This report was prepared by Robert C. Schmitt, State Statistician, with the assistance of Sharon Nishi, Karen Yamashita, and Bob Stanfield of the Hawaii State Data Center. The camera-ready copy was typed and proofread by Judy F. Noda, Helen T. Nagafuchi, and Charlotte N. L. Chow. All of the participating staff are members of the DPED's Research and Economic Analysis Division, headed by Dr. Richard Y. P. Joun. The maps were drawn by Stewart A. Wastell, illustrator in the DPED's Planning Division. Editing and printing arrangements were handled by the DPED's Information Office.

Copies of this report may be obtained for \$5.00 each from the Information Office on the 7th floor of the Kamamalu Building, 250 South King Street, Honolulu, or ordered from out of State by sending \$15.00 per copy (postpaid) to the DPED Information Office, P. O. Box 2359, Honolulu, Hawaii 96804.

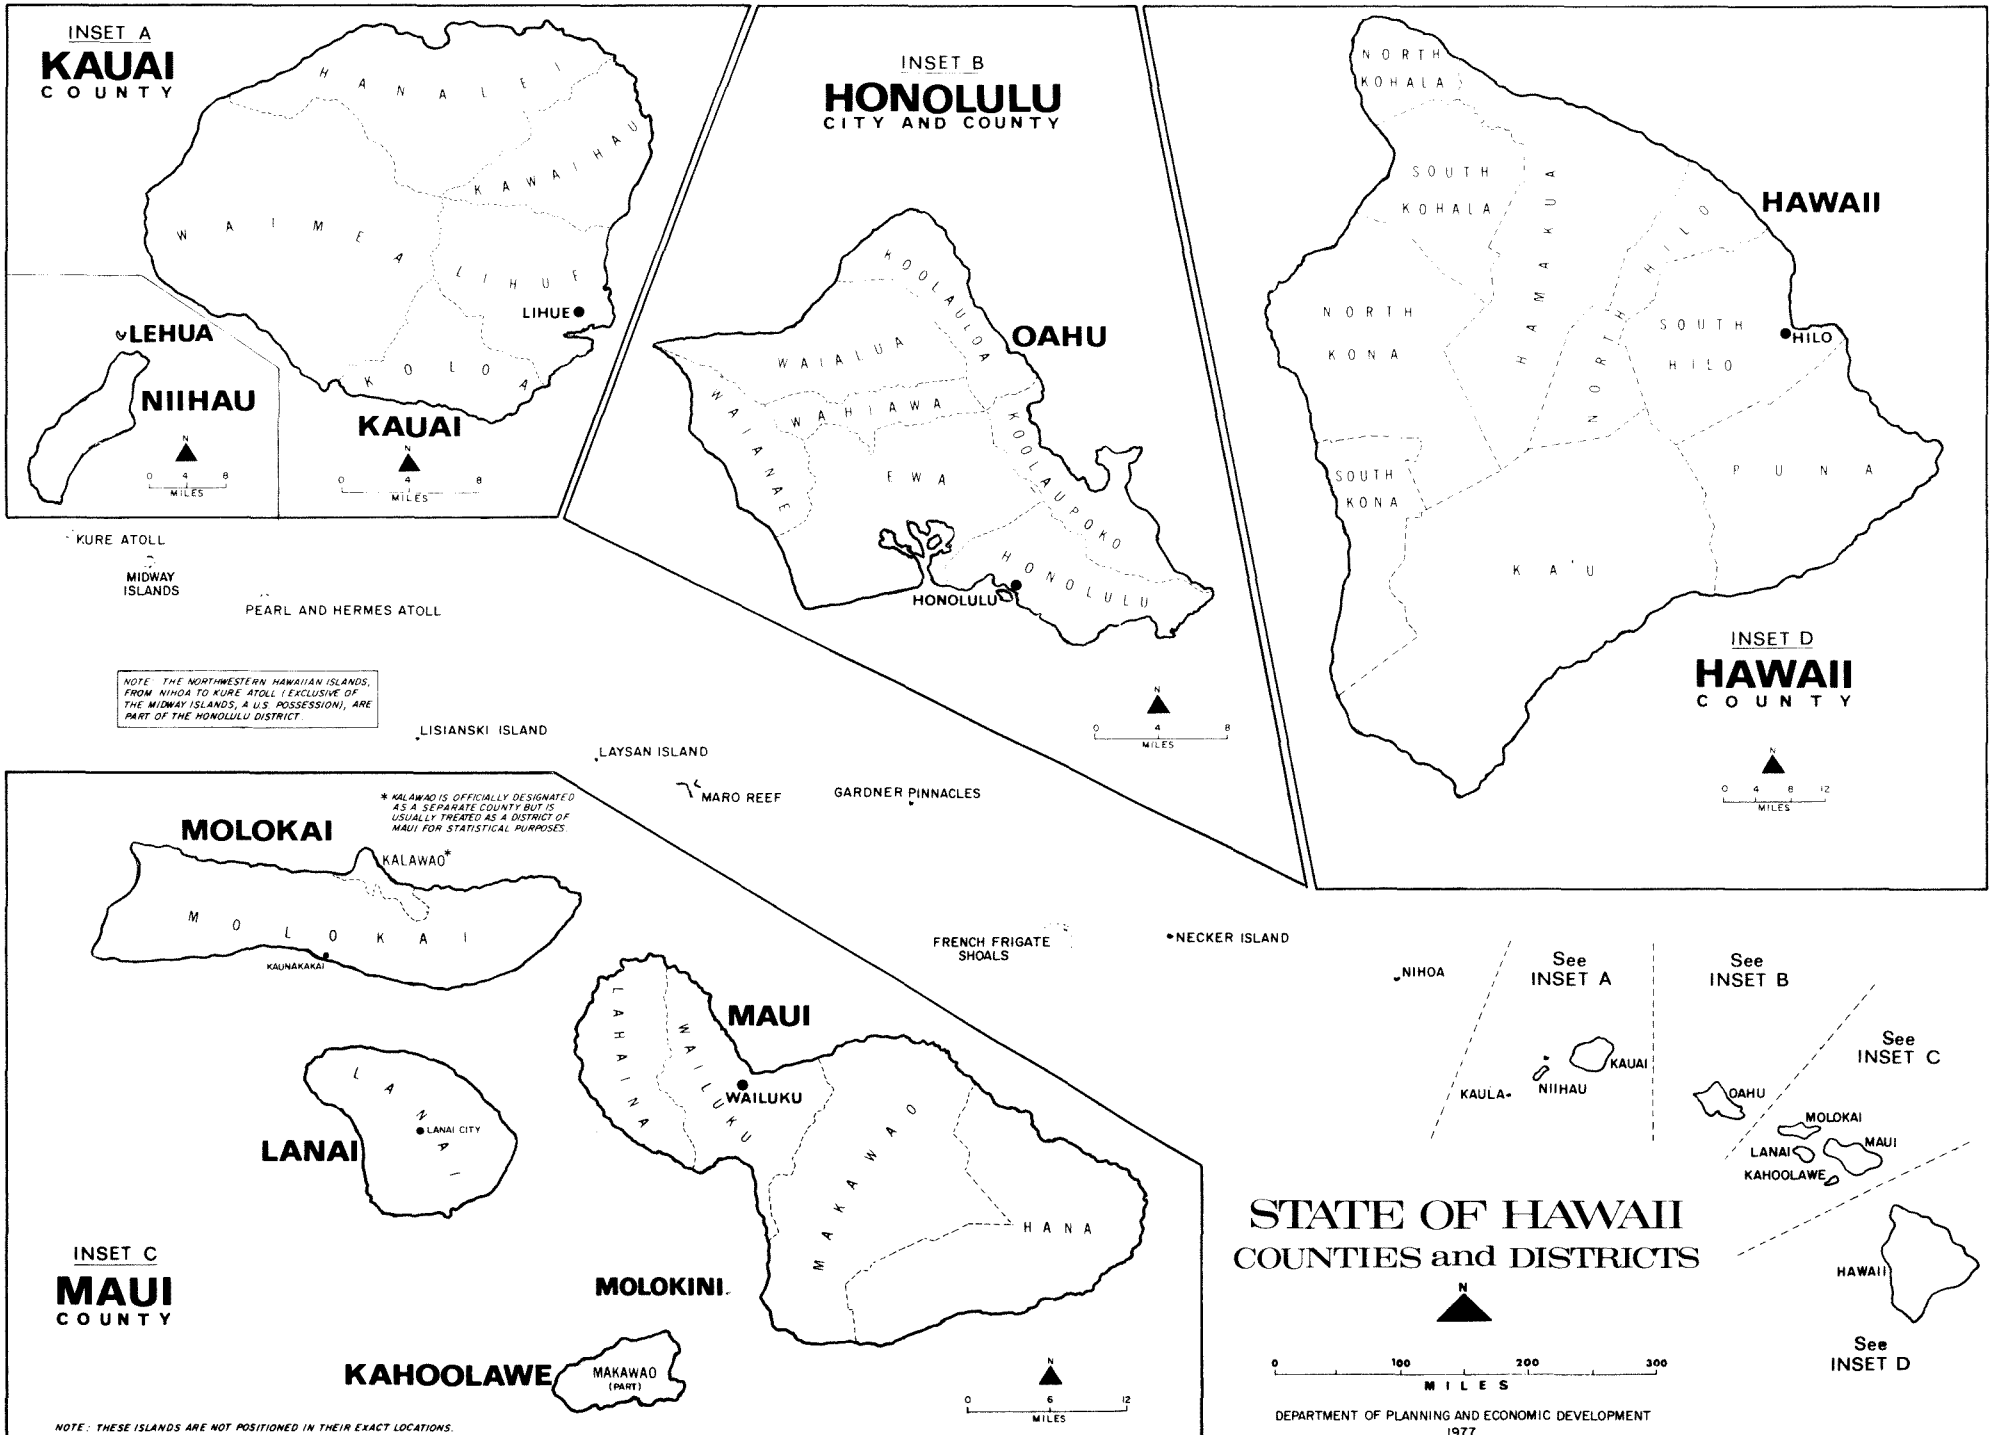

FOREWORD

By George R. Ariyoshi
Governor, State of Hawaii

Accurate, timely and substantial information is essential to sound decision-making. The State of Hawaii has long recognized that orderly State growth and planned prosperity require a continuing, efficient organization of statistical data and other information into forms which are easily used and readily available to all who need them. This State of Hawaii Data Book 1985 is the latest example of the State Administration's constant effort to provide and improve this important service to Hawaii's citizens.

