Hill and Makapuu Point) and the adjacent urbanized territory circling Pearl Harbor, as far west as Waipahu in 1960, Waipahu and Ewa Beach in 1970 and 1980, and also out to Whitmore Village and Schofield Barracks in 1980.

2/ The Kailua-Kaneohe Urbanized Area was initially defined as of 1980. It includes the urban territory on Windward Oahu, from Kahaluu through Waimanalo Beach.

3/ The 1970 totals for Kailua and Kaneohe have been adjusted to the 1980 boundaries. The 1960 totals for these places have been adjusted to the original 1970 boundaries.

VITAL STATISTICS AND HEALTH

This section presents data on births, deaths, marriages, divorces, diseases and accidents, nutrition, substance abuse, height and weight, hospitals, dental care, and health personnel.

Vital indexes generally reflect the high health standards of Hawaii. Expectation of life at birth in 1980 was 74.8 years for males and 81.2 years for females. The crude death rate in 1981 was only 5.4 per 1,000 resident population. Deaths under one year of age per 1,000 live births numbered 10.5 in 1981. Diseases of the heart have accounted for almost a third of all deaths in recent years; cancer, for almost one-fourth. The 1981 crude birth rate was 18.6 per 1,000 resident population. The total fertility rate for civilians fell from 3,360 per 1,000 women in 1960 to 2,461 in 1970 and 1,903 in 1980. Over 98 percent of all babies were born in hospitals in 1980, and almost one-fifth were born to military couples. One out of six births was illegitimate. There were 8,178 fetal deaths in 1980, including 6,462 elective abortions. Marriages numbered 12,218 in 1981, with about 23 percent accounted for by nonresidents. Divorces reached a 1981 total of 4,254. The State had 22 acute care civilian hospitals (with 2,316 beds), 57 skilled nursing and intermediate care facilities (with 4,532 beds), 24 special treatment facilities (with 609 beds) and 296 care homes (with 1,532 beds) in 1980. There were 1,707 physicians and surgeons, 686 dentists, 5,925 professional nurses, and 387 pharmacists licensed and living in Hawaii as of March 1982. Acute conditions per 100 persons numbered 169 in 1980, with respiratory conditions the most common complaint (at 114 cases per 100 persons). Among chronic conditions reported in the 1980 survey data, the most frequently mentioned were hypertension without heart involvement (7.6 per 100 persons), hay fever (5.4), and asthma (3.0). The most common communicable disease reported to authorities in 1980 was scarlet fever, with 5,102 cases. State mental health facilities served 10,625 patients in 1980, but the number of in-patients at the end of the year was only 440. Dental health was only fair: according to a 1979 survey, 275,000 had not visited a dentist within the previous year, and 176,000 persons reported one or more dental problems, chiefly cavities. Among persons 12 years old and over in 1979, 55 percent had used alcohol in the preceding month, 33 percent had smoked cigarettes, 14 percent had used marijuana, and 5 percent had used cocaine. The average adult male was 67.5 inches tall and weighed 159.5 lbs.; the average adult female was 62.6 inches and 127.9 lbs.

Major sources for data on vital statistics and health are the annual statistical reports of the Hawaii State Department of Health and various publications of the U.S. Public Health Service. Long-term trends are traced in Historical Statistics of Hawaii, Section 2. Sections 2 and 4 of the Statistical Abstract of the United States: 1981 contain similar data for the nation as a whole.

Section 3

EDUCATION

This section presents statistics on enrollment in public and private schools, colleges and universities; students graduated and degrees awarded; the highest grade of school completed; school facilities, personnel, and expenditures; and libraries.

Enrollment in elementary, intermediate and high schools in 1981-1982 totaled 200,844, about 1.0 percent less than in the preceding year and 6.8 percent below the all-time high reached in 1971-1972. There were 230 public schools with 8,139 classroom teachers and 162,805 students (81.1 percent of the total). There were also 146 private schools with 2,308 teachers and 38,039 pupils. Students graduating from public and private high schools in 1980-1981 numbered 14,647. Some 52,197 students attended colleges and universities in the State in 1981-1982, including 20,629 on the Manoa Campus of the University of Hawaii, 369 at West Oahu College, 3,478 at UH-Hilo, 20,949 at six community colleges, and 6,772 in four private colleges and universities. Eighty-seven percent of the children 5 and 6 years old were in school in 1970 (compared with 68 percent in 1950), and 53 percent in the 18- and 19-year-old group were enrolled (compared with 36 percent twenty years earlier). The expenditure per pupil in public schools rose from \$989 in 1970-1971 to \$2,457 in 1980-1981. Among adults, the illiteracy rate dropped from 8.4 percent in 1950 to 1.9 percent in 1970, and by 1980 approximately 20.3 percent of all residents 25 years of age or more could report having completed four or more years of college. The Hawaii State Library System, with 47 locations in all four counties, had 3.4 million books, film reels, phonorecords, and other collections in 1981, with an annual circulation of 5.3 million; the University of Hawaii libraries in the same year counted 2.2 million volumes.

The principal sources of data on education are the U.S. Bureau of the Census, Hawaii State Department of Education, University of Hawaii and private colleges and universities. Historical Statistics of Hawaii, Section 9, contains Island data back to 1820. Section 5 of the Statistical Abstract of the United States: 1981 presents comparable information for the nation as a whole.

Section 4

LAW ENFORCEMENT, COURTS AND CORRECTIONS

Statistics in this section refer to crime and delinquency, the police, attorneys, the judiciary system, prisons, and youth correctional facilities.

Major offenses reported to the police in 1981 numbered 64,000, compared with 71,000 in 1980 and 43,000 in 1971. The rate per 1,000 population increased from 54 in 1971 to 74 in 1980 and 65 in 1981. Seventy-seven percent of the 1981 total occurred on Oahu. For the State as a whole, major offenses known to police in 1981 included 47 murders or cases of non-negligent manslaughter, 340 rapes, 1,453 robberies, 584 aggravated assaults, 16,726 burglaries, 40,699 cases of larceny, and 4,211 auto thefts. The value of property reported stolen in 1981 amounted to \$31 million, exclusive of motor vehicles; only 7.7 percent was recovered. In 1977, when asked "Have you or your immediate family been a victim of crime (burglary, assault, etc.) in Hawaii since 1970?," forty percent of all Oahu adults and a fourth of all Neighbor Island adults answered affirmatively. Twenty percent of the major offenses known to police were cleared by arrest or otherwise in 1981. Forty-three percent of the persons arrested for major crimes and 20 percent of those arrested for lesser offenses in 1981 were less than eighteen years of age. The number of inmates in the nine State correctional institutions averaged 952 during 1981; of this number, 561 were adults serving time for felonies. Cases filed in the State Supreme Court, Intermediate Court of Appeals, four circuit courts, and four district courts and their divisions during fiscal 1981 numbered 890,000, including 793,000 traffic cases. Filings in the United States District Court for Hawaii included 595 civil cases, 1,540 criminal cases, and 781 bankruptcy cases. The last legal execution in Hawaii took place in 1947. Governmental expenditures on the criminal justice system in 1978 amounted to \$106 million, more than half of the total going for police protection. There were 2,675 attorneys licensed in Hawaii as of mid-1981.

Statistics on law enforcement, courts, and corrections in Hawaii appear in the annual reports of the county police departments, the State Judiciary, the Intake Service Center, and the Administrative Office of the United States Courts. The Hawaii Criminal Justice Information Data Center issues quarterly and annual reports titled Crime in Hawaii. Figures on crime, the courts, and corrections in earlier years appear in Historical Statistics of Hawaii, Section 10. National data are summarized in the Statistical Abstract of the United States: 1981, Section 6.

Table 113.-- LEGAL EXECUTIONS: 1826 TO 1981 -- Con.

NA Not available.

1/ Data for 1900-1911 limited to civilian executions.

2/ Includes military executions: not available before 1931, two in 1945, and one in 1947. According to Honolulu, November 1981, p. 96, seven men executed by the military lie buried at Schofield Barracks; if these graves include the three persons reported to have been executed between 1931 and 1947, four military executions apparently occurred before 1931. For information on military executions during the 1940s, see Honolulu, November 1981, p. 76, and Honolulu Advertiser, January 12, 1982, p. A-1.

3/ Period ended March 15, 1841. Prior to 1826, capital punishment was inflicted at the will of the king or superior chief and without trial. For information on the early history of capital punishment in Hawaii, see Ralph S. Kuykendall, The Hawaiian Kingdom, Vol. I (1938), pp. 125-127; Charles Wilkes, Narrative of the United States Exploring Expedition, Vol. IV (1845), pp. 39-41; and J. Arago, Narrative of a Voyage Around the World (1823, reprinted 1971), pp. 84 and 137-141.

