This report was prepared by Robert C. Schmitt, State Statistician, with the assistance of Sharon Nishi, Karen Yamashita, and Maureen St. Michel of the Hawaii State Data Center. The camera-ready copy was typed and proofread by Irene S. Fujimori, Judy F. Noda, and Helen T. Nagafuchi. All of the participating staff are members of the DPED's Research and Economic Analysis Division, headed by Dr. Richard Y. P. Joun. The maps were drawn by Stewart A. Wastell, illustrator in the DPED's Planning Division. Editing and printing arrangements were handled by the DPED's Information Office.

Copies of this report may be obtained for \$5.00 each from the Information Office on the 7th floor of the Kamamalu Building, 250 South King Street, Honolulu, or ordered from out of State by sending \$15.00 per copy (postpaid) to the DPED Information Office, P. O. Box 2359, Honolulu, Hawaii 96804.

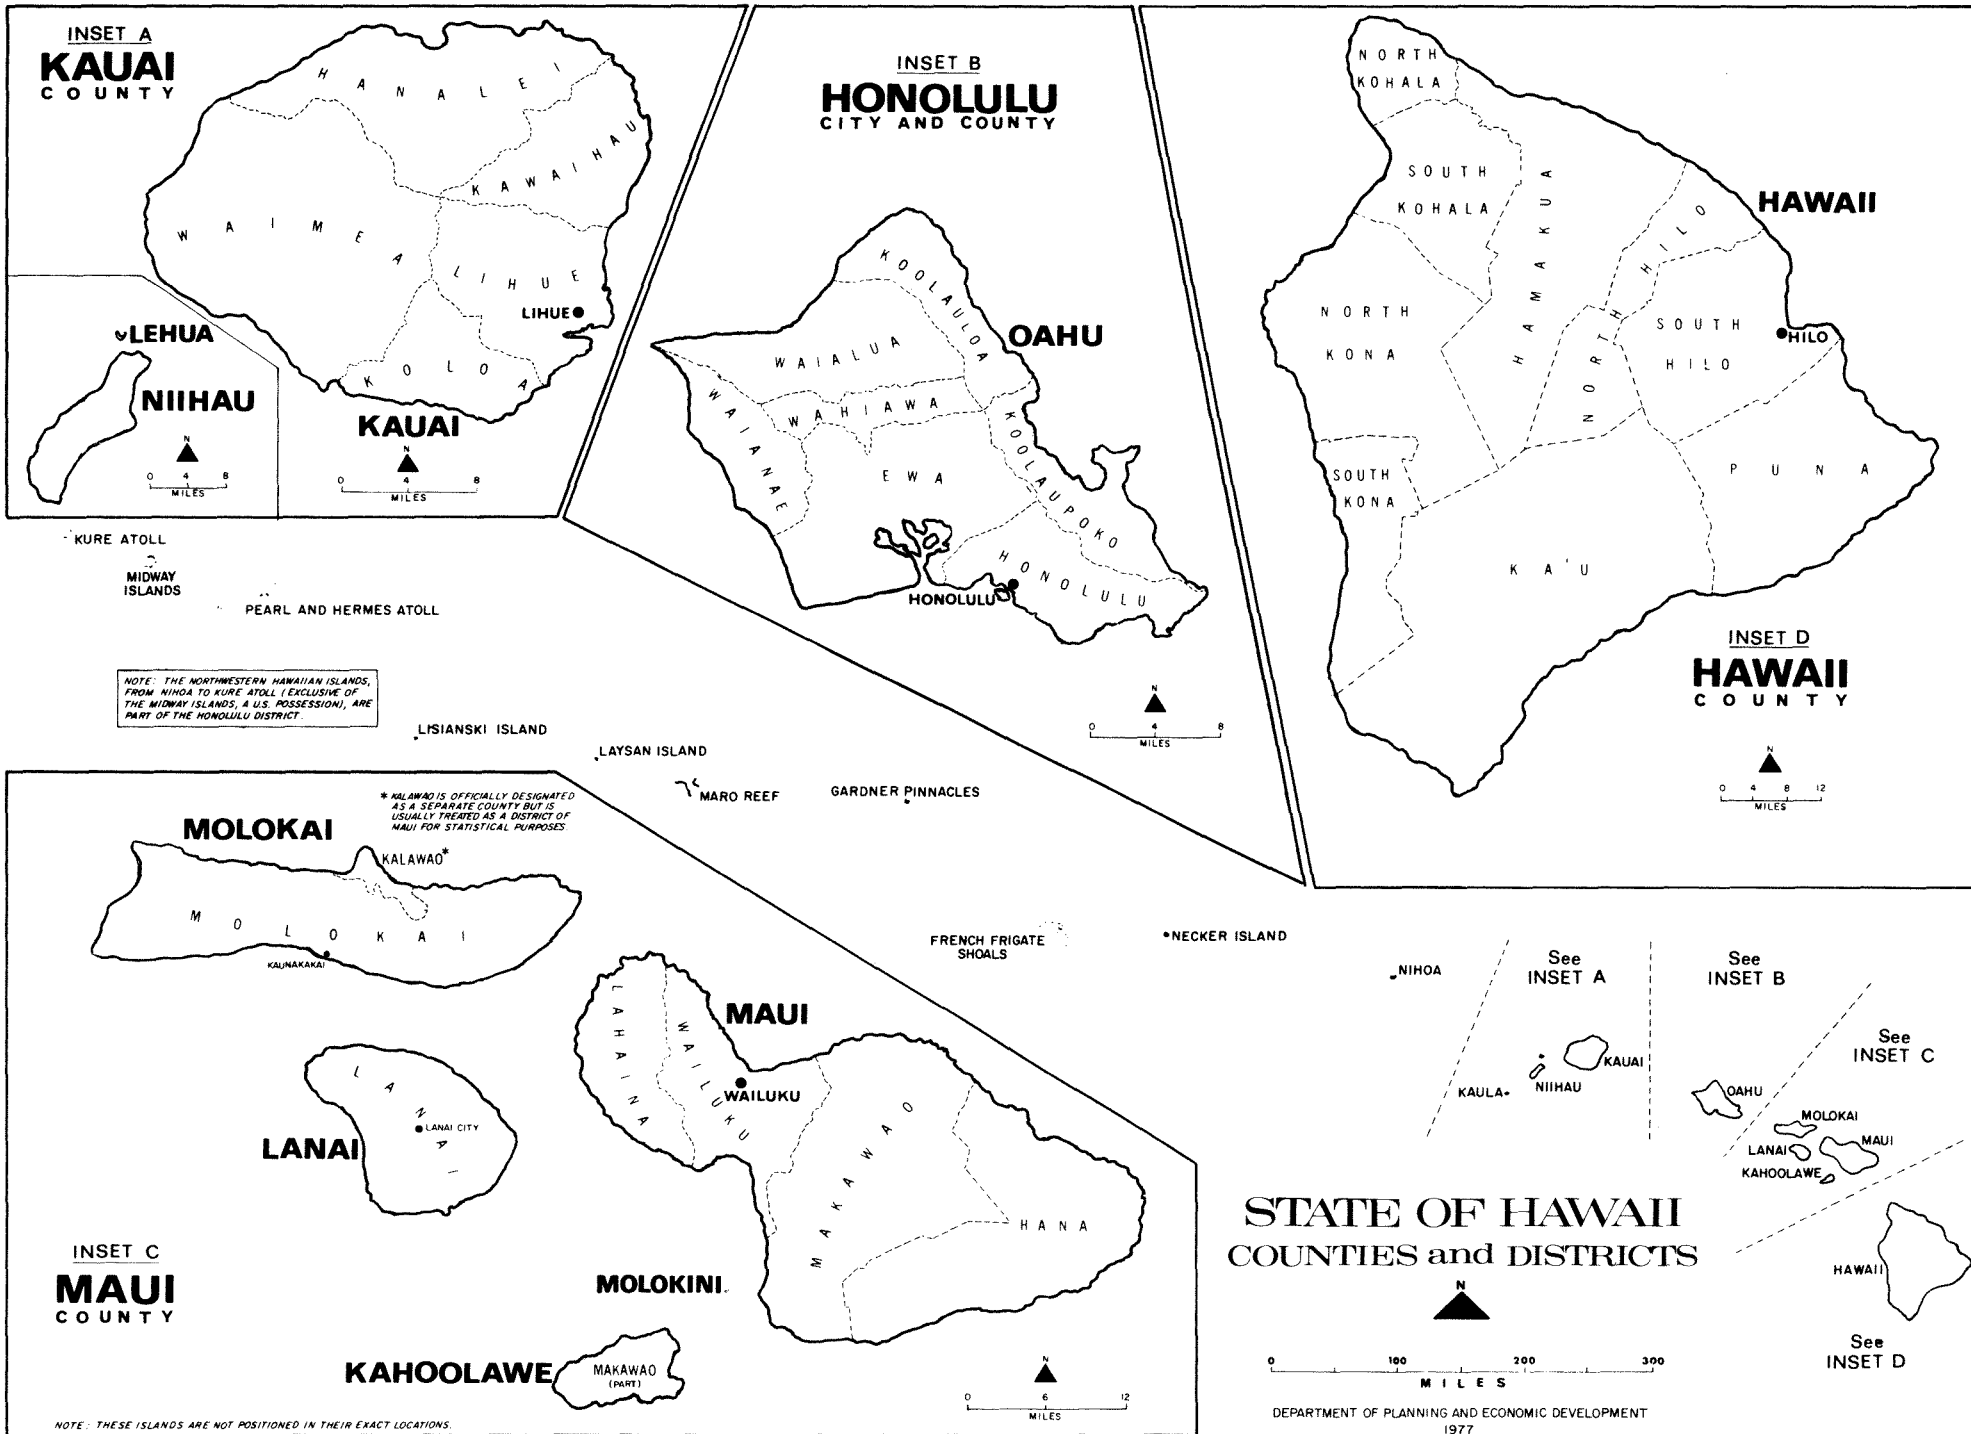

FOREWORD

By George R. Ariyoshi
Governor, State of Hawaii

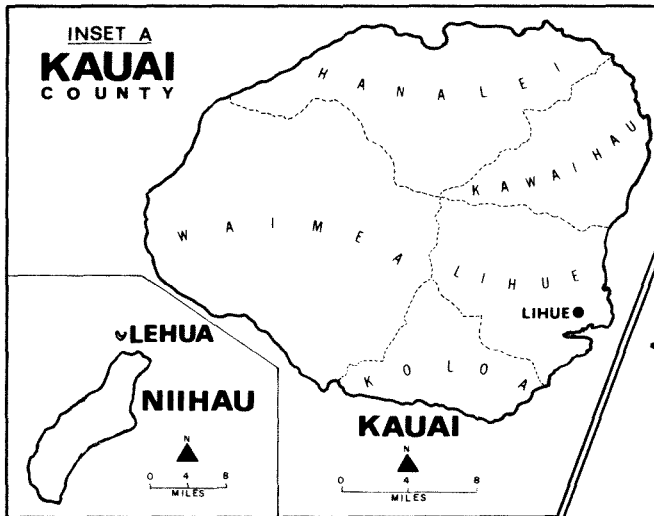

Accurate, timely and substantial information is essential to sound decision-making. The State of Hawaii has long recognized that orderly State growth and planned prosperity require a continuing, efficient organization of statistical data and other information into forms which are easily used and readily available to all who need them. This State of Hawaii Data Book 1984 is the latest example of the State Administration's constant effort to provide and improve this important service to Hawaii's citizens.