The Data Book is invaluable for Government administrators. It is vital to all agencies, companies, organizations and individuals who carry out a great variety of forms of research in the Islands and overseas. It is very useful to other citizens who have only an occasional need for accurate statistics. It is a book which, thanks to the professionalism of its compilers, can be depended upon, and upon which thousands do depend. And it is only one--although perhaps the best one--of a large number of excellent data sources which Hawaii makes available.

Through such reference works, Hawaii is able to go about its myriad tasks with confidence that its information base is sound. This State of Hawaii Data Book 1985 is one of many proofs we have that our people know what they are doing, and where they are going, and are reasonably certain they can achieve their goals.

INTRODUCTION

By Kent M. Keith
Director of Planning and Economic Development

The State of Hawaii Data Book: A Statistical Abstract is the standard official summary of statistics on the social, economic and political organization of the State. Like its long-established counterpart, the Statistical Abstract of the United States, it may be used as a convenient volume of statistical reference and as a guide to other statistical publications and sources.

The present volume, containing statistics available late in 1985, is the 19th such abstract to be published by the State of Hawaii. Earlier editions appeared in 1962, 1967, 1968, and annually beginning in 1970. Most of them are now out of print, but copies can be found in many high school, university and public libraries in Hawaii.

The Data Book follows closely the organization and format of the U.S. Abstract, to facilitate comparison of Hawaii data with corresponding series for the nation and other jurisdictions.

Emphasis in the Data Book is given to the most recent available State data. Historical statistics and information for Counties, islands, urban places, and smaller areas receive more limited attention. The publications cited as sources in the introductions to the various sections or at the end of each table usually contain additional statistical detail and a more comprehensive discussion of relevant definitions and concepts than can be presented here. Persons interested in more extensive information should consult these sources or write to the agencies responsible for them.

Many Federal, State, County and private organizations cooperated with our Research and Economic Analysis Division in the preparation of this report. These agencies are credited in the source references to the tables to which they contributed. Their assistance is gratefully acknowledged. Within our department, we would also like to acknowledge the DPED Library and Hawaii State Data Center, which were especially helpful in preparing this volume.

GUIDE TO TABULAR PRESENTATION

The tables in this report generally follow the principles of tabular presentation used by the U.S. Bureau of the Census in its annual publication, Statistical Abstract of the United States, and described in Bureau of the Census Manual of Tabular Presentation, published by the Bureau in 1950. These principles have been accepted by the Department of Planning and Economic Development for use in its publications and recommended to all other State agencies for official use.

Headnotes immediately below table titles provide information important for correct interpretation or evaluation of the table as a whole or for a major segment of it.

Unit indicators ("In thousands," "In millions of dollars," etc.) are usually given as the first element of the headnote. In tables where several units are used, the unit indicators are generally given in the stub or in the column headings.

Footnotes below the bottom rule of tables give information relating to specific items, figures or symbols within the table.

Parallel vertical rules are used to the right of a total column to indicate --

- (1) that the components which follow add to the total;
- (2) in the case of derived figures, that the underlying data are additive to their total.

A dash (-) represents zero in references to absolute values. In rates and percentages, a zero (0) is used.

In many tables, details will not add to the totals shown because of rounding.

Geographic coverage should be understood as Statewide, unless otherwise indicated in the table title, headnote, boxhead, or stub. All annual statistics should be understood as referring to calendar years unless otherwise indicated.

Section 1

POPULATION

This section presents statistics on the growth, geographic distribution, and composition of the population of Hawaii, and on the number and characteristics of migrants moving to and from the State.

Provisional estimates for 1984 indicate a resident population of 1,039,000. This total is well above the 1980 census count of 964,691 and the earlier counts of 500,000 in 1950, 256,000 in 1920, and 81,000 in 1884. These censuses and estimates include members of the armed forces stationed in Hawaii and their local dependents, a group making up 12 percent of the resident total when last surveyed. The 1984 de facto population -- which included 119,000 visitors present on an average day in that year but excluded more than 16,000 residents temporarily absent -- was 1,141,000. More than three-fourths of the 1984 de facto total was on Oahu, giving that island a density of 1,442 persons per square mile. The population of the State is relatively young -- the median age in 1980 was 28.3 years -- and racially diversified. The major unmixed groups, based on a 1983 sample survey, were Caucasians (24.5 percent of the non-barracks, non-institutional population) and Japanese (23.2 percent). In addition, 29.8 percent were of mixed race, primarily part Hawaiian. The same 1983 survey reported 314,000 households and 258,000 families in the State, with an average household size of 3.14. Migration has been a major factor in the growth of the population: between 1980 and 1984, there was a net in-migration (excluding military personnel and dependents) of 29,000, accounting for 41 percent of the total civilian population growth during that time. Immigrant arrivals in fiscal 1984 exceeded 8,900, mostly from the Philippines.

The principal sources for these data are the decennial population censuses conducted by the U.S. Bureau of the Census, the estimates developed annually by the Hawaii State Department of Health and Department of Planning and Economic Development in cooperation with the Bureau of the Census, the Hawaii Health Surveillance Program conducted regularly since 1969 by the Department of Health, the ongoing series on visitors present and residents absent maintained by the Hawaii Visitors Bureau, and the U.S. Immigration and Naturalization Service tabulations on immigration. The Department of Planning and Economic Development summarizes these data in two series of reports, both issued annually: The Population of Hawaii and Hawaii's In-Migrants. Other annual reports distributed by DPED contain population estimates for sub-county areas. Earlier figures on population and migration are given in Historical Statistics of Hawaii, Sections 1 and 3. Comparable national statistics on population and migration appear in Sections 1 and 3 of Statistical Abstract of the United States: 1985.

[Population counts from missionary censuses of 1831-1832 and 1835-1836, censuses conducted by the Hawaiian government from 1850 to 1896, and censuses by the U.S. Bureau of the Census beginning in 1900. Data for 1831-1896 are on a de facto or unspecified basis; data for 1900 and later years are resident totals, including armed forces stationed in Hawaii. Based on county boundaries established in 1905 and 1909]

1/ The resident population is defined as the number of persons whose usual place of residence is in an area, regardless of physical location on the estimate or census date. It includes military personnel stationed or homeported in the area but excludes persons of local origin attending school or in military service outside the area.

2/ The de facto population is defined as the number of persons physically present in an area, regardless of military status or usual place of residence; it includes visitors present but excludes residents temporarily absent.

3/ Averages for 12-month periods centered on the estimate or census dates.

4/ Provisional estimates.

2/ The ".99" census tracts consist of vessels anchored off the indicated tract; for example, persons living aboard ships in Maalaea Bay, adjacent to tract 307, are assigned to tract 307.99.

1/ The Honolulu Urbanized Area consists of Honolulu District (the area southwest of the crest of the Koolau Mountains, between Red Hill and Makapuu Point) and the adjacent urbanized territory circling Pearl Harbor, as far west as Waipahu and Ewa Beach in 1970 and 1980, and also extending to Whitmore Village and Schofield Barracks in 1980.

2/ The Kailua-Kaneohe Urbanized Area was initially defined as of 1980. It includes the urban territory on Windward Oahu, from Kahaluu through Waimanalo Beach.

3/ Included with "other urban."

4/ Including Kalawao County.

^{1/} The farm definition used in 1980 differed from that used in 1970 and 1960. In 1980, the annual dollar value of agricultural sales required for a place to be considered a farm was \$1,000 or more. Previously a place could have as little as \$50 of agricultural sales per year and qualify as a farm.

1/ Based on a sample; data may therefore differ somewhat from comparable data in table 37.

2/ A subfamily is a married couple (husband and wife enumerated as members of the same household) with or without children, or one parent with one or more never married children under 18 years of age, living in a household and related to either the householder or householder's spouse. The number or percentage of subfamilies is sometimes treated as a measure of the "doubling up" of households.

Table 46.-- SPECIFIED COMPONENTS OF POPULATION CHANGE:
FIRST SETTLEMENT TO 1983

[In thousands. These estimates, which are entirely speculative before 1832 and based on incomplete information for 1832-1950, were prepared in response to a query regarding the all-time cumulative population of Hawaii]

Period	Births and in-migrants	Live births	Civilian in-migrants
500-1778 1/	2,186	2,161	25
1778-1900	607	459	148
1900-1983	2,381	1,046	1,335
500-1983	5,174	3,666	1,508

1/ Assumes initial settlement by 100 persons arriving in A.D. 500; 25 in-migrants annually for 1,000 years; a constant rate of growth (0.63 percent annually), to a population of 300,000 in 1778; and a crude birth rate of 45 per 1,000 throughout the period. Six variants on these basic assumptions produce birth totals ranging from 1,517,000 to 9,104,000.

Section 2

VITAL STATISTICS AND HEALTH

This section presents data on births, deaths, marriages, divorces, diseases and accidents, nutrition, substance abuse, height and weight, hospitals, dental care, and health personnel.

Vital indexes generally reflect the high health standards of Hawaii. Expectation of life at birth in 1980 was 75.04 years for males and 81.45 years for females. There were 5,942 deaths in 1984, or 5.7 per 1,000 resident population. Deaths under one year of age per 1,000 live births numbered 10.9 in 1984. Diseases of the heart have accounted for almost a third of all deaths in recent years; cancer, for almost one-fourth. Live births in 1984 numbered 18,756, or 18.1 per 1,000 resident population. The total fertility rate for civilians fell from 3,360 per 1,000 women in 1960 to 2,461 in 1970 and 1,871 in 1980. Over 98 percent of all babies were born in hospitals in 1984, and more than one-fifth were born to military couples. One out of six births was to an unmarried woman. There were 6,906 fetal deaths in 1984, including 5,277 elective abortions. Marriages numbered 14,982 in 1984, with about 33 percent accounted for by nonresidents. Divorces reached a 1984 total of 4,769. The State had 24 acute care hospitals (with 2,896 beds), 32 long-term care facilities (with 2,648 beds), 10 specialty care facilities (with 967 beds) and 288 care homes (with 1,631 beds) in 1983. There were 1,966 physicians and surgeons, 767 dentists, 6,783 professional nurses, and 445 pharmacists licensed and living in Hawaii as of January 1985. Acute conditions per 100 persons numbered 209 in 1983, with respiratory conditions the most common complaint (at 154 cases per 100 persons). Among chronic conditions reported in the 1983 survey data, the most frequently mentioned were hypertension without heart involvement (7.3 per 100 persons), impairments of the back or spine (5.4), and hay fever (5.2). The most common communicable disease reported to authorities in 1984 were scarlet fever, with 2,973 cases, and gonorrhea, with 2,664. State mental health facilities served 9,724 patients in fiscal 1984, but the number of in-patients at the end of the year was only 337. Dental health was only fair: according to a 1979 survey, 275,000 residents had not visited a dentist within the previous year, and 176,000 reported one or more dental problems, chiefly cavities. Among persons 12 years old and over in 1979, 55 percent had used alcohol in the preceding month, 33 percent had smoked cigarettes, 14 percent had used marijuana, and 5 percent had used cocaine. The average adult male was 67.5 inches tall and weighed 159.5 lbs.; the average adult female was 62.6 inches and 127.9 lbs.

