This report was prepared by Robert C. Schmitt, State Statistician, with the assistance of Roy H. Tsumoto, Sharon Nishi, Karen Yamashita, and Maureen St. Michel. The camera-ready copy was typed and proofread by Irene S. Fujimori, Judy F. Noda, and Helen T. Nagafuchi. All are members of the DPED's Research and Economic Analysis Division, headed by Dr. Richard Y. P. Joun. The maps were drawn by Stewart A. Wastell, illustrator in the DPED's Planning Division. Editing and printing arrangements were handled by the DPED's Information Office.

Copies of this report may be obtained for \$5.00 each from the Information Office on the 7th floor of the Kamamalu Building, 250 South King Street, Honolulu, or ordered from out of State by sending \$10.00 per copy (postpaid) to the DPED Information Office, P. O. Box 2359, Honolulu, Hawaii 96804.

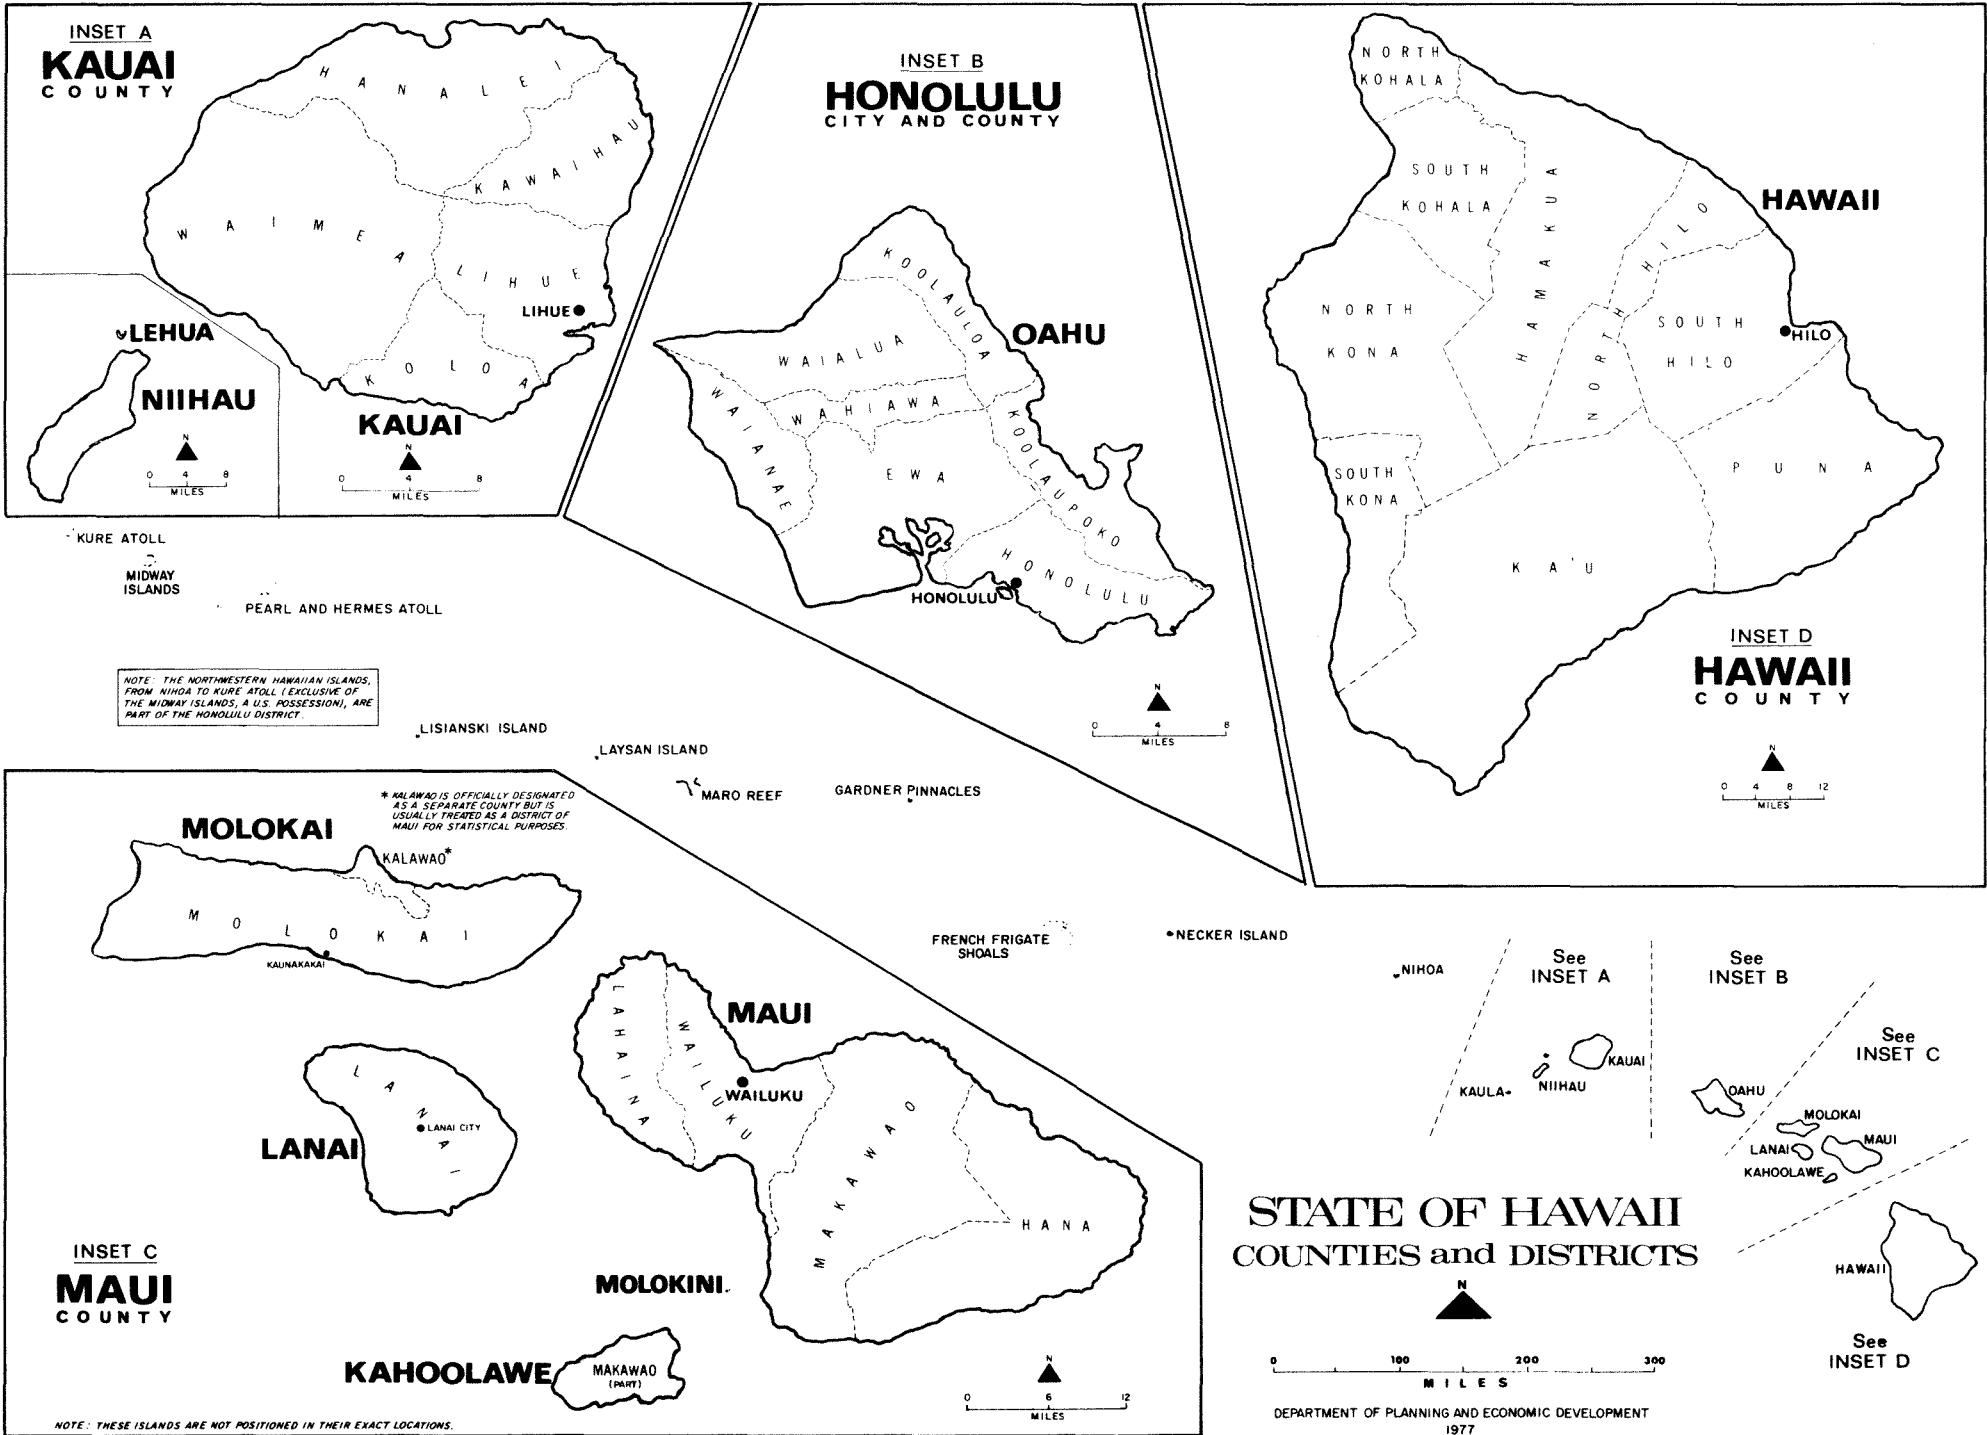

## FOREWORD

By George R. Ariyoshi  
Governor, State of Hawaii

Accurate, timely and substantial information is essential to sound decision-making. The State of Hawaii has long recognized that orderly State growth and planned prosperity require a continuing, efficient organization of statistical data and other information into forms which are easily used and readily available to all who need them. This State of Hawaii Data Book 1983 is the latest example of the State Administration's constant effort to provide and improve this important service to Hawaii's citizens.

The Data Book is invaluable for Government administrators. It is vital to all agencies, companies, organizations and individuals who carry out a great variety of forms of research in the Islands and overseas. It is very useful to other citizens who have only an occasional need for accurate statistics. It is a book which, thanks to the professionalism of its compilers, can be depended upon, and upon which thousands do depend. And it is only one--although perhaps the best one--of a large number of excellent data sources which Hawaii makes available.

Through such reference works, Hawaii is able to go about its myriad tasks with confidence that its information base is sound. This State of Hawaii Data Book 1983 is one of many proofs we have that our people know what they are doing, and where they are going, and are reasonably certain they can achieve their goals.

DEPARTMENT OF PLANNING AND ECONOMIC DEVELOPMENT  
1977

# INTRODUCTION

By Kent M. Keith, Director  
Department of Planning and Economic Development

The State of Hawaii Data Book: A Statistical Abstract is the standard official summary of statistics on the social, economic, and political organization of the State. Like its long-established counterpart, the Statistical Abstract of the United States, it may be used as a convenient volume of statistical reference and as a guide to other statistical publications and sources.

The present volume, containing statistics available in the summer of 1983, is the seventeenth such abstract to be published by the State of Hawaii. Earlier editions appeared in 1962, 1967, 1968, and annually beginning in 1970. Most of them are now out of print, but copies can be found in many high school, university, and public libraries in Hawaii.

The Data Book follows closely the organization and format of the U.S. Abstract, to facilitate comparison of Hawaii data with corresponding series for the nation and other jurisdictions.

Emphasis in the Data Book is given to the most recent available State data. Historical statistics and information for counties, islands, urban places, and smaller areas receive more limited attention. The publications cited as sources in the introductions to the various sections or at the end of each table usually contain additional statistical detail and a more comprehensive discussion of relevant definitions and concepts than can be presented here. Persons interested in more extensive information should consult these sources or write to the agencies responsible for them.

Largely as a result of federal budget reductions, many important statistical series have been suspended or terminated. Examples include the annual counts of aliens, comprehensive long-term meteorological data, the National Travel Survey, turnover in manufacturing employment, union membership, work stoppages, food prices, comparative family budgets, broadcast revenues and expenditures, passenger movements in Honolulu Harbor, fishery establishments, unsold housing inventory, the annual survey of manufactures by States, and department store sales. Many other statistical reports, particularly those from the 1980 decennial census, have been delayed long beyond their planned release dates.

Many Federal, State, County and private organizations cooperated in the preparation of this report. These agencies are credited in the source references to the tables to which they contributed. Their assistance is gratefully acknowledged.

# GUIDE TO TABULAR PRESENTATION

The tables in this report generally follow the principles of tabular presentation used by the U.S. Bureau of the Census in its annual publication, Statistical Abstract of the United States, and described in Bureau of the Census Manual of Tabular Presentation, published by the Bureau in 1950. These principles have been accepted by the Department of Planning and Economic Development for use in its publications and recommended to all other State agencies for official use.

Headnotes immediately below table titles provide information important for correct interpretation or evaluation of the table as a whole or for a major segment of it.

Unit indicators ("In thousands," "In millions of dollars," etc.) are usually given as the first element of the headnote. In tables where several units are used, the unit indicators are generally given in the stub or in the column headings.

Footnotes below the bottom rule of tables give information relating to specific items or figures within the table.

Parallel vertical rules are used to the right of a total column to indicate --

- (1) that the components which follow add to the total;
- (2) in the case of derived figures, that the underlying data are additive to their total.

The following symbols, used in the tables throughout this book, are explained in condensed form in footnotes to the tables where they appear:

- Represents zero or rounds to less than half the unit of measurement shown.
- D Figure withheld to avoid disclosure of information pertaining to a specific organization or individual.
- NA Data not enumerated, tabulated, or otherwise available separately.
- ... Same as NA; used in tables in which a large number of cells lack data.

In many tables, details will not add to the totals shown because of rounding.

Median: The value which divides the distribution into two equal parts--one-half the cases falling below this value and one-half exceeding it.

Geographic coverage should be understood as Statewide, unless otherwise indicated in the table title, headnote, boxhead, or stub. All annual statistics should be understood as referring to calendar years unless otherwise indicated.

## Section 1

# POPULATION

This section presents statistics on the growth, geographic distribution, and composition of the population of Hawaii, and on the number and characteristics of migrants moving to and from the State.

The 1980 census reported a resident population of 964,691. This total included approximately 57,000 members of the armed forces and 64,000 of their dependents. It excluded more than 97,000 visitors who were present on an average day in 1980, while including around 10,000 residents who were temporarily out of the State. The total population has risen from 58,000 in 1878 to 154,000 in 1900 and 423,000 in 1940. Provisional Statewide estimates for 1982 indicated a resident population of 994,000 and a de facto total of 1,084,000. Almost four-fifths of the 1980 de facto total lived on Oahu, giving that island a density of 1,385 persons per square mile. The population is young -- the median age in 1980 was 28.3 years -- and racially diversified. The major unmixed groups in 1982 were Caucasians (25.5 percent of the non-barracks, non-institutional population) and Japanese (22.3 percent). In addition, 28.8 percent were of mixed race, primarily part Hawaiian. The 1980 census reported 299,000 households and 226,000 families in the State. The average household size was 3.15. Migration has been a major factor in the growth of the population: between 1970 and 1980, there was a net in-migration (excluding military personnel and dependents) of 105,000, accounting for 55 percent of the total civilian population growth during that time. Immigrant arrivals in fiscal 1983 exceeded 5,200, mostly from the Philippines and Korea.