The Data Book is invaluable for Government administrators. It is vital to all agencies, companies, organizations and individuals who carry out a great variety of forms of research in the Islands and overseas. It is very useful to other citizens who have only an occasional need for accurate statistics. It is a book which, thanks to the professionalism of its compilers, can be depended upon, and upon which thousands do depend. And it is only one--although perhaps the best one--of a large number of excellent data sources which Hawaii makes available.

Through such reference works, Hawaii is able to go about its myriad tasks with confidence that its information base is sound. This State of Hawaii Data Book 1984 is one of many proofs we have that our people know what they are doing, and where they are going, and are reasonably certain they can achieve their goals.

INTRODUCTION

By Kent M. Keith
Director of Planning and Economic Development

The State of Hawaii Data Book: A Statistical Abstract is the standard official summary of statistics on the social, economic and political organization of the State. Like its long-established counterpart, the Statistical Abstract of the United States, it may be used as a convenient volume of statistical reference and as a guide to other statistical publications and sources.

The present volume, containing statistics available at the end of 1984, is the 18th such abstract to be published by the State of Hawaii. Earlier editions appeared in 1962, 1967, 1968, and annually beginning in 1970. Most of them are now out of print, but copies can be found in many high school, university and public libraries in Hawaii.

The Data Book follows closely the organization and format of the U.S. Abstract, to facilitate comparison of Hawaii data with corresponding series for the nation and other jurisdictions.

Emphasis in the Data Book is given to the most recent available State data. Historical statistics and information for Counties, islands, urban places, and smaller areas receive more limited attention. The publications cited as sources in the introductions to the various sections or at the end of each table usually contain additional statistical detail and a more comprehensive discussion of relevant definitions and concepts than can be presented here. Persons interested in more extensive information should consult these sources or write to the agencies responsible for them.

In addition to the many series presented in earlier editions, this edition presents findings of the 1982 economic censuses, greater detail from the 1980 population and housing censuses, revised and updated estimates from the Hawaii income and expenditure accounts study, and 1984 election results. Largely as a result of federal budget reductions, however, many important statistical series have been suspended or terminated. For most of these discontinued series, the most recent available information has been repeated in this edition, appropriately footnoted.

Many Federal, State, County and private organizations cooperated with our Research and Economic Analysis Division in the preparation of this report. These agencies are credited in the source references to the tables to which they contributed. Their assistance is gratefully acknowledged. Within our department, the DPED Library and Hawaii State Data Center were especially helpful.

GUIDE TO TABULAR PRESENTATION

The tables in this report generally follow the principles of tabular presentation used by the U.S. Bureau of the Census in its annual publication, Statistical Abstract of the United States, and described in Bureau of the Census Manual of Tabular Presentation, published by the Bureau in 1950. These principles have been accepted by the Department of Planning and Economic Development for use in its publications and recommended to all other State agencies for official use.

Headnotes immediately below table titles provide information important for correct interpretation or evaluation of the table as a whole or for a major segment of it.

Unit indicators ("In thousands," "In millions of dollars," etc.) are usually given as the first element of the headnote. In tables where several units are used, the unit indicators are generally given in the stub or in the column headings.

Footnotes below the bottom rule of tables give information relating to specific items, figures or symbols within the table.

Parallel vertical rules are used to the right of a total column to indicate --

- (1) that the components which follow add to the total;
- (2) in the case of derived figures, that the underlying data are additive to their total.

A dash (-) represents zero in references to absolute values. In rates and percentages, a zero (0) is used.

In many tables, details will not add to the totals shown because of rounding.

Geographic coverage should be understood as Statewide, unless otherwise indicated in the table title, headnote, boxhead, or stub. All annual statistics should be understood as referring to calendar years unless otherwise indicated.

Section 1

POPULATION

This section presents statistics on the growth, geographic distribution, and composition of the population of Hawaii, and on the number and characteristics of migrants moving to and from the State.

Provisional estimates for 1984 indicate a resident population of 1,039,000. This total is well above the 1980 census count of 964,691 and the earlier counts of 423,000 in 1940, 154,000 in 1900, and 84,000 in 1850. These censuses and estimates include members of the armed forces stationed in Hawaii and their local dependents, a group making up 12 percent of the resident total when last surveyed. The 1983 de facto population -- which included 108,000 visitors present on an average day in that year but excluded more than 11,000 residents temporarily absent -- was 1,115,000. More than three-fourths of the 1983 de facto total was on Oahu, giving that island a density of 1,427 persons per square mile. The population of the State is relatively young -- the median age in 1980 was 28.3 years -- and racially diversified. The major unmixed groups, based on a 1983 sample survey, were Caucasians (24.5 percent of the non-barracks, non-institutional population) and Japanese (23.2 percent). In addition, 29.8 percent were of mixed race, primarily part Hawaiian. The same 1983 survey reported 314,000 households and 258,000 families in the State, with an average household size of 3.14. Migration has been a major factor in the growth of the population: between 1970 and 1980, there was a net in-migration (excluding military personnel and dependents) of 106,000, accounting for 56 percent of the total civilian population growth during that time. Immigrant arrivals in fiscal 1984 exceeded 5,400, mostly from the Philippines.

The comparison of demographic data from different sources is often complicated by the use of differing definitions and coverage. Most series, for example, refer to resident population, while others pertain to de facto population; the latter, unlike the former, includes visitors present but excludes residents temporarily absent. Total resident population includes armed forces stationed in an area, as well as their dependents in the area; civilian population excludes military personnel but includes their dependents. Perhaps the greatest confusion is that resulting from the arbitrary classification of persons of mixed race in the 1970 and 1980 U.S. Censuses. Such groups were shown separately in earlier censuses, and are still reported separately in data issued by many State agencies.

The principal sources for these data are the decennial population censuses conducted by the U.S. Bureau of the Census, the estimates developed annually by the Hawaii State Department of Health and Department of Planning and Economic Development in cooperation with the Bureau of the Census, the Hawaii Health Surveillance Program conducted regularly since 1969 by the Department of Health, the ongoing series on visitors present and residents absent maintained by the Hawaii Visitors

Bureau, and the U.S. Immigration and Naturalization Service tabulations on immigration. The Department of Planning and Economic Development summarizes these data in two series of reports, both issued annually: The Population of Hawaii and Hawaii's In-Migrants. Other annual reports distributed by DPED contain population estimates for Oahu census tracts and Neighbor Island districts. Earlier figures on population and migration are given in Historical Statistics of Hawaii, Sections 1 and 3. Comparable national statistics on population and migration appear in sections 1 and 3 of Statistical Abstract of the United States: 1984.

1/ The urban population comprises all persons living in urbanized areas (first defined for Hawaii in 1960) and in places of 2,500 or more outside urbanized areas. Statistical boundaries were first established for Honolulu in 1831, Hilo in 1911 (for 1910 census tabulations), and other urban places beginning in 1930.

2/ The rural population includes all persons living outside urban places.

3/ Annual rate since the preceding census, based on the formula for continuous compounding.

4/ Total population also reported as 130,313.

5/ Total population also reported as 108,393 and 108,579.

1/ The resident population is defined as the number of persons whose usual place of residence is in an area, regardless of physical location on the estimate or census date. It includes military personnel stationed or homeported in the area but excludes persons of local origin attending school or in military service outside the area.

2/ The de facto population is defined as the number of persons physically present in an area, regardless of usual place of residence; it includes visitors present but excludes residents temporarily absent.

3/ Averages for 12-month periods centered on the estimate or census dates.

1/ The Honolulu Urbanized Area consists of Honolulu District (the area southwest of the crest of the Koolau Mountains, between Red Hill and Makapuu Point) and the adjacent urbanized territory circling Pearl Harbor, as far west as Waipahu in 1960, Waipahu and Ewa Beach in 1970 and 1980, and also out to Whitmore Village and Schofield Barracks in 1980.

2/ The Kailua-Kaneohe Urbanized Area was initially defined as of 1980. It includes the urban territory on Windward Oahu, from Kahaluu through Waimanalo Beach.

3/ The 1970 totals for Kailua and Kaneohe have been adjusted to the 1980 boundaries. The 1960 totals for these places have been adjusted to the original 1970 boundaries.

1/ Persons of mixed race classified by self-identification or race of mother. Data are not comparable either to earlier censuses or to such surveys as the Hawaii Health Surveillance Program. The latter survey reported that 27.3 percent of the population in households in 1980 was of mixed race (17.9 percent Part Hawaiian and 9.4 percent non-Hawaiian).

1/ Since the 1980 census obtained information on race through self-identification, the data represent self-classification by people according to the race with which they identify. For persons who could not provide a single response to the race question, the race of the person's mother was used; if a single response could not be provided for the person's mother, the first race reported by the person was used. This classification system differs greatly from that used by the Hawaii Health Surveillance Program, in which persons of mixed race (27.3 percent of the non-institutional, non-barracks population in 1980) are shown separately.

2/ For the United States as a whole, the 1980 census reported 172,346 Hawaiians: 118,251 in Hawaii, 24,245 in California, and 29,850 in other Mainland States. Results of the 1980 Hawaii Health Surveillance Program indicated a total of 9,366 Hawaiians and 166,087 Part Hawaiians in Hawaii.

1/ Based on a sample; data may therefore differ somewhat from comparable data in the preceding table.

2/ A subfamily is a married couple (husband and wife enumerated as members of the same household) with or without children, or one parent with one or more never married children under 18 years of age, living in a household and related to either the householder or householder's spouse. The number or percentage of subfamilies is sometimes treated as a measure of the "doubling up" of households.

OC Included with "other countries."

1/ Data exclude Vietnamese refugees still in parole status at the end of each reporting period. Such persons are counted when adjusted under the Immigration and Nationality Act.