The major sources for data on vital statistics and health are the annual statistical reports of the Hawaii State Department of Health. Long-term trends are traced in Historical Statistics of Hawaii, Section 2. Sections 2 and 4 of the Statistical Abstract of the United States: 1985 contain similar data for the nation as a whole.

Section 3

EDUCATION

This section presents statistics on enrollment in public and private schools, colleges and universities; students graduated and degrees awarded; the highest grade of school completed; achievement test results; school facilities, personnel, and expenditures; and libraries.

Enrollment in elementary, intermediate and high schools in 1984-1985 totaled 200,869, slightly more than in the preceding year but well below the all-time high of 215,524 reached in 1971-1972. There were 231 public schools with 8,060 classroom teachers and 163,860 students (81.6 percent of the total). There were also 141 private schools with 2,393 teachers and 37,009 pupils. Students graduating from public and private high schools in 1983-1984 numbered 12,992. Some 52,185 students attended colleges and universities in the State in 1984-1985, including 20,023 on the Manoa Campus of the University of Hawaii, 435 at West Oahu College, 3,237 at UH-Hilo, 20,275 at six community colleges, and 8,215 in four private colleges and universities. Ninety-two percent of the children 5 and 6 years old were in school in 1980 (compared with 87 percent in 1970), and 47 percent in the 18- and 19-year-old group were enrolled (compared with 53 percent a decade earlier). The expenditure per pupil in public schools rose from \$1,257 in 1973-1974 to \$3,481 in 1983-1984. Among adults, the illiteracy rate dropped from 17.5 percent in 1930 to 1.9 percent in 1970, and by 1980 one-fifth percent of all residents 25 years of age or more could report having completed four or more years of college. The Hawaii State Library System, with 49 locations in all four counties, had 4.7 million books, film reels, phonorecords, and other collections in 1984, with an annual circulation of 5.5 million. The University of Hawaii libraries in the same year counted 2.4 million volumes.

The principal sources of data on education are the U.S. Bureau of the Census, Hawaii State Department of Education, University of Hawaii, and private colleges and universities. Historical Statistics of Hawaii, Section 9, contains Island data back to 1820. Section 5 of the Statistical Abstract of the United States: 1985 presents comparable information for the nation as a whole.

Section 4

LAW ENFORCEMENT, COURTS AND PRISONS

Statistics in this section refer to crimes committed, victims of crime, arrests, the police, attorneys, the judiciary system, prisons, and youth correctional facilities.

Major offenses reported to the police in 1984 numbered 57,000, compared with 59,000 in 1983 and 51,000 in 1974. The rate per 1,000 resident population increased from 59 in 1974 to 74 in 1980, then declined to 55 in 1984. Seventy-eight percent of the 1984 total occurred on Oahu. Visitors have been found to be disproportionately victimized. For the State as a whole, major offenses known to police in 1984 included 34 murders or cases of non-negligent manslaughter, 315 rapes, 1,202 robberies, 857 aggravated assaults, 12,588 burglaries, 38,292 cases of larceny, and 3,625 auto thefts. The value of property reported stolen in 1984 amounted to \$27 million, exclusive of motor vehicles; only 7.0 percent was recovered. Authorities confiscated 533,000 marijuana plants, with an estimated value of \$47 million, during the year. Confirmed instances of child abuse and neglect numbered 1,670. Seventeen percent of the major offenses known to police were cleared by arrest or otherwise in 1984. Forty percent of the persons arrested for major crimes and 23 percent of those arrested for lesser offenses in 1984 were less than eighteen years of age. The number of inmates in the ten State correctional institutions averaged 1,652 during fiscal 1984; of this number, 974 were adults serving time for felonies. Cases concluded in the State Supreme Court, Intermediate Court of Appeals, four circuit courts, and four district courts and their divisions during fiscal 1984 numbered 931,000, including 812,000 traffic cases. Filings in the United States District Court for Hawaii included 1,459 civil cases, 3,030 criminal cases, and 630 bankruptcy cases. The last legal execution in Hawaii took place in 1947. There were 3,180 attorneys licensed in Hawaii as of mid-1985.

Statistics on law enforcement, courts, and corrections in Hawaii appear in the annual reports of the county police departments, the State Judiciary, the Intake Service Center, and the Administrative Office of the United States Courts. The Hawaii Criminal Justice Data Center issues quarterly and annual reports titled Crime in Hawaii. Figures on crime, the courts, and corrections in earlier years appear in Historical Statistics of Hawaii, Section 10. National data are summarized in the Statistical Abstract of the United States: 1985, Section 6.

Honolulu	120,238	28,558	5,711,600
Kauai	49,851	76,859	15,371,800

^{1/} A "wet" weight value of \$200 per pound was used in estimating the value of marijuana confiscated. That figure was used by most counties (Kauai county used \$1,000 per pound).

In 1985, however, the four county police department will be using the \$1,000 per plant value. The potential value per plant rather than the poundage is more consistent with the actual value of the crop.

The data above were provided by the four police departments and pertain only to marijuana plants confiscated. Data on confiscated, harvested and manicured marijuana were not available. The "street" value of processed marijuana is believed to be between \$1,800 and \$2,200 per pound.

Section 5

GEOGRAPHY AND ENVIRONMENT

This section relates to land and water areas, physical geography, climate, air and water quality, noise, and other geographic and environmental measurements of Hawaii. Most statistics on land use and ownership, however, appear in Section 6.

The State consists of eight major islands and 124 minor islands with a total land area of 6,425 square miles and a general coastline of 750 miles. Honolulu is 214 miles from Hilo, 1,367 miles from Kure Atoll (the westernmost end of the State), 2,397 miles from San Francisco, and 4,829 miles from Washington, D.C. The highest peak in the State is Mauna Kea, 13,796 feet above sea level; the longest stream is Kaukonahua Stream, Oahu, 33 miles in length; the deepest lake is Kauhako, on Molokai, 814 feet; and the highest named waterfall is Kahiwa, Molokai, a 1,750-foot cascade. Various measures of air pollution, such as suspended particulate matter, indicate that Honolulu is one of the cleanest cities in the nation. There is also relatively little water pollution: the 34 major beaches surveyed in 1984 were found to have fecal coliform levels per 100 ml. ranging from 2.3 to 109.7, and all 34 were within EPA standards. More than 1,200 species, subspecies, and varieties of native fauna and flora have been proposed or accepted for inclusion on lists of endangered, threatened, or extinct organisms. Climatically, Hawaii is marked by remarkably balmy temperatures and wide variations in rainfall. The all-time temperature range at Honolulu International Airport, for example, was from 53° to 94°F. Average precipitation, however, ranges from less than nine inches at Kawaihae to 451 inches atop Waialeale. The largest volcanic eruptions in Island history (1859 and 1950) each produced 600 million cubic yards of lava, the worst earthquake attained 7.5 on the Richter scale, the highest tsunami wave reached 56 feet, and the most destructive hurricane (Iwa, in 1982) gusted to 117 miles per hour. Water withdrawn for use in 1980 averaged 2.9 billion gallons per day, compared with 2.8 billion in 1975 and 2.7 billion in 1970. Among 31 neighborhoods on Oahu, median noise levels in 1981-1982 ranged from 37 decibels (in Mililani) to 57 decibels (in Pawa).

Important sources of data include the U.S. Geological Survey, National Ocean Survey, National Weather Service, U.S. Bureau of the Census Geography Division, the Division of Water and Land Development of the State Department of Land and Natural Resources, the State Department of Health, and the University of Hawaii Institute of Geophysics. Detailed information is given in Atlas of Hawaii, 2nd edition, published by the University of Hawaii Press in 1983. National data are reported in Statistical Abstract of the United States: 1985, Section 7.

1/ Listed in geographic order, from east to west. The channels between major islands were measured between the following points:

- Alenuihaha: Upolu Pt., Hawaii, to Puhilele Pt., Maui;
- Alalakeiki: Lae o ka Ule, Kahoolawe, to Nukuele Pt., Maui;
- Kealaikahiki: Makaalae, Kahoolawe, to Kamaiki Pt., Lanai;
- Auau: Kikoa Pt., Lanai, to Lahaina, Maui;
- Kalohi: Wahie Pt., Lanai, to Kamalo, Molokai;

- Kaiwi: Ilio Pt., Molokai, to Makapuu Pt., Oahu;
- Kauai: Kaena Pt., Oahu, to Kamilo Pt., Kauai;
- Kaulakahi: Mana Pt., Kauai, to Kaunuopou, Niihau.

2/ Width measured in statute miles between designated points on National Ocean Survey and Coast and Geodetic Survey charts. Width in kilometers calculated from miles (1 mile = 1.60934 km.).

3/ Depths given are the deepest soundings noted at or near the line joining the two designated points, on National Ocean Survey and Coast and Geodetic Survey charts. Depths measured in fathoms and converted to feet and meters (1 fathom = 6 feet = 1.8288 meters).

1/ Figures are lengths of general outline of seacoast. Data for the four islands of Maui County are not consistent with the reported county total.

2/ Shoreline of outer coast, offshore islands, bays, rivers, and creeks is included to the head of tidewater or to a point where tidal waters narrow to a width of 100 feet.