The comparison of demographic data from different sources is often complicated by the use of differing definitions and coverage. Some series, for example, refer to resident population, while others pertain to de facto population; the latter includes visitors present but excludes residents temporarily absent. Total population includes armed forces stationed in an area, as well as their dependents in the area; civilian population excludes military personnel but includes their dependents. Perhaps the greatest confusion is that resulting from the arbitrary classification of persons of mixed race in the 1970 and 1980 U.S. Censuses. Such groups were shown separately in earlier censuses, and are still reported separately in data issued by State agencies.

The principal sources for these data are the decennial population censuses conducted by the U.S. Bureau of the Census, the estimates developed annually by the Hawaii State Department of Health and Department of Planning and Economic Development in cooperation with the Bureau of the Census, the Hawaii Health Surveillance Program conducted regularly since 1969 by the Department of Health, and the ongoing series on migration maintained by the Hawaii Visitors Bureau and U.S. Immigration and Naturalization Service. The Department of Planning and

Economic Development summarizes these data in two series of reports, both issued annually: The Population of Hawaii and Hawaii's In-Migrants. Another annual report distributed by DPED contains population estimates for Oahu census tracts. Earlier figures on population and migration are given in Historical Statistics of Hawaii, Sections 1 and 3. Comparable national statistics on population and migration appear in sections 1 and 3 of Statistical Abstract of the United States: 1982-83.

Table 1.-- POPULATION, URBAN AND RURAL: 1831 TO 1980

[Data for 1831-1896 are on a de facto or unspecified basis; data for 1900 and later years are resident totals, including armed forces stationed in Hawaii.]

1970: April 1 ..	769,913	2.0	34	643,222	126,691	16.5
1980: April 1 ..	964,691	2.3	42	834,592	130,099	13.5

1/ The urban population comprises all persons living in urbanized areas (first defined for Hawaii in 1960) and in places of 2,500 or more outside urbanized areas. Statistical boundaries were first established for Honolulu in 1831, Hilo in 1911 (for 1910 census tabulations), and other urban places beginning in 1930.

2/ The rural population includes all persons living outside urban places.

3/ Annual rate since the preceding census, based on the formula for continuous compounding.

4/ Total population also reported as 130,313.

5/ Total population also reported as 108,393 and 108,579.

1981: July 1 ...	980,900	11,600	1,065,300	96,000
1982: July 1 ...	996,700	14,500	1,087,200	105,000
1983: July 1 ...	1,023,200	12,100	1,118,600	107,500

1/ The resident population is defined as the number of persons whose usual place of residence is in an area, regardless of physical location on the estimate or census date. It includes military personnel stationed or homeported in the area but excludes persons of local origin attending school or in military service outside the area.

2/ The de facto population is defined as the number of persons physically present in an area, regardless of usual place of residence; it includes visitors present but excludes residents temporarily absent.

3/ Averages for 12-month periods centered on the estimate or census dates.

Table 8.-- LAND AREA, 1980, AND RESIDENT POPULATION, 1970  
AND 1980, OF ISLANDS, CITIES, TOWNS, AND VILLAGES

[This table presents data for the 101 "census designated places" defined by the Hawaii State Department of Planning and Economic Development, in cooperation with the Bureau of the Census, for the 1980 decennial census, under authority granted by Sec. 26-18, Hawaii Revised Statutes, 1976 Replacement. Boundaries of a number of places, most notably Kailua in Hawaii County, were significantly altered between 1970 and 1980, and the 1970 and 1980 population counts accordingly refer to different areas. Although described in the legislation as "cities, towns, and villages," none of these places is an independent municipality with separate governmental and taxing powers; the boundaries determined for these places are statistical rather than political.]

Island and place	Land area, 1980 (acres)	Resident population		
		1970 <u>1/</u>	1980	Percent change
Hawaii .....	2,583,680	63,468	92,053	45.0

Northwestern Hawaiian Islands, exc. Midway .	1,895	31	31	-

NA Not available.

1/ Unless otherwise indicated, the 1970 totals shown here refer to the area as bounded for the 1970 census rather than the area defined for 1980.

2/ These places were newly defined for 1980.

3/ Aiea was redefined for 1980 to include four places shown separately in 1970: Aiea (12,560), Foster Village (3,755), Halawa Heights (5,809), and Waimalu (2,982). The 1970 population shown here is the sum of the figures for the separate places.

4/ Excluding the Northwestern Hawaiian Islands (1,895 acres; 31 inhabitants in both 1970 and 1980), legally part of Honolulu. Including the Northwestern Hawaiian Islands, Honolulu had a land area of 53,723 acres and a population of 324,871 in 1970 and 365,048 in 1980.

5/ Heeia (5,432 in 1980) included with Kaneohe in 1970 but not in 1980. The 1970 population within the 1980 boundaries of Kaneohe was 26,998. The 1980 population within the 1970 boundaries of Kaneohe was 35,351.

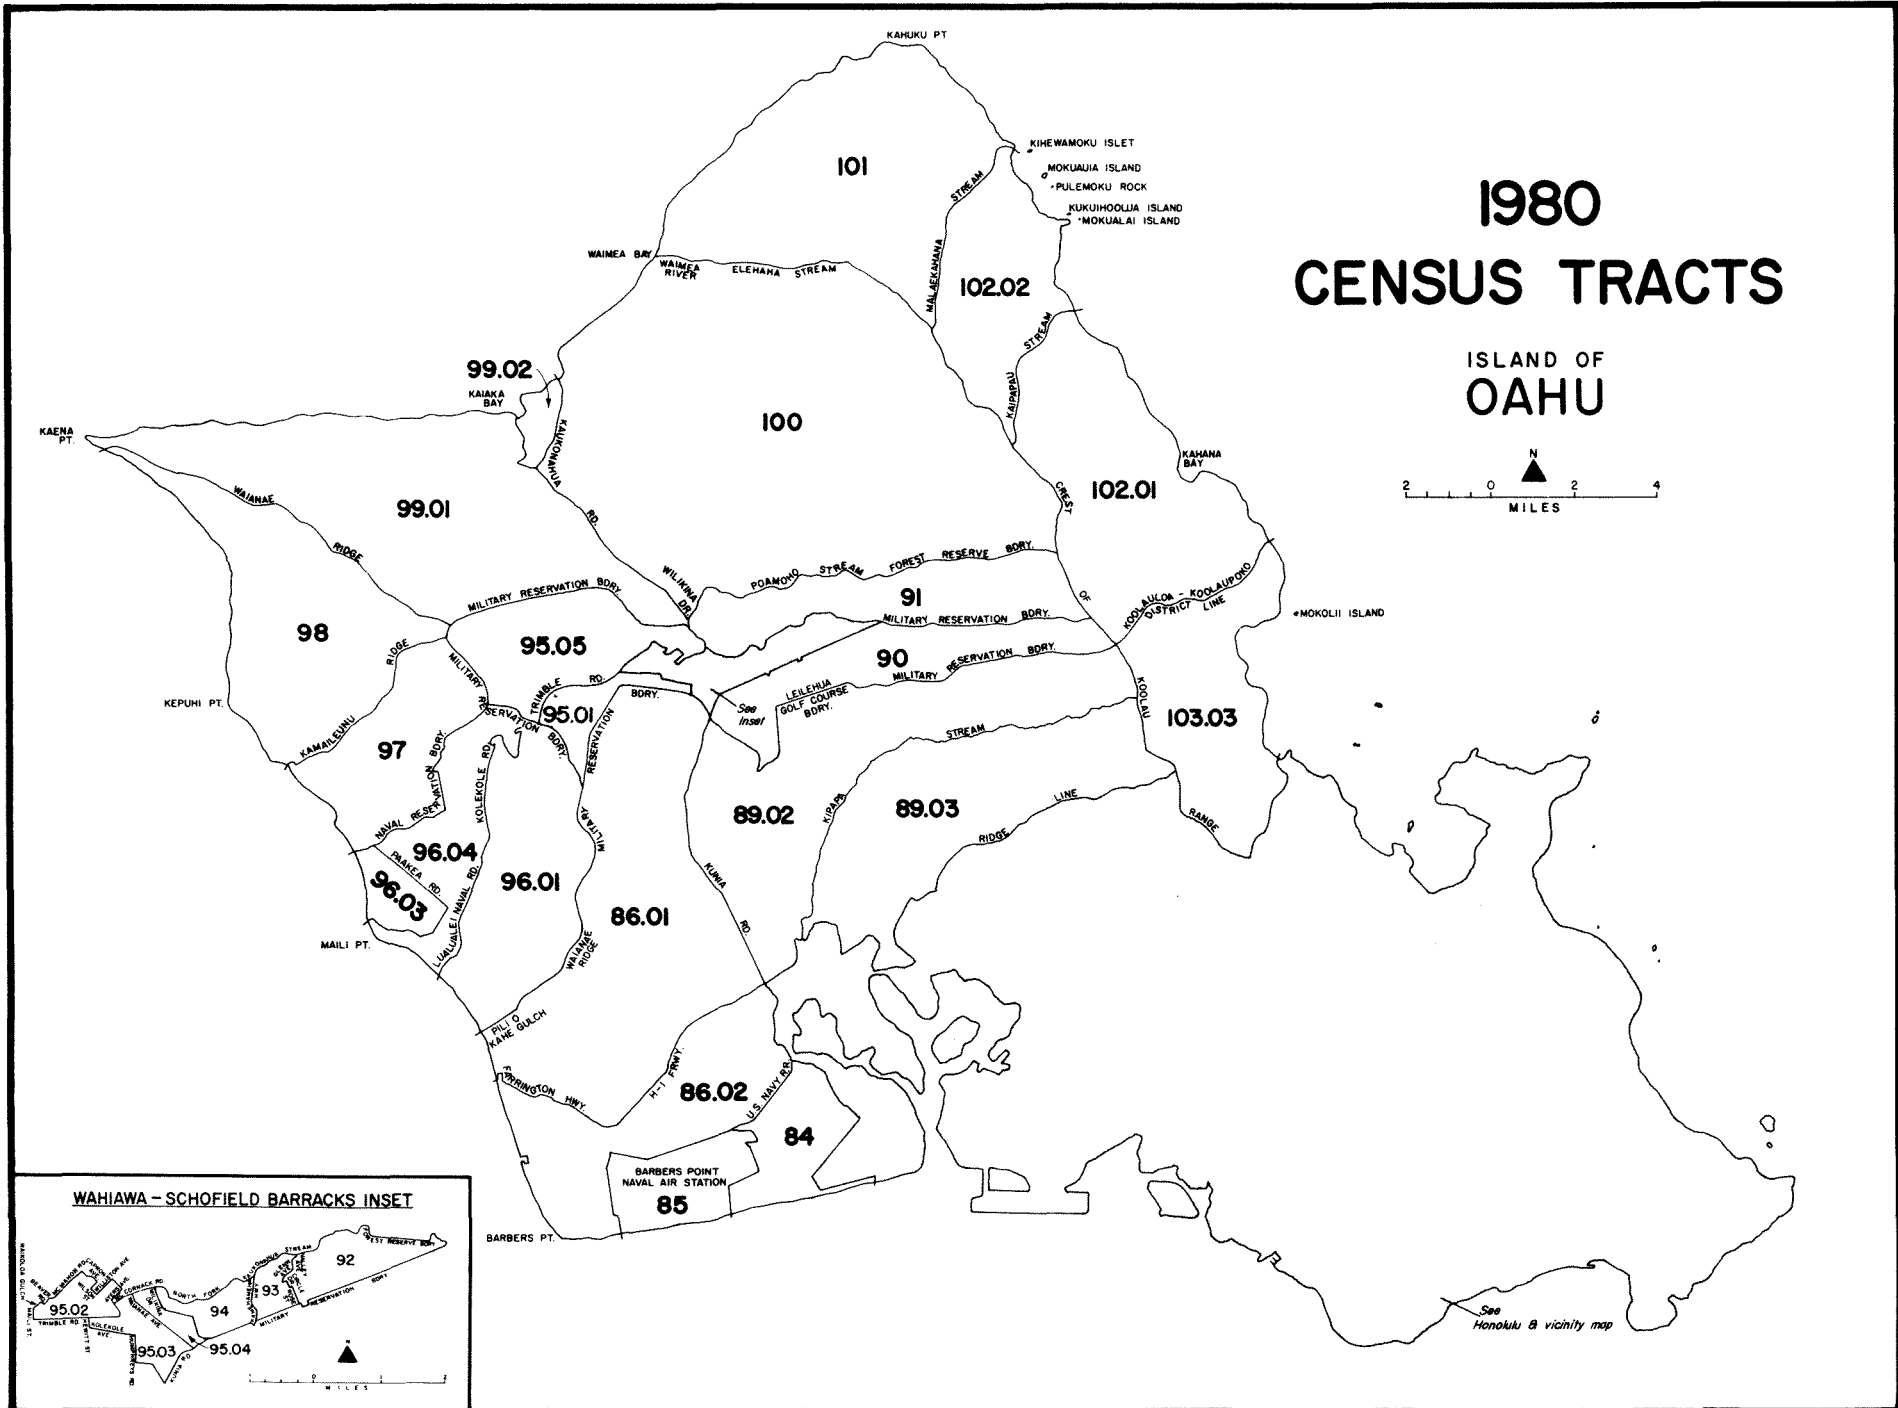

6/ Pearl City was redefined for 1980 to include two places shown separately in 1970: Pacific Palisades (7,846) and Pearl City (19,552). The 1970 population shown here is the sum of the figures for those two places.

Source: Area from Hawaii State Department of Planning and Economic Development, Statistical Boundaries of Cities, Towns and Villages As Approved Through December 31, 1979 (Report SB-A15, March 13, 1980). Population from U.S. Bureau of the Census, U.S. Census of Population: 1970, PC(1)-A13, Hawaii (April 1971), tables 6 and 9 and correction note; 1980 Census of Population, PC80-1-A13, Hawaii (October 1981), table 4; and unpublished final counts for places under 300 based on enumeration district data supplied February 13, 1981.

410 .....	45,056	226	237	-4.6	0.01	41

1/ Most tract boundaries either remained unchanged between 1970 and 1980 or underwent only minor changes. In cases where the 1970 tracts were split or merged for 1980, however, the 1980 tract designation is followed in parentheses by the 1970 designations.

2/ Area of census tracts fails to add to county total and subtotals because of rounding.

3/ The ".99" census tracts consist of vessels anchored off the indicated tract; for example, persons living aboard ships in Kewalo Basin, adjacent to tract 38, are assigned to tract 38.99.