2/ Data limited to immigrants entering the United States through Honolulu. Data include conditional entrants and persons admitted under Sec. 319(b), 322(a), and 322(c) but exclude immigrants admitted through other ports and subsequent adjustments to immigrant status. Between 1973 and 1979, final totals have exceeded provisional figures by 30.0-54.2 percent.

Section 2

VITAL STATISTICS AND HEALTH

This section presents data on births, deaths, marriages, divorces, diseases and accidents, nutrition, substance abuse, height and weight, hospitals, dental care, and health personnel.

Vital indexes generally reflect the high health standards of Hawaii. Expectation of life at birth in 1980 was 75.04 years for males and 81.45 years for females. The crude death rate in 1983 was only 5.6 per 1,000 resident population. Deaths under one year of age per 1,000 live births numbered 10.0 in 1983. Diseases of the heart have accounted for almost a third of all deaths in recent years; cancer, for almost one-fourth. The 1983 crude birth rate was 18.7 per 1,000 resident population. The total fertility rate for civilians fell from 3,360 per 1,000 women in 1960 to 2,461 in 1970 and 1,871 in 1980. Over 98 percent of all babies were born in hospitals in 1983, and more than one-fifth were born to military couples. One out of six births was illegitimate. There were 7,793 fetal deaths in 1982, including 6,175 elective abortions. Marriages numbered 14,062 in 1983, with about 27 percent accounted for by nonresidents. Divorces reached a 1983 total of 4,583. The State had 25 acute care civilian hospitals (with 2,875 beds), 34 long-term care facilities (with 2,668 beds), nine specialty care facilities (with 881 beds) and 295 care homes (with 1,614 beds) in 1982. There were 1,976 physicians and surgeons, 746 dentists, 6,208 professional nurses, and 437 pharmacists licensed and living in Hawaii as of January 1984. Acute conditions per 100 persons numbered 209 in 1983, with respiratory conditions the most common complaint (at 154 cases per 100 persons). Among chronic conditions reported in the 1983 survey data, the most frequently mentioned were hypertension without heart involvement (7.3 per 100 persons), impairments of the back or spine (5.4), and hay fever (5.2). The most common communicable disease reported to authorities in 1983 was scarlet fever, with 4,814 cases. State mental health facilities served 9,946 patients in 1983, but the number of in-patients at the end of the year was only 268. Dental health was only fair: according to a 1979 survey, 275,000 residents had not visited a dentist within the previous year, and 176,000 reported one or more dental problems, chiefly cavities. Among persons 12 years old and over in 1979, 55 percent had used alcohol in the preceding month, 33 percent had smoked cigarettes, 14 percent had used marijuana, and 5 percent had used cocaine. The average adult male was 67.5 inches tall and weighed 159.5 lbs.; the average adult female was 62.6 inches and 127.9 lbs.

Major sources for data on vital statistics and health are the annual statistical reports of the Hawaii State Department of Health and various publications of the U.S. Public Health Service. Long-term trends are traced in Historical Statistics of Hawaii, Section 2. Sections 2 and 4 of the Statistical Abstract of the United States: 1984 contain similar data for the nation as a whole.

Table 65.-- FERTILITY RATES, BY MILITARY STATUS:
1960, 1970, AND 1980 -- Con.

- 1/ The annual number of live births per 1,000 resident population.
 2/ The annual number of live births per 1,000 women of childbearing age.
 3/ The average number of children to whom 1,000 women would give birth according to a set of fertility rates providing the women survive the childbearing years.
 4/ The average number of girls to whom 1,000 women would give birth according to a set of fertility rates providing the women survive the childbearing years.

5/ Annual live births per 1,000 females in each age group.

Section 3

EDUCATION

This section presents statistics on enrollment in public and private schools, colleges and universities; students graduated and degrees awarded; the highest grade of school completed; achievement test results; school facilities, personnel, and expenditures; and libraries.

Enrollment in elementary, intermediate and high schools in 1983-1984 totaled 200,240, slightly more than in the preceding year but well below the all-time high of 215,524 reached in 1971-1972. There were 233 public schools with 7,997 classroom teachers and 162,241 students (81.0 percent of the total). There were also 141 private schools with 2,347 teachers and 37,999 pupils. Students graduating from public and private high schools in 1982-1983 numbered 13,248. Some 54,206 students attended colleges and universities in the State in 1983-1984, including 21,112 on the Manoa Campus of the University of Hawaii, 433 at West Oahu College, 3,613 at UH-Hilo, 21,310 at six community colleges, and 7,738 in four private colleges and universities. Ninety-two percent of the children 5 and 6 years old were in school in 1980 (compared with 87 percent in 1970), and 47 percent in the 18- and 19-year-old group were enrolled (compared with 53 percent a decade earlier). The expenditure per pupil in public schools rose from \$1,014 in 1972-1973 to \$3,098 in 1982-1983. Among adults, the illiteracy rate dropped from 8.4 percent in 1950 to 1.9 percent in 1970, and by 1980 one-fifth percent of all residents 25 years of age or more could report having completed four or more years of college. The Hawaii State Library System, with 47 locations in all four counties, had 4.3 million books, film reels, phonorecords, and other collections in 1983, with an annual circulation of 5.3 million; the University of Hawaii libraries in the same year counted 2.3 million volumes.

The principal sources of data on education are the U.S. Bureau of the Census, Hawaii State Department of Education, University of Hawaii and private colleges and universities. Historical Statistics of Hawaii, Section 9, contains Island data back to 1820. Section 5 of the Statistical Abstract of the United States: 1984 presents comparable information for the nation as a whole.

Section 4

LAW ENFORCEMENT, COURTS AND PRISONS

Statistics in this section refer to crime and delinquency, the police, attorneys, the judiciary system, prisons, and youth correctional facilities.

Major offenses reported to the police in 1983 numbered 59,000, compared with 65,000 in 1982 and 42,000 in 1973. The rate per 1,000 population increased from 49 in 1973 to 74 in 1981, then declined to 58 in 1983. Seventy-eight percent of the 1983 total occurred on Oahu. For the State as a whole, major offenses known to police in 1983 included 57 murders or cases of non-negligent manslaughter, 301 rapes, 1,330 robberies, 891 aggravated assaults, 13,636 burglaries, 38,920 cases of larceny, and 4,297 auto thefts. The value of property reported stolen in 1983 amounted to \$26 million, exclusive of motor vehicles; only 8.3 percent was recovered. In 1977, when asked whether they or their immediate families had been victims of crime (burglary, assault, etc.) in Hawaii since 1970, 40 percent of all Oahu adults and a fourth of all Neighbor Island adults answered affirmatively. Twenty-one percent of the major offenses known to police were cleared by arrest or otherwise in 1983. Thirty-nine percent of the persons arrested for major crimes and 22 percent of those arrested for lesser offenses in 1983 were less than eighteen years of age. The number of inmates in the nine State correctional institutions averaged 1,402 during 1983; of this number, 812 were adults serving time for felonies. Cases filed in the State Supreme Court, Intermediate Court of Appeals, four circuit courts, and four district courts and their divisions during fiscal 1983 numbered 999,000, including 898,000 traffic cases. Filings in the United States District Court for Hawaii included 1,136 civil cases, 2,408 criminal cases, and 677 bankruptcy cases. The last legal execution in Hawaii took place in 1947. Governmental expenditures on the criminal justice system in 1979 amounted to \$103 million, more than half of the total going for police protection. There were 2,963 attorneys licensed in Hawaii as of mid-1984.

Statistics on law enforcement, courts, and corrections in Hawaii appear in the annual reports of the county police departments, the State Judiciary, the Intake Service Center, and the Administrative Office of the United States Courts. The Hawaii Criminal Justice Data Center issues quarterly and annual reports titled Crime in Hawaii. Figures on crime, the courts, and corrections in earlier years appear in Historical Statistics of Hawaii, Section 10. National data are summarized in the Statistical Abstract of the United States: 1984, Section 6.

Section 5

GEOGRAPHY AND ENVIRONMENT

This section relates to land and water areas, physical geography, climate, air and water quality, noise, and other geographic and environmental measurements of Hawaii. Most statistics on land use and ownership, however, appear in section 6.

The State consists of eight major islands and 124 minor islands with a total land area of 6,425 square miles and a general coastline of 750 miles. Honolulu is 214 miles from Hilo, 1,367 miles from Kure Atoll (the westernmost end of the State), 2,397 miles from San Francisco, and 4,829 miles from Washington, D.C. The highest peak in the State is Mauna Kea, 13,796 feet above sea level; the longest stream is Kaukonahua Stream, Oahu, 33 miles in length; the biggest lake is Halalii, on Niihau, 841 acres; and the highest named waterfall is Kahiwa, Molokai, a 1,750-foot cascade. Various measures of air pollution, such as suspended particulate matter, indicate that Honolulu is one of the cleanest cities in the nation. There is also relatively little water pollution: 35 major beaches surveyed in 1983 were found to have fecal coliform levels per 100 ml. ranging from 2.0 to 121.1, and all 35 were within EPA standards. More than 1,100 species, subspecies, and varieties of native flora were endangered, threatened, or extinct, according to a 1977 survey. Climatically, Hawaii is marked by remarkably balmy temperatures and wide variations in rainfall. The all-time temperature range at Honolulu International Airport, for example, was from 53° to 92°F. Average precipitation, however, ranges from less than 10 inches at Kawaihae and the summit of Mauna Kea to 451 inches atop Waialeale. The longest volcanic eruption in Island history lasted 867 days, the worst earthquake attained 7.5 on the Richter scale, and the highest tsunami wave reached 56 feet. Water withdrawn for use in 1980 averaged 2.9 billion gallons per day, compared with 2.8 billion in 1975 and 2.7 billion in 1970. Among 31 neighborhoods on Oahu, median noise levels in 1981-1982 ranged from 37 decibels (in Mililani) to 57 decibels (in Pawa).

Important sources of data include the U.S. Geological Survey, National Ocean Survey, National Weather Service, U.S. Bureau of the Census Geography Division, the Division of Water and Land Development of the State Department of Land and Natural Resources, the State Department of Health, and the University of Hawaii Institute of Geophysics. Detailed information is given in Atlas of Hawaii, published by the University Press of Hawaii in 1983. National data are reported in Statistical Abstract of the United States: 1984, Section 7.

1/ Figures are lengths of general outline of seacoast. Data for the four islands of Maui County are not consistent with the reported county total.

2/ Shoreline of outer coast, offshore islands, bays, rivers, and creeks is included to the head of tidewater or to a point where tidal waters narrow to a width of 100 feet.

3/ Derived from data expressed in statute miles; independently rounded and accordingly may not add exactly to indicated totals and subtotals.
1 mi. = 1.609 km.

4/ Data are not available for five minor islands: Molokini, Lehua, Gardner Pinnacles, Maro Reef, and Pearl and Hermes Atoll.