4/ Based on newspaper accounts of specific executions and possibly incomplete for the year.

5/ Capital punishment was abolished by Act 282, S.L.H. 1957, approved June 4, 1957.

Section 5

GEOGRAPHY AND ENVIRONMENT

This section relates to land and water areas, physical geography, climate, air and water quality, noise and other geographic and environmental measurements of Hawaii.

The State consists of eight major islands and 124 minor islands with a total land area of 6,425 square miles and a general coastline of 750 miles. Honolulu is 214 miles from Hilo, 1,367 miles from Kure Atoll (the westernmost end of the State), 2,397 miles from San Francisco, and 4,829 miles from Washington, D.C. The highest peak in the State is Mauna Kea, 13,796 feet above sea level; the longest stream is Kaukonahua Stream, Oahu, 33 miles in length; the biggest lake is Halalii, on Niihau, 841 acres; and the highest named waterfall is Kahiwa, Molokai, a 1,750-foot cascade. Various measures of air pollution, such as suspended particulate matter, indicate that Honolulu is one of the cleanest cities in the nation. There is also relatively little water pollution: 39 major beaches surveyed in 1981 were found to have fecal coliform levels per 100 ml. ranging from 2.0 to 219.3, and all but one were within EPA standards. More than 1,100 species, subspecies, and varieties of native flora were endangered, threatened, or extinct, according to a 1977 survey. Climatically, Hawaii is marked by remarkably balmy temperatures and wide variations in rainfall. The all-time temperature range at Honolulu International Airport, for example, was from 53° to 92°F. Normal precipitation, however, ranges from 5.7 inches near Kawaihae, South Kohala, to 451 inches atop Waialeale. The longest volcanic eruption in Island history lasted 867 days, the worst earthquake attained 7.5 on the Richter scale, and the highest tsunami wave reached 56 feet. Water withdrawn for use in 1975 averaged 2.8 billion gallons per day, compared with 2.7 billion in 1970 and 2.0 billion in 1965. Among 21 neighborhoods on Oahu, median noise levels in 1981-1982 ranged from 40.9 decibels (in Kaneohe) to 57.1 decibels (in Pawaa).

Important sources of data include the U.S. Geological Survey, National Ocean Survey, National Weather Service, U.S. Bureau of the Census Geography Division, the Division of Water and Land Development of the State Department of Land and Natural Resources, the State Department of Health, and the University of Hawaii Institute of Geophysics. Detailed information is given in Atlas of Hawaii, published by the University Press of Hawaii in 1973, and Hawai'i, the Natural Environment, issued by the Department of Planning and Economic Development in 1974. National data are reported in Statistical Abstract of the United States: 1981, Section 7.

2/ Width measured in statute miles between designated points on National Ocean Survey and Coast and Geodetic Survey charts. Width in kilometers calculated from miles (1 mile = 1.60934 km.).

3/ Depths given are the deepest soundings noted at or near the line joining the two designated points, on National Ocean Survey and Coast and Geodetic Survey charts. Depths measured in fathoms and converted to feet and meters (1 fathom = 6 feet = 1.8288 meters).

1/ Figures are lengths of general outline of seacoast. Data for the four islands of Maui County are not consistent with the reported county total.

2/ Shoreline of outer coast, offshore islands, bays, rivers, and creeks is included to the head of tidewater or to a point where tidal waters narrow to a width of 100 feet.

3/ Derived from data expressed in statute miles; independently rounded and accordingly may not add exactly to indicated totals and subtotals.
1 mi. = 1.609 km.

4/ Among the States and Territories, Hawaii ranks fourth in general coastline and seventeenth in tidal shoreline.

5/ Data are not available for five minor islands: Molokini, Lehua, Gardner Pinnacles, Maro Reef, and Pearl and Hermes Atoll.

6/ Excludes the Midway Islands, which are part of the Hawaiian Archipelago but not legally part of the State of Hawaii. Midway has a general coastline of 20 miles and a tidal shoreline of 33 miles.

Table 118.-- LAND AND WATER AREA OF COUNTIES AND ISLANDS -- Con.

1/ Areas in square kilometers and acres were calculated directly from the figures shown for square miles (except for Molokini, Lehua, Kaula, and the Northwestern Hawaiian Islands, for which square miles calculated to three decimal places were used); these equivalents were independently rounded, and hence may not add exactly to the indicated totals and subtotals. 1 sq. mi. = 640 A. = 2.58999 sq. km.

2/ Dry land and land temporarily or partially covered by water, as marshland, swamps, etc.; streams and canals under one-eighth statute mile wide; and lakes, reservoirs, and ponds under 40 acres of area.

3/ Permanent inland water surface, such as lakes, reservoirs, and ponds having 40 acres or more of area; streams, sloughs, estuaries, and canals one-eighth of a statute mile or more in width; deeply indented embayments and sounds, and other coastal waters behind or sheltered by headlands or islands separated by less than one nautical mile of water; and islands having less than 40 acres of area.

4/ More exactly, the area of Molokini is 18.6 acres (equivalent to 0.03 square miles or 0.075 square kilometers).

5/ Exclusive of the Midway Islands, which are part of the Hawaiian Archipelago but not legally part of the State of Hawaii. Islands included in the State and their land areas in square miles are: Nihoa, 0.298; Necker Island, 0.091; French Frigate Shoals, 0.088; Gardner Pinnacles, 0.004; Maro Reef, awash; Laysan Island, 1.312 (plus 0.220 of inland water, for a total area of 1.533); Lisianski Island, 0.675; Pearl and Hermes Atoll, 0.122; and Kure Atoll, 0.371.

Table 119.-- MAJOR SUMMITS -- Con.

1/ The adjacent ocean floor has an average depth of 2,800 fathoms and a maximum depth of 3,045 fathoms. Thus, Mauna Kea and Mauna Loa rise respectively 30,596 feet and 30,477 feet above their submarine bases as calculated from average depths, and respectively 32,066 and 31,497 feet above as calculated from maximum depths. So measured, Mauna Kea and Mauna Loa are the world's tallest mountains.

2/ Two distinct peaks. The lower one has an elevation of 3,105 feet.

3/ Not part of the State of Hawaii.

Table 135.-- NOISE LEVELS IN SPECIFIED NEIGHBORHOODS ON OAHU:
1981-1982

[Data collected during the latter part of 1981 and early 1982, during daylight hours only. Data were obtained from both manual sampling, utilizing on-site noise-level readouts, and automatic sampling, utilizing a community noise analyzer. Differences in noise levels as measured by the two types of sampling result from the inclusion in the automatic samplings of such sources as vehicles traveling near the microphone, barking dogs, or other instantaneous sounds. With manual samplings, these sources are eliminated from the recorded data. The 1981-1982 surveys were concentrated in Honolulu and Windward Oahu; future surveys will be conducted in Leeward Oahu and along the North Shore.]

Section 6

LAND USE AND OWNERSHIP

General statistics on the use, ownership, and tenure of land appear in this section. Information on specific use or ownership categories is given elsewhere: parks in section 7, farms in section 19, forests in section 20, cane land and industrial parks in section 22, and shopping centers in section 23.

Out of the 4,128,000 acres in the State, almost 2,200,000 are in unused open space. Other major categories include agriculture, with 1,347,000 acres, services (including military installations), with 123,000, and recreation, with 280,000. In the Honolulu Standard Metropolitan Statistical Area (which is coterminous with Oahu), land in residential use increased from 22,600 acres in 1969 to 27,700 in 1980; during the same 11-year span, agricultural land declined from 88,900 to 74,900 acres. For the State as a whole, the Land Use Commission has zoned 155,000 acres as "urban," 1,976,000 as "conservation," 1,972,000 as "agricultural," and 9,000 as "rural."

Recent data on land ownership indicate that the Federal government owns 7.3 percent of all land, the State and counties own 34.8 percent, and private owners (chiefly large estates) have 57.9 percent. Total Federal holdings reported by the General Services Administration in 1979 came to 660,600 acres, exclusive of leased land (52,000 acres); most of the Federal land is in wildlife, park and military use. The State Department of Hawaiian Home Lands holds about 190,000 acres, divided among 3,034 lessees. Total land parcels in the State number 380,000.