Source: U.S. Bureau of the Census, Census of Population and Housing, 1980: Summary Tape File 1A, Hawaii (1981), 1970 Census of Population and Housing, Census Tracts, Honolulu SMSA, PHC(1)-88 (1972), Areas of Hawaii: 1960, GE-20, No. 13 (October 1967), p. 5, and unpublished acreage data for counties and islands supplied May 5, 1983; Honolulu Department of General Planning, unpublished estimates of census tract acreage, June 1981. The 1970 population of census tracts split between 1970 and 1980 was approximated from 1970 data for blocks and enumeration districts.

Table 10.-- RESIDENT POPULATION OF URBANIZED AREAS, OTHER URBAN PLACES, AND RURAL TERRITORY: 1960 TO 1980

Kind of area	1980	1970	1960
State total .....	964,691	769,913	632,772
Honolulu Urbanized Area <u>1/</u> .....	582,463	443,749	351,336
Honolulu .....	365,048	324,871	294,194
Rest of urbanized area .....	217,415	118,878	57,142
Kailua-Kaneohe Urbanized Area <u>2/</u> ...	105,712	...	...
Kailua <u>3/</u> .....	35,812	33,783	24,402
Kaneohe <u>3/</u> .....	29,919	26,998	15,291
Rest of urbanized area .....	39,981	...	...
Other urban places .....	146,417	138,692	92,932
Rural territory .....	130,099	126,691	148,811

1/ The Honolulu Urbanized Area consists of Honolulu District (the area southwest of the crest of the Koolau Mountains, between Red Hill and Makapuu Point) and the adjacent urbanized territory circling Pearl Harbor, as far west as Waipahu in 1960, Waipahu and Ewa Beach in 1970 and 1980, and also out to Whitmore Village and Schofield Barracks in 1980.

2/ The Kailua-Kaneohe Urbanized Area was initially defined as of 1980. It includes the urban territory on Windward Oahu, from Kahaluu through Waimanalo Beach.

3/ The 1970 totals for Kailua and Kaneohe have been adjusted to the 1980 boundaries. The 1960 totals for these places have been adjusted to the original 1970 boundaries.

Source: U.S. Census of Population: 1960, PC(1)-13A, tables 1, 8, and 10, and unpublished data for enumeration districts; U.S. Census of Population: 1970, PC(1)-A13, tables 1, 6, and 11, and correction note, and unpublished data for enumeration districts; U.S. Census of Population: 1980, PC80-1-A13, tables 7 and 13. The 1970 data recapitulated in the 1980 census bulletin have been corrected by DPED.

Table 34.-- IMMIGRANTS ADMITTED, BY COUNTRY OF BIRTH: 1973 TO 1983 -- Con.

OC Included with "other countries."

1/ Data exclude Vietnamese refugees still in parole status at the end of each reporting period. Such persons are counted when adjusted under the Immigration and Nationality Act.

2/ Data limited to immigrants entering the United States through Honolulu. Data include conditional entrants and persons admitted under Sec. 319(b), 332(a), and 323(c) but exclude immigrants admitted through other ports and subsequent adjustments to immigrant status. Between 1972 and 1979, final totals have exceeded provisional figures by 30.0-54.2 percent. For calendar year provisional data back to 1972, see DPED Statistical Memorandum 83-2, "Migration to Hawaii During 1982" (February 4, 1983), table 2.

## Section 2

# VITAL STATISTICS AND HEALTH

This section presents data on births, deaths, marriages, divorces, diseases and accidents, nutrition, substance abuse, height and weight, hospitals, dental care, and health personnel.

Vital indexes generally reflect the high health standards of Hawaii. Expectation of life at birth in 1980 was 75.04 years for males and 81.45 years for females. The crude death rate in 1982 was only 5.5 per 1,000 resident population. Deaths under one year of age per 1,000 live births numbered 8.9 in 1982. Diseases of the heart have accounted for almost a third of all deaths in recent years; cancer, for almost one-fourth. The 1982 crude birth rate was 18.9 per 1,000 resident population. The total fertility rate for civilians fell from 3,360 per 1,000 women in 1960 to 2,461 in 1970 and 1,903 in 1980. Over 98 percent of all babies were born in hospitals in 1982, and more than one-fifth were born to military couples. One out of six births was illegitimate. There were 8,278 fetal deaths in 1981, including 6,617 elective abortions. Marriages numbered 13,483 in 1982, with about 25 percent accounted for by nonresidents. Divorces reached a 1982 total of 4,233. The State had 25 acute care civilian hospitals (with 2,925 beds), 34 long-term care facilities (with 2,670 beds), nine specialty care facilities (with 893 beds) and 292 care homes (with 1,555 beds) in 1981. There were 1,862 physicians and surgeons, 724 dentists, 6,478 professional nurses, and 411 pharmacists licensed and living in Hawaii as of January 1983. Acute conditions per 100 persons numbered 224 in 1982, with respiratory conditions the most common complaint (at 156 cases per 100 persons). Among chronic conditions reported in the 1982 survey data, the most frequently mentioned were hypertension without heart involvement (7.1 per 100 persons), hay fever (4.8), and impairments of the back or spine (4.7). The most common communicable disease reported to authorities in 1981 was scarlet fever, with 4,348 cases. State mental health facilities served 10,689 patients in 1981, but the number of in-patients at the end of the year was only 408. Dental health was only fair: according to a 1979 survey, 275,000 residents had not visited a dentist within the previous year, and 176,000 reported one or more dental problems, chiefly cavities. Among persons 12 years old and over in 1979, 55 percent had used alcohol in the preceding month, 33 percent had smoked cigarettes, 14 percent had used marijuana, and 5 percent had used cocaine. The average adult male was 67.5 inches tall and weighed 159.5 lbs.; the average adult female was 62.6 inches and 127.9 lbs.

Major sources for data on vital statistics and health are the annual statistical reports of the Hawaii State Department of Health and various publications of the U.S. Public Health Service. Long-term trends are traced in Historical Statistics of Hawaii, Section 2. Sections 2 and 4 of the Statistical Abstract of the United States: 1982-83 contain similar data for the nation as a whole.

Table 55.-- ACUTE CONDITIONS: 1982

Condition	Incidence of condition per year	Conditions per 111 persons per year
All acute conditions .....	2,141,939	224.1
Infective parasitic diseases ....	147,634	15.4
Respiratory condition .....	1,494,118	156.3
Upper respiratory .....	1,112,298	115.9
Influenza .....	391,113	41.8
Other respiratory condition ...	91,617	9.6
Digestive system condition .....	31,243	3.3
Injuries .....	212,739	21.2
All other acute conditions .....	266,315	27.9

Source: Hawaii State Department of Health, Hawaii Health Surveillance Program, records.

Table 56.-- CHRONIC CONDITIONS: 1982

Selected chronic conditions	Prevalence of condition	Conditions per 1,000 persons
Heart condition .....	22,178	23.2
Impairments of back or spine .....	44,646	46.7
Hypertension without heart involvement	67,620	70.7
Arthritis/rheumatism .....	29,312	30.7
Hearing impairment .....	30,139	31.5
Asthma with or without hayfever .....	35,441	37.1
Diabetes .....	18,590	19.4
Mental and nervous condition .....	16,956	17.7
Visual impairment .....	12,015	12.6
Malignant neoplasms .....	6,060	6.3
Chronic and allergic skin conditions ..	28,770	30.1
Chronic sinusitis .....	27,717	29.0
Hayfever without asthma .....	45,792	47.9
Stomach ulcer .....	6,248	6.5
Bronchitis/emphysema .....	15,459	16.2
Benign and unspecified neoplasms .....	6,539	6.8
Hemorrhoids .....	16,969	17.7
Thyroid/goiter .....	5,450	5.7
Varicose veins .....	10,948	11.5
Gout .....	10,072	10.5

Table 57.-- LIMITATION OF ACTIVITY DUE TO CHRONIC OR ACUTE  
CONDITIONS: 1982

Type of limitation	Number
Persons with one or more chronic conditions .....	352,492
No limitation of activity .....	289,308
Limited, but not in major activity .....	27,726
Limited in amount or kind of activity .....	22,234
Unable to carry on major activity .....	13,224
Restricted days in past 12 months <u>1/</u> .....	12,383,934
Per person <u>2/</u> .....	13.0
Bed days in past 12 months .....	4,272,937
Per person <u>2/</u> .....	4.5
Work days lost by persons 17 years of age and older in past 12 months .....	2,090,050
Per employed person 17 years and older <u>2/</u> .....	5.3
School days lost by persons 6 to 16 years of age in past 12 months .....	609,665
Per pupil 6 to 16 years of age <u>2/</u> .....	3.6

1/ A restricted activity day is one in which a person had to cut down on his usual activity for all or most of the day.

2/ Base includes persons without chronic or acute conditions or restricted activities.

### Section 3

## EDUCATION

This section presents statistics on enrollment in public and private schools, colleges and universities; students graduated and degrees awarded; the highest grade of school completed; school facilities, personnel, and expenditures; and libraries.

Enrollment in elementary, intermediate and high schools in 1982-1983 totaled 200,129, slightly less than in the preceding year and 7.1 percent below the all-time high reached in 1971-1972. There were 233 public schools with 8,083 classroom teachers and 162,024 students (81.0 percent of the total). There were also 140 private schools with 2,219 teachers and 38,105 pupils. Students graduating from public and private high schools in 1981-1982 numbered 13,948. Some 54,146 students attended colleges and universities in the State in 1982-1983, including 21,065 on the Manoa Campus of the University of Hawaii, 410 at West Oahu College, 3,752 at UH-Hilo, 22,300 at six community colleges, and 6,619 in four private colleges and universities. Ninety-two percent of the children 5 and 6 years old were in school in 1980 (compared with 87 percent in 1970), and 47 percent in the 18- and 19-year-old group were enrolled (compared with 53 percent a decade earlier). The expenditure per pupil in public schools rose from \$1,007 in 1971-1972 to \$2,701 in 1981-1982. Among adults, the illiteracy rate dropped from 8.4 percent in 1950 to 1.9 percent in 1970, and by 1980 approximately 20.3 percent of all residents 25 years of age or more could report having completed four or more years of college. The Hawaii State Library System, with 47 locations in all four counties, had 3.4 million books, film reels, phonorecords, and other collections in 1981, with an annual circulation of 5.3 million; the University of Hawaii libraries in the same year counted 2.2 million volumes.

The principal sources of data on education are the U.S. Bureau of the Census, Hawaii State Department of Education, University of Hawaii and private colleges and universities. Historical Statistics of Hawaii, Section 9, contains Island data back to 1820. Section 5 of the Statistical Abstract of the United States: 1982-83 presents comparable information for the nation as a whole.

## Section 4

# LAW ENFORCEMENT, COURTS AND CORRECTIONS

Statistics in this section refer to crime and delinquency, the police, attorneys, the judiciary system, prisons, and youth correctional facilities.

Major offenses reported to the police in 1982 numbered 65,000, compared with 64,000 in 1981 and 37,000 in 1972. The rate per 1,000 population increased from 45 in 1972 to 65 in 1981 and 66 in 1982. Seventy-seven percent of the 1982 total occurred on Oahu. For the State as a whole, major offenses known to police in 1982 included 31 murders or cases of non-negligent manslaughter, 342 rapes, 1,560 robberies, 609 aggravated assaults, 16,477 burglaries, 42,248 cases of larceny, and 4,181 auto thefts. The value of property reported stolen in 1982 amounted to \$26 million, exclusive of motor vehicles; only 7.8 percent was recovered. In 1977, when asked whether they or their immediate families had been victims of crime (burglary, assault, etc.) in Hawaii since 1970, 40 percent of all Oahu adults and a fourth of all Neighbor Island adults answered affirmatively. Nineteen percent of the major offenses known to police were cleared by arrest or otherwise in 1982. Forty-two percent of the persons arrested for major crimes and 24 percent of those arrested for lesser offenses in 1982 were less than eighteen years of age. The number of inmates in the nine State correctional institutions averaged 1,155 during 1982; of this number, 681 were adults serving time for felonies. Cases filed in the State Supreme Court, Intermediate Court of Appeals, four circuit courts, and four district courts and their divisions during fiscal 1982 numbered 946,000, including 842,000 traffic cases. Filings in the United States District Court for Hawaii included 636 civil cases, 1,947 criminal cases, and 788 bankruptcy cases. The last legal execution in Hawaii took place in 1947. Governmental expenditures on the criminal justice system in 1979 amounted to \$103 million, more than half of the total going for police protection. There were 2,788 attorneys licensed in Hawaii as of mid-1983.

Statistics on law enforcement, courts, and corrections in Hawaii appear in the annual reports of the county police departments, the State Judiciary, the Intake Service Center, and the Administrative Office of the United States Courts. The Hawaii Criminal Justice Data Center issues quarterly and annual reports titled Crime in Hawaii. Figures on crime, the courts, and corrections in earlier years appear in Historical Statistics of Hawaii, Section 10. National data are summarized in the Statistical Abstract of the United States: 1982-83, Section 6.

Table 104.-- CRIMINAL JUSTICE SYSTEM EXPENDITURE AND EMPLOYMENT: 1979

## Section 5

# GEOGRAPHY AND ENVIRONMENT

This section relates to land and water areas, physical geography, climate, air and water quality, noise, and other geographic and environmental measurements of Hawaii.

The State consists of eight major islands and 124 minor islands with a total land area of 6,425 square miles and a general coastline of 750 miles. Honolulu is 214 miles from Hilo, 1,367 miles from Kure Atoll (the westernmost end of the State), 2,397 miles from San Francisco, and 4,829 miles from Washington, D.C. The highest peak in the State is Mauna Kea, 13,796 feet above sea level; the longest stream is Kaukonahua Stream, Oahu, 33 miles in length; the biggest lake is Halalii, on Niihau, 841 acres; and the highest named waterfall is Kahiwa, Molokai, a 1,750-foot cascade. Various measures of air pollution, such as suspended particulate matter, indicate that Honolulu is one of the cleanest cities in the nation. There is also relatively little water pollution: 39 major beaches surveyed in 1982 were found to have fecal coliform levels per 100 ml. ranging from 2.0 to 222.6, and all but one were within EPA standards. More than 1,100 species, subspecies, and varieties of native flora were endangered, threatened, or extinct, according to a 1977 survey. Climatically, Hawaii is marked by remarkably balmy temperatures and wide variations in rainfall. The all-time temperature range at Honolulu International Airport, for example, was from 53° to 92°F. Normal precipitation, however, ranges from 8.7 inches at Kawaihae, South Kohala, to 451 inches atop Waialeale. The longest volcanic eruption in Island history lasted 867 days, the worst earthquake attained 7.5 on the Richter scale, and the highest tsunami wave reached 56 feet. Water withdrawn for use in 1980 averaged 2.7 billion gallons per day, compared with 2.8 billion in 1975 and 2.7 billion in 1970. Among 31 neighborhoods on Oahu, median noise levels in 1981-1982 ranged from 37 decibels (in Mililani) to 57 decibels (in Pawa).

Important sources of data include the U.S. Geological Survey, National Ocean Survey, National Weather Service, U.S. Bureau of the Census Geography Division, the Division of Water and Land Development of the State Department of Land and Natural Resources, the State Department of Health, and the University of Hawaii Institute of Geophysics. Detailed information is given in Atlas of Hawaii, published by the University Press of Hawaii in 1983. National data are reported in Statistical Abstract of the United States: 1982-83, Section 7.