3/ Derived from data expressed in statute miles; independently rounded and accordingly may not add exactly to indicated totals and subtotals.
1 mi. = 1.609 km.

4/ Data are not available for five minor islands: Molokini, Lehua, Gardner Pinnacles, Maro Reef, and Pearl and Hermes Atoll.

5/ Excludes the Midway Islands, which are part of the Hawaiian Archipelago but not legally part of the State of Hawaii. Midway has a general coastline of 20 miles and a tidal shoreline of 33 miles.

1/ Areas in square kilometers and acres were calculated directly from the figures shown for square miles; these equivalents were independently rounded, and hence may not add exactly to the indicated totals and subtotals. 1 square mile = 640 acres = 2.58999 square kilometers.

2/ Dry land and land temporarily or partially covered by water, as marshland, swamps, etc.; streams and canals under one-eighth statute mile wide; and lakes, reservoirs, and ponds under 40 acres of area.

Continued on next page.

Table 138.-- LAND AND WATER AREA OF COUNTIES AND ISLANDS: 1982 -- Con.

3/ Permanent inland water surface, such as lakes, reservoirs, and ponds having 40 acres or more of area; streams, sloughs, estuaries, and canals one-eighth statute mile or more in width; deeply indented embayments and sounds, and other coastal waters behind or sheltered by headlands or islands separated by less than 1 nautical mile of water, and islands having less than 40 acres of area.

4/ Because of rounding, island figures may not add to county figures.

5/ Kaula, included here with Kauai County, has also been claimed by the City and County of Honolulu.

6/ Molokini, offshore of Maui, not measured; other sources give the area of MoTokini as 18.6 acres (0.03 square miles or 0.075 square kilometers).

7/ Includes Lehua, previously reported as 243 acres (0.38 square miles or 0.98 square kilometers).

8/ Exclusive of the Midway Islands, which are part of the Hawaiian Archipelago but not legally part of the State of Hawaii.

1/ The adjacent ocean floor has an average depth of 2,800 fathoms and a maximum depth of 3,045 fathoms. Thus, Mauna Kea and Mauna Loa rise respectively 30,596 feet and 30,479 feet above their submarine bases as calculated from average depths, and respectively 32,066 and 31,499 feet above as calculated from maximum depths. So measured, Mauna Kea and Mauna Loa are the world's tallest mountains.

Endemic birds are those peculiar to a particular region, in this case Hawaii, and therefore found nowhere else in the world; indigenous birds are those native to a given region, in this case Hawaii, but with a total range of distribution encompassing a much wider area. The classification is that in Andrew J. Berger, *Hawaiian Birdlife* (1972).

2/ Including Moku Manu, excluded after 1981. Moku Manu had 4 species and 913 individuals (including 425 Red-footed Boobies and 460 Great Frigatebirds) in 1982, 4 species and 760 individuals in 1983, and 4 species and 545 individuals in 1984.

Section 6

LAND USE AND OWNERSHIP

General statistics on the use, ownership, and tenure of land appear in this section. Information on specific use or ownership categories is given elsewhere: parks in Section 7, agriculture in Section 19, forests in Section 20, and cane land and industrial parks in Section 22.

Out of the 4,112,000 acres in the State, 1,300,000 are in cropland or pastureland. Other major categories include forestland, with 1,473,000 acres, urban and built-up, with 126,000, and miscellaneous nonfarm, with 852,000. On Oahu, land in residential use increased from 22,600 acres in 1969 to 28,100 in 1982; during the same 13-year span, agricultural land declined from 88,900 to 74,700 acres. For the State as a whole, the Land Use Commission has zoned 159,000 acres as urban, 1,969,000 as conservation, 1,974,000 as agricultural, and 10,000 as rural.

Recent data on land ownership indicate that the Federal government owns 8.3 percent of all land, the State and counties own 30.8 percent, and private owners (chiefly large estates) have 60.9 percent. Total Federal holdings reported by the General Services Administration in 1983 came to 691,000 acres, exclusive of leased land (52,000 acres); most of the Federal land was in wildlife, park and military use. The State Department of Hawaiian Home Lands holds about 188,000 acres, divided among 3,332 lessees. Total land parcels in the State as of 1985 numbered 398,000.

Considerable caution is necessary in comparing statistics from different sources on land use, ownership, or tenure. Variations in definitions and survey dates seriously affect comparability in many instances, even where terminology is relatively unambiguous and misinterpretation seems unlikely. An example of such difficulties is the wide range in estimates of Federal land, with totals ranging from 327,000 acres to 691,000.

Tabulations by the U.S. Department of Agriculture and General Services Administration, Hawaii State Department of Hawaiian Home Lands, Department of Land and Natural Resources, Department of Planning and Economic Development, and Land Use Commission, Honolulu Department of Finance, and Honolulu Department of General Planning provided the data for this section. Historical Statistics of Hawaii, Section 12, contains limited information for earlier years. Statistics for the nation as a whole are available in Sections 7, 8, 11 and 24 of the Statistical Abstract of the United States: 1985.

1/ Because of the omission of public thoroughfares and for other reasons, totals by island may differ considerably from official area estimates in other tables in this volume.

2/ State land ceded by presidential proclamation or governor's executive order to the federal government appears in most cases to have been classified for this table as federal land, even though title to it technically remains with the state. Land ceded by the state to the counties, in contrast, has probably been classified as state land. For both types of ceded land, treatment may have varied from parcel to parcel.

3/ For data on the leasehold status of privately owned land, see the two following tables.

4/ Data exclude the Northwestern Hawaiian Islands (1,722 acres).

Section 7

RECREATION AND TOURISM

Statistics on tourism, recreation, sports, museums, parks, pets, and the performing arts appear in this section. Additional information on recreational and resort land use is given in Section 6; on transportation, in Section 18; and on hotels and hotel workers, in Sections 12, 13, 15 and 23.

Approximately 4,856,000 visitors stayed overnight or longer in Hawaii during 1984, compared with 2,786,000 in 1974 and only 564,000 in 1964. The average number present at any given time during 1984 was 119,000. Total visitor expenditures (exclusive of trans-Pacific fares) in 1984 amounted to \$4.6 billion, compared with \$1.2 billion a decade earlier. The 1984 visitor total included 3.2 million from other States, 330,000 from Canada, and 816,000 from Japan. Expenditures per visitor day in 1983 averaged \$85.88 for westbound visitors and \$227.32 for the Japanese. Visitor-related spending in 1983 resulted in tax revenues of \$477 million and generated 164,500 jobs.

Both visitors and residents have access to a wide range of recreational and cultural facilities. The State has seven National parks and similar areas, 74 State parks, 626 County parks, 57 golf courses, 259 public tennis courts, 2,033 small-boat moorages, 1,600 recognized surfing sites, and 24.4 miles of safe, sandy, accessible beach. Recreational, scenic and cultural facilities reporting more than two million annual visitors each include Waikiki Beach, the National Memorial Cemetery of the Pacific, Wailua River State Park, and Hawaii Volcanoes National Park. Total visits to 48 museums, state monuments and similar attractions in 1984 numbered 12 million. About 334,000 Hawaii residents traveled to the Mainland in 1984. Thirteen theatrical groups on Oahu reported 1,734 performances of 695 productions for the 1983-1984 season, with a combined audience of 1,060,000. During the same period, the Honolulu Symphony Orchestra gave 133 concerts, with a total attendance of 195,000. Professional baseball drew 145,000 fans in 1984, and during the 1983-1984 school year, attendance at UH-Manoa varsity baseball, basketball and football home games exceeded 502,000.

Information on recreation and tourism is issued periodically by the Hawaii Visitors Bureau (particularly in its Annual Research Report), the State Parks Division of the Department of Land and Natural Resources, the Hawaii State Department of Planning and Economic Development, U.S. National Park Service, U.S. Passport Office, County park and recreation departments, and other organizations. Long-term trends are summarized in Historical Statistics of Hawaii, Section 11. National statistics are given in Section 8 of Statistical Abstract of the United States: 1985.

Table 191.-- SUMMARY CHARACTERISTICS OF WESTBOUND VISITORS TO HAWAII:
1974 TO 1984 -- Con.

1/ Base includes estimated number of visitors arriving directly from Canada and usually omitted from the Hawaii Visitors Bureau Basic Data Survey.

2/ Party heads only. Calculated as the number of professional, technical, business, managerial and official workers as a percent of all party heads responding to this question.

3/ Party heads only.

4/ Excludes condominiums operating as hotels. Data for years before 1979 are not comparable in coverage.

5/ Computed from total visitor days and total visitor arrivals for westbound visitors destined for Hawaii. These data may differ somewhat from corresponding data in the source, because of different computation procedures.

6/ Base includes passengers who did not answer this question.

Section 8

ELECTIONS

This section presents data on election districts, registered voters, votes cast, campaign expenditures, elected officials, and legislative activity.

About 419,000 persons were registered to vote in the general election of November 6, 1984, and more than 349,000 actually voted. The number voting amounted to 46 percent of the 755,000 Hawaii residents of voting age at that time. The latter figure included aliens, inmates of mental and penal institutions, and members of the armed forces and their dependents, groups that are either ineligible or unlikely to vote in Island elections. Among registered voters, females outnumbered males and Democrats were far more numerous than Republicans. Campaign expenditures for the 1984 primary and general elections (other than for federal offices) exceeded \$6.2 million.

Hawaii has 2 Congressional, 25 Senatorial, 51 Representative, and 9 Councilmanic districts. It also contains 15 Soil Conservation districts, 30 active Neighborhood Board districts, and 276 election precincts.

Elective offices in Hawaii include the President and Vice President, two U.S. Senators, two U.S. Representatives, the Governor and Lieutenant Governor, 25 State Senators, 51 State Representatives, and various county officials. Persons of Hawaiian blood also vote for the Board of Trustees of the Office of Hawaiian Affairs. The minimum voting age for all races is 18 years.

The 1985 State Legislature, with 76 members, included 62 males, 35 persons under 40 years of age, 29 persons of Japanese ancestry, 15 persons born in places other than Hawaii, and 61 Democrats.

In its 1985 regular session, the State Legislature considered 3,147 bills; 332 were passed and 306 became law. The Legislature also considered 971 resolutions, of which 320 were adopted.