5/ Excludes the Midway Islands, which are part of the Hawaiian Archipelago but not legally part of the State of Hawaii. Midway has a general coastline of 20 miles and a tidal shoreline of 33 miles.

Table 161.-- LAND AND WATER AREA OF COUNTIES AND ISLANDS: 1982 -- Con.

1/ Areas in square kilometers and acres were calculated directly from the figures shown for square miles; these equivalents were independently rounded, and hence may not add exactly to the indicated totals and subtotals. 1 square mile = 640 acres = 2.58999 square kilometers.

2/ Dry land and land temporarily or partially covered by water, as marshland, swamps, etc.; streams and canals under one-eighth statute mile wide; and lakes, reservoirs, and ponds under 40 acres of area.

3/ Permanent inland water surface, such as lakes, reservoirs, and ponds having 40 acres or more of area; streams, sloughs, estuaries, and canals one-eighth statute mile or more in width; deeply indented embayments and sounds, and other coastal waters behind or sheltered by headlands or islands separated by less than 1 nautical mile of water, and islands having less than 40 acres of area.

4/ Because of rounding, island figures may not add to county figures.

5/ Molokini, offshore of Maui, not measured; other sources give the area of Molokini as 18.6 acres (0.03 square miles or 0.075 square kilometers).

6/ Exclusive of the Midway Islands, which are part of the Hawaiian Archipelago but not legally part of the State of Hawaii.

Table 180.-- NOISE LEVELS IN SPECIFIED NEIGHBORHOODS ON OAHU: 1981-1982

[Data collected during the latter part of 1981 and throughout 1982, during daylight hours only. Data were obtained from both manual sampling, utilizing on-site noise-level readouts, and automatic sampling, utilizing a community noise analyzer. Differences in noise levels as measured by the two types of sampling result from the inclusion in the automatic samplings of such sources as vehicles traveling near the microphone, barking dogs, or other instantaneous sounds. With manual samplings, these sources are eliminated from the recorded data]

1/ Separate data are shown for endemic birds averaging more than 25 individuals in 1975-1979, indigenous birds more than 200, introduced birds more than 500, and migratory species and stragglers more than 100. Endemic birds are those peculiar to a particular region, in this case Hawaii, and therefore found nowhere else in the world; indigenous birds are those native to a given region, in this case Hawaii, but with a total range of distribution encompassing a much wider area. The classification is that in Andrew J. Berger, Hawaiian Birdlife (1972).

Section 6

LAND USE AND OWNERSHIP

General statistics on the use, ownership, and tenure of land appear in this section. Information on specific use or ownership categories is given elsewhere: parks in section 7, agriculture in section 19, forests in section 20, cane land and industrial parks in section 22, and shopping centers in section 23.

Out of the 4,112,000 acres in the State, almost 1,300,000 are in cropland or pastureland. Other major categories include forestland, with 1,443,000 acres, urban and built-up, with 139,000, and miscellaneous nonfarm, with 790,000. In the Honolulu Metropolitan Statistical Area (which is coterminous with Oahu), land in residential use increased from 22,600 acres in 1969 to 28,100 in 1982; during the same 13-year span, agricultural land declined from 88,900 to 74,700 acres. For the State as a whole, the Land Use Commission has zoned 157,000 acres as "urban," 1,975,000 as "conservation," 1,970,000 as "agricultural," and 10,000 as "rural."

Recent data on land ownership indicate that the Federal government owns 8.3 percent of all land, the State and counties own 30.9 percent, and private owners (chiefly large estates) have 60.8 percent. Total Federal holdings reported by the General Services Administration in 1982 came to 701,000 acres, exclusive of leased land (51,000 acres); most of the Federal land is in wildlife, park and military use. The State Department of Hawaiian Home Lands holds about 186,000 acres, divided among 3,337 lessees. Total land parcels in the State number 391,000.

Considerable caution is necessary in comparing statistics from different sources on land use, ownership, or tenure. Variations in definitions and survey dates seriously affect comparability in many instances, even where terminology is relatively unambiguous and misinterpretation seems unlikely. An example of such difficulties is the wide range in estimates of Federal land, with totals ranging from 328,000 acres to 701,000.

Reports of the U.S. Department of Agriculture and General Services Administration, Hawaii State Department of Hawaiian Home Lands, Department of Land and Natural Resources, Department of Planning and Economic Development, and Land Use Commission, Honolulu Department of Finance, and Honolulu and Hawaii County planning departments provided the data for this section. Historical Statistics of Hawaii, Section 12, contains limited information for earlier years. Statistics for the nation as a whole are available in Sections 7, 11, 8 and 24 of the Statistical Abstract of the United States: 1984.

1/ Because of the omission of public thoroughfares and for other reasons, totals by island may differ considerably from official area estimates in other tables in this volume.

2/ State land ceded by presidential proclamation or governor's executive order to the federal government appears in most cases to have been classified for this table as federal land, even though title to it technically remains with the state. Land ceded by the state to the counties, in contrast, has probably been classified as state land. For both types of ceded land, treatment may have varied from parcel to parcel.

Section 7

RECREATION AND TOURISM

Statistics on tourism, recreation, sports, museums, pets, parks, and the performing arts appear in this section. Additional information on recreational land use is given in section 6; on transportation, in section 18; and on hotels, in section 23.

Approximately 4,368,000 visitors stayed overnight or longer in Hawaii during 1983, compared with 2,631,000 in 1973 and only 297,000 in 1960. The average number present at any given time during 1983 was 108,000. Total visitor expenditures (exclusive of trans-Pacific fares) in 1983 amounted to \$4 billion, compared with \$1 billion a decade earlier. The 1983 visitor total included 2.9 million from other States, 268,000 from Canada, and 729,000 from Japan. Expenditures per visitor day in 1980 averaged \$71.24 for westbound visitors and \$185 for the Japanese. Visitor-related spending in 1983 resulted in tax revenues of \$477 million and generated 164,500 jobs.

Both visitors and residents have access to a wide range of recreational and cultural facilities. The State has seven National parks and similar areas, 74 State parks, 626 County parks, 57 golf courses, 259 public tennis courts, 2,023 small-boat moorages, 1,600 recognized surfing sites, and 24.4 miles of safe, sandy, accessible beach. Recreational and cultural facilities reporting more than a million annual visitors each include Hawaii Volcanoes National Park, the National Memorial Cemetery of the Pacific, U.S.S. Arizona Memorial, Wailua River State Park, Castle Park, and the Honolulu Zoo. Total visits to 45 museums, state monuments and similar attractions in 1983 numbered 13 million. About 237,000 Hawaii residents traveled to the Mainland in 1983. Thirteen theatrical groups on Oahu reported 1,376 performances of 502 productions for the 1982-1983 season, with a combined audience of 937,000. During the same period, the Honolulu Symphony Orchestra gave 142 concerts, with a total attendance of 204,000. Professional baseball drew 145,000 fans in 1983, and during the 1983-1984 school year, attendance at UH-Manoa varsity baseball, basketball and football home games exceeded 502,000.

Information on recreation and tourism is issued periodically by the Hawaii Visitors Bureau (particularly in its Annual Research Report), the State Parks Division of the Department of Land and Natural Resources, the U.S. National Park Service, U.S. Passport Office, County park and recreation departments, and other organizations. Long-term trends are summarized in Historical Statistics of Hawaii, Section 11. National statistics are given in Section 8 of Statistical Abstract of the United States: 1984.

Table 216.-- SUMMARY CHARACTERISTICS OF WESTBOUND VISITORS TO HAWAII:
1973 TO 1983 -- Con.

- 1/ Base includes estimated number of visitors arriving directly from Canada and usually omitted from the Hawaii Visitors Bureau Basic Data Survey.
 - 2/ Party heads only. Calculated as the number of professional, technical, business, managerial and official workers as a percent of all party heads responding to this question.
 - 3/ Party heads only.
 - 4/ Excludes condominiums operating as hotels. Data for years before 1979 are not comparable in coverage.
 - 5/ Computed from total visitor days and total visitor arrivals for westbound visitors destined for Hawaii. These data differ somewhat from corresponding data in the source, because of different computation procedures.
 - 6/ Base includes passengers who did not answer this question.
 - 7/ Pacific and Mountain States.
 - 8/ Revised from Data Book 1983, table 184.

Section 8

GOVERNMENT FINANCES AND EMPLOYMENT

This section presents statistics relating to the revenues, expenditures, debt, and civilian employment of Federal, State and County governments in Hawaii.

Local government is vested in one combined city-county (Honolulu, consisting of the Island of Oahu and several outlying islets), three non-metropolitan counties (Hawaii, Kauai, and Maui), and one area (Kalawao County) administered by the State Department of Health. Separate municipal governments do not exist.

Tax collections by Federal, State and County governments in fiscal 1983 reached \$3.4 billion, more than twice the level reported ten years earlier. The 1983 total included \$1.9 billion in U.S. taxes, \$1.2 billion in State taxes, and \$320 million in County taxes, licenses and fees. Individual income taxes accounted for 89 percent of Federal collections and 28 percent of State collections in Hawaii in 1983. State revenue receipts totaled \$2.1 billion, chiefly from the General Excise and Use Tax (\$601 million) and Federal grants-in-aid (\$387 million). The largest expenditure item in the State accounts for 1983 was education, with \$690 million (out of \$2,191 million) going to the University of Hawaii and public schools and libraries. The counties, in contrast, depended largely on the real property tax (which until mid-1981 was assessed and collected by the State) and grants-in-aid for their revenues, and reported police and fire protection as their largest single expenditure item. Assessed valuation of the State quadrupled between 1974 and 1984, reaching \$49 billion by the end of the period; of this total, \$6.7 billion was exempt from taxation. Public bonded debt outstanding at the end of 1983 exceeded \$2.5 billion.

Total government employment in 1983 averaged 91,000, about 5 percent over the 1978 average. The 1983 total included over 32,000 Federal workers, 46,000 persons employed by the State, and 13,000 persons on County payrolls. State civil service employees as of mid-1983 numbered 18,500.

Important sources for statistics on government in Hawaii include the U.S. Census of Governments and various annual publications of the Bureau of the Census, reports of the U.S. Treasury Department, Hawaii State Departments of Accounting and General Services, Budget and Finance, and Taxation, and the County auditors and finance directors, and an annual compilation issued by the Tax Foundation of Hawaii, Government in Hawaii: A Handbook of Financial Statistics. Data extending back to the middle of the 19th century are summarized in Historical Statistics of Hawaii, Section 25. Comparable Mainland statistics appear in the Statistical Abstract of the United States: 1984, Sections 10 and 11.