Considerable caution is necessary in comparing statistics from different sources on land use, ownership, or tenure. Variations in definitions and survey dates seriously affect comparability in many instances, even where terminology is relatively unambiguous and misinterpretation seems unlikely. An example of such difficulties is the wide range in estimates of Federal land, with totals ranging from 297,000 acres to 661,000. Statistics on military land use are likewise confusing, going as high as 175,000 acres and as low as 56,000.

Reports of the U.S. Department of Agriculture and General Services Administration, Hawaii State Department of Hawaiian Home Lands, Department of Land and Natural Resources, Department of Planning and Economic Development, Department of Taxation, and Land Use Commission, and county planning departments provided the data for this section. Greater detail appears in DPED Statistical Report 98, Land Use and Ownership Trends in Hawaii, issued in 1973. Historical Statistics of Hawaii, Section 12, contains limited information for earlier years. Statistics for the nation as a whole are available in Sections 8 and 24 of the Statistical Abstract of the United States: 1981.

1/ Because of the omission of public thoroughfares and for other reasons, totals by island may differ considerably from official area estimates in other tables in this volume.

2/ State land ceded by presidential proclamation or governor's executive order to the federal government appears in most cases to have been classified for this table as federal land, even though title to it technically remains with the state. Land ceded by the state to the counties, in contrast, has probably been classified as state land. For both types of ceded land, treatment may have varied from parcel to parcel, and no firm statement is possible.

3/ For data on the leasehold status of privately owned land, see the two following tables.

4/ Lehua, Kaula, and the Northwestern Hawaiian Islands other than Midway. Source follows next table.

1/ Corrected from published data, which overstated Navy acreage and the State total by 195,359.7 acres.

2/ Data for 1979 are not comparable to figures for earlier years. According to a letter from the General Services Administration, "this increase of nearly 258,000 acres is almost entirely due to a correction of acreage holdings submitted by the U.S Fish and Wildlife Service. That office revised a Hawaiian Islands National Wildlife Refuge holding from 1,906.5 acres to 254,418.1 acres to include the lagoon water acreage of the circular reefs and shoals."

3/ At time of acquisition. Includes estimated equivalent cost of properties acquired through donation, exchange, devise, forfeiture, or judicial process.

Section 7

RECREATION AND TOURISM

Statistics on tourism, recreation, sports, museums, the performing arts, pets and parks appear in this section. Information on recreational land use is given in Section 6; on transportation, in Section 18; on hotels, in Section 23.

Approximately 3,935,000 visitors stayed overnight or longer in Hawaii during 1981, compared with 1,747,000 in 1970 and only 297,000 in 1960. The average number present at any given time during 1981 was 96,000. Total visitor expenditures (exclusive of trans-Pacific fares) in 1981 amounted to \$3.2 billion, compared with \$705 million a decade earlier. The 1981 visitor total included 2.3 million from other States, 291,000 from Canada, and 690,000 from Japan. Expenditures per visitor day in 1980 averaged \$71.24 for westbound visitors and \$185 for the Japanese. Visitor-related spending in 1981 resulted in tax revenues of \$446 million and generated 146,000 jobs.

Both visitors and residents have access to a wide range of recreational and cultural facilities. The State has seven National parks and similar areas, 71 State parks, 621 County parks, 57 golf courses, 252 public tennis courts, 2,044 small-boat moorages, 1,600 recognized surfing sites, and 24.4 miles of safe, sandy, accessible beach. Recreational and cultural facilities reporting more than a million annual visitors include four National or State parks, the National Memorial Cemetery of the Pacific, U.S.S. Arizona Memorial, Castle Park, and the Honolulu Zoo. Total visits to 44 museums, state monuments and similar attractions in 1981 numbered 11.4 million. About 231,000 Hawaii residents traveled to the Mainland in 1981 and half of them were absent more than 13.3 days. Fourteen theatrical groups on Oahu reported 1,128 performances of 254 productions for the 1980-1981 season, with a combined audience of 831,000. During the same period, the Honolulu Symphony Orchestra gave 107 concerts, with a total attendance of 156,000. Professional baseball drew 139,000 fans in 1982, and during the 1980-1981 school year, attendance at UH-Manoa varsity baseball, basketball and football home games exceeded 478,000.

Information on recreation and tourism is issued periodically by the Hawaii Visitors Bureau, the State Parks Division of the Department of Land and Natural Resources, the U.S. National Park Service, U.S. Passport Office, County park and recreation departments, and other organizations. A compilation of statistics on recreational facilities and behavior was issued by the Hawaii State Department of Land and Natural Resources in 1980 in its State Recreation Plan, Technical Reference Document. Long-term trends are summarized in Historical Statistics of Hawaii, Section 11. National statistics are given in Section 8 of Statistical Abstract of the United States: 1981.

1/ Because many visitors visit more than one island, county data sum to total greater than the State total shown in another table. Data cover westbound visitors destined to or beyond Hawaii, and include one-day (non-overnight) Neighbor Island visits by these passengers. Not separately available for the City and County of Honolulu.

2/ Data for 1970-1979 are revisions.

^{1/} Base includes estimated number of visitors arriving directly from Canada and usually omitted from the Hawaii Visitors Bureau Basic Data Survey.

^{2/} Party heads only. Calculated as the number of professional, technical, business, managerial and official workers as a percent of all party heads responding to this question.

^{3/} Party heads only.

^{4/} Includes condominiums operating as hotels through June 1978 but excludes such facilities thereafter.

^{5/} Computed from total visitor days and total visitor arrivals for westbound visitors destined for Hawaii. These data differ somewhat from corresponding data in the source, because of different computation procedures.

^{6/} Base includes passengers who did not answer this question.

^{7/} Pacific and Mountain States.

Section 8

GOVERNMENT FINANCES AND EMPLOYMENT

This section presents statistics relating to the revenues, expenditures, debt, and civilian employment of Federal, State and County governments in Hawaii.

Local government is vested in one combined city-county (Honolulu, consisting of the Island of Oahu and several outlying islets), three non-metropolitan counties (Hawaii, Kauai, and Maui), and one area (Kalawao County) administered by the State Department of Health. Separate municipal governments do not exist.

Tax collections by Federal, State and County governments in fiscal 1981 reached \$3,246 million, almost triple the level reported ten years earlier. The 1981 total included \$1.8 billion in U.S. taxes, \$1.4 billion in State taxes, and \$48 million in County taxes, licenses and fees. Individual income taxes accounted for 87 percent of Federal collections and 24 percent of State collections in Hawaii in 1981. State revenue receipts totaled \$1,905 million, chiefly from the General Excise and Use Tax (\$549 million) and Federal grants-in-aid (\$390 million). The largest expenditure item in the State accounts for 1981 was education, with \$581 million (out of \$1,940 million) going to the University of Hawaii and public schools and libraries. The counties, in contrast, depended largely on the real property tax (which until mid-1981 was still assessed and collected by the State) and grants-in-aid for their revenues, and reported police and fire protection as their largest single expenditure item. Assessed valuation of the State tripled between 1971 and 1981, reaching \$25.4 billion by the end of the period; of this total, \$7.4 billion was exempt from taxation. Public bonded debt outstanding at the end of 1981 exceeded \$2.2 billion.

Total government employment in 1981 averaged 89,000, about 14 percent over the 1971 average. The 1981 total included 30,000 Federal workers, 45,000 persons employed by the State, and 13,000 persons on County payrolls. State civil service employees as of mid-1981 numbered 18,000.

Important sources for statistics on government in Hawaii include the U.S. Census of Governments and various annual publications of the Bureau of the Census, reports of the U.S. Treasury Department, Hawaii State Departments of Accounting and General Services, Budget and Finance, and Taxation, and the County auditors and finance directors, and an annual compilation issued by the Tax Foundation of Hawaii, Government in Hawaii: A Handbook of Financial Statistics. Data extending back to the middle of the 19th century are summarized in Historical Statistics of Hawaii, Section 25. Comparable Mainland statistics appear in the Statistical Abstract of the United States: 1981, Sections 9 and 10.

Section 9

SOCIAL INSURANCE AND WELFARE SERVICES

This section presents data related to governmental expenditures on social welfare; programs for old-age, survivors, disability and health insurance; public employees retirement; unemployment insurance; aid to the needy; and maternal, child, and other welfare services. Also included here are selected statistics on private charity and welfare programs.