1/ Listed in geographic order, from east to west. The channels between major islands were measured between the following points:

Alenuihaha: Upolu Pt., Hawaii, to Puhilele Pt., Maui;  
 Alalakeiki: Lae o ka Ule, Kahoolawe, to Nukuele Pt., Maui;  
 Kealaikahiki: Makaalae, Kahoolawe, to Kamaiki Pt., Lanai;  
 Auau: Kikoa Pt., Lanai, to Lahaina, Maui;  
 Kalohi: Wahie Pt., Lanai, to Kamalo, Molokai;  
 Pailolo: Lipoa Pt., Maui, to Pohakuloa, Molokai;  
 Kaiwi: Ilio Pt., Molokai, to Makapuu Pt., Oahu;  
 Kauai: Kaena Pt., Oahu, to Kamilo Pt., Kauai;  
 Kaulakahi: Mana Pt., Kauai, to Kaunuopou, Niihau.

2/ Width measured in statute miles between designated points on National Ocean Survey and Coast and Geodetic Survey charts. Width in kilometers calculated from miles (1 mile = 1.60934 km.).

3/ Depths given are the deepest soundings noted at or near the line joining the two designated points, on National Ocean Survey and Coast and Geodetic Survey charts. Depths measured in fathoms and converted to feet and meters (1 fathom = 6 feet = 1.8288 meters).

Source: Compiled by Lee S. Motteler, Pacific Scientific Information Center, Bernice P. Bishop Museum, in November 1980.

1/ Figures are lengths of general outline of seacoast. Data for the four islands of Maui County are not consistent with the reported county total.

2/ Shoreline of outer coast, offshore islands, bays, rivers, and creeks is included to the head of tidewater or to a point where tidal waters narrow to a width of 100 feet.

3/ Derived from data expressed in statute miles; independently rounded and accordingly may not add exactly to indicated totals and subtotals.

1 mi. = 1.609 km.

4/ Data are not available for five minor islands: Molokini, Lehua, Gardner Pinnacles, Maro Reef, and Pearl and Hermes Atoll.

5/ Excludes the Midway Islands, which are part of the Hawaiian Archipelago but not legally part of the State of Hawaii. Midway has a general coastline of 20 miles and a tidal shoreline of 33 miles.

Table 132.-- LAND AND WATER AREA OF COUNTIES AND ISLANDS: 1982 -- Con.

1/ Areas in square kilometers and acres were calculated directly from the figures shown for square miles; these equivalents were independently rounded, and hence may not add exactly to the indicated totals and subtotals. 1 square mile = 640 acres = 2.58999 square kilometers.

2/ Dry land and land temporarily or partially covered by water, as marshland, swamps, etc.; streams and canals under one-eighth statute mile wide; and lakes, reservoirs, and ponds under 40 acres of area.

3/ Permanent inland water surface, such as lakes, reservoirs, and ponds having 40 acres or more of area; streams, sloughs, estuaries, and canals one-eighth statute mile or more in width; deeply indented embayments and sounds, and other coastal waters behind or sheltered by headlands or islands separated by less than 1 nautical mile of water, and islands having less than 40 acres of area.

4/ Because of rounding, island figures may not add to county figures.

5/ Molokini, offshore of Maui, not measured; other sources give the area of Molokini as 18.6 acres (0.03 square miles or 0.075 square kilometers).

6/ Exclusive of the Midway Islands, which are part of the Hawaiian Archipelago but not legally part of the State of Hawaii.

Source: Unpublished data supplied by the Geography Division, U.S. Bureau of the Census, May 5, 1983, as cited in the Hawaii State Department of Planning and Economic Development, Remeasurements of the Area of Hawaii, 1982 (Statistical Memorandum 83-6, May 18, 1983).

Sand Island .....	15	5

1/ The adjacent ocean floor has an average depth of 2,800 fathoms and a maximum depth of 3,045 fathoms. Thus, Mauna Kea and Mauna Loa rise respectively 30,596 feet and 30,477 feet above their submarine bases as calculated from average depths, and respectively 32,066 and 31,497 feet above as calculated from maximum depths. So measured, Mauna Kea and Mauna Loa are the world's tallest mountains.

2/ Lua Makika on earlier maps.

3/ Two distinct peaks. The lower one has an elevation of 3,105 feet.

4/ Not part of the State of Hawaii.

<sup>1/</sup> According to Lee S. Motteler, Pacific Scientific Information Center, Bernice P. Bishop Museum, the sea cliffs along the northeastern coast of Molokai between Umilehi Point and Puukaoku Point drop 3,250 feet at an average slope of 58 degrees. These cliffs have been described by the Guinness Book of World Records (1982 edition, p. 157) as "the highest sea cliffs yet pinpointed anywhere in the world."

Table 150.-- NOISE LEVELS IN SPECIFIED NEIGHBORHOODS ON OAHU: 1981-1982

[Data collected during the latter part of 1981 and throughout 1982, during daylight hours only. Data were obtained from both manual sampling, utilizing on-site noise-level readouts, and automatic sampling, utilizing a community noise analyzer. Differences in noise levels as measured by the two types of sampling result from the inclusion in the automatic samplings of such sources as vehicles traveling near the microphone, barking dogs, or other instantaneous sounds. With manual samplings, these sources are eliminated from the recorded data.]

Dec. ...	57	9	-	20	75.9	71.4
Ann. ...	65	92	71	110	78.6	74.8

1/ Mean monthly frequency of trade winds in Hawaiian waters.

2/ Expected number of hazardous days in Hawaiian waters due to strong trade winds.

3/ Observations at Sunset Beach, Oahu. Annual averages were: flat or 1 foot, 71 days; 2-5 feet, 184 days; 6-10 feet, 71 days; 11-15 feet, 26 days; 16 feet or higher, 13 days.

4/ Observations at Kaneohe, Oahu. The mean ranged from 73.0 in January and February to 80.2 in August. Absolute maximums and minimums were respectively 84 (in July, August, and October) and 68 (December and February).

Spotted Dove .....	586	1,091	1,104	1,393	1,052
Migratory species:					
American Golden Plover .	564	1,138	1,884	1,621	1,402
Ruddy Turnstone .....	97	165	397	361	291

1/ Separate data are shown for endemic birds averaging more than 25 individuals in 1975-1979, indigenous birds more than 200, introduced birds more than 500, and migratory species and stragglers more than 100. Endemic birds are those peculiar to a particular region, in this case Hawaii, and therefore found nowhere else in the world; indigenous birds are those native to a given region, in this case Hawaii, but with a total range of distribution encompassing a much wider area. The classification is that in Andrew J. Berger, *Hawaiian Birdlife* (1972).

2/ Excluding Moku Manu, previously included. Moku Manu had 4 species and 913 individuals (including 425 Red-footed Boobies and 460 Great Frigatebirds) in 1982.

Source: Hawaii Audubon Society, *The 'Elepaio* (monthly).

Table 162.-- TREES ALONG STREETS OR IN PARKS UNDER THE JURISDICTION OF THE CITY AND COUNTY OF HONOLULU: 1981 AND 1982

Location	June 30, 1981	June 30, 1982
Along City and County streets and highways <u>1/</u> .....	110,975	113,489
In City and County parks .....	96,250	96,296

1/ Excludes Federal, State, and private thoroughfares.

## Section 6

# LAND USE AND OWNERSHIP

General statistics on the use, ownership, and tenure of land appear in this section. Information on specific use or ownership categories is given elsewhere: parks in section 7, agriculture in section 19, forests in section 20, cane land and industrial parks in section 22, and shopping centers in section 23.

Out of the 4,112,000 acres in the State, almost 1,300,000 are in cropland or pastureland. Other major categories include forestland, with 1,443,000 acres, urban and built-up, with 139,000, and miscellaneous nonfarm, with 790,000. In the Honolulu Standard Metropolitan Statistical Area (which is coterminous with Oahu), land in residential use increased from 22,600 acres in 1969 to 27,600 in 1981; during the same 12-year span, agricultural land declined from 88,900 to 74,700 acres. For the State as a whole, the Land Use Commission has zoned 156,000 acres as "urban," 1,975,000 as "conservation," 1,971,000 as "agricultural," and 9,000 as "rural."

Recent data on land ownership indicate that the Federal government owns 8.4 percent of all land, the State and counties own 30.4 percent, and private owners (chiefly large estates) have 61.3 percent. Total Federal holdings reported by the General Services Administration in 1982 came to 787,000 acres, exclusive of leased land (51,000 acres); most of the Federal land is in wildlife, park and military use. The State Department of Hawaiian Home Lands holds about 192,000 acres, divided among 3,077 lessees. Total land parcels in the State number 385,000.

Considerable caution is necessary in comparing statistics from different sources on land use, ownership, or tenure. Variations in definitions and survey dates seriously affect comparability in many instances, even where terminology is relatively unambiguous and misinterpretation seems unlikely. An example of such difficulties is the wide range in estimates of Federal land, with totals ranging from 297,000 acres to 787,000. Statistics on military land use are likewise confusing, going as high as 207,000 acres and as low as 56,000.

Reports of the U.S. Department of Agriculture and General Services Administration, Hawaii State Department of Hawaiian Home Lands, Department of Land and Natural Resources, Department of Planning and Economic Development, Department of Taxation, and Land Use Commission, and county planning departments provided the data for this section. Historical Statistics of Hawaii, Section 12, contains limited information for earlier years. Statistics for the nation as a whole are available in Sections 8 and 24 of the Statistical Abstract of the United States: 1982-83.

1977: January ..	4,111,500.0	149,262.9	1,976,995.7	1,976,327.2	8,914.2
1978: January ..	4,111,500.0	151,012.5	1,976,931.4	1,974,339.5	9,216.7
1979: January ..	4,111,500.0	151,929.6	1,976,105.9	1,974,229.8	9,234.7
1980: January ..	4,111,500.0	152,199.2	1,975,865.1	1,974,195.5	9,240.3
1981: January ..	4,111,500.0	154,318.8	1,975,836.4	1,972,103.5	9,241.3
1982: January ..	4,111,500.0	154,725.8	1,975,672.2	1,971,886.0	9,216.0
1983: January ..	4,112,387.5	156,413.1	1,975,472.5	1,971,278.6	9,223.3

Footnotes and source follow next table.

Table 171.-- ESTIMATED ACREAGE OF LAND USE DISTRICTS, BY ISLANDS:  
JANUARY 1983

[See headnote of preceding table.]

Island	Total area <u>1/</u>	Classification by State Land Use Commission <u>2/</u>			
		Urban	Conservation	Agricultural	Rural
State total	4,112,387.5	156,413.1	1,975,472.5	1,971,278.6	9,223.3
Hawaii .....	2,573,400.0	36,055.2	1,309,132.0	1,227,593.5	619.3
Maui .....	465,800.0	15,772.0	193,678.7	252,597.3	3,752.0
Kahoolawe .....	28,800.0	-	28,800.0	-	-
Lanai .....	90,500.0	2,338.5	38,202.5	47,239.0	2,720.0
Molokai .....	165,800.0	3,410.2	49,767.7	111,723.4	898.7
Oahu .....	386,187.5	87,893.6	154,859.8	143,434.1	-
Kauai .....	353,900.0	10,943.6	198,731.8	142,991.3	1,233.3
Niihau .....	45,700.0	-	-	45,700.0	-
Kaula and Lehua	400.0	-	400.0	-	-
Other islands <u>3/</u>	1,900.0	-	1,900.0	-	-

1/ These totals differ somewhat from the official figures based on measurements by the Geography Division of the U.S. Bureau of the Census, cited in Section 5. The increase in the 1983 total area reflects additions to the Urban District on Oahu at Honolulu International Airport (Reef runway and South Ramp refill) created from former submerged lands.

2/ For definitions, see Hawaii Revised Statutes, 1976 Replacement, Section 205-2.

3/ The Northwestern Islands, from Nihoa to Kure Atoll, excluding Midway.

Source: Hawaii State Department of Planning and Economic Development, Land Use Commission, data supplied February 9, 1983.

Table 172.-- LAND OWNERSHIP, BY ISLANDS: 1983

[In acres.]

Island	All land <u>1/</u>	Land owned by government <u>2/</u>			Privately owned land <u>3/</u>
		Federal	State	Counties	
State total <u>4/</u> ....	3,930,629	328,414	1,177,988	15,155	2,409,071
Percent .....	100.0	8.4	30.0	0.4	61.3
Hawaii .....	2,493,791	218,557	828,202	1,280	1,445,752
Maui .....	400,788	26,824	96,046	1,217	276,701
Kahoolawe .....	28,800	28,800	-	-	-
Molokini .....	19	19	-	-	-
Lanai .....	88,997	8	132	14	88,843
Molokai .....	170,153	133	47,330	248	122,441
Oahu .....	348,860	50,880	62,599	11,734	223,647
Kauai .....	352,004	2,937	143,423	662	204,982
Niihau .....	46,705	-	-	-	46,705
Lehua and Kaula .....	512	256	256	-	-

1/ Because of the omission of public thoroughfares and for other reasons, totals by island may differ considerably from official area estimates in other tables in this volume.

2/ State land ceded by presidential proclamation or governor's executive order to the federal government appears in most cases to have been classified for this table as federal land, even though title to it technically remains with the state. Land ceded by the state to the counties, in contrast, has probably been classified as state land. For both types of ceded land, treatment may have varied from parcel to parcel, and no firm statement is possible.

3/ For data on the leasehold status of privately owned land, see the two following tables.

4/ Data exclude the Northwestern Hawaiian Islands.

Source: City and County of Honolulu, Department of Finance, Real Property Assessment Division, records.

## Section 7

# RECREATION AND TOURISM

Statistics on tourism, recreation, sports, museums, the performing arts, pets and parks appear in this section. Information on recreational land use is given in Section 6; on transportation, in Section 18; on hotels, in Section 23.

Approximately 4,243,000 visitors stayed overnight or longer in Hawaii during 1982, compared with 1,747,000 in 1970 and only 297,000 in 1960. The average number present at any given time during 1982 was 105,000. Total visitor expenditures (exclusive of trans-Pacific fares) in 1982 amounted to \$3.7 billion, compared with \$840 million a decade earlier. The 1982 visitor total included 2.6 million from other States, 303,000 from Canada, and 715,000 from Japan. Expenditures per visitor day in 1980 averaged \$71.24 for westbound visitors and \$185 for the Japanese. Visitor-related spending in 1982 resulted in tax revenues of \$448 million and generated 161,000 jobs.

Both visitors and residents have access to a wide range of recreational and cultural facilities. The State has seven National parks and similar areas, 72 State parks, 627 County parks, 57 golf courses, 249 public tennis courts, 1,989 small-boat moorages, 1,600 recognized surfing sites, and 24.4 miles of safe, sandy, accessible beach. Recreational and cultural facilities reporting more than a million annual visitors include four National or State parks, the National Memorial Cemetery of the Pacific, U.S.S. Arizona Memorial, Castle Park, and the Honolulu Zoo. Total visits to 45 museums, state monuments and similar attractions in 1982 numbered 13 million. About 290,000 Hawaii residents traveled to the Mainland in 1982. Twelve theatrical groups on Oahu reported 1,300 performances of 500 productions for the 1981-1982 season, with a combined audience of 805,000. During the same period, the Honolulu Symphony Orchestra gave 109 concerts, with a total attendance of 169,000. Professional baseball drew 139,000 fans in 1982, and during the 1982-1983 school year, attendance at UH-Manoa varsity baseball, basketball and football home games exceeded 459,000.