Section 9

SOCIAL INSURANCE AND HUMAN SERVICES

This section presents data related to governmental expenditures on social welfare; programs for old-age, survivors, disability and health insurance; public employee retirement; unemployment insurance; aid to the needy; and child and other welfare services. Also included here are selected statistics on United Way campaigns, foundations, and the quality of life.

Total social welfare costs reached \$304 million in fiscal 1983, compared with \$107 million a decade earlier. About 56 percent of the 1983 total came from State funds and the remainder from the Federal government. The monthly average number of persons served by major welfare programs in 1983 was 64,000, or 6.4 percent of the resident population of the State. Two-thirds of all public assistance payments and 52 percent of all recipient cases were accounted for by aid to families with dependent children. The average monthly payment per case for public assistance was \$371, or 63 percent more than in 1973. Participation in the food stamp program included 39,000 households and 101,000 persons. Among workers receiving unemployment compensation in 1983, weekly benefits averaged \$123. About 121,000 Hawaii residents were receiving Social Security benefits as of the end of 1983, and about 86,000 were enrolled for Medicare. There were also 14,000 State and County government pensioners in 1982, with annual benefits of \$105 million. Child adoptions in 1983 numbered 582. Nineteen foundations reported assests of \$145 million when most recently surveyed. The Aloha United Way reported agency allocations of \$8.5 million on Oahu and \$1.6 million on the Neighbor Islands in 1983. One recent comparative study of the "quality of life" in 277 American metropolitan areas ranked Honolulu 28th, but another ranked Honolulu 47th.

Major data sources include reports and records of the U.S. Department of Health and Human Services, the Hawaii State Department of Social Services and Housing, the Hawaii State Department of Labor and Industrial Relations, the Hawaii State Employees' Retirement System, and the Aloha United Way. Historical Statistics of Hawaii, Section 8, contains data for earlier years. Section 13 of the Statistical Abstract of the United States: 1984 presents comparable Mainland data.

Section 10

NATIONAL DEFENSE

This section presents statistics relating to the armed forces and their dependents, national guard strength, civilian employment in national defense, veterans, military housing, and expenditures by the armed forces. Further information appears in sections 1, 2, 6, 11, 12, 14, 17, 22, and 23.

There were approximately 60,800 officers and enlisted men (including 4,500 aboard ships homeported in Hawaii) and 67,100 military dependents in the Islands as of July 1, 1984. This number has been relatively stable in recent years, but at the height of World War II more than 400,000 uniformed personnel were present. The Navy alone accounts for one-third of the current total. More than 11,400 Hawaii residents were in the armed forces worldwide in 1984. The importance of national defense in Hawaii can be further measured by total expenditures (\$1.85 billion), military prime contract awards (\$639 million), civilian employment (20,800), veterans in civil life (98,000), military personnel receiving retired pay (10,000 men, receiving \$11.3 million monthly), military-connected pupils in public schools (19,700), military housing (19,200 units), and land used by the armed forces (over 121,000 acres). Defense expenditures are second only to tourism as a source of income to Hawaii.

The Department of Planning and Economic Development has, since 1959, issued periodic reports on Military Personnel and Dependents in Hawaii. Other published sources include reports of the U.S. Bureau of the Census, the Administrator of Veterans Affairs, the U.S. Department of Defense, the Hawaii State Department of Labor and Industrial Relations, Department of Defense, and Department of Education, and the Hawaii State Census Statistical Areas Committee. Definitions used by these sources frequently differ to some degree, and care is accordingly necessary in comparing data issued by two or more agencies. In mid-1982, for example, the number of armed forces in Hawaii was reported as 53,915 by DOD, 54,879 by the Bureau of the Census, and 61,107 by the local commanding officers reporting to DPED. Historical Statistics of Hawaii, Section 26, includes series on the armed forces dating back to 1795. Section 12 of the Statistical Abstract of the United States: 1984 presents data on national defense and veterans affairs for other States and the entire nation.

^{1/} Beginning in 1982, ship crews living ashore are included with the ashore total. The number of crew members ashore increased sharply between 1981 and 1982, partly because of the increased housing allowance offered to Navy personnel after June 1, 1982, but primarily because of the reclassification of personnel stationed aboard ship but living ashore.

Section 11

LABOR FORCE, EMPLOYMENT, AND EARNINGS

This section presents statistics on the size and composition of the labor force, employment by sex, occupation, and industry, work disability, wage rates, payrolls, hours, industrial safety, unionization, and strikes.

The civilian labor force averaged 473,000 in 1983; of this total, 442,000 persons were employed and 30,000 were unemployed and seeking work. The civilian jobcount rose from 365,000 in 1973 to 445,000 a decade later. (The jobcount differs from employment because the latter counts multiple jobholders -- "moonlighters" -- only once.) The unemployment rate averaged 6.5 percent in 1983, with island levels ranging from 5.7 to 20.0 percent. In 1980, 57.8 percent of all females 16 years old and over were in the civilian labor force -- the fourth highest ratio in the nation. By occupation, one out of four civilian workers is classified as professional or managerial. Activities with especially large numbers of employees include government (91,000 in 1983), services (104,000), and retail trade (88,000). The average annual earnings of wage and salary workers under the Hawaii Employment Security Law reached \$16,100 in 1983, almost twice the 1973 average. Average weekly hours in 1983 ranged from 31.9 (for retail trade) to 41.7 (for communications and utilities). Labor union membership was estimated at 113,000 in 1980. Work stoppages in 1983 involved 2,838 workers.

Analyzing labor force trends is greatly complicated by shifts in sources and estimating methods. Prior to 1976, the number of employed civilians was estimated from data on the number of jobs covered by the Hawaii State Employment Security Law, as adjusted to exclude the double-counting thought to be present. Then, beginning in 1976, the labor force estimates were based primarily on the Current Population Survey, a relatively small household survey subject to considerable sampling variation. The 1970-1975 estimates were later revised for greater comparability with the 1976-1983 data.

Principal sources for the data on labor force, employment, hours, earnings, unions and strikes are the decennial reports of the U.S. Bureau of the Census, the same agency's Current Population Survey, reports by the U.S. Bureau of Labor Statistics, monthly and annual tabulations by the Hawaii State Department of Labor and Industrial Relations, and annual surveys of pay rates by the Hawaii Employers Council. Historical Statistics of Hawaii, Section 4, includes figures for earlier years. Statistics for the nation as a whole are published in Section 14 of the Statistical Abstract of the United States: 1984.

1/ Interstate liable initial claims (UI and Supp.), excluding UCFE and Supp. and UCX. Covers Hawaii workers seeking work and filing for benefits on the Mainland. Since July 1980, data have included Federal civilian employees and ex-servicemen.

2/ Interstate agent initial claims (UI and Supp.), excluding UCFE and Supp. and UCX. Covers Mainland workers filing claims for unemployment insurance and registered for work with the Hawaii State Employment Service.

3/ Interstate agent initial claims (regular only) as a percent of inter-state liable initial claims (regular only). Ratios under 100 suggest a net out-migration of workers.

4/ Regular and extended claims.

5/ The method of counting liable and agent initial claims was revised effective October 1979. Data for 1979 and later years are accordingly not directly comparable with figures for earlier years.

Section 12

INCOME, EXPENDITURES, AND WEALTH

This section presents statistics on two different aspects of income and expenditures, one relating to the State income and product system and the other to the distribution of income to families, households and individuals. Specifically, information is given on gross state product, industrial income, personal income, family and household income, poverty, personal wealth, and family expenditures. Data on wage rates, salaries, and earnings appear in Sections 3, 8, 11, and 22; on industrial payrolls, in Sections 11, 15, 20, 22, and 23; on the family income of visitors, in Section 7; on retirement payments and public assistance, in Sections 9 and 10; on taxable income, in Section 8.

Gross state product in 1983 amounted to approximately \$14 billion, or triple the 1972 total. The major sources of outside income to Hawaii in 1983 were defense expenditures (\$1.85 billion), pineapple production (\$219 million), sugar production (\$410 million), and visitor expenditures (\$4.0 billion). Personal income in 1983 was \$12.4 billion, compared with \$4.6 billion only ten years earlier, and per capita personal income was \$12,114, more than twice the 1973 level. The per capita figure for Hawaii exceeded the national average by only 4 percent, and thus failed to compensate for the Islands' much higher cost of living. The median annual income of families, based on data for 1982-1983, was \$24,800; for unrelated individuals, the median was \$12,100. The official poverty threshold for a 4-person nonfarm family in Hawaii was set in February 1984 at \$11,730. The most recent family expenditure survey, taken in 1972 and 1973, reported that the largest items in the family budget on Oahu were housing (accounting for 33.8 percent of spending for current consumption), food (20.4 percent) and transportation (19.1 percent). Top wealthholders in 1976 included 39,000 persons with assets of \$120,000 or more and 500 millionaires.

The chief sources of data shown in this section are the U.S. Bureau of Economic Analysis, U.S. Bureau of the Census, U.S. Bureau of Labor Statistics, U.S. Department of Health and Human Services, Internal Revenue Service, Hawaii Agricultural Reporting Service, Hawaii State Department of Health and Department of Planning and Economic Development, and Hawaii Visitors Bureau. Sections 6 and 7 of Historical Statistics of Hawaii present data for earlier years. Comparable data for the country as a whole are given in Statistical Abstract of the United States: 1984, Section 15.

Section 13

PRICES

This section presents indexes of consumer prices for Honolulu, average prices for selected foods, and a comparison of Honolulu family budgets with those in other metropolitan areas. Other statistics on prices are reported in Sections 16, 17, 18, 19, 21, and 23.

In October 1984, the Honolulu all-items consumer price index for all urban consumers stood at 287.4, with the 1967 level equal to 100. The index had increased 4.0 percent in the preceding 12 months, 36.5 percent since October 1979, and 97.5 percent since September 1974. Prices have risen most rapidly since 1967 for medical care (284.3 percent) fuel and other utilities (245.8 percent), and food away from home (up 231.5 percent), and least for apparel and upkeep (up 100.1 percent).

An "intermediate" budget for a four-person family living on Oahu was estimated at \$31,893 as of the Autumn of 1981. This family budget was 26 percent higher than the corresponding urban United States average, and was first among the 25 American metropolitan areas surveyed. The "lower" budget was 33 percent above the national figure; the "higher" budget, 32 percent. Oahu-Mainland differentials in the intermediate budget were greatest for rents and personal income taxes and least for food away from home and automobile transportation. An "intermediate" budget for a retired couple in Honolulu came to \$12,157 in the Autumn of 1981, 19 percent above the U.S. urban average.