Total public welfare costs reached \$287 million in fiscal 1981, compared with \$68 million a decade earlier. About 54 percent of the 1981 total came from State funds and the remainder from the Federal government. The monthly average number of persons served by major welfare programs in 1981 was 72,480, or 7.5 percent of the resident population of the State at the beginning of the year. Two-thirds of all public assistance payments and 54 percent of all recipient cases were accounted for by aid to families with dependent children. The average monthly payment per case for public assistance was \$343, almost twice as much as in 1970. Participation in the food stamp program included 40,500 households and 104,000 persons. Among workers receiving unemployment compensation in 1981, weekly benefits averaged \$114. Almost 110,000 Hawaii residents were receiving Social Security benefits as of the end of 1979, and about 70,000 were enrolled for Medicare. There were also 13,000 State and County government pensioners in 1981, with annual benefits in excess of \$98 million. Child adoptions in 1981 numbered 659. The Aloha United Way reported agency allocations of \$7.9 million on Oahu and \$1.4 million on the Neighbor Islands in 1981. A recent comparative study of the "quality of life" in 277 American metropolitan areas ranked Honolulu 28th.

Major data sources include reports and records of the U.S. Department of Health and Human Services, the Hawaii State Department of Social Services and Housing, the Hawaii State Department of Labor and Industrial Relations, the Hawaii State Employees' Retirement System, and the Aloha United Way. Historical Statistics of Hawaii, Section 8, contains data for earlier years. Section 11 of the Statistical Abstract of the United States: 1981 presents comparable Mainland data.

Section 10

NATIONAL DEFENSE

This section presents statistics relating to the armed forces and their dependents, national guard strength, civilian employment in national defense, veterans, military housing, and expenditures by the armed forces.

There were approximately 61,500 officers and enlisted men (including 15,300 aboard ships homeported in Hawaii) and 64,300 military dependents in the Islands as of July 1, 1981. This number has been relatively stable in recent years, but at the height of World War II more than 400,000 uniformed personnel were present. The Navy alone accounts for almost two-fifths of the current total. More than 11,900 Hawaii residents were in the armed forces worldwide in 1981. The importance of national defense in Hawaii can be further measured by total expenditures (\$1.45 billion), military prime contract awards (\$591 million), civilian employment (19,400), veterans in civil life (104,000), military personnel receiving retired or retainer pay (9,200 men, receiving \$9.3 million monthly), military-connected pupils in public schools (16,516), military housing (19,000 units), and land controlled by the armed forces (223,000 acres). Defense expenditures are second only to tourism as a source of income to Hawaii.

The Department of Planning and Economic Development has, since 1959, issued periodic reports on Military Personnel and Dependents in Hawaii. Other published sources include reports of the U.S. Bureau of the Census, the Administrator of Veterans Affairs, the U.S. Department of Defense, the Hawaii State Department of Labor and Industrial Relations, Department of Defense, Department of Education, and the Hawaii State Census Statistical Areas Committee. Definitions used by these sources frequently differ to some degree, and care is accordingly necessary in comparing data issued by two or more agencies. In mid-1980, for example, the number of armed forces in Hawaii was reported as 50,673 by DOD, 58,000 by the Bureau of the Census, 58,579 by the Bureau of Economic Analysis and 61,019 by the local commanding officers reporting to DPED. Historical Statistics of Hawaii, Section 26, includes series on the armed forces dating back to 1795. Section 12 of the Statistical Abstract of the United States: 1981 presents data on national defense and veterans affairs for other States and the entire nation.

Section 11

LABOR FORCE, EMPLOYMENT, AND EARNINGS

This section presents statistics on the size and composition of the labor force, employment by sex, occupation, and industry, work disability, wage rates, payrolls, hours, turnover, industrial safety, unionization, and strikes.

The civilian labor force averaged 449,000 in 1981; of this total, 425,000 persons were employed and 24,000 were unemployed and seeking work. The civilian jobcount rose from 339,000 in 1971 to 445,000 a decade later. (The jobcount differs from employment because the latter counts multiple jobholders -- "moonlighters" -- only once.) The unemployment rate averaged 5.3 percent in 1981, with island levels ranging from 3.9 to 8.4 percent. In 1980, 57.7 percent of all females 16 years old and over were in the civilian labor force -- the fourth highest ratio in the nation. By occupation, one out of four civilian workers is classified as professional or managerial. Activities with especially large numbers of employees include government (89,000 in 1981), services (101,000), and retail trade (87,000). The average annual earnings of wage and salary workers under the Hawaii Employment Security Law reached \$14,500 in 1981, almost twice the 1970 average. Average weekly hours in 1981 ranged from 31.4 (for retail trade) to 43.5 (for communications and utilities). Labor union membership was estimated at 113,000 in 1980. Work stoppages in 1981 involved 890 workers.

Analyzing labor force trends is greatly complicated by shifts in sources and estimating methods. Prior to 1970, the number of employed civilians was estimated from data on the number of jobs covered by the Hawaii State Employment Security Law; workers holding more than one job were accordingly counted more than once. From 1970 to 1975, the same source was used, but the totals were adjusted to exclude the double-counting thought to be present. Then, beginning in 1976, the labor force estimates were based primarily on the Current Population Survey, a relatively small household survey subject to considerable sampling variation. The 1970-1975 estimates were later revised for greater comparability with the 1976-1981 data.

Principal sources for the data on labor force, employment, hours, earnings, unions and strikes are the decennial reports of the U.S. Bureau of the Census, the same agency's Current Population Survey, various studies by the U.S. Bureau of Labor Statistics, monthly and annual tabulations by the Hawaii State Department of Labor and Industrial Relations, and annual surveys of pay rates by the Hawaii Employers Council. Historical Statistics of Hawaii, Section 4, includes figures for earlier years. Statistics for the nation as a whole are published in Section 13 of the Statistical Abstract of the United States: 1981.

Section 12

INCOME, EXPENDITURES, AND WEALTH

This section presents statistics on two different aspects of income and expenditures, one relating to the State income and product system and the other to the distribution of income to families, households and individuals. Specifically, information is given on gross state product, industrial income, personal income, family and household income, poverty, personal wealth, and family expenditures. Data on wage rates, salaries, and earnings appear in Sections 3, 8, 11, and 22; on industrial payrolls, in Sections 11, 15, 20, 22, and 23; on the family income of visitors, in Section 7; on retirement payments and public assistance, in Sections 9 and 10; on taxable income, in Section 8.

Gross state product in 1980 amounted to approximately \$11.5 billion, almost triple the 1970 total. The major sources of outside income to Hawaii in 1981 were defense expenditures (\$1.45 billion), pineapple production (\$218 million), sugar production (\$328 million), and visitor expenditures (\$3.2 billion). Personal income in 1981 was \$10.8 billion, compared with \$3.8 billion only ten years earlier, and per capita personal income was \$11,036, more than twice the 1971 level. The per capita figure for Hawaii exceeded the national average by 5 percent, and thus failed to compensate for the Islands' much higher cost of living. The median annual income of families, based on data for 1979, was \$23,066; for unrelated individuals, the median was \$7,026. The official poverty threshold for a 4-person nonfarm family in Hawaii was set in April 1982 at \$10,700. The most recent family expenditure survey, taken in 1972 and 1973, reported that the largest items in the family budget on Oahu were housing (accounting for 33.8 percent of spending for current consumption), food (20.4 percent) and transportation (19.1 percent).

The chief sources of data shown in this section are the U.S. Bureau of Economic Analysis, U.S. Bureau of the Census, U.S. Bureau of Labor Statistics, U.S. Department of Health and Human Services, Internal Revenue Service, Hawaii State Department of Agriculture, Hawaii State Department of Planning and Economic Development, and Hawaii Visitors Bureau. Sections 6 and 7 of Historical Statistics of Hawaii present data for earlier years. Comparable data for the country as a whole are given in Statistical Abstract of the United States: 1981, Section 14.

Section 13

PRICES

This section presents indexes of consumer prices for Honolulu, average prices for selected foods, and a comparison of Honolulu family budgets with those in other metropolitan areas. Other statistics on prices are reported in Sections 16, 17, 18, 19, 21, and 23.

In June 1982, the Honolulu all-items consumer price index for all urban consumers stood at 269.5, with the 1967 level equal to 100. The index had increased 6.6 percent in the preceding 12 months, 58.1 percent since June 1977, and 120.5 percent since June 1972. Prices have risen most rapidly since 1967 for gas and electricity (409.5 percent), medical care (234.7 percent) and food at home (up 200.6 percent), and least for women's and girls' apparel (up 87.4 percent).