Information on recreation and tourism is issued periodically by the Hawaii Visitors Bureau, the State Parks Division of the Department of Land and Natural Resources, the U.S. National Park Service, U.S. Passport Office, County park and recreation departments, and other organizations. A compilation of statistics on recreational facilities and behavior was issued by the Hawaii State Department of Land and Natural Resources in 1980 in its State Recreation Plan, Technical Reference Document. Long-term trends are summarized in Historical Statistics of Hawaii, Section 11. National statistics are given in Section 8 of Statistical Abstract of the United States: 1982-83.

Kaloko-Honokohau National Historical Park .....	...	1,300	-	1,300	( <u>3/</u> )
Puukohola Heiau National Historical Site .....	...	100	34	66	33,506
U.S.S. Arizona Memorial <u>4/</u> .	...	12	12	-	1,148,561
Kalaupapa National Historical Park .....	...	10,902	23	10,879	( <u>3/</u> )

1/ Federal and non-Federal acreage data exclude Puukohola Heiau and are not consistent with the total acreage, which refers to total area authorized as of these dates.

2/ This figure does not include the Oloa Forest tract. The 9,654-acre tract is entirely in Federal ownership, managed by the National Park Service, and has been designated as part of the wilderness system by Congress, but is not legally within the authorized boundary of Hawaii Volcanoes National Park.

3/ Not yet open to the public.

4/ The U.S.S. Arizona Memorial is wholly within the Pearl Harbor Naval Base. The acreage figure given is the approximate extent of the total area over which the National Park Service has been granted use rights by the U.S. Navy.

## Section 8

# GOVERNMENT FINANCES AND EMPLOYMENT

This section presents statistics relating to the revenues, expenditures, debt, and civilian employment of Federal, State and County governments in Hawaii.

Local government is vested in one combined city-county (Honolulu, consisting of the Island of Oahu and several outlying islets), three non-metropolitan counties (Hawaii, Kauai, and Maui), and one area (Kalawao County) administered by the State Department of Health. Separate municipal governments do not exist.

Tax collections by Federal, State and County governments in fiscal 1982 reached \$3.3 billion, almost triple the level reported ten years earlier. The 1982 total included \$1.9 billion in U.S. taxes, \$1.1 billion in State taxes, and \$304 million in County taxes, licenses and fees. Individual income taxes accounted for 89 percent of Federal collections and 25 percent of State collections in Hawaii in 1982. State revenue receipts totaled \$2.0 billion, chiefly from the General Excise and Use Tax (\$577 million) and Federal grants-in-aid (\$371 million). The largest expenditure item in the State accounts for 1982 was education, with \$633 million (out of \$1,958 million) going to the University of Hawaii and public schools and libraries. The counties, in contrast, depended largely on the real property tax (which until mid-1981 was assessed and collected by the State) and grants-in-aid for their revenues, and reported police and fire protection as their largest single expenditure item. Assessed valuation of the State quadrupled between 1973 and 1983, reaching \$47 billion by the end of the period; of this total, \$6.4 billion was exempt from taxation. Public bonded debt outstanding at the end of 1982 exceeded \$2.3 billion.

Total government employment in 1982 averaged 90,000, about 14 percent over the 1972 average. The 1982 total included over 31,000 Federal workers, 46,000 persons employed by the State, and 13,000 persons on County payrolls. State civil service employees as of mid-1982 numbered 18,600.

Important sources for statistics on government in Hawaii include the U.S. Census of Governments and various annual publications of the Bureau of the Census, reports of the U.S. Treasury Department, Hawaii State Departments of Accounting and General Services, Budget and Finance, and Taxation, and the County auditors and finance directors, and an annual compilation issued by the Tax Foundation of Hawaii, Government in Hawaii: A Handbook of Financial Statistics. Data extending back to the middle of the 19th century are summarized in Historical Statistics of Hawaii, Section 25. Comparable Mainland statistics appear in the Statistical Abstract of the United States: 1982-83, Sections 9 and 10.

Table 228.-- FEDERAL, STATE, AND COUNTY TAX COLLECTIONS: 1972 TO 1982

Year	All levels of government			Federal 1/ (\$1,000)	State 2/ (\$1,000)	County 2/ (\$1,000)
	Amount (\$1,000)	Per capita 3/ (dollars)	Percent of personal income 4/

## Section 9

# SOCIAL INSURANCE AND HUMAN SERVICES

This section presents data related to governmental expenditures on social welfare; programs for old-age, survivors, disability and health insurance; public employee retirement; unemployment insurance; aid to the needy; and child and other welfare services. Also included here are selected statistics on United Way campaigns, foundations, and the quality of life.

Total social welfare costs reached \$289 million in fiscal 1982, compared with \$94 million a decade earlier. About 58 percent of the 1981 total came from State funds and the remainder from the Federal government. The monthly average number of persons served by major welfare programs in 1982 was 69,000, or 7.0 percent of the resident population of the State at the beginning of the year. Two-thirds of all public assistance payments and 53 percent of all recipient cases were accounted for by aid to families with dependent children. The average monthly payment per case for public assistance was \$355, more than twice as much as in 1970. Participation in the food stamp program included 38,000 households and 99,000 persons. Among workers receiving unemployment compensation in 1982, weekly benefits averaged \$124. Almost 117,000 Hawaii residents were receiving Social Security benefits as of the end of 1982, and about 81,000 were enrolled for Medicare. There were also 14,000 State and County government pensioners in 1982, with annual benefits of \$105 million. Child adoptions in 1982 numbered 603. The Aloha United Way reported agency allocations of \$8.2 million on Oahu and \$1.6 million on the Neighbor Islands in 1982. A recent comparative study of the "quality of life" in 277 American metropolitan areas ranked Honolulu 28th.

Major data sources include reports and records of the U.S. Department of Health and Human Services, the Hawaii State Department of Social Services and Housing, the Hawaii State Department of Labor and Industrial Relations, the Hawaii State Employees' Retirement System, and the Aloha United Way. Historical Statistics of Hawaii, Section 8, contains data for earlier years. Section 11 of the Statistical Abstract of the United States: 1982-83 presents comparable Mainland data.

Table 256.-- SOCIAL WELFARE COSTS: 1972 TO 1982

## Section 10

# NATIONAL DEFENSE

This section presents statistics relating to the armed forces and their dependents, national guard strength, civilian employment in national defense, veterans, military housing, and expenditures by the armed forces.

There were approximately 59,000 officers and enlisted men (including 5,300 aboard ships homeported in Hawaii) and 66,000 military dependents in the Islands as of July 1, 1983. This number has been relatively stable in recent years, but at the height of World War II more than 400,000 uniformed personnel were present. The Navy alone accounts for one-third of the current total. More than 11,900 Hawaii residents were in the armed forces worldwide in 1982. The importance of national defense in Hawaii can be further measured by total expenditures (\$1.7 billion), military prime contract awards (\$526 million), civilian employment (20,400), veterans in civil life (100,000), military personnel receiving retired or retainer pay (10,700 men, receiving \$10.8 million monthly), military-connected pupils in public schools (19,000), military housing (19,000 units), and land owned by the armed forces (207,000 acres). Defense expenditures are second only to tourism as a source of income to Hawaii.

The Department of Planning and Economic Development has, since 1959, issued periodic reports on Military Personnel and Dependents in Hawaii. Other published sources include reports of the U.S. Bureau of the Census, the Administrator of Veterans Affairs, the U.S. Department of Defense, the Hawaii State Department of Labor and Industrial Relations, Department of Defense, and Department of Education, and the Hawaii State Census Statistical Areas Committee. Definitions used by these sources frequently differ to some degree, and care is accordingly necessary in comparing data issued by two or more agencies. In mid-1982, for example, the number of armed forces in Hawaii was reported as 53,915 by DOD, 54,879 by the Bureau of the Census, and 61,107 by the local commanding officers reporting to DPED. Historical Statistics of Hawaii, Section 26, includes series on the armed forces dating back to 1795. Section 12 of the Statistical Abstract of the United States: 1982-83 presents data on national defense and veterans affairs for other States and the entire nation.

## Section 11

# LABOR FORCE, EMPLOYMENT, AND EARNINGS

This section presents statistics on the size and composition of the labor force, employment by sex, occupation, and industry, work disability, wage rates, payrolls, hours, turnover, industrial safety, unionization, and strikes.

The civilian labor force averaged 458,000 in 1982; of this total, 428,000 persons were employed and 31,000 were unemployed and seeking work. The civilian jobcount rose from 350,000 in 1972 to 442,000 a decade later. (The jobcount differs from employment because the latter counts multiple jobholders — "moonlighters" — only once.) The unemployment rate averaged 6.7 percent in 1982, with island levels ranging from 6.1 to 18.5 percent. In 1980, 57.8 percent of all females 16 years old and over were in the civilian labor force — the fourth highest ratio in the nation. By occupation, one out of four civilian workers is classified as professional or managerial. Activities with especially large numbers of employees include government (90,000 in 1982), services (101,000), and retail trade (87,000). The average annual earnings of wage and salary workers under the Hawaii Employment Security Law reached \$15,400 in 1982, almost twice the 1972 average. Average weekly hours in 1982 ranged from 31.8 (for retail trade) to 43.9 (for communications and utilities). Labor union membership was estimated at 113,000 in 1980. Work stoppages in 1982 involved 911 workers.

Analyzing labor force trends is greatly complicated by shifts in sources and estimating methods. Prior to 1970, the number of employed civilians was estimated from data on the number of jobs covered by the Hawaii State Employment Security Law; workers holding more than one job were accordingly counted more than once. From 1970 to 1975, the same source was used, but the totals were adjusted to exclude the double-counting thought to be present. Then, beginning in 1976, the labor force estimates were based primarily on the Current Population Survey, a relatively small household survey subject to considerable sampling variation. The 1970-1975 estimates were later revised for greater comparability with the 1976-1982 data.

Principal sources for the data on labor force, employment, hours, earnings, unions and strikes are the decennial reports of the U.S. Bureau of the Census, the same agency's Current Population Survey, reports by the U.S. Bureau of Labor Statistics, monthly and annual tabulations by the Hawaii State Department of Labor and Industrial Relations, and annual surveys of pay rates by the Hawaii Employers Council. Historical Statistics of Hawaii, Section 4, includes figures for earlier years. Statistics for the nation as a whole are published in Section 13 of the Statistical Abstract of the United States: 1982-83.

Table 311.-- INTERSTATE MOVEMENT OF JOB-SEEKERS: 1974 TO 1982

Calendar year	Island workers on the Mainland <u>1/</u>		Mainland workers in Hawaii <u>2/</u>		Ratio <u>3/</u>
	Total <u>4/</u>	Regular only	Total <u>4/</u>	Regular only	
1974 .....	5,924	5,924	7,284	6,988	118
1975 .....	9,425	7,607	9,478	8,785	115
1976 .....	9,934	7,458	8,994	8,334	112
1977 .....	7,090	5,846	8,846	8,154	139
1978 .....	4,495	4,313	6,533	6,261	145
1979 <u>5/</u> .....	4,272	4,272	5,285	5,250	123
1980 .....	5,633	5,211	5,196	4,956	95
1981 .....	5,619	5,485	4,552	4,396	80
1982 .....	5,372	5,372	5,259	4,848	90

1/ Interstate liable initial claims (UI and Supp.), excluding UCFE and Supp. and UCX. Covers Hawaii workers seeking work and filing for benefits on the Mainland. Since July 1980, data have included Federal civilian employees and ex-servicemen.

2/ Interstate agent initial claims (UI and Supp.), excluding UCFE and Supp. and UCX. Covers Mainland workers filing claims for unemployment insurance and registered for work with the Hawaii State Employment Service.

3/ Interstate agent initial claims (regular only) as a percent of inter-state liable initial claims (regular only). Ratios under 100 suggest a net out-migration of workers.

4/ Regular and extended claims.

5/ The method of counting liable and agent initial claims was revised effective October 1979. Data for 1979 and later years are accordingly not directly comparable with figures for earlier years.

1981 .....	7	700	14,000	0.01
1982 <u>2/</u> .....	-	-	-	0

NA Not available.

1/ Workers counted more than once if involved in more than one stoppage during year.

2/ Data limited to stoppages involving 1,000 or more workers and thus not comparable to statistics for earlier years.

Source: U.S. Bureau of Labor Statistics, records.

Table 318.-- WORK STOPPAGES: 1977 TO 1982

[As estimated by the Hawaii State Department of Labor and Industrial Relations. Data exclude stoppages lasting less than one full shift (8 hours) and stoppages affecting fewer than 6 workers. Beginning with 1982, these data also exclude stoppages not begun or in progress during the week containing the 12th of each month during the year. Due to definitional and timing differences, none of the data in this table are exactly comparable to similar statistics compiled by the U.S. Bureau of Labor Statistics.]

Year	Number of stoppages <u>1/</u>	Workers involved <u>1/</u>	Man-days lost <u>2/</u>
1977 .....	12	9,670	206,795
1978 .....	14	1,774	33,990
1979 .....	10	10,380	229,880
1980 .....	9	6,886	138,490
1981 .....	9	890	8,650
1982 <u>3/</u> .....	7	911	14,480

1/ Stoppages carrying over from previous year are counted in both years.

2/ Partly estimated.

3/ Data limited to stoppages begun or in progress during the week containing the 12th of each month during the year. The statistics for 1982 are thus not exactly comparable to the figures for earlier years.

## Section 12

# INCOME, EXPENDITURES, AND WEALTH

This section presents statistics on two different aspects of income and expenditures, one relating to the State income and product system and the other to the distribution of income to families, households and individuals. Specifically, information is given on gross state product, industrial income, personal income, family and household income, poverty, personal wealth, and family expenditures. Data on wage rates, salaries, and earnings appear in Sections 3, 8, 11, and 22; on industrial payrolls, in Sections 11, 15, 20, 22, and 23; on the family income of visitors, in Section 7; on retirement payments and public assistance, in Sections 9 and 10; on taxable income, in Section 8.

Gross state product in 1981 amounted to approximately \$13 billion, or triple the 1970 total. The major sources of outside income to Hawaii in 1982 were defense expenditures (\$1.7 billion), pineapple production (\$206 million), sugar production (\$352 million), and visitor expenditures (\$3.7 billion). Personal income in 1982 was \$11.6 billion, compared with \$4.2 billion only ten years earlier, and per capita personal income was \$11,652, more than twice the 1972 level. The per capita figure for Hawaii exceeded the national average by 5 percent, and thus failed to compensate for the Islands' much higher cost of living. The median annual income of families, based on data for 1979, was \$22,750; for unrelated individuals, the median was \$7,097. The official poverty threshold for a 4-person nonfarm family in Hawaii was set in February 1983 at \$11,390. The most recent family expenditure survey, taken in 1972 and 1973, reported that the largest items in the family budget on Oahu were housing (accounting for 33.8 percent of spending for current consumption), food (20.4 percent) and transportation (19.1 percent). Top wealthholders in 1976 included 39,000 persons with assets of \$120,000 or more and 500 millionaires.