The Honolulu consumer price index has been compiled by the United States Bureau of Labor Statistics since December 1963. This index measures the average change in prices of goods and services purchased by urban families and single persons living alone. Prices are expressed as a percent of the average levels reported in 1967, the base date. Current data for Honolulu and other cities are published in the Monthly Labor Review and CPI Detailed Report, issued monthly by BLS.

Important changes were made in the consumer price index at the beginning of 1978. The existing index, covering urban wage earner and clerical families and single persons living alone, had been based on spending patterns observed in a 1961 survey and had been issued at three-month intervals. This index was discontinued after June 1978. Beginning in February 1978, two new indexes were published, both based on the findings of a 1972-1973 survey and both issued at two-month intervals. The first of these new indexes covered the same population as the older index, that is, urban wage earner and clerical families and individuals; the second covered all urban consumers. The new indexes were linked to the existing index for December 1977 and, like the latter, expressed as a percent of the 1967 annual average. The index for all urban consumers was further modified in February 1983, when the basis for measuring homeowners' costs was substantially altered.

Comparisons of family budgets between Honolulu and various Mainland communities have been published by the U.S. Bureau of Labor Statistics through the Fall of 1981. Although discontinued by BLS after 1981, this comparison was subsequently updated by DPED. Budget costs for a retired couple have similarly been prepared by BLS for Honolulu and the Mainland, most recently as of 1981. Cost of living adjustments for Federal employees in Hawaii are based on Honolulu-Washington comparisons, compiled by the U.S. Office of Personnel Management at annual intervals.

In addition to these data, the Bureau of Labor Statistics until 1978 published monthly and annual data on average Honolulu prices for a wide variety of foods, and occasional data on a number of non-food items. The city food price series were suspended after June 1978 and since that time only unofficial estimates have been available.

No composite wholesale or producer price index, comparable to the all-items consumer price index, is available for Hawaii. Average wholesale prices of agricultural products are reported in Statistics of Hawaiian Agriculture, issued by the Hawaii Agricultural Reporting Service, and in various other publications of the State Department of Agriculture. Wholesale price statistics of other commodities are less readily available, and in most cases totally lacking.

Data on prices and living costs for the nation as a whole and other areas are summarized in Statistical Abstract of the United States: 1984, Section 16. Long-term trends for Hawaii are traced in Historical Statistics of Hawaii, Section 5.

1/ Among the 25 metropolitan areas for which separate indexes were reported, Honolulu ranked first in total budget costs at the higher and intermediate levels and second at the lower level (where Anchorage ranked first).

2/ Housing includes shelter, housefurnishings and household operations. The higher budget also includes an allowance for lodging away from Oahu.

3/ The average costs of shelter were weighted by the following proportions: lower budget, all families living in rented dwellings; intermediate budget, 25 percent in rented dwellings; higher budget, 15 percent renters.

4/ Includes average contract rent, heating fuel, gas, electricity, water, specified equipment, and insurance on household contents.

5/ Includes interest and principal payments plus taxes; insurance on house and contents; water, refuse disposal, heating fuel, gas, electricity, and specified equipment; and home repair and maintenance costs.

6/ Based on 65 percent of the lower budget families and all of the intermediate and higher budget families owning automobiles.

Section 14

ELECTIONS

This section presents data on election districts, registered voters, votes cast, campaign expenditures, elected officials, and legislative bills and resolutions.

About 419,000 persons were registered to vote in the general election of November 6, 1984, and more than 349,000 actually voted. The number voting amounted to 46 percent of the 755,000 Hawaii residents of voting age at that time. The latter figure included aliens, inmates of mental and penal institutions, and members of the armed forces and their dependents, groups that are either ineligible or unlikely to vote in Island elections. Among registered voters, females outnumbered males and Democrats were far more numerous than Republicans. Campaign expenditures for the 1982 primary and general elections (other than the presidential race) exceeded \$10 million.

Hawaii has 2 Congressional, 25 Senatorial, 51 Representative, and 9 Councilmanic districts. It also contains 15 Soil Conservation districts, 28 active Neighborhood Board districts, and 276 election precincts.

Elective offices in Hawaii include the President and Vice President, 2 U.S. Senators, 2 U.S. Representatives, the Governor and Lieutenant Governor, 25 State Senators, 51 State Representatives, and various county officials. Persons of Hawaiian blood also vote for the Board of Trustees of the Office of Hawaiian Affairs. The minimum voting age for all races is 18 years.

The 1984 State Legislature, with 76 members, included 59 males, 32 persons under 40 years of age, 29 persons of Japanese ancestry, 14 persons born in places other than Hawaii, and 63 Democrats.

In its 1984 regular session, the State Legislature considered 4,555 bills; 312 were passed and 291 became law. The Legislature also considered 914 resolutions, of which 325 were adopted.

The official results of primary, general, and special elections are published by the Office of the Lieutenant Governor. Additional information is often available from the various County clerks. Earlier figures for Hawaii appear in Historical Statistics of Hawaii, Section 24. National statistics appear in the Statistical Abstract of the United States: 1984, Section 9.

Section 15

BANKING, INSURANCE, AND BUSINESS ENTERPRISE

Statistics in this section relate to banks and other financial institutions, stocks and bonds, insurance, fires, and business firms.

There were ten banks with 162 branches, eight savings and loan associations with 166 branches, four trust companies, and 78 industrial loan or small loan licensees with 209 branch offices in Hawaii as of December 31, 1983. Deposits in Island banks reached \$7.0 billion in mid-1984, compared with \$2.6 billion a decade earlier. Assets of savings and loan associations stood at \$4.8 billion in mid-1984, more than three times their 1974 level. There were 144 credit unions with combined assets of \$1.1 billion at the end of 1983.

Approximately 234,000 Hawaii residents held shares in U.S. public corporations or investment companies in 1983.

Life insurance in force in Hawaii at the end of 1982 amounted to \$23 billion, more than twice the figure reported ten years earlier. For all 699 insurance companies doing business in the Islands, Hawaii premiums amounted to \$796 million in 1982 and losses, claims, and benefits paid came to only \$436 million. Oahu fire losses amounted to \$11 million in fiscal 1983. Persons covered by the two major prepaid health insurance plans as of December 31, 1983, numbered 667,000, with membership dues of \$335 million.

By mid-1984, more than 39,000 corporations and partnerships were registered to do business in Hawaii: 26,000 local ("domestic") corporations, 4,000 out-of-State ("foreign") corporations, and 9,000 partnerships. Business establishments with one or more employees in 1982 numbered 21,655; 98 had 250 or more employees. During fiscal 1984, 2,770 new local corporations were formed. Business receipts of corporations in 1981 exceeded \$17 billion; business receipts of proprietorships in the same year amounted to \$868 million. Hawaii's largest corporation, Amfac, Inc., reported 1982 sales of \$2.25 billion.

Sources for statistics on these subjects include the Hawaii State Department of Commerce and Consumer Affairs (specifically its Bank Examination, Insurance, and Business Registration Divisions), the State Department of Taxation, the Honolulu Fire Department, the New York Stock Exchange, the Health Insurance Institute and two major local health insurance plans, the Hawaii Credit Union League, and the annual report on County Business Patterns issued by the U.S. Bureau of the Census. Historical Statistics of Hawaii, Sections 22 and 23, provides information for earlier periods. Comparable Mainland data appear in Sections 17 and 18 of Statistical Abstract of the United States: 1984.

Section 16

COMMUNICATIONS

This section presents statistics on the usage, finances, and operations of the various communications media: postal service, telephone, telegraph, radio, television, newspapers and periodicals, and books.

Hawaii is served by all major communications media. In 1983 it had 130 post offices and stations handling 305 million pieces of mail and accounting for postal receipts in excess of \$80 million. There were 458,000 telephone lines in service, 332,000 telephone homes, about 1.9 billion local calls originated, 12 million completed interisland calls (in 1981), and 32 million incoming and outgoing transpacific calls (in 1980). Telegraph messages to and from Hawaii in 1982 totaled 169,000. The 41 commercial, public and educational radio stations in the Islands in 1984 included 26 on the regular broadcast band and 15 FM stations. The State also had 15 television stations (13 commercial and 2 public), including satellites but excluding translators. Ten cable TV companies served 188,000 subscribers. An estimated 97 percent of all households in the State had television sets. Island publishers printed nine daily newspapers, numerous magazines and other periodicals, and a wide diversity of books. Newspaper circulation reported by the two English-language dailies on Oahu averaged 197,000 in 1983-1984, compared with 207,000 a decade earlier.

The major sources for statistics on communications are the reports and records of the U.S. Postal Service, Federal Communications Commission, Division of Consumer Advocacy and CATV Division of the Hawaii State Department of Commerce and Consumer Affairs, Hawaiian Telephone Company, Audit Bureau of Circulations, A. C. Nielsen Co., and Hawaii Media Guide. Earlier figures appear in Historical Statistics of Hawaii, Section 18. Data on communications for other States and for the nation as a whole are carried in Statistical Abstract of the United States: 1984, Section 19.

1/ The number of local calls is affected as central offices are being converted to Electronic Common Control (ECC). ECC records call attempts after the first digit is dialed. Non-ECC offices record the call attempts when the handset is lifted. Also significant in 1981 were an estimated 17 million fewer calls due to the implementation of Directory Assistance Charging. Because of these fundamental changes in data collection, more recent figures are not comparable to earlier years.

2/ As a result of deregulation of the telephone industry, these series became subject to disclosure rules after 1980 or 1981, and regular publication of annual data was suspended.

Section 17

ENERGY AND SCIENCE

This section presents statistics on energy production and consumption, the electric and gas utility industries, research and development, and scientific resources.

Total energy consumption in 1982 amounted to 218 trillion British thermal units, compared with 226 trillion BTU a decade earlier. Transportation accounted for 47 percent of the 1982 total. Primary consumption expenditures for fuels and electricity in 1981 totaled \$1.9 billion.

Electricity sales exceeded 6.4 billion kilowatt-hours in 1983, a total that has doubled since 1968. Manufactured gas sales reached 31.3 million therms in 1983, 9.4 percent below the figure ten years earlier. Residential rates in 1983 averaged 11.3 cents per kilowatt-hour and \$1.80 per therm, both well above the corresponding rates only a few years earlier. Average residential use (6,569 kWh and 219 therms in 1983) has declined significantly in recent years. By 1981, almost seven percent of the housing units in the State had solar heating devices.

The liquid fuel tax base for 1983 was approximately 920 million gallons, compared with 825 million in 1974 and 755 million in 1970. The 1983 total included 310 million gallons of gasoline, 502 million of aviation fuel, and 104 million of diesel oil. The average price for unleaded gasoline rose from 69.6 cents per gallon in January 1976 to \$1.633 six years later, then fell to \$1.490 by June 1984.