An "intermediate" budget for a four-person family living on Oahu was estimated at \$31,893 as of the Autumn of 1981. This family budget was 26 percent higher than the corresponding urban United States average, and was first among the 25 American metropolitan areas surveyed. The "lower" budget was 33 percent above the national figure; the "higher" budget, 32 percent. Oahu-Mainland differentials in the intermediate budget were greatest for rents and personal income taxes and least for food away from home and automobile transportation. An "intermediate" budget for a retired couple in Honolulu came to \$12,157 in the Autumn of 1981, 19 percent above the U.S. urban average.

The Honolulu consumer price index has been compiled by the United States Bureau of Labor Statistics since December 1963. This index measures the average change in prices of goods and services purchased by urban families and single persons living alone. Prices are expressed as a percent of the average levels reported in 1967, the base date. Current data for Honolulu and other cities are published in the Monthly Labor Review and CPI Detailed Report, issued monthly by BLS. A similar series for Honolulu was maintained by the Hawaii State Department of Labor and Industrial Relations from March 1943 to December 1963, using March 1943 as the base date.

Important changes were made in the consumer price index at the beginning of 1978. The existing index, covering urban wage earner and clerical families and single persons living alone, had been based on spending patterns observed in a 1961 survey and had been issued at three-month intervals. This index was discontinued after June 1978. Beginning in February 1978, two new indexes were published, both based on the findings of a 1972-1973 survey and both issued at two-month intervals. The first of these new indexes covered the same population as the older index, that is, urban wage earner and clerical families and individuals; the second covered all urban consumers. The new indexes

were linked to the existing index for December 1977 (174.9) and, like the latter, expressed as a percent of the 1967 annual average. The June 1978 all-items index was 182.1 according to the old coverage and weights, 184.1 based on the previous coverage and revised weights, and 183.9 with the expanded coverage and new weights.

Comparisons of family budgets between Honolulu and various Mainland communities have most recently been made for the Fall of 1981. These data were compiled and published by the U.S. Bureau of Labor Statistics. Similar comparisons go back a number of years, and include a Honolulu-Los Angeles comparison for 1945, Honolulu-Washington comparisons for 1951 and 1955-1981, and a 40-area comparison (later for 25 areas) for various dates since Autumn 1966. Budget costs for a retired couple have been prepared by BLS for Honolulu and the Mainland as of 1966, 1967, and annually since 1969. Cost of living adjustments for Federal employees in Hawaii are based on the Honolulu-Washington comparisons.

In addition to these data, the Bureau of Labor Statistics until 1978 published monthly and annual data on average Honolulu prices for a wide variety of foods, and occasional data on a number of non-food items. The city food price series were suspended after June 1978 and since that time only unofficial estimates have been available.

No composite wholesale price index, comparable to the all-items consumer price index, is available for Hawaii. Average wholesale prices of agricultural products are reported in Statistics of Hawaiian Agriculture, issued by the Hawaii Agricultural Reporting Service, and Honolulu Prices: Wholesale Eggs, Poultry, Pork, Beef and Rice and Wholesale Prices: Wholesale Fresh Fruits and Vegetables, both publications of the State Department of Agriculture, Market News Service. Wholesale price statistics of other commodities are less readily available, and in most cases totally lacking.

Data on prices and living costs for the nation as a whole and other areas are summarized in Statistical Abstract of the United States: 1981, Section 15. Long-term trends for Hawaii are traced in Historical Statistics of Hawaii, Section 5.

Section 14

ELECTIONS

This section presents data on the number and characteristics of election districts, registered voters, votes cast, campaign expenditures, elected officials, and legislative bills.

Almost 403,000 persons were registered to vote in the general election of November 4, 1980, and more than 318,000 actually voted. The number voting amounted to 46 percent of the 696,000 Hawaii residents of voting age at that time. The latter figure included numerous aliens, inmates of mental and penal institutions, and members of the armed forces and their dependents, groups that are either ineligible or unlikely to vote in Island elections. Among registered voters, females slightly outnumbered males and Democrats were far more numerous than Republicans. Campaign expenditures for the 1980 primary and general elections (other than the presidential race) exceeded \$9,600,000.

A constitutional convention was convened on July 5, 1978. All of the constitutional amendments proposed by the convention were subsequently approved by the electorate.

Hawaii has 2 Congressional, 25 Senatorial, 51 Representative, and 9 Councilmanic districts. It also contains 15 Soil Conservation districts, 28 active Neighborhood Board districts, and 299 election precincts.

Elective offices in Hawaii include the President and Vice President, 2 U.S. Senators, 2 U.S. Representatives, the Governor and Lieutenant Governor, 25 State Senators, 51 State Representatives, and various county officials. The minimum voting age is 18 years.

The 1981 State Legislature, with 76 members, included 62 males, 28 persons under 40 years of age, 36 persons of Japanese ancestry, 12 persons born in places other than Hawaii, and 56 Democrats.

In its 1982 session, the State Legislature considered 5,931 bills; 308 were passed and 296 became law. The Legislature also considered 883 resolutions, of which 420 were adopted.

The official results of primary, general, and special elections are published by the Office of the Lieutenant Governor. Additional information is often available from the various County clerks. Earlier figures for Hawaii appear in Historical Statistics of Hawaii, Section 24. National statistics appear in the Statistical Abstract of the United States: 1981, Section 16.

Section 15

BANKING, INSURANCE, AND BUSINESS ENTERPRISE

Statistics in this section relate to banks and other financial institutions, stocks and bonds, insurance, fires, and business firms.

There were nine banks with 182 branches, nine savings and loan associations with 163 branches, four trust companies, and 76 industrial loan or small loan licensees with 236 branch offices in Hawaii as of December 31, 1981. Deposits in Island banks reached \$4.8 billion in mid-1981, compared with \$1.8 billion a decade earlier. Assets of savings and loan associations stood at \$4.4 billion in mid-1981, more than five times their 1971 level. There were 152 credit unions with combined assets of \$827 million at the end of 1981.

Approximately 174,000 Hawaii residents held shares in U.S. public corporations or investment companies in 1981.

Life insurance in force in Hawaii at the end of 1980 amounted to \$19.1 billion, more than twice the figure reported ten years earlier. For all 594 insurance companies doing business in the Islands, Hawaii premiums amounted to \$682 million in 1980 and losses, claims, and benefits paid came to only \$353 million. Oahu fire losses amounted to \$15 million in fiscal 1981. Persons covered by the two major prepaid health insurance plans as of December 31, 1981, numbered 661,000, with membership dues of \$251 million.

By mid-1982, more than 38,000 corporations and partnerships were registered to do business in Hawaii: 26,400 local ("domestic") corporations, 3,700 out-of-State ("foreign") corporations, and 8,200 partnerships. Business establishments with one or more employees in 1980 numbered 21,125; 100 had 250 or more employees. During fiscal 1982, 3,126 new local corporations were formed and 1,436 existing local corporations were dissolved or merged. Business receipts of corporations exceeded \$12 billion in 1978; business receipts of proprietorships in 1979 amounted to \$1.04 billion. Hawaii's largest corporation, Amfac, Inc., reported 1981 sales of \$2.15 billion, with a net profit of \$44 million.

Sources for statistics on these subjects include the Hawaii State Department of Commerce and Consumer Affairs (specifically its Bank Examination, Insurance, and Business Registration Divisions), the State Department of Taxation, the Honolulu Fire Department, the New York Stock Exchange, the Health Insurance Institute and two major local health insurance plans, the Hawaii Credit Union League, and the annual report on County Business Patterns issued by the U.S. Bureau of the Census. Historical Statistics of Hawaii, Sections 22 and 23, provides information for earlier periods. Comparable Mainland data appear in Sections 17 and 18 of Statistical Abstract of the United States: 1981.

Section 16

COMMUNICATIONS

This section presents statistics on the usage, finances, and operations of the various communications media: postal service, telephone, telegraph, radio, television, newspapers and periodicals, and books.

Hawaii is served by all major communications media. In 1981 it had 76 post offices handling 293 million pieces of mail and accounting for postal receipts in excess of \$67 million. There were 728,000 telephones in service (double the number a dozen years earlier), 311,000 telephone homes, about 2 billion local calls originated, 12 million completed interisland calls, and over 32 million incoming and outgoing transpacific calls. Telegraph messages to and from Hawaii in 1981 totaled 196,000. The 45 commercial, public and educational radio stations in the Islands early in 1982 included 29 on the regular broadcast band and 16 FM stations. The State also had 16 television stations (14 commercial and 2 public), including satellites but excluding translators. Ten cable TV companies served 142,000 subscribers. An estimated 97 percent of all households had television sets, and evening programs in May 1982 were watched by an average of 157,000 households. Island publishers printed eight daily newspapers, numerous magazines and other periodicals, and a wide diversity of books. Newspaper circulation reported by the two English-language dailies on Oahu averaged 196,000 in 1981-1982, compared with 201,000 a decade earlier.