The official results of primary, general, and special elections are published by the Office of the Lieutenant Governor. Additional information is often available from the various County clerks. Earlier figures for Hawaii appear in Historical Statistics of Hawaii, Section 24. National statistics appear in the Statistical Abstract of the United States: 1985, Section 9.

Section 9

GOVERNMENT FINANCES AND EMPLOYMENT

This section presents statistics relating to the revenues, expenditures, debt, and civilian employment of Federal, State and County governments in Hawaii.

Local government is vested in one combined city-county (Honolulu, consisting of the Island of Oahu and several outlying islets), three non-metropolitan counties (Hawaii, Kauai, and Maui), and one area (Kalawao County) administered by the State Department of Health. Separate municipal governments do not exist.

Tax collections by Federal, State and County governments in fiscal 1984 reached \$3.66 billion, more than twice the level reported ten years earlier. The 1984 total included \$1.98 billion in U.S. taxes, \$1.33 billion in State taxes, and \$343 million in County taxes, licenses and fees. Individual income taxes accounted for 87 percent of Federal collections and 30 percent of State collections in Hawaii in 1984. State revenue receipts totaled \$2.2 billion, chiefly from the General Excise and Use Tax (\$640 million), individual income tax (\$402 million) and Federal grants-in-aid (\$365 million). The largest expenditure item in the State accounts for 1984 was education, with \$696 million (out of \$2.08 billion) going to the University of Hawaii and public schools and libraries. The counties, in contrast, depended largely on the real property tax (which until mid-1981 was assessed and collected by the State) and grants-in-aid for their revenues, and reported police and fire protection as their largest single expenditure item. Assessed valuation of the State tripled between 1975 and 1985, reaching \$51 billion by the end of the period; of this total, \$7 billion was exempt from taxation. Public bonded debt outstanding at the end of 1984 exceeded \$2.7 billion.

Total government employment in 1984 averaged 92,000, about 6 percent over the 1979 average. The 1984 total included over 32,000 Federal workers, 47,000 persons employed by the State, and 13,000 persons on County payrolls. State civil service employees as of mid-1984 numbered 18,200.

Important sources for statistics on government in Hawaii include the U.S. Census of Governments and various annual publications of the Bureau of the Census, reports of the U.S. Treasury Department, Hawaii State Departments of Accounting and General Services, Budget and Finance, and Taxation, and the County auditors and finance directors, and an annual compilation issued by the Tax Foundation of Hawaii, Government in Hawaii: A Handbook of Financial Statistics. Data extending back to the middle of the 19th century are summarized in Historical Statistics of Hawaii, Section 25. Comparable Mainland statistics appear in the Statistical Abstract of the United States: 1985, Sections 10 and 11.

Section 10

NATIONAL DEFENSE

This section presents statistics relating to the armed forces and their dependents, national guard strength, civilian employment in national defense, veterans, military housing, and expenditures by the armed forces. Further information appears in Sections 1, 2, 6, 12, 13, 14, 22, and 23.

There were approximately 60,800 officers and enlisted men (including 4,500 aboard ships homeported in Hawaii) and 67,100 military dependents in the Islands as of July 1, 1984. This number has been relatively stable in recent years, but at the height of World War II more than 400,000 uniformed personnel were present. The Navy alone accounts for one-third of the current total. More than 11,400 Hawaii residents were in the armed forces worldwide in 1984. The importance of national defense in Hawaii can be further measured by total expenditures (\$1.87 billion), military prime contract awards (\$639 million), civilian employment (20,600), veterans in civil life (97,000), military personnel receiving retired pay (10,000 men, receiving \$11.5 million monthly), military-connected pupils in public schools (20,200), military housing (19,200 units), and land used by the armed forces (over 110,000 acres). Defense expenditures are second only to tourism as a source of income to Hawaii.

The Department of Planning and Economic Development has, since 1959, issued periodic reports on Military Personnel and Dependents in Hawaii. Other published sources include reports of the U.S. Department of Defense, U.S. Bureau of the Census, Administrator of Veterans Affairs, the Hawaii State Department of Labor and Industrial Relations, Department of Defense, and Department of Education, and Hawaii State Census Statistical Areas Committee. Definitions used by these sources frequently differ to some degree, and care is accordingly necessary in comparing data issued by two or more agencies. In mid-1982, for example, the number of armed forces in Hawaii was reported as 53,915 by DOD, 54,879 by the Bureau of the Census, and 61,107 by the local commanding officers reporting to DPED. Historical Statistics of Hawaii, Section 26, includes series on the armed forces dating back to 1795. Section 12 of the Statistical Abstract of the United States: 1985 presents data on national defense and veterans affairs for other States and the entire nation.

^{1/} Data include nearly 200 Hawaii residents serving (and 22 dying) with the British armed forces, many prior to the U.S. entry into World War I. Of the 102 war casualties, only 14 occurred overseas prior to the armistice; 61 took place in Hawaii or North America or after the armistice, and the time or place of 27 is unknown.

^{2/} The number serving represents the cumulative number of registrants from Hawaii inducted through December 31, 1945. The cumulative number of Hawaii registrants, 18 to 37 years old and classified 1-C, inducted or enlisted through August 1, 1945 was 22,210.

^{3/} In addition, 923 wounded personnel gave Hawaii as their pre-service residence.

Section 11

SOCIAL INSURANCE AND HUMAN SERVICES

This section presents data related to governmental expenditures on social welfare; programs for old-age, survivors, disability and health insurance; public employee retirement; unemployment insurance; aid to the needy; and child and other welfare services. Also included here are selected statistics on United Way campaigns, foundations, and the quality of life. Related data are cited in Sections 9 and 13.

Total social welfare costs reached \$336 million in fiscal 1984, compared with \$112 million a decade earlier. About 56 percent of the 1984 total came from State funds and the remainder from the Federal government. The monthly average number of persons served by major welfare programs in 1984 was 62,000, or 6.4 percent of the civilian population of the State. Almost two-thirds of all public assistance payments and over half of all recipient cases were accounted for by aid to families with dependent children. The average monthly payment per case for public assistance was \$370, or 56 percent more than in 1974. Participation in the food stamp program included 38,000 households and 100,000 persons. Among workers receiving unemployment compensation in 1983, weekly benefits averaged \$123. About 125,000 Hawaii residents were receiving Social Security benefits as of the end of 1984, and about 93,000 were enrolled for Medicare. There were also 16,000 State and County government pensioners in 1984, with annual benefits of \$136 million. Child adoptions in 1984 numbered 548. Sixty-eight foundations reported assests of \$165 million when most recently surveyed. The Aloha United Way reported agency allocations of \$8.4 million on Oahu and \$1.6 million on the Neighbor Islands in 1984. A recent comparative study of the "quality of life" in 329 American metropolitan areas ranked Honolulu sixty-first.

Major data sources include reports and records of the U.S. Department of Health and Human Services, the Hawaii State Department of Social Services and Housing, the Hawaii State Department of Labor and Industrial Relations, the Hawaii State Employees' Retirement System, and the Aloha United Way. Historical Statistics of Hawaii, Section 8, contains data for earlier years. Section 13 of the Statistical Abstract of the United States: 1985 presents comparable Mainland data.

Section 12

LABOR FORCE, EMPLOYMENT, AND EARNINGS

This section presents statistics on the size and composition of the labor force, employment by occupation, industry, class of worker, and place of work, wage rates, payrolls, hours, industrial safety, work disability, unionization, and strikes. Related series appear in Sections 14 and 19 through 23.

The civilian labor force averaged 473,000 in 1984; of this total, 446,000 persons were employed and 27,000 were unemployed and seeking work. The civilian jobcount rose from 375,000 in 1974 to 454,000 a decade later. (The jobcount differs from employment because the latter counts multiple jobholders -- "moonlighters" -- only once.) Areas with large concentrations of workers in 1980 included downtown Honolulu (46,000), Waikiki (30,000), and Pearl Harbor-Hickam (15,000). The unemployment rate averaged 5.6 percent in 1984, with island levels ranging from 5.3 to 14.1 percent. In 1983, 59.1 percent of all females 16 years old and over were in the civilian labor force -- the eighth highest ratio in the nation. By occupation, one out of four civilian workers is classified as professional or managerial. Activities with especially large numbers of employees include, services (109,000 in 1984), retail trade (92,000), and government (92,000). The average annual earnings of wage and salary workers under the Hawaii Employment Security Law reached \$16,700 in 1984, or 8.4 percent less than the 1974 average after adjustment for inflation. Average weekly hours in 1984 ranged from 31.3 (for retail trade) to 41.0 (for communications and utilities). Labor union membership was estimated at 151,000 in 1984. Work stoppages in 1984 involved 2,100 workers.

Analyzing labor force data is complicated by differences in concepts, coverage, definitions, timing, and estimating methods. Census statistics collected as of the last week in March 1980 differ from annual averages for calendar year 1980 or later periods, and jobcounts based on employers' reports of covered workers are seldom comparable to civilian employment totals derived from small household surveys.

Principal sources for the data on labor force, employment, place of work, hours, earnings, unions and strikes are the decennial reports of the U.S. Bureau of the Census, the same agency's Current Population Survey, reports by the U.S. Bureau of Labor Statistics, monthly and annual tabulations by the Hawaii State Department of Labor and Industrial Relations, and annual surveys of pay rates by the Hawaii Employers Council. Historical Statistics of Hawaii, Section 4, includes figures for earlier years. Statistics for the nation as a whole are published in Section 14 of the Statistical Abstract of the United States: 1985.

1/ Interstate liable initial claims (UI and Supp.), excluding UCFE and Supp. and UCX. Covers Hawaii workers seeking work and filing for benefits on the Mainland. Since July 1980, data have included Federal civilian employees and ex-servicemen.

2/ Interstate agent initial claims (UI and Supp.), excluding UCFE and Supp. and UCX. Covers Mainland workers filing claims for unemployment insurance and registered for work with the Hawaii State Employment Service.

3/ Interstate agent initial claims (regular only) as a percent of inter-state liable initial claims (regular only). Ratios under 100 suggest a net out-migration of workers.

4/ Regular and extended claims.

5/ The method of counting liable and agent initial claims was revised effective October 1979. Data for 1979 and later years are accordingly not directly comparable with figures for earlier years.