The State is well served with scientific resources. Especially noteworthy is the cluster of telescopes used for astronomical observations at the summit of Mauna Kea -- six major facilities (plus two under construction), with cumulative capital costs of \$53 million and Hawaii-based staff of 95 persons as of 1984. Federal research and development obligations in Hawaii approached \$45 million in 1982. Thirty patents were granted to Hawaii residents in 1983.

Information on energy and science can be obtained from reports and records of the U.S. Department of Energy, U.S. Patent and Trademark Office, U.S. Bureau of the Census, National Science Foundation, Hawaii State Department of Taxation, Hawaii State Department of Commerce and Consumer Affairs and its Division of Consumer Advocacy (formerly the Department of Regulatory Agencies, Public Utilities Division), and individual utility companies. Detailed statistics on energy consumption appear in Hawaii Integrated Energy Assessment, Vol. IV, Energy Data Handbook, published by the State Energy Office of the Department of Planning and Economic Development in 1980. Historical Statistics of Hawaii, Section 19, presents data for earlier years. Data for the nation as a whole can be found in the Statistical Abstract of the United States: 1984, Sections 20 and 21.

Z Represents small, non-zero value.

1/ Totals may not equal sum of components due to independent rounding.

2/ For data by type of petroleum, see source.

3/ Includes industrial and utility production.

4/ Consumed at utilities to produce electricity.

5/ Coal and nuclear power.

1/ Totals do not include small quantities of energy sources for which consistent historical data are not available, such as solar energy obtained by the use of thermal and photovoltaic collectors; wind energy; and geothermal, biomass, and waste energy other than that consumed at the electric utilities.

2/ Data include power from electric utilities, including electrical energy losses incurred in the generation and transmission of electricity.

3/ Energy input at electric utilities. Distributed among the other four sectors.

TRANSPORTATION

This section presents statistics relating to public roads, motor vehicles, bicycles, traffic accidents, local public transit, civil aviation, harbors, and water traffic.

Motor vehicle registration in Hawaii increased from 495,000 in 1974 to 717,000 in 1984. Vehicle miles rose during the same period from 3.9 billion to 6.5 billion. Hawaii residents purchased 45,500 new passenger cars and 6,600 trucks in 1983. By the end of that year, 575,000 licensed drivers had access to 4,073 miles of streets and highways throughout the State. Bus passengers carried by the Honolulu Mass Transit Lines increased from 37 million in 1973 to 75 million in 1983. Registered bicycles numbered 108,000 in 1974 and 71,000 in 1983.

Most scheduled interisland travel is now by air. In 1983, airlines and air taxis reported 7.0 million interisland passengers, more than two times their 1970 total, and carried 55,000 tons of cargo. The State has 8 commercial airports, 15 general aviation, military or semi-private airports, 10 civilian heliports, 3,327 active pilots, and about 426 active civil aircraft in general aviation.

Rapid growth is similarly evident in transpacific travel. Although surface passenger arrivals dropped from 54,000 in 1959 to 741 in 1983, air arrivals increased during the same 24-year span from 224,000 to 4.8 million. Overseas cargo received in the State in 1981 amounted to 51,000 tons by air and 9.4 million tons by ship.

Undocumented State-registered vessels as of December 31, 1983 numbered 12,604, compared with 12,049 in 1973. Median length was 18 feet, and four-fifths were stored on land. There were 1,203 documented vessels in the State in 1984, double the 1971 total.

The chief source for transportation statistics is the Hawaii State Department of Transportation and its Highways, Harbors and Airports Divisions. Other sources include the U.S. Coast Guard, Civil Aeronautics Board, Federal Aviation Administration, Federal Highway Administration, Army Corps of Engineers, Honolulu Department of Transportation Services and Department of Data Systems, County finance departments, Hawaii Automobile Dealers Association, and individual transportation companies. Data for the entire period of record through 1976 appear in Historical Statistics of Hawaii, Section 17. Similar statistics for other areas are reported in Statistical Abstract of the United States: 1984, Sections 22 and 23.

1/ Data refer to years ended June 30 through 1983 and calendar years thereafter. Data limited to the Port of Honolulu. The decline in passenger volumes after 1977 reflects the termination of service by the Mariposa and Monterey on April 2, 1978.

2/ Calendar year statistics. Scheduled interisland passenger service by hydrofoil was begun June 15, 1975 and terminated January 15, 1978. Interisland cruise ship service was begun June 21, 1980. The 1978 figure is an estimate based on the daily average for 1977. Data exclude interisland travel by transpacific cruise ships.

3/ Transpacific passenger movements revised from Data Book 1983, table 486.

Section 19

AGRICULTURE

This section presents statistics on agricultural land, farms, crops, livestock, dairy products, and poultry. Related information appears in Sections 6 (on land use), 11 and 15 (agricultural employment and earnings), and 22 (food processing).

There were 4,596 farms in Hawaii as of 1982, with a total area of 1.96 million acres. The value of crop sales in 1983 was \$479 million, or 175 percent higher than the total for 1973. Livestock sales amounted to \$86 million, or 56 percent more than the 1973 level. Combined crop and livestock sales in 1983 ranged from \$62 million in Kauai County to \$191 million on the Big Island. Major crops were sugar (\$266 million in sales, up 88 percent over the decade), pineapple (\$100 million, or 153 percent over the 1973 total), flowers and nursery products (\$36 million, or 442 percent more than in 1973), vegetables and melons (\$26 million, up 185 percent), and macadamia nuts (\$24 million, up 674 percent). Diversified crops, defined as all crops other than sugar and pineapple, rose from \$29 million in 1973 to \$113 million in 1983, or approximately 283 percent. About 680 farms sold \$36 million of flowers and nursery products in 1983, chiefly anthuriums, potted foliage, and orchids. Important products of livestock farms as of 1983 included cattle (\$29 million in sales), milk (also \$29 million), and eggs (\$14 million). In 1983, Hawaii produced 44 percent of the fresh market vegetables consumed locally, 20 percent of the fresh market fruits, 32 percent of the beef and veal, 25 percent of the chickens, none of the rice, and 76 percent of the eggs.

Aquaculture has been growing in importance in recent years. Freshwater prawn production amounted to 268,500 pounds in 1983, with a value of more than \$1.3 million. Ten years earlier the corresponding figures had been only 4,400 pounds and \$15,000.

Statistics on Hawaiian agriculture exclude pakalōlō (marijuana) and other illicit plants. Authorities confiscated \$54 million worth of marijuana in 1983, but the proportion escaping detection is unknown.

Important sources for data on agriculture include the United States Census of Agriculture, most recently conducted as of 1982, the annual report on Statistics of Hawaiian Agriculture issued by the Hawaii Agricultural Reporting Service, and data compiled by the Hawaiian Sugar Planters' Association, and Aquaculture Development Program of the Department of Land and Natural Resources. Agricultural data for earlier years are summarized in Historical Statistics of Hawaii, Section 13. National statistics appear in Section 24 of the Statistical Abstract of the United States: 1984.

Section 20

FORESTS, FISHERIES, AND MINING

This section presents data on forests and forest products, commercial fishing, and mining and mineral products.

The most recent available statistics show 1.2 million acres of forest and water reserve and 948,000 acres of commercial timberland in the State, most of it on the Big Island. About 46,000 acres had been planted in eucalyptus and other species of trees by mid-1983. Forest products harvested in 1977 had a value of \$3.5 million, including \$2.3 million from logs for fiber. Forest and brushland fires burned 19,000 acres in fiscal 1983.

The commercial fish catch in fiscal year 1982 amounted to 9.2 million pounds and had a value of \$11 million. Ahi (Yellowfin) accounted for about 30 percent of the total value. Other important species are aku (Skipjack), mahimahi, opakapaka, ono, akule, opelu and Pacific Blue Marlin. Commercial fishermen numbered 2,940; they operated some 1,300 fishing vessels, serving about 119 fishery wholesaling and processing establishments.

The value of mineral production reached \$41 million in 1983, most of it in cement (\$17 million) and stone (\$23 million). The 1982 total was well below the all-time high reached in 1979.

Important sources of data on these subjects are the United States Census of Agriculture, United States Census of Mineral Industries and reports and records of the U.S. Bureau of Mines, National Marine Fisheries Service, and Hawaii State Department of Land and Natural Resources, Aquatic Resources Division and Forestry and Wildlife Division. Historical Statistics of Hawaii, Section 14, summarizes the data for earlier periods. Comparable Mainland statistics are reported in the Statistical Abstract of the United States: 1984, Sections 25, 26 and 27.

Section 21

CONSTRUCTION AND HOUSING

This section presents statistics on construction activity and costs, the size and composition of the housing inventory, occupancy of housing and office buildings, sales, and residential financing.

There were 19,733 building permits issued in 1983, with an estimated value of \$767 million. The total included \$380 million for private residential construction and \$304 million for private nonresidential structures. The value of government construction contracts awarded was \$278 million. Construction put in place, as indicated by the contracting tax base, totaled \$905 million in 1973 and \$1.35 billion in 1983. The value of land transfers in fiscal 1984 was \$3.6 billion. Mortgage loans outstanding at the end of 1982 amounted to \$7.7 billion. The July 1984 construction cost index for Honolulu (1967=100) was 348 for single-family residences and 367 for high-rise buildings.

The number of housing units in the State increased from 267,000 in 1974 to 360,000 in 1984. Owner occupied units numbered 113,000 in 1974 and 147,000 in 1984; the latter total included 36,000 on leased land. Condominium units, first authorized in 1961, numbered 98,000 at the end of 1982. Military and public housing accounted for 27,000 units as of 1984. Housing was in short supply throughout most of the past decade: on Oahu, the vacancy rate in March 1983, according to the Federal Home Loan Bank of Seattle, was only 1.3 percent. The average selling price of single family homes on Oahu during 1983, based on Multiple Listing Service data, was \$189,000; for condominium units it was \$114,000. The median contract monthly rent for the State rose from \$120 in 1970 to \$271 in 1980, and the median value of owner occupied single-family units increased from \$35,100 to \$118,100.

The principal sources for these data are the 1970 and 1980 U.S. Censuses of Housing, postal vacancy surveys issued by the Federal Home Loan Bank of Seattle, various series compiled by State and County agencies (primarily the Hawaii Housing Authority, Hawaii State Department of Planning and Economic Development, Department of Commerce and Consumer Affairs, Department of Taxation, and Bureau of Conveyances, and the four County building departments), the construction cost indexes prepared by the First Hawaiian Bank, and the Honolulu Board of Realtors reports on Multiple Listing Service activity. Many of these series are summarized in reports published by the Bank of Hawaii (particularly Construction in Hawaii, issued annually) and the First Hawaiian Bank. Persons interested in figures for earlier periods should consult Historical Statistics of Hawaii, Section 15. Mainland statistics appear in Section 28 of Statistical Abstract of the United States: 1984.