The major sources for statistics on communications are the reports and records of the U.S. Postal Service, Federal Communications Commission, Division of Consumer Advocacy and CATV Division of the Hawaii State Department of Commerce and Consumer Affairs, Hawaiian Telephone Company, Audit Bureau of Circulations, A. C. Nielsen Co., and Hawaii Media Guide. Earlier figures appear in Historical Statistics of Hawaii, Section 18. Data on communications for other States and for the nation as a whole are carried in Statistical Abstract of the United States: 1981, Section 19.

1/ The daily newspapers were: Honolulu Advertiser, Honolulu Star-Bulletin, and Hawaii Tribune-Herald (Hilo), all English-language; Hawaii Hochi and Hawaii Times, both bilingual (Japanese and English); Korea Times & Han Kook Ilbo (Korean language); and United Chinese Press (Chinese language). Since these data were compiled, the Maui News and West Hawaii Today have become dailies and the Hawaii Times has become a weekly.

Section 17

ENERGY AND SCIENCE

This section presents statistics on energy production and consumption, the electric and gas utility industries, and research and development and scientific resources.

Total energy consumption in 1979 amounted to 271 trillion British thermal units, compared with 204 trillion BTU a decade earlier. Transportation accounted for 58 percent of the 1979 total.

Electricity sales exceeded 6.4 billion kilowatt-hours in 1981, a total that has doubled since 1968. Manufactured gas sales reached 32.4 million therms in 1981, nine percent below the figure five years earlier. Residential rates in 1981 averaged 11.6 cents per kilowatt-hour and \$1.73 per therm, both well above the corresponding rates only a few years earlier. Average residential use (7,002 kWh and 227 therms in 1981) has declined significantly in recent years. By 1981, almost seven percent of the housing units in the State had solar heating devices.

The liquid fuel tax base for 1981 was approximately 918 million gallons, compared with 825 million in 1974 and 755 million in 1970. The 1981 total included 306 million gallons of gasoline, 490 million of aviation fuel, and 117 million of diesel oil. The average price for unleaded gasoline rose from 69.6 cents per gallon in January 1976 to \$1.633 six years later, then fell to \$1.544 by May 1982.

The State is well served with scientific resources. A 1976 inventory reported 384 companies and agencies with research or scientific capabilities. Employment in these organizations was more than 34,000. Federal research and development obligations in Hawaii exceeded \$42 million in 1980. Forty-nine patents were granted to Hawaii residents in 1981.

Information on energy and science can be obtained from reports and records of the U.S. Department of Energy, U.S. Patent and Trademark Office, National Science Foundation, Hawaii State Department of Taxation, Hawaii State Department of Commerce and Consumer Affairs, Division of Consumer Advocacy (formerly the Department of Regulatory Agencies, Public Utilities Division), and individual utility companies. Detailed statistics on energy consumption appear in Hawaii Integrated Energy Assessment, Vol. IV, Energy Data Handbook, published by the State Energy Office of the Department of Planning and Economic Development in 1980. Hawaii's Scientific Resources, 1977 Directory, issued by the DPED in 1977, contains information on scientific organizations and facilities in the Islands. Historical Statistics of Hawaii, Section 19, presents data for earlier years. Data for the nation as a whole can be found in the Statistical Abstract of the United States: 1981, Sections 20 and 21.

Section 18

TRANSPORTATION

This section presents statistics relating to public roads, motor vehicles, bicycles, traffic accidents, local public transit, civil aviation, harbors, and water traffic.

Motor vehicle registration in Hawaii increased from 431,000 in 1971 to 649,000 in 1981. Vehicle miles rose during the same period from 3.7 billion to 5.9 billion. Hawaii residents purchased 37,000 new passenger cars in 1980 and scrapped or shipped out approximately 33,000. By the end of 1981, 541,000 licensed drivers had access to 4,004 miles of streets and highways throughout the State. Bus passengers carried by the Honolulu Mass Transit Lines increased from 19.4 million in 1971 to 73.5 million in 1981. Registered bicycles numbered 108,000 in 1974 and 69,000 in 1981.

Most scheduled interisland travel is now by air. In 1981, the two major airlines and a number of air taxis reported 6.7 million interisland passengers, about two times their 1971 total, and carried 66,000 tons of cargo. The State has 10 commercial airports, 14 general aviation, military or semi-private airports, 12 civilian heliports, 3,948 active pilots, and about 385 active civil aircraft in general aviation.

Rapid growth is similarly evident in transpacific travel. Although surface passenger arrivals dropped from 54,000 in 1959 to 542 in 1982, air arrivals increased during the same 23-year span from 224,000 to 4.3 million. Overseas cargo received in the State in 1979 amounted to 61,000 tons by air and 9.3 million tons by ship.

Undocumented State-registered vessels as of December 31, 1981 numbered 13,405, compared with 8,803 in 1971. Median length was 18 feet, and four-fifths were stored on land. There were also 1,141 documented vessels in the State in 1981, almost double the 1971 total.

The chief source for transportation statistics is the Hawaii State Department of Transportation and its Highways, Harbors and Airports Divisions and Motor Vehicle Safety Office. Other sources include the U.S. Coast Guard, Civil Aeronautics Board, Federal Aviation Administration, Army Corps of Engineers, Honolulu Department of Transportation Services and Department of Data Services, County finance departments, Cardinal Mailing Services, and individual transportation companies. Data for the entire period of record appear in Historical Statistics of Hawaii, Section 17. Similar statistics for other areas are reported in Statistical Abstract of the United States: 1981, Sections 22 and 23.

1/ According to the Waterborne Commerce Statistics Center, the source for these data, the 1976 data for Honolulu Harbor (reported in The State of Hawaii Data Book 1978, table 322) "incorrectly credited Honolulu Harbor, Oahu, with passenger traffic which should have been credited to Kewalo Basin, Oahu. In addition, these improper credits to Honolulu Harbor were doubled because the origin and destination data were incorrectly reported by the operators on the VORs (Vessel Operation Reports). The incorrect data contained in the CY 1976 VORs was corrected in CY 1977 thus reflecting a significant reduction in passenger totals for Honolulu Harbor, Oahu, in CY 1977 and a significant increase in passenger totals for Kewalo Basin, Oahu, in CY 1977. The passenger totals for CY 1976, 1977 and 1978 are further distorted by the fact that there are at least two water carriers that did not report passenger traffic for those years." The 1977 data for Honolulu Harbor were published in the 1979 edition, table 309, and the 1980 edition, table 377. These errors also affect the trend data for Honolulu Harbor presented in the preceding table and its earlier counterparts (for example, table 429 in the 1981 edition).

2/ Commercial interisland service was suspended from January 15, 1978 to June 21, 1980. It appears that local passenger traffic was misclassified as interisland during 1978.

3/ Chiefly Pearl Harbor tours. According to the U.S. Navy, civilian boats carried 537,671 passengers to or around the U.S.S. Arizona Memorial during 1978. All local passenger traffic appears to have been misclassified as interisland for this table.

Section 19

AGRICULTURE

This section presents statistics on agricultural land, farms, and specific crops, livestock, dairy products, and poultry. Related information appears in Section 6 (on land use), 11 and 15 (agricultural employment and earnings), and 22 (food processing).

There were 4,300 farms in Hawaii as of 1981, with a total area of 2.0 million acres. Both figures have declined during the past decade. The value of crop sales in 1981 was \$401 million, or 125 percent higher than the total for 1971. Livestock sales amounted to \$88 million, or 105 percent more than the 1971 level. Combined crop and livestock sales ranged from \$58 million in Kauai County to \$163 million on the Big Island. Major crops were sugar (\$207 million in sales, up 79 percent over the decade), pineapple (\$90 million, or 123 percent over the 1971 total), flowers and nursery products (\$30 million, or 560 percent more than in 1971), and macadamia nuts (\$26 million, up 641 percent). Diversified agriculture, defined as all crops other than sugar and pineapple, rose from \$23 million in 1971 to \$104 million in 1981, or approximately 362 percent. About 680 farms sold \$30 million of flowers and nursery products in 1981, chiefly anthuriums, potted foliage, and orchids. Important products of livestock farms as of 1981 included cattle (\$28 million in sales), milk (\$30 million), and eggs (\$15 million). In 1981, Hawaii produced 40 percent of the fresh market vegetables consumed locally, 25 percent of the fresh market fruits, 30 percent of the beef and veal, 28 percent of the chickens, none of the rice, and 88 percent of the eggs.