The chief sources of data shown in this section are the U.S. Bureau of Economic Analysis, U.S. Bureau of the Census, U.S. Bureau of Labor Statistics, U.S. Department of Health and Human Services, Internal Revenue Service, Hawaii Agricultural Reporting Service, Hawaii State Department of Planning and Economic Development, and Hawaii Visitors Bureau. Sections 6 and 7 of Historical Statistics of Hawaii present data for earlier years. Comparable data for the country as a whole are given in Statistical Abstract of the United States: 1982-83, Section 14.

Table 319.-- DIRECT INCOME FROM MAJOR EXPORT INDUSTRIES: 1972 TO 1982

[In millions of dollars.]

Year	Total for four major industries	Value of production		Defense expenditures	Visitor expenditures <u>1/</u>
		Raw sugar and molasses <u>2/</u>	Fresh and processed pineapple

## Section 13

# PRICES

This section presents indexes of consumer prices for Honolulu, average prices for selected foods, and a comparison of Honolulu family budgets with those in other metropolitan areas. Other statistics on prices are reported in Sections 16, 17, 18, 19, 21, and 23.

In August 1983, the Honolulu all-items consumer price index for all urban consumers stood at 278.2, with the 1967 level equal to 100. The index had increased 1.5 percent in the preceding 12 months, 47.4 percent since August 1978, and 111.0 percent since September 1973. Prices have risen most rapidly since 1967 for medical care (265.5 percent) fuel and other utilities (230.1 percent), and food away from home (up 213.1 percent), and least for apparel and upkeep (up 109.1 percent).

An "intermediate" budget for a four-person family living on Oahu was estimated at \$31,893 as of the Autumn of 1981. This family budget was 26 percent higher than the corresponding urban United States average, and was first among the 25 American metropolitan areas surveyed. The "lower" budget was 33 percent above the national figure; the "higher" budget, 32 percent. Oahu-Mainland differentials in the intermediate budget were greatest for rents and personal income taxes and least for food away from home and automobile transportation. An "intermediate" budget for a retired couple in Honolulu came to \$12,157 in the Autumn of 1981, 19 percent above the U.S. urban average.

The Honolulu consumer price index has been compiled by the United States Bureau of Labor Statistics since December 1963. This index measures the average change in prices of goods and services purchased by urban families and single persons living alone. Prices are expressed as a percent of the average levels reported in 1967, the base date. Current data for Honolulu and other cities are published in the Monthly Labor Review and CPI Detailed Report, issued monthly by BLS.

Important changes were made in the consumer price index at the beginning of 1978. The existing index, covering urban wage earner and clerical families and single persons living alone, had been based on spending patterns observed in a 1961 survey and had been issued at three-month intervals. This index was discontinued after June 1978. Beginning in February 1978, two new indexes were published, both based on the findings of a 1972-1973 survey and both issued at two-month intervals. The first of these new indexes covered the same population as the older index, that is, urban wage earner and clerical families and individuals; the second covered all urban consumers. The new indexes were linked to the existing index for December 1977 and, like the latter, expressed as a percent of the 1967 annual average. The index for all urban consumers was further modified in February 1983, when the basis for measuring homeowners' costs was substantially altered.

Comparisons of family budgets between Honolulu and various Mainland communities have been published by the U.S. Bureau of Labor Statistics through the Fall of 1981. Although discontinued by BLS after 1981, this comparison was updated to 1982 by DPED. Similar comparisons by various agencies go back a number of years, and include a Honolulu-Los Angeles comparison for 1945, Honolulu-Washington comparisons for 1951 and 1955-1983, and a 40-area comparison (later for 25 areas) for various dates since 1966. Budget costs for a retired couple have been prepared by BLS for Honolulu and the Mainland as of 1966, 1967, and annually from 1969 to 1981. Cost of living adjustments for Federal employees in Hawaii are based on the Honolulu-Washington comparisons, compiled by the U.S. Office of Personnel Management.

In addition to these data, the Bureau of Labor Statistics until 1978 published monthly and annual data on average Honolulu prices for a wide variety of foods, and occasional data on a number of non-food items. The city food price series were suspended after June 1978 and since that time only unofficial estimates have been available.

No composite wholesale price index, comparable to the all-items consumer price index, is available for Hawaii. Average wholesale prices of agricultural products are reported in Statistics of Hawaiian Agriculture, issued by the Hawaii Agricultural Reporting Service, and Honolulu Prices: Wholesale Eggs, Poultry, Pork, Beef and Rice and Wholesale Prices: Wholesale Fresh Fruits and Vegetables, both publications of the State Department of Agriculture, Market News Service. Wholesale price statistics of other commodities are less readily available, and in most cases totally lacking.

Data on prices and living costs for the nation as a whole and other areas are summarized in Statistical Abstract of the United States: 1982-83, Section 15. Long-term trends for Hawaii are traced in Historical Statistics of Hawaii, Section 5.

Table 344.-- ANNUAL BUDGETS FOR THREE LEVELS OF LIVING FOR A FOUR-PERSON FAMILY  
ON OAHU: AUTUMN 1980 -- Con.

1/ Among the 25 metropolitan areas for which separate indexes were reported, Honolulu ranked first in total budget costs at the higher and intermediate levels and second at the lower level (where Anchorage ranked first).

2/ Housing includes shelter, housefurnishings and household operations. The higher budget also includes an allowance for lodging away from Oahu.

3/ The average costs of shelter were weighted by the following proportions: lower budget, all families living in rented dwellings; intermediate budget, 25 percent in rented dwellings; higher budget, 15 percent renters.

4/ Includes average contract rent, heating fuel, gas, electricity, water, specified equipment, and insurance on household contents.

5/ Includes interest and principal payments plus taxes; insurance on house and contents; water, refuse disposal, heating fuel, gas, electricity, and specified equipment; and home repair and maintenance costs.

6/ Based on 65 percent of the lower budget families and all of the intermediate and higher budget families owning automobiles.

7/ Based on 30 percent of all families paying full cost of medical insurance 26 percent paying half cost, and 44 percent covered by noncontributory insurance plans (paid by employer).

8/ Includes reading, recreation, tobacco products, alcoholic beverages, education, and miscellaneous expenditures.

9/ Includes gifts and contributions, life insurance and occupational expenses.

Table 345.-- ANNUAL BUDGETS FOR THREE LEVELS OF LIVING FOR A RETIRED COUPLE  
ON OAHU: AUTUMN 1981 -- Con.

1/ Among the 25 metropolitan areas for which separate indexes were reported, Honolulu ranked second at all three levels (Anchorage ranked first at all three levels).

2/ Housing includes shelter, housefurnishings and household operations. The higher budget also includes an allowance for lodging away from Oahu.

3/ The average costs of shelter were weighted by the following proportions: lower budget, 40 percent living in rented dwellings; intermediate budget, 35 percent in rented dwellings; higher budget, 30 percent in rented dwellings.

4/ Includes average contract rent, heating fuel, gas electricity, water, specified equipment, and insurance on household contents.

5/ Includes property taxes, insurance on house and contents, water, refuse disposal, heating fuel, gas, electricity, specified equipment, and home repair and maintenance costs. Assumes all mortgage payments have been completed prior to retirement.

6/ Based on 45 percent of the lower budget families, 60 percent of the intermediate budget families, and all of the higher budget families owning automobiles.

7/ Includes reading, recreation, tobacco products, alcoholic beverages, and miscellaneous expenditures.

8/ Includes gifts and contributions. The higher level also includes an allowance for life insurance.

1/ Based on access to military commissary and exchange facilities and type of housing occupied. "Local retail" refers to Federal employees who purchase goods and services from private retail establishments; "commissary, PX," to Federal employees who have unlimited access to and who use military commissary and exchange facilities. "Private housing" refers to Federal employees who occupy housing units that are privately owned or rented; "Federal housing," to Federal employees who occupy units owned or leased by a Federal agency.

2/ Washington, D.C., living costs=100. Based on a survey of comparative costs for Federal employees in 1983.

3/ Authorized allowance rate, expressed as a percentage differential, effective October 2, 1983.

## Section 14

# ELECTIONS

This section presents data on the number and characteristics of election districts, registered voters, votes cast, campaign expenditures, elected officials, and legislative bills.

About 405,000 persons were registered to vote in the general election of November 2, 1982, and more than 325,000 actually voted. The number voting amounted to 45 percent of the 716,000 Hawaii residents of voting age at that time. The latter figure included numerous aliens, inmates of mental and penal institutions, and members of the armed forces and their dependents, groups that are either ineligible or unlikely to vote in Island elections. Among registered voters, females outnumbered males and Democrats were far more numerous than Republicans. Campaign expenditures for the 1982 primary and general elections (other than the presidential race) exceeded \$10 million.

Hawaii has 2 Congressional, 25 Senatorial, 51 Representative, and 9 Councilmanic districts. It also contains 15 Soil Conservation districts, 28 active Neighborhood Board districts, and 299 election precincts.

Elective offices in Hawaii include the President and Vice President, 2 U.S. Senators, 2 U.S. Representatives, the Governor and Lieutenant Governor, 25 State Senators, 51 State Representatives, and various county officials. The minimum voting age is 18 years.

The 1983 State Legislature, with 76 members, included 59 males, 34 persons under 40 years of age, 29 persons of Japanese ancestry, 14 persons born in places other than Hawaii, and 63 Democrats.

In its 1983 session, the State Legislature considered 3,119 bills; 311 were passed and 301 became law. The Legislature also considered 1,073 resolutions, of which 411 were adopted.

The official results of primary, general, and special elections are published by the Office of the Lieutenant Governor. Additional information is often available from the various County clerks. Earlier figures for Hawaii appear in Historical Statistics of Hawaii, Section 24. National statistics appear in the Statistical Abstract of the United States: 1982-83, Section 16.

## Section 15

# BANKING, INSURANCE, AND BUSINESS ENTERPRISE

Statistics in this section relate to banks and other financial institutions, stocks and bonds, insurance, fires, and business firms.

There were ten banks with 181 branches, eight savings and loan associations with 153 branches, four trust companies, and 78 industrial loan or small loan licensees with 230 branch offices in Hawaii as of December 31, 1982. Deposits in Island banks reached \$5.5 billion in mid-1982, compared with \$2.0 billion a decade earlier. Assets of savings and loan associations stood at \$4.7 billion in mid-1982, more than four times their 1972 level. There were 147 credit unions with combined assets of \$936 million at the end of 1982.

Approximately 174,000 Hawaii residents held shares in U.S. public corporations or investment companies in 1981.

Life insurance in force in Hawaii at the end of 1981 amounted to \$21.3 billion, more than twice the figure reported ten years earlier. For all 640 insurance companies doing business in the Islands, Hawaii premiums amounted to \$755 million in 1981 and losses, claims, and benefits paid came to only \$353 million. Oahu fire losses amounted to \$11 million in fiscal 1982. Persons covered by the two major prepaid health insurance plans as of December 31, 1982, numbered 650,000, with membership dues of \$289 million.

By mid-1982, more than 38,000 corporations and partnerships were registered to do business in Hawaii: 26,400 local ("domestic") corporations, 3,700 out-of-State ("foreign") corporations, and 8,200 partnerships. Business establishments with one or more employees in 1981 numbered 21,264; 108 had 250 or more employees. During fiscal 1982, 3,126 new local corporations were formed and 1,436 existing local corporations were dissolved or merged. Business receipts of corporations in 1979 exceeded \$13 billion; business receipts of proprietorships in the same year amounted to \$1.05 billion. Hawaii's largest corporation, Amfac, Inc., reported 1982 sales of \$2.2 billion, with a net profit of \$34 million.

Sources for statistics on these subjects include the Hawaii State Department of Commerce and Consumer Affairs (specifically its Bank Examination, Insurance, and Business Registration Divisions), the State Department of Taxation, the Honolulu Fire Department, the New York Stock Exchange, the Health Insurance Institute and two major local health insurance plans, the Hawaii Credit Union League, and the annual report on County Business Patterns issued by the U.S. Bureau of the Census. Historical Statistics of Hawaii, Sections 22 and 23, provides information for earlier periods. Comparable Mainland data appear in Sections 17 and 18 of Statistical Abstract of the United States: 1982-83.

## Section 16

# COMMUNICATIONS

This section presents statistics on the usage, finances, and operations of the various communications media: postal service, telephone, telegraph, radio, television, newspapers and periodicals, and books.

Hawaii is served by all major communications media. In 1982 it had 76 post offices handling 290 million pieces of mail and accounting for postal receipts in excess of \$77 million. There were 445,000 telephone lines in service, 323,000 telephone homes, about 2 billion local calls originated, 12 million completed interisland calls (in 1981), and 32 million incoming and outgoing transpacific calls (in 1980). Telegraph messages to and from Hawaii in 1981 totaled 196,000. The 45 commercial, public and educational radio stations in the Islands early in 1982 included 29 on the regular broadcast band and 16 FM stations. The State also had 16 television stations (14 commercial and 2 public), including satellites but excluding translators. Ten cable TV companies served 165,000 subscribers. An estimated 97 percent of all households had television sets, and evening programs in May 1983 were watched by a combined average of 168,000 households. Island publishers printed eight daily newspapers, numerous magazines and other periodicals, and a wide diversity of books. Newspaper circulation reported by the two English-language dailies on Oahu averaged 198,000 in 1982-1983, compared with 202,000 a decade earlier.

The major sources for statistics on communications are the reports and records of the U.S. Postal Service, Federal Communications Commission, Division of Consumer Advocacy and CATV Division of the Hawaii State Department of Commerce and Consumer Affairs, Hawaiian Telephone Company, Audit Bureau of Circulations, A. C. Nielsen Co., and Hawaii Media Guide. Earlier figures appear in Historical Statistics of Hawaii, Section 18. Data on communications for other States and for the nation as a whole are carried in Statistical Abstract of the United States: 1982-83, Section 19.

Table 396.-- POSTAL SERVICE: 1972 TO 1982

[For fiscal years ended June 30 through 1976 and September 30 thereafter.]

NA Not available.

1/ The number of local calls is affected as central offices are being converted to Electronic Common Control (ECC). ECC records call attempts after the first digit is dialed. Non-ECC offices record the call attempts when the handset is lifted. Also significant in 1981 were an estimated 17 million fewer calls due to the implementation of Directory Assistance Charging. Because of these fundamental changes in data collection, more recent figures are not comparable to earlier years.

2/ As a result of deregulation of the telephone industry, these series became subject to disclosure rules after 1980 or 1981, and regular publication of annual data was suspended.

3/ Excludes uncollectables.

4/ Includes calls paid in Hawaii and elsewhere.

Source: Hawaiian Telephone Company, records; Hawaii State Department of Commerce and Consumer Affairs, Division of Consumer Advocacy, records.

## Section 17

# ENERGY AND SCIENCE

This section presents statistics on energy production and consumption, the electric and gas utility industries, research and development, and scientific resources.

Total energy consumption in 1981 amounted to 237 trillion British thermal units, compared with 219 trillion BTU a decade earlier. Transportation accounted for 52 percent of the 1981 total.

Electricity sales exceeded 6.3 billion kilowatt-hours in 1982, a total that has doubled since 1968. Manufactured gas sales reached 32.2 million therms in 1982, eight percent below the figure five years earlier. Residential rates in 1982 averaged 12.3 cents per kilowatt-hour and \$1.73 per therm, both well above the corresponding rates only a few years earlier. Average residential use (6,654 kWh and 218 therms in 1982) has declined significantly in recent years. By 1981, almost seven percent of the housing units in the State had solar heating devices.