1/ As of April 1.

2/ As indicated by the number of taxpayers claiming home exemptions. The number of owner occupied housing units reported by the U.S. Census of Housing is somewhat higher than the corresponding number based on taxpayer home exemptions, chiefly because of differences in definitions. Section 22

MANUFACTURES

This section presents statistics on the manufacturing segment of the economy, including sugar processing and pineapple canning.

The number of manufacturing establishments in Hawaii increased from 697 in 1967 to 773 in 1972 and 967 in 1982. The value added by manufacture rose from \$326 million in 1967 to \$410 million in 1972, \$786 million in 1977, and \$1,249 million in 1980. More than three-fourths of all manufacturing activity in the State in 1982 was on Oahu. Food processing -- mostly sugar and pineapple -- accounted for more than 50 percent of the value added by manufacture in 1980. Between 1973 and 1983, the general excise and use tax base increased 104 percent for sugar processing, 48 percent for pineapple canning, and 44 percent for all other manufacturing. There were two pineapple canneries and 13 sugar mills in Hawaii in mid-1983. The production of canned pineapple fruit and juices in 1981 amounted to 18 million actual cases, well below the levels of earlier years. Sugar production in 1983 amounted to 1,044,000 short tons, about the same level as in other recent years. The value of sugar production (including commercial molasses) was \$410 million, compared with the record of \$677 million set in 1974. Important manufactures other than food processing include apparel (\$37 million in value added in 1980), printing and publishing (\$134 million), and chemicals and allied products (\$35 million).

Sources for data on this subject include the United States Census of Manufactures, most recently conducted for 1982, the Annual Survey of Manufactures, and publications of the Hawaii State Department of Agriculture and Department of Taxation, and Hawaiian Sugar Planters' Association. Historical Statistics of Hawaii, Section 16, reviews the figures for earlier years. Statistics for the nation as a whole appear in Section 29 of the Statistical Abstract of the United States: 1984.

Year	Preferred rate <u>1/</u>	Practical rate <u>2/</u>
1981	80	73
1982	80	72
1983	83	73

1/ The preferred level of operations is defined as a level, normally between actual operations and practical capacity, which the manufacturer would prefer not to exceed due to costs or other considerations. In this table, the preferred utilization rate represents the ratio of actual to preferred level of operations.

2/ Practical capacity is broadly defined as the greatest output the plant could achieve within the framework of a realistic work pattern. The practical capacity utilization rate is the ratio of actual operations to the practical capacity level.

Section 23

DOMESTIC TRADE AND SERVICES

This section presents statistics relating to retail and wholesale trade; hotels; and selected personal, business, automotive, repair, and amusement services.

These activities have undergone rapid growth in recent decades, in part because of higher price levels. Retail sales increased from \$751 million in 1963 to \$1.9 billion in 1972 and \$5.2 billion in 1982. Wholesale sales rose from \$1.6 billion in 1972 to \$4.1 billion in 1982. Hotels, amusements, and other services reported receipts exceeding \$2.6 billion in 1982, compared with \$665 million in 1972. General excise and use tax base data for more recent years indicate continued increases; between 1973 and 1983, the retailing tax base rose 190 percent, the wholesaling base by 203 percent, and the base for services by 206 percent. Major retail concentrations include Waikiki, Ala Moana Center, Pearlridge Center, and downtown Honolulu. In addition to civilian retail outlets, there are many commissaries, exchanges, clubs, gasoline stations and food services maintained by the armed forces; these facilities had sales of \$427 million in 1983.

Growth has been especially rapid for hotels. The number of units in the State rose from 6,800 in 1959 to 33,000 in 1971 and 64,000 in June 1984. There were 457 hotels, motels and apartment-hotels in the State on the latter date, including 290 on the Neighbor Islands. Almost one-third of all transient units were in condominium structures. Occupancy rates averaged 76.6 percent in Waikiki and 60.9 percent on the Neighbor Islands during 1983. The average daily room rate was \$55 in 1983. The hotel payroll in 1983 totaled \$329 million, compared with \$196 million five years earlier.

Sixty-three feature motion pictures and television specials and series were filmed in Hawaii in 1983, accounting for local expenditures of \$35 million.

The major source of these data are the United State Censuses of Retail Trade, Wholesale Trade, and Service Industries, most recently conducted for 1982. Statistics on the retailing, wholesaling, and services tax bases are available from the Hawaii State Department of Taxation. Data on hotel room counts, occupancy and other characteristics are published by the Hawaii Visitors Bureau and the firm of Pannell Kerr Forster. The Hawaii Film Office in the Department of Planning and Economic Development compiles data on motion picture and television production. A summary of figures on trade and services in earlier years appears in Historical Statistics of Hawaii, Section 20. The Statistical Abstract of the United States: 1984, Section 30, presents similar data for other states and the nation as a whole.

Section 24

FOREIGN AND INTERSTATE COMMERCE

This section includes data on the flow of goods, services, and capital between Hawaii and the rest of the world, with particular emphasis on trade and investment involving foreign countries.

Imports to Hawaii from foreign nations rose from \$340 million in 1973 to \$1.8 billion in 1983. Exports to foreign countries amounted to only \$73 million in 1973, but by 1983 reached \$203 million. (These figures, it should be noted, refer to merchandise imports and exports through the Honolulu Customs District. They do not necessarily represent exports of commodities originating in Hawaii, nor imports for direct consumption within the State.)

Trade with the Mainland United States has similarly risen in the past decade. Merchandise received from the Mainland increased from \$1.2 billion in 1970 to \$3.4 billion in 1979, the most recent year available. Estimates of the value of merchandise exported to the Mainland are no longer available.

Among the foreign nations, Hawaii's leading trading partners in 1983 were Indonesia for imports and Japan for exports. Imports from Indonesia amounted to \$629 million, or 34 percent of the total, while exports to Japan reached \$72 million or 35 percent of all foreign exports. About 68 percent of all imports for consumption were petroleum and natural gas products and monolithic integrated circuits.

Honolulu Foreign Trade Zone No. 9 handled merchandise valued at \$48 million in fiscal 1983. Merchandise handled by Subzone No. 9A, the PRI refinery, was valued at \$1.5 billion, almost all of it in petroleum and petroleum products.

Foreign-owned U.S. firms in Hawaii operated 276 establishments in 1982, and employed 14,000 persons with an annual payroll of \$198 million. Foreign investments in Hawaii exceeded \$215 million in 1983.

Sources for statistics on interstate and foreign commerce include the U.S. Bureau of the Census and Bureau of Economic Analysis, Foreign Trade Zone No. 9 and Subzone No. 9A, and the Hawaii International Services Agency. Further information appears in cargo data by origin and destination, compiled by the Army Corps of Engineers and cited in Section 18.

Comparable data for the nation as a whole appear in Section 31 of Statistical Abstract of the United States: 1984. Long-term Island trends are summarized in Historical Statistics of Hawaii, Section 21.

BIBLIOGRAPHY

This volume is the eighteenth in a series published by the Hawaii State Department of Planning and Economic Development and its predecessor agencies. The first was Statistical Abstract of Hawaii, 1962, issued by the Department of Planning and Research in 1962. After a four-year hiatus, updated versions titled The State of Hawaii Data Book were published by the Department of Planning and Economic Development in 1967, 1968, and annually beginning in 1970. Most of the volumes issued prior to the present edition are now out of print, but copies can be consulted in the DPED Library, Hawaii State Library, University of Hawaii and community college libraries, Honolulu Municipal Reference Library, and other collections throughout the State.

Additional information regarding specific statistical sources can be found in the introductory statements to each section of the Data Book, in footnotes and source references to the various tables, and in other DPED publications.

Although most of the series in the Data Book are shown only for recent years, earlier figures in many cases can be found in Historical Statistics of Hawaii, by Robert C. Schmitt. This book, published by the University Press of Hawaii in 1977, contains 711 pages of narrative and tables on the development of statistics in Hawaii since the 18th century. Copies are available from the University of Hawaii Press and various book stores for \$30.00.

Many statistics in the Data Book also appear in Atlas of Hawaii and Ronck's Hawaii Almanac, likewise published by the University of Hawaii Press. Atlas of Hawaii (second edition, 1983) was compiled by the University of Hawaii Department of Geography, and is sold for \$29.95. Ronck's Hawaii Almanac, compiled and edited by Ronn Ronck, appeared in 1984 and costs \$3.95.

Another useful publication is Statistical Sources in Hawaii: Reference Guide to Materials Available at the Hawaii State Library, compiled by Masae Gotanda and published by the Office of Library Services of the Hawaii State Department of Education in November 1978.

Privately published works of general statistical reference include Hawaii Facts and Figures and All About Business in Hawaii. Hawaii Facts and Figures is a publication of the Chamber of Commerce of Hawaii, first issued (under a different title) almost fifty years ago. The most recent edition appeared early in 1984, with statistics through 1983; copies are available from the Chamber for \$2.00. All About Business in Hawaii 1984 is the 12th in an annual series published by Crossroads Press, Inc. The current edition costs \$3.50.

Two other privately published reports containing useful statistics are the annual economic reviews of the two largest banks in the State. The

current editions are Hawaii 1984, published by the Bank of Hawaii in the fall of 1984, and Hawaii in 1983, issued by the First Hawaiian Bank as a supplement to its bimonthly Economic Indicators for March-April 1984. Greater detail appears in Hawaii's Economic Indicators: Sources, Definitions, and Trends, published by the First Hawaiian Bank in March 1980.

The County of Hawaii, Department of Research and Development, has published its own County of Hawaii Data Book 1980, presenting 264 pages of statistics for the Big Island. This report, dated December 1980, is available for \$7.50 (postpaid, \$10.00).

A similar report for Kauai, 1983 Kauai Statistical Review: An Annual Report of the County's Economic Indicators, is issued by the Kauai Office of Economic Development. The most recent edition, presenting data for 1983, was released in 1984 and contains 25 pages of tables.

Persons interested in comparisons between Hawaii and other States or the nation as a whole should consult the Statistical Abstract of the United States and its companion volumes, the State and Metropolitan Area Data Book and County and City Data Book. The Abstract is an annual publication of the U.S. Bureau of the Census, initiated in 1878. The current edition is the 104th, dated 1984; copies are available for \$23.00 (cloth) or \$19.00 (paper) from the Superintendent of Documents, U.S. Government Printing Office, Washington, D. C. 20402. The State and Metropolitan Area Data Book, 1982, also available from GPO, costs \$15.00. The County and City Data Book, 1983 is sold by the same agency for \$24.00. All three volumes are (or soon will be) on the shelves of most libraries.