Aquaculture has been growing in importance in recent years. Freshwater prawn production amounted to 240,000 pounds in 1981, with a value of more than \$1 million. Seven years earlier the corresponding figures had been only 11,000 lb. and \$38,500.

Statistics on Hawaiian agriculture exclude pakalōlō (marijuana) and other illicit plants. Authorities confiscated \$38 million worth of marijuana in 1981, but the proportion escaping detection is unknown.

Important sources for data on agriculture include the United States Census of Agriculture, generally conducted at five-year intervals, the annual report on Statistics of Hawaiian Agriculture issued by the Hawaii Agricultural Reporting Service, and data compiled by the Hawaii Agricultural Experiment Station, Hawaiian Sugar Planters' Association, and Pineapple Growers Association of Hawaii. Agricultural data for earlier years are summarized in Historical Statistics of Hawaii, Section 13. National statistics appear in Section 24 of the Statistical Abstract of the United States: 1981.

Section 20

FORESTS, FISHERIES, AND MINING

This section presents data on forests and forest products, commercial fishing, and mining and mineral products.

The most recent available statistics show 1.2 million acres of forest and water reserve and 948,000 acres of commercial forest in the State, most of it on the Big Island. About 46,000 acres had been planted in eucalyptus and other species of trees by mid-1981. Forest products harvested in 1977 had a value of \$3.5 million, including \$2.3 million from logs for fiber. More than 500 forest and brushland fires burned 15,000 acres in fiscal 1981.

The commercial fish catch in fiscal year 1981 amounted to 11 million pounds and had a value of \$12 million. Aku (Skipjack) accounted for about 28 percent of the total value. Other important species are ahi, mahimahi, ono, lobster, opelu and opakapaka. Commercial fishermen numbered 2,577; they operated 1,266 fishing vessels, serving about 126 fishery wholesaling and processing establishments.

The value of mineral production reached \$58 million in 1981, most of it in cement (\$23 million) and stone (\$31 million). The 1981 total, only slightly below the all-time high reached in 1979, was double the level of the early 1970s.

Important sources of data on these subjects are the United States Census of Agriculture, United States Census of Mineral Industries, and reports and records of the U.S. Bureau of Mines, National Marine Fisheries Service, and Hawaii State Department of Land and Natural Resources, Aquatic Resources Division and Forestry and Wildlife Division. Historical Statistics of Hawaii, Section 14, summarizes the data for earlier periods. Comparable Mainland statistics are reported in the Statistical Abstract of the United States: 1981, Sections 25, 26 and 27.

Table 469.-- MINERAL INDUSTRIES : 1958 TO 1977 - Con.

(D) Withheld to avoid disclosing operations of individual companies.

1/ In 1977, 1972, and 1967, data for companies without paid employees were excluded from the census of mineral industries.

2/ For crushed and broken stone, sand and gravel, clay, and gypsum mining operations in manufacturing establishments, the number of production, development, and exploration workers was estimated from reported figures for hours worked. No data were obtained on other employees at such operations; hence, the same employment and payroll figures are included for all employees as for production, development, and exploration workers.

3/ For crushed and broken stone, sand and gravel, clay, and gypsum, mining operations in manufacturing establishments, includes the estimated value of minerals produced and used in the same establishment in making manufactured products. For all years, represents gross value of shipments and contains some duplication due to the transfer of crude minerals from one establishment to another for preparation.

Section 21

CONSTRUCTION AND HOUSING

This section presents statistics on construction activity and costs, the size and composition of the housing inventory, occupancy of housing, sales, and residential financing.

There were 21,395 building permits issued in 1981, with an estimated value of \$898 million. The total included \$460 million for private residential construction and \$346 million for private nonresidential structures. The value of government construction contracts awarded was \$428 million. Construction put in place, as indicated by the contracting tax base, totaled \$693 million in 1971 and \$1.6 billion in 1981. The value of land transfers in 1982 was \$2.9 billion. Mortgage loans outstanding at the end of 1980 amounted to \$7.1 billion. The July 1982 construction cost index for Honolulu (1967=100) was 302.3 for single-family residences and 327.0 for high-rise buildings.

The number of housing units in the State increased from 239,000 in 1972 to 349,000 in 1982. Owner occupied units numbered 101,000 in 1972 and 144,000 in 1982; the latter total included 106,000 on land owned in fee simple and 37,000 on leased land. Condominium units, first authorized in 1961, numbered 90,000 at the end of 1981. Military and public housing accounted for 26,000 units as of 1982. Housing was in short supply throughout most of the past decade: on Oahu, the vacancy rate in March 1982, according to the Federal Home Loan Bank, was only 1.7 percent. The average selling price of single family homes on Oahu during 1981, based on Multiple Listing Service data, was \$192,000; for condominium units it was \$111,000. The median contract monthly rent for the State rose from \$120 in 1970 to \$271 in 1980, and the median value of owner occupied single-family units increased from \$35,100 to \$118,100.

The principal sources for these data are the 1970 and 1980 U.S. Censuses of Housing, postal vacancy surveys issued by the Federal Home Loan Bank, various series compiled by State and County agencies (primarily the Hawaii Housing Authority, Hawaii State Department of Planning and Economic Development, Department of Commerce and Consumer Affairs, Department of Taxation, and Bureau of Conveyances, and the four County building departments), the construction cost indexes prepared by the First Hawaiian Bank, and the Honolulu Board of Realtors reports on Multiple Listing Service activity. Many of these series are summarized in reports published by the Bank of Hawaii (particularly Construction in Hawaii, issued annually) and the First Hawaiian Bank. Persons interested in figures for earlier periods should consult Historical Statistics of Hawaii, Section 15. Mainland statistics appear in Section 28 of Statistical Abstract of the United States: 1981.

1/ As of April 1.

2/ As indicated by the number of taxpayers claiming home exemptions. The number of owner occupied housing units reported by the U.S. Census of Housing is somewhat higher than the corresponding number based on taxpayer home exemptions, chiefly because of differences in definitions. Data for 1977-1982 refer to January 1; data for 1970-1976, to July 1.

3/ Calculated as a residual after accounting for the known components, some of which pertain to dates other than April 1, and thus not attributable to any specific date.

4/ As of April 1. Data include housing units leased from private owners.

Section 22

MANUFACTURES

This section presents statistics on the manufacturing segment of the economy, including sugar processing and pineapple canning.

The number of manufacturing establishments in Hawaii increased from 697 in 1967 to 773 in 1972 and 949 in 1977. The value added by manufacture rose from \$326 million in 1967 to \$410 million in 1972, \$786 million in 1977, and \$783 million in 1978. Three-fourths of all manufacturing activity in the State in 1977 was on Oahu. Food processing -- mostly sugar and pineapple -- accounted for more than 44 percent of the value added by manufacture in that year. Between 1971 and 1981, the general excise and use tax base increased 118 percent for sugar processing, 38 percent for pineapple canning, and 121 percent for all other manufacturing. There were three pineapple canneries and 15 sugar mills in Hawaii in mid-1981. The production of canned pineapple fruit and juices in 1981 amounted to 18 million actual cases, well below the levels of earlier years. Sugar production in 1981 amounted to 1.05 million short tons, about the same level as in other recent years. The value of sugar production (including commercial molasses) was \$328 million, well below the record set in 1974. Important manufactures other than food processing include apparel (\$45.9 million in value added in 1978), printing and publishing (\$97.9 million), and transportation equipment (\$28.4 million).

Sources for data on this subject include the United States Census of Manufactures, most recently conducted for 1977, the now-discontinued Annual Survey of Manufactures, and publications of the Hawaii State Department of Agriculture and Department of Taxation, Hawaiian Sugar Planters' Association, and Pineapple Growers Association of Hawaii. Historical Statistics of Hawaii, Section 16, reviews the figures for earlier years. Statistics for the nation as a whole appear in Section 29 of the Statistical Abstract of the United States: 1981.

Section 23

DOMESTIC TRADE AND SERVICES

This section presents statistics relating to retail and wholesale trade; hotels; and selected personal, business, automotive, repair, and amusement services.