Section 13

INCOME, EXPENDITURES, AND WEALTH

This section presents statistics on two different aspects of income and expenditures, one relating to the State income and product system and the other to the distribution of income to families, households and individuals. Specifically, information is given on gross state product, income by industry, personal income, family and household income, poverty, personal wealth, and family expenditures. Data on wage rates, salaries, and earnings appear in Sections 3, 9, 12, and 22; on industrial payrolls, in Sections 12, 15, and 20 through 23; on the family income of visitors, in Section 7; on retirement payments and public assistance, in Sections 10 and 11; on taxable income, in Section 9.

Gross state product in 1983 amounted to approximately \$14 billion, or double the 1965 total after adjustment for inflation. The major sources of outside income to Hawaii in 1984 were defense expenditures (\$1.87 billion), pineapple production (\$250 million), sugar production (\$393 million), and visitor expenditures (\$4.6 billion). Personal income in 1984 was \$13.5 billion, compared with \$5.3 billion only ten years earlier, and per capita personal income was \$11,767, more than twice the 1974 level. The per capita figure for Hawaii exceeded the national average by only 2 percent, and thus failed to compensate for the Islands' much higher cost of living. The median annual income of families, based on data for 1982-1983, was \$24,800; for unrelated individuals, the median was \$12,100. The official poverty threshold for a 4-person nonfarm family in Hawaii was set in March 1985 at \$12,250. The most recent family expenditure survey, taken in 1972 and 1973, reported that the largest items in the family budget on Oahu were housing (accounting for 33.8 percent of spending for current consumption), food (20.4 percent) and transportation (19.1 percent). Top wealthholders in 1982 included 14,000 persons with assets of \$300,000 or more and 800 millionaires.

The chief sources of data shown in this section are the U.S. Bureau of Economic Analysis, U.S. Bureau of the Census, U.S. Bureau of Labor Statistics, U.S. Department of Health and Human Services, Internal Revenue Service, Hawaii Agricultural Reporting Service, Hawaii State Department of Health and Department of Planning and Economic Development, and Hawaii Visitors Bureau. Sections 6 and 7 of Historical Statistics of Hawaii present data for earlier years. Comparable data for the country as a whole are given in Statistical Abstract of the United States: 1985, Section 15.

Section 14

PRICES

This section presents indexes of consumer prices for Honolulu, average prices for selected foods, and a comparison of Honolulu family budgets with those in other metropolitan areas. Other statistics on prices are reported in Sections 16, 17, 18, 19, 21, and 23.

In June 1985, the Honolulu all-items consumer price index for all urban consumers stood at 293.5, with the 1967 level equal to 100. The index had increased 3.1 percent in the preceding 12 months, 29.0 percent since 1980, and 90.2 percent since 1975. Prices have risen most rapidly since 1967 for medical care (294.5 percent), fuel and other utilities (248.5 percent), and food away from home (up 241.8 percent), and least rapidly for apparel and upkeep (101.4 percent).

An "intermediate" budget for a four-person family living on Oahu was estimated at \$31,893 as of the Autumn of 1981. This family budget was 26 percent higher than the corresponding urban United States average, and was first among the 25 American metropolitan areas surveyed. The "lower" budget was 33 percent above the national figure; the "higher" budget, 32 percent. Oahu-Mainland differentials in the intermediate budget were greatest for rents and personal income taxes and least for food away from home and automobile transportation. An "intermediate" budget for a retired couple in Honolulu came to \$12,157 in the Autumn of 1981, 19 percent above the U.S. urban average.

The Honolulu consumer price index has been compiled by the United States Bureau of Labor Statistics since December 1963. This index measures the average change in prices of goods and services purchased by urban families and single persons living alone. Prices are expressed as a percent of the average levels reported in 1967, the base date. Current data for Honolulu and other cities are published in the Monthly Labor Review and CPI Detailed Report, issued monthly by BLS.

Important changes were made in the consumer price index at the beginning of 1978. The existing index, covering urban wage earner and clerical families and single persons living alone, had been based on spending patterns observed in a 1961 survey and had been issued at three-month intervals. This index was discontinued after June 1978. Beginning in February 1978, two new indexes were published, both based on the findings of a 1972-1973 survey and both issued at two-month intervals. The first of these new indexes covered the same population as the older index, that is, urban wage earner and clerical families and individuals; the second covered all urban consumers. The new indexes were linked to the existing index for December 1977 and, like the latter, expressed as a percent of the 1967 annual average. The index for all urban consumers was further modified in February 1983, when the basis for measuring homeowners' costs was substantially altered.

Comparisons of family budgets between Honolulu and various Mainland communities were published annually by the U.S. Bureau of Labor Statistics from 1966 to 1981, and then discontinued. Cost of living adjustments for Federal employees in Hawaii are based on comparisons with Washington, D.C., prices, compiled by the U.S. Office of Personnel Management at annual intervals through 1983.

In addition to these data, the Bureau of Labor Statistics formerly published monthly and annual data on average Honolulu prices for a variety of foods, and occasional data on a number of non-food items. The city food price series were suspended after June 1978 and since that time only unofficial estimates have been available. Monthly data for Honolulu electric and gas utility rates and gasoline prices are still compiled by BLS and are published in a regular release, Consumer Prices: Energy and Food.

No composite wholesale or producer price index, comparable to the all-items consumer price index, is available for Hawaii. Average wholesale prices of agricultural products are reported in Statistics of Hawaiian Agriculture, issued by the Hawaii Agricultural Reporting Service, and in various other publications of the State Department of Agriculture. Wholesale price statistics of other commodities are usually un available.

Data on prices and living costs for the nation as a whole and other areas are summarized in Statistical Abstract of the United States: 1985, Section 16. Long-term trends for Hawaii are traced in Historical Statistics of Hawaii, Section 5.

Section 15

BANKING, INSURANCE, AND BUSINESS ENTERPRISE

Statistics in this section relate to banks and other financial institutions, stocks and bonds, insurance, fires, and business firms.

There were ten banks with 178 branches, eight savings and loan associations with 163 branches, four trust companies with seven branches, and 77 industrial loan or small loan licensees with 223 branch offices in Hawaii as of December 31, 1984. Deposits in Island banks reached \$7.0 billion in mid-1984, compared with \$2.6 billion a decade earlier. Assets of savings and loan associations stood at \$4.8 billion in mid-1984, more than three times their 1974 level. There were 142 credit unions with, combined assets of \$1.2 billion at the end of 1984.

Approximately 234,000 Hawaii residents held shares in U.S. public corporations or investment companies in 1983.

Life insurance in force in Hawaii at the end of 1983 amounted to \$26 billion, more than twice the figure reported ten years earlier. For all 720 insurance companies doing business in the Islands, Hawaii premiums amounted to \$872 million in 1983 and losses, claims, and benefits paid came to \$606 million. Oahu fire losses amounted to \$11 million in fiscal 1984. Persons covered by the three major prepaid health insurance plans as of December 31, 1984, numbered 695,000, with membership dues of \$369 million.

By mid-1985, more than 39,000 corporations and partnerships were registered to do business in Hawaii: 26,000 local ("domestic") corporations, 4,000 out-of-State ("foreign") corporations, and 9,000 partnerships. Business establishments with one or more employees in 1983 numbered 24,519; half had fewer than five employees. During fiscal 1985, 2,969 new local corporations were formed. Business receipts of corporations in 1981 exceeded \$17 billion; business receipts of partnerships and proprietorships in the same year amounted to respectively \$1.7 billion and \$0.9 billion. Hawaii's largest corporation, Amfac, Inc., reported annual sales of \$2.4 billion.

Sources for statistics on these subjects include the Hawaii State Department of Commerce and Consumer Affairs (specifically its Financial Institutions, Insurance, and Business Registration Divisions), the State Department of Taxation, the Honolulu Fire Department, the New York Stock Exchange, Dun and Bradstreet, Inc., local health insurance plans, the Hawaii Credit Union League, and the annual report on County Business Patterns issued by the U.S. Bureau of the Census. Historical Statistics of Hawaii, Sections 22 and 23, provides information for earlier periods. Comparable Mainland data appear in Sections 17 and 18 of Statistical Abstract of the United States: 1985.

Section 16

COMMUNICATIONS

This section presents statistics on the usage, finances, and operations of the various communications media: postal service, telephone, telegraph, radio, television, newspapers and periodicals, and books. Sections 12 and 15 contain employment and payrolls data for communications establishments.

Hawaii is served by all major communications media. In 1984 it had 130 post offices and stations handling 317 million pieces of mail and accounting for postal receipts in excess of \$84 million. There were 472,000 telephone access lines in service, 339,000 telephone homes, about 2.1 billion local calls originated, 12 million completed interisland calls (in 1981), and 32 million incoming and outgoing transpacific calls (in 1980). Telegraph messages to and from Hawaii in 1983 totaled 146,000. The 45 commercial, public and educational radio stations in the Islands in 1985 included 26 on the regular broadcast band and 19 FM stations. The State also had 15 television stations (13 commercial and 2 public), including satellites but excluding translators. Ten cable TV companies served 211,000 subscribers. An estimated 97 percent of all households in the State had television sets, and the average prime-time TV audience in February 1985 numbered 187,000 households. Island publishers printed nine daily newspapers, numerous magazines and other periodicals, and a wide diversity of books. Newspaper circulation reported by the two English-language dailies on Oahu averaged 197,000 in 1984-1985.

The major sources for statistics on communications are the reports and records of the U.S. Postal Service, Federal Communications Commission, Division of Consumer Advocacy and CATV Division of the Hawaii State Department of Commerce and Consumer Affairs, Hawaiian Telephone Company, Audit Bureau of Circulations, A. C. Nielsen Co., and Hawaii Media Guide. Earlier figures appear in Historical Statistics of Hawaii, Section 18. Data on communications for other States and for the nation as a whole are carried in Statistical Abstract of the United States: 1985, Section 19.

1/ The number of local calls is affected as central offices are being converted to Electronic Common Control (ECC). ECC records call attempts after the first digit is dialed. Non-ECC offices record the call attempts when the handset is lifted. Also significant in 1981 were an estimated 17 million fewer calls due to the implementation of Directory Assistance Charging. Because of these fundamental changes in data collection, more recent figures are not comparable to earlier years.

2/ As a result of deregulation of the telephone industry, these series became subject to disclosure rules after 1980 or 1981, and regular publication of annual data was discontinued.