The liquid fuel tax base for 1982 was approximately 893 million gallons, compared with 825 million in 1974 and 755 million in 1970. The 1982 total included 309 million gallons of gasoline, 474 million of aviation fuel, and 106 million of diesel oil. The average price for unleaded gasoline rose from 69.6 cents per gallon in January 1976 to \$1.633 six years later, then fell to \$1.450 by June 1983.

The State is well served with scientific resources. A 1976 inventory by DPED reported 384 companies and agencies with research or scientific capabilities. Employment in these organizations was more than 34,000. Federal research and development obligations in Hawaii approached \$50 million in 1981. Thirty-one patents were granted to Hawaii residents in 1982.

Information on energy and science can be obtained from reports and records of the U.S. Department of Energy, U.S. Patent and Trademark Office, National Science Foundation, Hawaii State Department of Taxation, Hawaii State Department of Commerce and Consumer Affairs and its Division of Consumer Advocacy (formerly the Department of Regulatory Agencies, Public Utilities Division), and individual utility companies. Detailed statistics on energy consumption appear in Hawaii Integrated Energy Assessment, Vol. IV, Energy Data Handbook, published by the State Energy Office of the Department of Planning and Economic Development in 1980. Hawaii's Scientific Resources, 1977 Directory, issued by the DPED in 1977, contains information on scientific organizations and facilities in the Islands. Historical Statistics of Hawaii, Section 19, presents data for earlier years. Data for the nation as a whole can be found in the Statistical Abstract of the United States: 1982-83, Sections 20 and 21.

1/ Includes only utility production for 1960-1963 and industrial and utility production for 1964 and thereafter.

2/ Consumed at utilities to produce electricity.

3/ Coal and nuclear power.

Z Represents small, non-zero value.

1/ Totals may not equal sum of components due to independent rounding.

2/ Includes industrial and utility production.

3/ Consumed at utilities to produce electricity.

4/ Coal, natural gas (dry), and nuclear power.

1981 .....	237.2	23.0	18.8	71.4	123.9	69.9

1/ Totals do not include small quantities of energy sources for which consistent historical data are not available, such as solar energy obtained by the use of thermal and photovoltaic collectors; wind energy; and geothermal, biomass, and waste energy other than that consumed at the electric utilities.

2/ Data include power from electric utilities, including electrical energy losses incurred in the generation and transmission of electricity.

3/ Energy input at electric utilities. Distributed among the other four sectors.

## Section 18

# TRANSPORTATION

This section presents statistics relating to public roads, motor vehicles, bicycles, traffic accidents, local public transit, civil aviation, harbors, and water traffic.

Motor vehicle registration in Hawaii increased from 455,000 in 1972 to 672,000 in 1982. Vehicle miles rose during the same period from 3.8 billion to 6.0 billion. Hawaii residents purchased 37,000 new passenger cars in 1982 and scrapped or shipped out approximately 13,000. By the end of 1982, 561,000 licensed drivers had access to 4,060 miles of streets and highways throughout the State. Bus passengers carried by the Honolulu Mass Transit Lines increased from 31 million in 1972 to 74 million in 1982. Registered bicycles numbered 108,000 in 1974 and 62,000 in 1982.

Most scheduled interisland travel is now by air. In 1982, airlines and air taxis reported 7.3 million interisland passengers, almost two times their 1972 total, and carried 57,000 tons of cargo. The State has 8 commercial airports, 15 general aviation, military or semi-private airports, 8 civilian heliports, 3,532 active pilots, and about 623 active civil aircraft in general aviation.

Rapid growth is similarly evident in transpacific travel. Although surface passenger arrivals dropped from 54,000 in 1959 to 542 in 1982, air arrivals increased during the same 24-year span from 224,000 to 4.7 million. Overseas cargo received in the State in 1980 amounted to 57,000 tons by air and 9.4 million tons by ship.

Undocumented State-registered vessels as of December 31, 1982 numbered 12,999, compared with 10,250 in 1972. Median length was 18 feet, and four-fifths were stored on land. There were also 1,225 or so documented vessels in the State in 1982, almost double the 1972 total.

The chief source for transportation statistics is the Hawaii State Department of Transportation and its Highways, Harbors and Airports Divisions. Other sources include the U.S. Coast Guard, Civil Aeronautics Board, Federal Aviation Administration, Army Corps of Engineers, Honolulu Department of Transportation Services and Department of Data Systems, County finance departments, Cardinal Mailing Services, and individual transportation companies. Data for the entire period of record appear in Historical Statistics of Hawaii, Section 17. Similar statistics for other areas are reported in Statistical Abstract of the United States: 1982-83, Sections 22 and 23.

<sup>1/</sup> Data limited to the Port of Honolulu. The decline in passenger volumes after 1977 reflects the termination of service by the Mariposa and Monterey on April 2, 1978.

<sup>2/</sup> Scheduled interisland passenger service by hydrofoil was begun June 15, 1975 and terminated January 15, 1978. Interisland cruise ship service was begun June 21, 1980. The 1978 figure is an estimate based on the daily average for 1977.

Source: Transpacific passengers, 1979 and later years, from TheoDavies Marine Agencies, Inc., records; interisland passengers, 1980 and later years, from American Hawaii Cruises, records; other data from Hawaii State Department of Transportation, Harbors Division, records.

## Section 19

# AGRICULTURE

This section presents statistics on agricultural land, farms, crops, livestock, dairy products, and poultry. Related information appears in Section 6 (on land use), 11 and 15 (agricultural employment and earnings), and 22 (food processing).

There were 4,400 farms in Hawaii as of 1982, with a total area of 2.0 million acres. The value of crop sales in 1982 was \$434 million, or 133 percent higher than the total for 1972. Livestock sales amounted to \$78 million, or 69 percent more than the 1972 level. Combined crop and livestock sales in 1982 ranged from \$60 million in Kauai County to \$176 million on the Big Island. Major crops were sugar (\$231 million in sales, up 97 percent over the decade), pineapple (\$99 million, or 127 percent over the 1972 total), flowers and nursery products (\$31 million, or 483 percent more than in 1972), and macadamia nuts (\$27 million, up 788 percent). Diversified crops, defined as all crops other than sugar and pineapple, rose from \$25 million in 1972 to \$104 million in 1982, or approximately 315 percent. About 650 farms sold \$31 million of flowers and nursery products in 1982, chiefly anthuriums, potted foliage, and orchids. Important products of livestock farms as of 1982 included cattle (\$28 million in sales), milk (\$22 million), and eggs (\$15 million). In 1982, Hawaii produced 37 percent of the fresh market vegetables consumed locally, 24 percent of the fresh market fruits, 30 percent of the beef and veal, 24 percent of the chickens, none of the rice, and 76 percent of the eggs.

Aquaculture has been growing in importance in recent years. Freshwater prawn production amounted to 317,000 pounds in 1982, with a value of more than \$1.5 million. Ten years earlier the corresponding figures had been only 4,300 pounds and \$15,000.

Statistics on Hawaiian agriculture exclude pakalōlō (marijuana) and other illicit plants. Authorities confiscated \$31 million worth of marijuana in 1982, but the proportion escaping detection is unknown.

Important sources for data on agriculture include the United States Census of Agriculture, generally conducted at five-year intervals, the annual report on Statistics of Hawaiian Agriculture issued by the Hawaii Agricultural Reporting Service, and data compiled by the Hawaiian Sugar Planters' Association, Pineapple Growers Association of Hawaii, and Aquaculture Development Program of the Department of Land and Natural Resources. Agricultural data for earlier years are summarized in Historical Statistics of Hawaii, Section 13. National statistics appear in Section 24 of the Statistical Abstract of the United States: 1982-83.

Table 505.-- AGRICULTURAL, URBAN AND OTHER LAND USE, FOR THE SIX LARGEST ISLANDS: 1978-1980 -- Con.

1/ These data differ somewhat from the official statistics compiled from surveys of farmers and ranchers and published in Statistics of Hawaiian Agriculture (annual), cited elsewhere in this section.

2/ Unidentified field crops; also includes flowers and nursery.

3/ Includes areas used for rotation and replanting.

4/ Includes unidentified orchards.

5/ Includes dairy grazing areas.

6/ Unidentified livestock, also including grazing.

7/ Includes Rural District lands.

8/ Includes Conservation District lands.

Source: Total area from State Land Use Commission data in The State of Hawaii Data Book 1981, table 138. Agricultural and urban land use estimated by the Hawaii State Department of Agriculture from U.S. Geological Survey orthophoto quad sheets, 1977-1978, as field checked by the U.S. Soil Conservation Service, Hawaii, to December 1980. Non-agricultural and non-urban balance calculated as residual.

## Section 20

# FORESTS, FISHERIES, AND MINING

This section presents data on forests and forest products, commercial fishing, and mining and mineral products.

The most recent available statistics show 1.2 million acres of forest and water reserve and 948,000 acres of commercial timberland in the State, most of it on the Big Island. About 46,000 acres had been planted in eucalyptus and other species of trees by mid-1982. Forest products harvested in 1977 had a value of \$3.5 million, including \$2.3 million from logs for fiber. More than 250 forest and brushland fires burned 6,900 acres in fiscal 1982.

The commercial fish catch in fiscal year 1981 amounted to 9.2 million pounds and had a value of \$11 million. Ahi (Yellowfin) accounted for about 30 percent of the total value. Other important species are aku (Skipjack), mahimahi, opakapaka, ono, akule, opelu and Pacific Blue Marlin. Commercial fishermen numbered 2,525; they operated some 1,300 fishing vessels, serving about 126 fishery wholesaling and processing establishments.

The value of mineral production reached \$44 million in 1982, most of it in cement (\$16 million) and stone (\$24 million). The 1982 total was well below the all-time high reached in 1979.

Important sources of data on these subjects are the United States Census of Agriculture, United States Census of Mineral Industries and reports and records of the U.S. Bureau of Mines, National Marine Fisheries Service, and Hawaii State Department of Land and Natural Resources, Aquatic Resources Division and Forestry and Wildlife Division. Historical Statistics of Hawaii, Section 14, summarizes the data for earlier periods. Comparable Mainland statistics are reported in the Statistical Abstract of the United States: 1982-83, Sections 25, 26 and 27.

Table 520.-- MINERAL INDUSTRIES : 1958 TO 1977 - Con.

(D) Withheld to avoid disclosing operations of individual companies.

1/ In 1977, 1972, and 1967, data for companies without paid employees were excluded from the census of mineral industries.

2/ For crushed and broken stone, sand and gravel, clay, and gypsum mining operations in manufacturing establishments, the number of production, development, and exploration workers was estimated from reported figures for hours worked. No data were obtained on other employees at such operations; hence, the same employment and payroll figures are included for all employees as for production, development, and exploration workers.

3/ For crushed and broken stone, sand and gravel, clay, and gypsum, mining operations in manufacturing establishments, includes the estimated value of minerals produced and used in the same establishment in making manufactured products. For all years, represents gross value of shipments and contains some duplication due to the transfer of crude minerals from one establishment to another for preparation.

## Section 21

# CONSTRUCTION AND HOUSING

This section presents statistics on construction activity and costs, the size and composition of the housing inventory, occupancy of housing and office buildings, sales, and residential financing.

There were 16,816 building permits issued in 1982, with an estimated value of \$704 million. The total included \$328 million for private residential construction and \$325 million for private nonresidential structures. The value of government construction contracts awarded was \$393 million. Construction put in place, as indicated by the contracting tax base, totaled \$696 million in 1972 and \$1.3 billion in 1982. The value of land transfers in fiscal 1983 was \$3.0 billion. Mortgage loans outstanding at the end of 1981 amounted to \$7.5 billion. The July 1983 construction cost index for Honolulu (1967=100) was 333.4 for single-family residences and 351.6 for high-rise buildings.

The number of housing units in the State increased from 251,000 in 1973 to 353,000 in 1983. Owner occupied units numbered 106,000 in 1973 and 144,000 in 1983; the latter total included 36,000 on leased land. Condominium units, first authorized in 1961, numbered 98,000 at the end of 1982. Military and public housing accounted for 26,000 units as of 1983. Housing was in short supply throughout most of the past decade: on Oahu, the vacancy rate in March 1983, according to the Federal Home Loan Bank of Seattle, was only 1.3 percent. The average selling price of single family homes on Oahu during 1982, based on Multiple Listing Service data, was \$184,000; for condominium units it was \$107,000. The median contract monthly rent for the State rose from \$120 in 1970 to \$271 in 1980, and the median value of owner occupied single-family units increased from \$35,100 to \$118,100.

The principal sources for these data are the 1970 and 1980 U.S. Censuses of Housing, postal vacancy surveys issued by the Federal Home Loan Bank of Seattle, various series compiled by State and County agencies (primarily the Hawaii Housing Authority, Hawaii State Department of Planning and Economic Development, Department of Commerce and Consumer Affairs, Department of Taxation, and Bureau of Conveyances, and the four County building departments), the construction cost indexes prepared by the First Hawaiian Bank, and the Honolulu Board of Realtors reports on Multiple Listing Service activity. Many of these series are summarized in reports published by the Bank of Hawaii (particularly Construction in Hawaii, issued annually) and the First Hawaiian Bank. Persons interested in figures for earlier periods should consult Historical Statistics of Hawaii, Section 15. Mainland statistics appear in Section 28 of Statistical Abstract of the United States: 1982-83.

1983 ...	353,393	108,761	35,586	183,228	19,304	6,514

NA Not available.

1/ As of April 1.

2/ As indicated by the number of taxpayers claiming home exemptions. The number of owner occupied housing units reported by the U.S. Census of Housing is somewhat higher than the corresponding number based on taxpayer home exemptions, chiefly because of differences in definitions. Data for 1977-1983 refer to January 1; data for 1970-1976, to July 1.

3/ Calculated as a residual after accounting for the known components, some of which pertain to dates other than April 1, and thus not attributable to any specific date.

4/ As of April 1. Data include housing units leased from private owners.

Source: Hawaii State Department of Planning and Economic Development, Housing Unit Estimates for Hawaii, 1970-1983 (Statistical Report 162, August 15, 1983), table 3.

Table 539.-- GENERAL HOUSING CHARACTERISTICS, BY COUNTIES: 1980 -- Con.

1/ Includes Kalawao County (121 housing units), not shown separately in this table.

2/ Estimated market value of property (house and lot), for one-family houses on less than 10 acres. The median value of owner-occupied condominium units was \$98,600.

3/ Excluding no cash rent.

4/ Units temporarily occupied, or intended for occupancy, entirely by persons who have a usual residence elsewhere are classified as vacant. Shared ownership or time-sharing condominiums are classified as "vacant, held for occasional use."

Table 563. -- SEATING CAPACITIES OF SELECTED STADIUMS, THEATERS,  
CHURCHES, AND OTHER FACILITIES ON OAHU: JUNE 1983 -- Con.

1/ Capacity in football configuration.

2/ Capacity in boxing configuration.

3/ Capacity in concert configuration.

4/ As of 1979. In 1922, when the Hawaii Theater was opened,  
its capacity was 1,760, the greatest of any theater in the Territory.

5/ Destroyed by fire in July 1982. A new facility is expected  
to be completed in February 1984 with a seating capacity of  
approximately 750.