These activities have undergone rapid growth in recent decades, in part because of higher prices. Retail sales increased from \$1.1 billion in 1967 to \$1.9 billion in 1972 and \$3.3 billion in 1977. Wholesale sales rose from \$1.0 billion in 1967 to \$2.6 billion in 1977. Hotels, amusements, and other services reported receipts of \$1.3 billion in 1977, compared with \$310 million in 1967. General excise and use tax base data for more recent years indicate continued increases; between 1977 and 1981, the retailing tax base rose 59 percent, the wholesaling base by 77 percent, and the base for services by 65 percent. Major retail concentrations include Ala Moana Center, Waikiki, Pearlridge Center, and downtown Honolulu. The 19 department stores on Oahu reported sales of \$425 million in 1980. In addition to civilian retail outlets, there are 140 commissaries, exchanges, clubs, and food services maintained by the armed forces; these facilities had sales of \$359 million in 1981.

Growth has been especially rapid for hotels. The number of units in the State rose from 6,800 in 1959 to 27,000 in mid-1970 and 58,000 in February 1982. There were 417 hotels, motels and apartment-hotels in the State on the latter date, including 270 on the Neighbor Islands. A fourth of all transient units were in condominium structures. Occupancy rates averaged 73.9 percent in Waikiki and 59.1 percent on the Neighbor Islands during 1981. The average daily room rate was \$49.73 in 1981. The hotel payroll in 1981 totaled \$264 million, compared with \$78 million ten years earlier.

Fifty-four feature motion pictures and television specials and series were filmed in Hawaii in 1981, accounting for local expenditures of \$17 million.

The major source of these data is the United State Census of Business, most recently conducted at the end of 1977. Statistics on the retailing, wholesaling, and services tax bases are available from the Hawaii State Department of Taxation. Data on hotel room counts, occupancy and other characteristics are published by the Hawaii Visitors Bureau and the firm of Pannell Kerr Forster. The Hawaii Film Office in the Department of Planning and Economic Development compiles data on motion picture and television production. A summary of figures on trade and services in earlier years appears in Historical Statistics of Hawaii, Section 20. The Statistical Abstract of the United States: 1981, Section 30, presents similar data for other states and the nation as a whole.

Section 24

FOREIGN AND INTERSTATE COMMERCE

This section includes data on the flow of goods, services, and capital between Hawaii and the rest of the world, with particular emphasis on trade and investment involving foreign countries.

Imports to Hawaii from foreign nations rose from \$224 million in 1971 to \$1.98 billion in 1981. Exports to foreign countries amounted to only \$46 million in 1971, but by 1981 exceeded \$237 million. (These figures, it should be noted, refer to merchandise imports and exports through the Honolulu Customs District. They do not necessarily represent exports of commodities originating in Hawaii, nor imports for direct consumption within the State.)

Trade with the Mainland United States has similarly risen in the past decade. Merchandise received from the Mainland increased from \$887 million in 1968 to \$2.2 billion in 1978, the most recent year available. Merchandise exported to the Mainland rose from \$329 million in 1968 to \$817 million in 1974, then slipped back to \$495 million in 1978.

Among the foreign nations, Hawaii's leading trading partners in 1981 were Indonesia for imports and Australia for exports. Imports from Indonesia amounted to \$709 million, or 36 percent of the total, while exports to Australia reached \$61 million or 26 percent of all foreign exports. About 48 percent of all imports for consumption were petroleum and natural gas products.

Honolulu Foreign Trade Zone No. 9 handled merchandise valued at \$46.2 million in fiscal 1981. Merchandise handled by Subzone No. 9A, the PRI refinery, was valued at \$1.7 billion, almost all of it in petroleum and petroleum products.

Foreign-owned U.S. firms in Hawaii operated 263 establishments in 1980, and employed 11,738 persons with an annual payroll of \$157 million. Out of 56,502 hotel rooms in the State as of July 1981, 10,333 (or 18.3 percent) were foreign owned.

Sources for statistics on interstate and foreign commerce include the U.S. Bureau of the Census (for foreign trade and foreign-owned firms), the Bank of Hawaii (for interstate trade and balance of payments), Foreign Trade Zone No. 9 and Subzone No. 9A, and the Hawaii International Services Agency. Further information appears in cargo data by origin and destination, compiled by the Army Corps of Engineers and cited in Section 18.

Comparable data for the nation as a whole appear in Section 31 of Statistical Abstract of the United States: 1981. Long-term Island trends are summarized in Historical Statistics of Hawaii, Section 21.

BIBLIOGRAPHY

This volume is the sixteenth in a series published by the Hawaii State Department of Planning and Economic Development and its predecessor agencies. The first was Statistical Abstract of Hawaii, 1962, issued by the Department of Planning and Research in 1962. After a four-year hiatus, updated versions titled The State of Hawaii Data Book were published by the Department of Planning and Economic Development in 1967, 1968, and annually beginning in 1970. Most of the volumes issued prior to the present edition are now out of print, but copies can be consulted in the DPED Library, Hawaii State Library, University of Hawaii and community college libraries, Honolulu Municipal Reference Library, and other collections throughout the State.

Additional information regarding specific statistical sources can be found in the introductory statements to each section of the Data Book, in footnotes and source references to the various tables, and in other DPED publications. Three of these DPED reports cover statistical sources in considerable detail: Statistics in Hawaii: 34 Papers Prepared for the Hawaii Statistical Reporting System Workshop, February 18-20, 1970, at Waikiki (1970), Proceedings of the Conference on Socio-Environmental Indicators, March 15-17, 1971, Honolulu, Hawaii (1971), and Inventory of Hawaii Planning Information (1973). The first two are reports of statistical symposia. The third is a 164-page reference work prepared for the Hawaii Urban Planning Information Center, containing detailed geographic and subject-matter indexes and source listings. These reports are now out of print, but copies can be consulted in most Hawaii libraries.

Although most of the series in the Data Book are shown only for recent years, earlier figures in many cases can be found in Historical Statistics of Hawaii, by Robert C. Schmitt. This book, published by the University Press of Hawaii in 1977, contains 711 pages of narrative and tables on the development of statistics in Hawaii since the 18th century. Copies are available from the University Press and various book stores for \$30.00.

Another useful publication is Statistical Sources in Hawaii: Reference Guide to Materials Available at the Hawaii State Library, compiled by Masae Gotanda and published by the Office of Library Services of the Hawaii State Department of Education in November 1978.

Privately published works of general statistical reference include Hawaii Facts and Figures and All About Business in Hawaii. Hawaii Facts and Figures is a publication of the Chamber of Commerce of Hawaii, first issued (under a different title) more than forty years ago. The most recent edition appeared early in 1982, with statistics through 1981; copies are available from the Chamber for \$2.00. All About Business in Hawaii, 1982 Edition, is the tenth in an annual series published by Crossroads Press, Inc. The current edition costs \$3.50.

Two other privately published reports containing useful statistics are the annual economic reviews of the two largest banks in the State. The

current editions are Hawaii 82, published by the Bank of Hawaii in October 1982, and Hawaii in 1981, issued by the First Hawaiian Bank as a supplement to its monthly Economic Indicators for April 1982. Greater detail appears in Hawaii's Economic Indicators: Sources, Definitions, and Trends, published by the First Hawaiian Bank in March 1980.

The County of Hawaii, Department of Research and Development, has published its own County of Hawaii Data Book 1980, presenting 264 pages of statistics for the Big Island. This report, dated December 1980, is available for \$7.50 (postpaid, \$10.00).

A similar report for Kauai, 1981 Kauai Statistical Review: An Annual Report of the County's Economic Indicators, is issued by the Kauai Office of Economic Development. The most recent edition, presenting data for 1981, was released in mid-1982 and contains 42 pages of tables.

Persons interested in comparisons between Hawaii and other States or the nation as a whole should consult the Statistical Abstract of the United States and its companion volumes, the State and Metropolitan Area Data Book and County and City Data Book. The Abstract is an annual publication of the U.S. Bureau of the Census, initiated in 1878. The current edition is the 102nd, dated 1981; copies are available for \$16.00 (cloth) or \$11.00 (paper) from the Superintendent of Documents, U.S. Government Printing Office, Washington, D. C. 20402. The State and Metropolitan Area Data Book, 1982, will soon be issued by GPO. The County and City Data Book, most recently issued for 1977, is sold by the same agency for \$21.00. All three volumes are (or soon will be) on the shelves of most libraries.

1/ The 1962 edition was titled Statistical Abstract of Hawaii, 1962. In addition, a 41-page, 57-table supplement, Historical Statistics of Hawaii, 1778-1962, was published and distributed without extra charge to persons receiving the regular edition.

2/ A 19-page supplement, State of Hawaii Census Tract Maps and Directory of Hawaii Map Sources, was included with each copy of the regular edition, and was not sold separately.