Section 17

ENERGY AND SCIENCE

This section presents statistics on energy production and consumption, the electric and gas utility industries, research and development, and scientific resources. Related series are cited in Sections 12 (on utility employment), 14 (prices), and 18 (gasoline consumption).

Total energy consumption in 1984 amounted to 262 trillion British thermal units, compared with 219 trillion BTU a decade earlier. Aviation fuels accounted for 31 percent of the 1984 total. Total expenditures for fuels and electricity in 1984 totaled almost \$2.0 billion.

Electricity sales exceeded 6.6 billion kilowatt-hours in 1984, a total that has increased 29 percent since 1974. Manufactured gas sales reached 30.9 million therms in 1984, 10.0 percent below the figure ten years earlier. Residential rates in 1984 averaged 11.8 cents per kilowatt-hour and \$1.79 per therm, both more than double the corresponding rates a decade earlier. Average residential use (6,552 kWh and 203 therms in 1984) has declined significantly in recent years. By 1981, almost seven percent of the housing units in the State had solar heating devices.

The liquid fuel tax base for 1984 was approximately 926 million gallons, compared with 825 million in 1974. The 1984 total included 322 million gallons of gasoline, 486 million of aviation fuel, and 114 million of diesel oil. The average price for automotive gasoline rose from 78 cents per gallon in June 1978 to \$1.58 three years later, then fell to \$1.39 by June 1985.

The State is well served with scientific resources. Especially noteworthy is the cluster of telescopes used for astronomical observations at the summit of Mauna Kea -- six major facilities (plus two under construction). Federal research and development obligations in Hawaii reached \$71 million in 1983. Forty-three patents were granted to Hawaii residents in 1984.

Information on energy and science can be obtained from reports and records of the U.S. Department of Energy, U.S. Patent and Trademark Office, U.S. Bureau of Labor Statistics, National Science Foundation, Hawaii State Department of Taxation, Hawaii State Department of Commerce and Consumer Affairs and its Division of Consumer Advocacy, Hawaii State Department of Planning and Economic Development Energy Division, UH Institute for Astronomy, and individual utility companies. Historical Statistics of Hawaii, Section 19, presents data for earlier years. Data for the nation as a whole can be found in the Statistical Abstract of the United States: 1985, Sections 20 and 21.

1/ Totals do not include small quantities of energy sources for which consistent historical data are not available, such as solar energy obtained by the use of thermal and photovoltaic collectors; and geothermal, biomass, and waste energy other than that consumed at the electric utilities.

2/ Data include power from electric utilities, including electrical energy losses incurred in the generation and transmission of electricity.

3/ Energy input at electric utilities. Distributed among the other four sectors.

Section 18

TRANSPORTATION

This section presents statistics relating to public roads, motor vehicles, bicycles, traffic accidents, local public transit, civil aviation, harbors, and water traffic. Other information bearing on transportation appears in Sections 7, 12, 14, and 24.

Motor vehicle registration in Hawaii increased from 495,000 in 1974 to 717,000 in 1984. Vehicle miles rose during the same period from 3.9 billion to 6.5 billion. Hawaii residents purchased 49,000 new passenger cars and 15,000 trucks in 1984. By the end of that year, 582,000 licensed drivers had access to 3,888 miles of streets and highways throughout the State. Bus passengers carried by the Honolulu Mass Transit Lines increased from 51 million in 1974 to 76 million in 1984. Registered bicycles numbered 108,000 in 1974 and 79,000 in 1984.

Most scheduled interisland travel is by air. In 1984, airlines and air taxis reported 7.6 million interisland passengers, some 47 percent more than in 1974, and carried 56,000 tons of cargo. The State has 8 commercial airports, 15 general aviation, military or semi-private airports, 10 civilian heliports, 3,224 active pilots, and about 381 active civil aircraft in general aviation.

Rapid growth is similarly evident in transpacific air travel. Although surface passenger arrivals dropped from 54,000 in 1959 to 726 in 1984, air arrivals increased during the same 25-year span from 224,000 to 5.3 million. Overseas cargo received in the State in 1981 amounted to 51,000 tons by air and 9.4 million tons by ship.

Undocumented State-registered vessels as of December 31, 1984 numbered 13,000, compared with 8,000 in 1970. Median length was 18 feet, and four-fifths were stored on land. There were 1,300 documented vessels in the State in 1985, more than double the 1970 total.

The chief source for transportation statistics is the Hawaii State Department of Transportation and its Highways, Harbors and Airports Divisions. Other sources include the U.S. Coast Guard, Federal Aviation Administration, Federal Highway Administration, Army Corps of Engineers, Honolulu Department of Transportation Services and Department of Data Systems, County finance departments, Hawaii Automobile Dealers Association, and individual transportation companies. Data for the entire period of record through 1976 appear in Historical Statistics of Hawaii, Section 17. Similar statistics for other areas are reported in Statistical Abstract of the United States: 1985, Sections 22 and 23.

Section 19

AGRICULTURE

This section presents statistics on agricultural land, farms, crops, livestock, dairy products, poultry, and aquaculture. Related information appears in Sections 6 (on land use), 12 and 15 (agricultural employment and earnings), and 22 (food processing).

There were 4,596 farms in Hawaii as of 1982, with a total area of 1.96 million acres. The value of crop sales in 1984 was \$467 million, or 10 percent lower than the total for 1974. Livestock sales amounted to \$87 million, or 50 percent more than the 1974 level. Combined crop and livestock sales in 1984 ranged from \$64 million in Kauai County to \$185 million on the Big Island. Major crops were sugar (\$256 million in sales, down 42 percent over the decade), pineapple (\$90 million, or 123 percent over the 1974 total), flowers and nursery products (\$43 million, or 423 percent more than in 1974), vegetables and melons (\$26 million, up 164 percent), and macadamia nuts (\$26 million, up 398 percent). Diversified crops, defined as all crops other than sugar and pineapple, rose from \$35 million in 1974 to \$121 million in 1984, or approximately 245 percent. About 670 farms sold \$43 million of flowers and nursery products in 1984, chiefly anthuriums, potted foliage, and orchids. Important products of livestock farms as of 1984 included cattle (\$28 million in sales), milk (\$29 million), and eggs (\$16 million). In 1984, Hawaii produced 41 percent of the fresh market vegetables consumed locally, 30 percent of the fresh market fruits, 31 percent of the beef and veal, 21 percent of the chickens, none of the rice, and 78 percent of the eggs.

Aquaculture has been growing in importance in recent years. Freshwater prawn production amounted to 318,000 pounds in 1984, with a value of more than \$1.7 million. Ten years earlier the corresponding figures had been only 11,000 pounds and \$38,000.

Statistics on Hawaiian agriculture exclude pakalōlō (marijuana) and other illicit plants. Authorities confiscated \$47 million worth of marijuana in 1984, but the proportion escaping detection is unknown.

Important sources for data on agriculture include the United States Census of Agriculture, most recently conducted as of 1982, the annual report on Statistics of Hawaiian Agriculture issued by the Hawaii Agricultural Reporting Service, and data compiled by the Hawaiian Sugar Planters' Association and the Aquaculture Development Program of the Department of Land and Natural Resources. Agricultural data for earlier years are summarized in Historical Statistics of Hawaii, Section 13. National statistics appear in Section 24 of the Statistical Abstract of the United States: 1985.

Section 20

FORESTS, FISHERIES, AND MINING

This section presents data on forests and forest products, commercial fishing, and mining and mineral products.

The most recent available statistics show 1.2 million acres of forest and water reserve and 948,000 acres of commercial timberland in the State, most of it on the Big Island. Over 46,000 acres had been planted in eucalyptus and other species of trees by mid-1984. Forest products harvested in 1977 had a value of \$3.5 million, including \$2.3 million from logs for fiber. Forest and brushland fires burned 8,000 acres in fiscal 1984.

The commercial fish catch in fiscal year 1983 amounted to 7.8 million pounds and had a value of \$11 million. Ahi (yellowfin) and aku (skipjack) accounted for about 44 percent of the total value. Other important species are mahimahi, opakapaka, ono, akule, opelu and Pacific blue marlin. Commercial fishermen numbered 2,480; they operated some 1,300 fishing vessels, serving about 119 fishery wholesaling and processing establishments.

The value of mineral production reached \$54 million in 1984, most of it in cement (\$20 million) and stone (\$31 million). The 1984 total was well below the all-time high reached in 1979.

Important sources of data on these subjects are the United States Census of Mineral Industries and reports and records of the U.S. Bureau of Mines and Hawaii State Department of Land and Natural Resources, Aquatic Resources Division and Forestry and Wildlife Division. Historical Statistics of Hawaii, Section 14, summarizes the data for earlier periods. Comparable Mainland statistics are reported in the Statistical Abstract of the United States: 1985, Sections 25, 26 and 27.

Section 21

CONSTRUCTION AND HOUSING

This section presents statistics on construction activity and costs, the size and composition of the housing inventory, occupancy of housing and office buildings, sales, and residential financing. Related series are included in Sections 6 and 14.

There were 20,582 building permits issued in 1984, with an estimated value of \$711 million. The total included \$382 million for private residential construction and \$196 million for private nonresidential structures. The value of government construction contracts awarded was \$412 million. Construction put in place, as indicated by the contracting tax base, totaled \$1.35 billion in 1983 and \$1.24 billion in 1984. The value of land transfers in 1984 was \$3.8 billion. Mortgage loans outstanding at the end of 1983 amounted to \$7.6 billion. The July 1985 construction cost index for Honolulu (1967=100) was 357 for single-family residences and 373 for high-rise buildings.

The number of housing units in the State increased from 284,000 in 1975 to 364,000 in 1985. Owner occupied units numbered 116,000 in 1975 and 150,000 in 1985; the latter total included 36,000 on leased land. Condominium units, first authorized in 1961, numbered 98,000 at the end of 1982. Government-owned housing, mostly military and public, accounted for 26,000 units as of 1985. Housing was in short supply throughout most of the past decade: on Oahu, the vacancy rate in March 1983, according to the Federal Home Loan Bank of Seattle, was only 1.3 percent. The average selling price of single family homes on Oahu during 1984, based on Multiple Listing Service data, was \$187,000; for condominium units it was \$101,000. The median gross monthly rent for Oahu rose from \$141 in 1970 to \$413 in 1983, and the median value of owner occupied single-family units increased from \$38,400 to \$163,400.