Source: Compiled by the Hawaii State Department of Planning  
and Economic Development from the Honolulu Fire Department, Fire  
Prevention Bureau; The Hawaiian Journal of History, I (1967), pp.  
73-82; and officials of the facilities listed.

## Section 22

# MANUFACTURES

This section presents statistics on the manufacturing segment of the economy, including sugar processing and pineapple canning.

The number of manufacturing establishments in Hawaii increased from 697 in 1967 to 773 in 1972 and 949 in 1977. The value added by manufacture rose from \$326 million in 1967 to \$410 million in 1972, \$786 million in 1977, and \$1,249 million in 1980. Three-fourths of all manufacturing activity in the State in 1977 was on Oahu. Food processing — mostly sugar and pineapple — accounted for more than 44 percent of the value added by manufacture in that year. Between 1972 and 1982, the general excise and use tax base increased 54 percent for sugar processing, 49 percent for pineapple canning, and 72 percent for all other manufacturing. There were three pineapple canneries and 15 sugar mills in Hawaii in mid-1982. The production of canned pineapple fruit and juices in 1981 amounted to 18 million actual cases, well below the levels of earlier years. Sugar production in 1982 amounted to 983,000 short tons, somewhat below the level of other recent years. The value of sugar production (including commercial molasses) was \$352 million, compared with the record of \$677 million set in 1974. Important manufactures other than food processing include apparel (\$37 million in value added in 1980), printing and publishing (\$134 million), and chemicals and allied products (\$35 million).

Sources for data on this subject include the United States Census of Manufactures, most recently conducted (but not yet published) for 1982, the Annual Survey of Manufactures, and publications of the Hawaii State Department of Agriculture and Department of Taxation, Hawaiian Sugar Planters' Association, and Pineapple Growers Association of Hawaii. Historical Statistics of Hawaii, Section 16, reviews the figures for earlier years. Statistics for the nation as a whole appear in Section 29 of the Statistical Abstract of the United States: 1982-83.

Table 564.--MANUFACTURES: 1971 TO 1981

Year	All employees		Production workers

## Section 23

# DOMESTIC TRADE AND SERVICES

This section presents statistics relating to retail and wholesale trade; hotels; and selected personal, business, automotive, repair, and amusement services.

These activities have undergone rapid growth in recent decades, in part because of higher prices. Retail sales increased from \$1.1 billion in 1967 to \$1.9 billion in 1972 and \$3.3 billion in 1977. Wholesale sales rose from \$1.0 billion in 1967 to \$2.6 billion in 1977. Hotels, amusements, and other services reported receipts of \$1.3 billion in 1977, compared with \$310 million in 1967. General excise and use tax base data for more recent years indicate continued increases; between 1977 and 1982, the retailing tax base rose 63 percent, the wholesaling base by 61 percent, and the base for services by 74 percent. Major retail concentrations include Ala Moana Center, Waikiki, Pearlridge Center, and downtown Honolulu. The 19 department stores on Oahu reported sales of \$425 million in 1980. In addition to civilian retail outlets, there are 152 commissaries, exchanges, clubs, and food services maintained by the armed forces; these facilities had sales of \$405 million in 1982.

Growth has been especially rapid for hotels. The number of units in the State rose from 6,800 in 1959 to 33,000 in 1971 and 59,000 in June 1983. There were 430 hotels, motels and apartment-hotels in the State on the latter date, including 270 on the Neighbor Islands. A fourth of all transient units were in condominium structures. Occupancy rates averaged 77.7 percent in Waikiki and 60.0 percent on the Neighbor Islands during 1982. The average daily room rate was \$51.78 in 1982. The hotel payroll in 1982 totaled \$291 million, compared with \$94 million ten years earlier.

Sixty-six feature motion pictures and television specials and series were filmed in Hawaii in 1982, accounting for local expenditures of \$32 million.

The major source of these data is the United State Census of Business, most recently conducted for 1982. Statistics on the retailing, wholesaling, and services tax bases are available from the Hawaii State Department of Taxation. Data on hotel room counts, occupancy and other characteristics are published by the Hawaii Visitors Bureau and the firm of Pannell Kerr Forster. The Hawaii Film Office in the Department of Planning and Economic Development compiles data on motion picture and television production. A summary of figures on trade and services in earlier years appears in Historical Statistics of Hawaii, Section 20. The Statistical Abstract of the United States: 1982-83, Section 30, presents similar data for other states and the nation as a whole.

Table 576.-- RETAIL TRADE, WHOLESALE TRADE, AND SELECTED SERVICES:  
1963 TO 1977

(D) Withheld to avoid disclosing data for individual companies.

(V) Insufficient coverage.

(NA) Not available.

<sup>1/</sup> Hotels, motels, tourist courts, and motor hotels in Hawaii (with or without payroll) numbered 236. Of the 198 with payroll, the principal class of customer was reported as commercial for 19, tourist for 165, group/convention for 9, and other or unknown for 5.

<sup>2/</sup> Guestrooms in hotels in business at the end of the year numbered 35,647, including 35,443 for transient guests and 204 for residential guests.

<sup>3/</sup> The Oahu total for larger hotels exceeds the Statewide total, probably because of the method for expanding data from partial returns.

Source: U.S. Bureau of the Census, 1977 Census of Service Industries, Subject Series, Hotels, Motels, and Other Lodging Places, SC-77-S-2 (April 1981), tables 1, 2, 3, 5, 10, and 15.

## Section 24

# FOREIGN AND INTERSTATE COMMERCE

This section includes data on the flow of goods, services, and capital between Hawaii and the rest of the world, with particular emphasis on trade and investment involving foreign countries.

Imports to Hawaii from foreign nations rose from \$244 million in 1972 to \$1.7 billion in 1982. Exports to foreign countries amounted to only \$60 million in 1972, but by 1982 reached \$219 million. (These figures, it should be noted, refer to merchandise imports and exports through the Honolulu Customs District. They do not necessarily represent exports of commodities originating in Hawaii, nor imports for direct consumption within the State.)

Trade with the Mainland United States has similarly risen in the past decade. Merchandise received from the Mainland increased from \$887 million in 1968 to \$2.2 billion in 1978, the most recent year available. Merchandise exported to the Mainland rose from \$329 million in 1968 to \$817 million in 1974, then slipped back to \$495 million in 1978.

Among the foreign nations, Hawaii's leading trading partners in 1982 were Indonesia for imports and Japan for exports. Imports from Indonesia amounted to \$586 million, or 34 percent of the total, while exports to Japan reached \$40 million or 18 percent of all foreign exports. About 39 percent of all imports for consumption were petroleum and natural gas products and integrated circuits.

Honolulu Foreign Trade Zone No. 9 handled merchandise valued at \$52.5 million in fiscal 1982. Merchandise handled by Subzone No. 9A, the PRI refinery, was valued at \$1.76 billion, almost all of it in petroleum and petroleum products.

Foreign-owned U.S. firms in Hawaii operated 263 establishments in 1980, and employed 11,738 persons with an annual payroll of \$157 million. Foreign investments in Hawaii exceeded \$635 million in 1982.

Sources for statistics on interstate and foreign commerce include the U.S. Bureau of the Census (for foreign trade and foreign-owned firms), the Bank of Hawaii (for discontinued series on interstate trade and balance of payments), Foreign Trade Zone No. 9 and Subzone No. 9A, and the Hawaii International Services Agency. Further information appears in cargo data by origin and destination, compiled by the Army Corps of Engineers and cited in Section 18.

Comparable data for the nation as a whole appear in Section 31 of Statistical Abstract of the United States: 1982-83. Long-term Island trends are summarized in Historical Statistics of Hawaii, Section 21.

Table 608.-- INTERSTATE TRADE:  
1968 TO 1978

[In millions of dollars. Compilation  
of these statistics was discontinued  
after 1978.]

Year	Imports	Exports
1968 .....	886.7	329.1
1969 .....	1,029.1	321.7
1970 .....	1,194.1	339.8
1971 .....	1,201.4	365.7
1972 .....	1,220.0	350.2
1973 .....	1,563.5	381.8
1974 .....	1,866.2	817.0
1975 .....	1,773.9	522.4
1976 .....	1,756.3	415.2
1977 .....	1,982.7	471.0
1978 .....	2,185.5	494.7

Source: Bank of Hawaii, Hawaii  
1982, Annual Economic Review (1982),  
p. 44. Compiled from reports of major  
shippers and carriers, for commodities  
moving between Hawaii and the Mainland.

Table 609.-- FOREIGN TRADE THROUGH THE HONOLULU CUSTOMS DISTRICT:  
1972 TO 1982

[Value, in millions of dollars, of U.S. imports and exports entered or exported through the Honolulu Customs District. The data may include imports intended for consumption on the Mainland and exports originated on the Mainland.]

Year	General imports <u>1/</u>	Imports for consumption <u>1/</u>	Exports of foreign and domestic merchandise <u>2/</u>
1972 .....	244.3	227.5	60.4
1973 .....	340.1	304.9	72.8
1974 .....	645.3	605.5	115.2
1975 .....	784.4	757.6	95.7
1976 .....	915.1	876.5	66.2
1977 .....	1,038.2	988.1	98.3
1978 .....	1,184.5	1,126.4	137.8
1979 .....	1,334.6	1,238.5	176.1
1980 .....	1,842.0	1,721.4	174.3
1981 .....	1,982.2	1,525.4	237.7
1982 .....	1,732.7	1,509.4	219.0

1/ Customs value basis. Excludes vessels under their own power or afloat and shipments valued under \$251.

2/ Totals are on f.a.s. (free alongside ship) basis.

Source: U.S. Bureau of the Census, U.S. Foreign Trade: Highlights of Exports and Imports, FT 990 (through 1973) and Highlights of U.S. Export and Import Trade, FT 990 (1974 and later), cumulative totals in December issues.

Table 610.-- FOREIGN TRADE THROUGH THE HONOLULU CUSTOMS DISTRICT, BY METHOD OF TRANSPORTATION: 1982

[See headnote to preceding table.]

Category and method of transportation	Value 1/ (million dollars)	Shipping weight (million pounds)
General imports, all methods 2/ .....	1,732.7	(NA)
Vessel .....	1,036.1	6,554.6
Air .....	677.8	16.6
Imports for consumption, all methods 3/ ....	1,509.4	(NA)
Exports, all methods 2/ .....	219.0	(NA)
Vessel .....	113.0	1,053.5
Air .....	67.9	16.7

NA Not available.

1/ Customs value basis for imports; f.a.s. (free alongside ship) value basis for exports. See source for definitions.

2/ Includes categories not tabulated by method of transportation, not shown separately.

3/ Not available by method of transportation.

# BIBLIOGRAPHY

This volume is the seventeenth in a series published by the Hawaii State Department of Planning and Economic Development and its predecessor agencies. The first was Statistical Abstract of Hawaii, 1962, issued by the Department of Planning and Research in 1962. After a four-year hiatus, updated versions titled The State of Hawaii Data Book were published by the Department of Planning and Economic Development in 1967, 1968, and annually beginning in 1970. Most of the volumes issued prior to the present edition are now out of print, but copies can be consulted in the DPED Library, Hawaii State Library, University of Hawaii and community college libraries, Honolulu Municipal Reference Library, and other collections throughout the State.

Additional information regarding specific statistical sources can be found in the introductory statements to each section of the Data Book, in footnotes and source references to the various tables, and in other DPED publications. Three of these DPED reports cover statistical sources in considerable detail: Statistics in Hawaii: 34 Papers Prepared for the Hawaii Statistical Reporting System Workshop, February 18-20, 1970, at Waikiki (1970), Proceedings of the Conference on Socio-Environmental Indicators, March 15-17, 1971, Honolulu, Hawaii (1971), and Inventory of Hawaii Planning Information (1973). The first two are reports of statistical symposia. The third is a 164-page reference work prepared for the Hawaii Urban Planning Information Center, containing detailed geographic and subject-matter indexes and source listings. These reports are now out of print, but copies can be consulted in most Hawaii libraries.

Although most of the series in the Data Book are shown only for recent years, earlier figures in many cases can be found in Historical Statistics of Hawaii, by Robert C. Schmitt. This book, published by the University Press of Hawaii in 1977, contains 711 pages of narrative and tables on the development of statistics in Hawaii since the 18th century. Copies are available from the University Press and various book stores for \$30.00.

Another useful publication is Statistical Sources in Hawaii: Reference Guide to Materials Available at the Hawaii State Library, compiled by Masae Gotanda and published by the Office of Library Services of the Hawaii State Department of Education in November 1978.

Privately published works of general statistical reference include Hawaii Facts and Figures and All About Business in Hawaii. Hawaii Facts and Figures is a publication of the Chamber of Commerce of Hawaii, first issued (under a different title) almost fifty years ago. The most recent edition appeared early in 1983, with statistics through 1982; copies are available from the Chamber for \$2.00. All About Business in Hawaii, 1983 is the 11th in an annual series published by Crossroads Press, Inc. The current edition costs \$3.50.

Two other privately published reports containing useful statistics are the annual economic reviews of the two largest banks in the State. The

current editions are Hawaii 1983, published by the Bank of Hawaii in the fall of 1983, and Hawaii in 1982, issued by the First Hawaiian Bank as a supplement to its bimonthly Economic Indicators for March-April 1983. Greater detail appears in Hawaii's Economic Indicators: Sources, Definitions, and Trends, published by the First Hawaiian Bank in March 1980.

The County of Hawaii, Department of Research and Development, has published its own County of Hawaii Data Book 1980, presenting 264 pages of statistics for the Big Island. This report, dated December 1980, is available for \$7.50 (postpaid, \$10.00).

A similar report for Kauai, 1982 Kauai Statistical Review: An Annual Report of the County's Economic Indicators, is issued by the Kauai Office of Economic Development. The most recent edition, presenting data for 1982, was released in 1983 and contains 22 pages of tables.

Persons interested in comparisons between Hawaii and other States or the nation as a whole should consult the Statistical Abstract of the United States and its companion volumes, the State and Metropolitan Area Data Book and County and City Data Book. The Abstract is an annual publication of the U.S. Bureau of the Census, initiated in 1878. The current edition is the 103rd, dated 1982-83; copies are available for \$15.00 (cloth) or \$11.00 (paper) from the Superintendent of Documents, U.S. Government Printing Office, Washington, D. C. 20402. The State and Metropolitan Area Data Book, 1982, also available from GPO, costs \$15.00. The County and City Data Book, most recently issued for 1977, is sold by the same agency for \$21.00. All three volumes are (or soon will be) on the shelves of most libraries.

Table A.-- PRINTING HISTORY OF THE STATE OF HAWAII DATA BOOK:  
1962 TO 1982

Edition	Number of pages	Number of tables	Price (dollars)		Printing costs (dollars)	Number of copies printed

1982 .....	596	566	5.00	10.00	15,633.00	3,000

NA Not available.

1/ The 1962 edition was titled Statistical Abstract of Hawaii, 1962. In addition, a 41-page, 57-table supplement, Historical Statistics of Hawaii, 1778-1962, was published and distributed without extra charge to persons receiving the regular edition.

2/ A 19-page supplement, State of Hawaii Census Tract Maps and Directory of Hawaii Map Sources, was included with each copy of the regular edition, and was not sold separately.

Source: DPED records.