The principal sources for these data are the 1970 and 1980 U.S. Censuses of Housing, the 1976, 1979, and 1983 Annual Housing Surveys, postal vacancy surveys issued by the Federal Home Loan Bank of Seattle, various series compiled by State and County agencies (primarily the Hawaii Housing Authority, Hawaii State Department of Planning and Economic Development, Department of Commerce and Consumer Affairs, Department of Taxation, and Bureau of Conveyances, and the four County building departments), the construction cost indexes prepared by the First Hawaiian Bank, and the Honolulu Board of Realtors reports on Multiple Listing Service activity. Many of these series are summarized in reports published by the Bank of Hawaii (particularly Construction in Hawaii, issued annually) and the First Hawaiian Bank. Persons interested in figures for earlier periods should consult Historical Statistics of Hawaii, Section 15. Mainland statistics appear in Section 28 of Statistical Abstract of the United States: 1985.

1/ As of April 1.

2/ As indicated by the number of taxpayers claiming home exemptions. The number of owner occupied housing units reported by the U.S. Census of Housing is somewhat higher than the corresponding number based on taxpayer home exemptions, chiefly because of differences in definitions. Data for 1977-1985 refer to January 1; data for 1970-1976, to July 1.

Section 22

MANUFACTURES

This section presents statistics on the manufacturing segment of the economy, including sugar processing and pineapple canning. Additional information appears in Sections 12 and 15.

The number of manufacturing establishments in Hawaii increased from 697 in 1967 to 967 in 1982. The value added by manufacture rose from \$326 million in 1967 to \$410 million in 1972, \$786 million in 1977, and \$1,120 million in 1982. More than three-fourths of all manufacturing activity in the State in 1982 was on Oahu. Food processing -- mostly sugar and pineapple -- accounted for more than 35 percent of the value added by manufacture in 1982. Between 1982 and 1984, the general excise and use tax base increased 30 percent for sugar processing, and 7 percent for pineapple canning, but declined 2 percent for all other manufacturing. There were two pineapple canneries and 12 sugar mills in Hawaii in mid-1984. The production of canned pineapple fruit and juices in 1981 (the most recent year available) was 18 million actual cases, well below the levels of earlier years. Sugar production in 1984 amounted to 1,062,000 short tons, the most since 1971. The value of sugar production (including commercial molasses) was \$393 million, compared with the record of \$677 million set in 1974. Important manufactures other than food processing include apparel (\$56 million in value added in 1982), printing and publishing (more than \$27 million), stone, clay, and glass products (\$39 million), and chemicals and allied products (\$25 million).

Sources for data on this subject include the United States Census of Manufactures, most recently conducted for 1982, the Annual Survey of Manufactures, publications of the Hawaii State Department of Agriculture and Department of Taxation, and reports and records of the Hawaiian Sugar Planters' Association. Historical Statistics of Hawaii, Section 16, reviews the figures for earlier years. Statistics for the nation as a whole appear in Section 29 of the Statistical Abstract of the United States: 1985.

Section 23

DOMESTIC TRADE AND SERVICES

This section presents statistics relating to retail and wholesale trade; hotels; and selected personal, business, automotive, repair, and amusement services. Related data are included in Sections 7, 12 and 15.

These activities have undergone rapid growth in recent decades, in part because of higher price levels. Retail sales increased from \$751 million in 1963 to \$1.9 billion in 1972 and \$5.2 billion in 1982. Wholesale sales rose from \$1.6 billion in 1972 to \$4.1 billion in 1982. Hotels, amusements, and other services reported receipts exceeding \$2.6 billion in 1982, compared with \$665 million in 1972. General excise and use tax base data for more recent years indicate continued increases; between 1982 and 1984, the retailing tax base rose 18 percent, the wholesaling base by 25 percent, and the base for services by 24 percent. Major retail concentrations include Waikiki, Ala Moana Center, Pearlridge Center, and downtown Honolulu. In addition to civilian retail outlets, there are many commissaries, exchanges, clubs, gasoline stations and food services maintained by the armed forces; these facilities had sales of \$470 million in 1984.

Growth has been especially rapid for hotels and related facilities. The number of units in the State rose from 6,800 in 1959 to 33,000 in 1971 and 66,000 in 1985. There were 481 hotels, motels and apartment-hotels in Hawaii on the latter date, including 309 on the Neighbor Islands. One-third of all transient units were in condominium structures. Occupancy rates averaged 82.6 percent in Waikiki and 69.1 percent on the Neighbor Islands during 1984. The average daily room rate was \$59 in 1984. The hotel payroll in 1984 totaled \$369 million, compared with \$219 million five years earlier.

Seventy-six feature motion pictures and television specials and series were filmed in Hawaii in 1984, accounting for local expenditures of \$38 million.

The major source of these data are the United State Censuses of Retail Trade, Wholesale Trade, and Service Industries, most recently conducted for 1982. Statistics on the retailing, wholesaling, and services tax bases are available from the Hawaii State Department of Taxation. Data on hotel room counts, occupancy and other characteristics are published by the Hawaii Visitors Bureau and the firm of Pannell Kerr Forster. The Film Industry Branch of the Department of Planning and Economic Development compiles data on motion picture and television production. A summary of figures on trade and services in earlier years appears in Historical Statistics of Hawaii, Section 20. The Statistical Abstract of the United States: 1985, Section 30, presents similar data for other states and the nation as a whole.

Section 24

FOREIGN AND INTERSTATE COMMERCE

This section includes data on the flow of goods, services, and capital between Hawaii and the rest of the world, with particular emphasis on trade and investment involving foreign countries.

Imports to Hawaii from foreign nations rose from \$645 million in 1974 to \$1.6 billion in 1984. Exports to foreign countries amounted to only \$115 million in 1974, but by 1984 reached \$316 million. These figures, it should be noted, refer to merchandise imports and exports through the Honolulu Customs District. They do not necessarily represent exports of commodities originating in Hawaii, nor imports for direct consumption within the State.

Trade with the Mainland United States has similarly risen in the past decade. Merchandise received from the Mainland increased from \$1.3 billion in 1970 to \$4.9 billion in 1983. Estimates of the value of merchandise shipped to the Mainland are no longer available.

Among the foreign nations, Hawaii's leading trading partners in 1984 were Indonesia for imports and Taiwan for exports. Imports from Indonesia amounted to \$373 million, or 2.3 percent of the total, while exports to Taiwan reached \$64 million or 20 percent of all foreign exports. About 57 percent of all imports for consumption were petroleum and natural gas products and monolithic integrated circuits.

Honolulu Foreign Trade Zone No. 9 handled merchandise valued at \$46 million in fiscal 1984. Merchandise handled by Subzone No. 9A, the PRI refinery, was valued at \$1.3 billion, almost all of it in petroleum and petroleum products.

Foreign-owned U.S. firms in Hawaii operated 276 establishments in 1982, and employed 14,000 persons with an annual payroll of \$198 million. Foreign investments in Hawaii between 1959 and 1984 exceeded \$2.2 billion.

Sources for statistics on interstate and foreign commerce include the U.S. Bureau of the Census and Bureau of Economic Analysis, Foreign Trade Zone No. 9 and Subzone No. 9A, and the International Services Branch of the Hawaii State Department of Planning and Economic Development. Further information appears in cargo data by origin and destination, compiled by the Army Corps of Engineers and cited in Section 18.

Comparable data for the nation as a whole appear in Section 31 of Statistical Abstract of the United States: 1985. Long-term Island trends are summarized in Historical Statistics of Hawaii, Section 21.

BIBLIOGRAPHY

This volume is the nineteenth in a series published by the Hawaii State Department of Planning and Economic Development and its predecessor agencies. The first was Statistical Abstract of Hawaii, 1962, issued by the Department of Planning and Research in 1962. After a four-year hiatus, updated versions titled The State of Hawaii Data Book were published by the Department of Planning and Economic Development in 1967, 1968, and annually beginning in 1970. All of the volumes issued prior to the 1984 edition are now out of print, but copies can be consulted in the DPED Library, Hawaii State Library, University of Hawaii and community college libraries, Honolulu Municipal Reference Library, and other collections throughout the State.

Additional information regarding specific statistical sources can be found in the introductory statements to each section of the Data Book, in footnotes and source references to the various tables, and in the underlying reports.

Although most of the series in the Data Book are shown only for recent years, earlier figures can usually be found in Historical Statistics of Hawaii, by Robert C. Schmitt. This book, published by the University Press of Hawaii in 1977, contains 711 pages of narrative and tables on the development of statistics in Hawaii since the 18th century. Copies are available from the University of Hawaii Press and various book stores for \$30.00.

Privately published works of general statistical reference include Hawaii Facts and Figures and All About Business in Hawaii. Hawaii Facts and Figures is a publication of the Chamber of Commerce of Hawaii, first issued (under a different title) almost fifty years ago. The most recent edition appeared early in 1985, with statistics through 1984; copies are available from the Chamber for \$3.00. All About Business in Hawaii 1985 is the 13th in an annual series published by Crossroads Press, Inc. The current edition costs \$3.75.

The County of Hawaii, Department of Research and Development, has published its own County of Hawaii Data Book 1980, presenting 264 pages of statistics for the Big Island. This report, dated December 1980, is sold for \$7.50 (postpaid, \$10.00).

A similar report for Kauai, 1984 Kauai Statistical Review: An Annual Report of the County's Economic Indicators, is available from the Kauai Office of Economic Development. The most recent edition, released in 1985, contains 27 pages of tables.

Persons interested in comparisons between Hawaii and other States or the nation as a whole should consult the Statistical Abstract of the United States and its companion volumes, the State and Metropolitan Area Data Book and County and City Data Book. The Abstract is an annual publication of the

U.S. Bureau of the Census, initiated in 1878. The current edition is the 105th, dated 1985; copies are available for \$23.00 (cloth) or \$19.00 (paper) from the Superintendent of Documents, U.S. Government Printing Office, Washington, D. C. 20402. The State and Metropolitan Area Data Book, 1982, also available from GPO, costs \$15.00. The County and City Data Book, 1983 is sold by the same agency for \$24.00. All three volumes are on the shelves of major libraries.
