This report was largely the work of the DBED Research and Economic Analysis Division, headed by Richard Y. P. Joun, Ph.D. It was compiled and edited by Robert C. Schmitt, State Statistician, with the assistance of Sharon Nishi, Emogene K. Estores, Karen Yamashita, and Bob Stanfield. The camera-ready copy was typed and proofread by Irene S. Fujimori, Judy F. Noda, Helen T. Nagafuchi, and Charlotte N. L. Chow. Stewart A. Wastell, illustrator in the Office of State Planning, drew the maps. Printing arrangements were handled by the DBED's Information Office.

Copies of this report may be obtained for \$5.00 each from the Information Office on the 7th floor of the Kamamalu Building, 250 South King Street, Honolulu, or ordered from out of State by sending \$15.00 per copy (postpaid) to the DBED Information Office, P. O. Box 2359, Honolulu, Hawaii 96804.

ABOUT THIS BOOK

The State of Hawaii Data Book: A Statistical Abstract is the standard official summary of statistics on the social, economic, and political organization of our island state.

In addition to serving as a reference, it is a guide to other sources of statistics.

The State of Hawaii State Data Book closely follows the organization and format of its counterpart, the Statistical Abstract of the United States, thus facilitating comparison of Hawaii and national data.

The State of Hawaii Data Book places the major emphasis on statewide data and less on counties, islands, urban places, and smaller areas. Source references for additional statistical detail are given in the introductions to the various sections and at the end of each table.

This is the 22nd such abstract published by the State of Hawaii. Earlier editions appeared in 1962, 1967, 1968, and annually beginning in 1970. Most of them are now out of print, but copies can be found in many libraries in Hawaii.

Many Federal, State, County, and private organizations cooperated with the DBED Research and Economic Analysis Division in the preparation of this book. They are credited in the source references that accompany the tables to which they contributed.

GUIDE TO TABULAR PRESENTATION

The tables in this report generally follow the principles of tabular presentation used by the U.S. Bureau of the Census in its annual publication, Statistical Abstract of the United States, and described in Bureau of the Census Manual of Tabular Presentation, published by the Bureau in 1950. These principles have been accepted by the Department of Business and Economic Development for use in its publications and recommended to all other State agencies for official use.

Headnotes immediately below table titles provide information important for correct interpretation or evaluation of the table as a whole or for a major segment of it.

Unit indicators ("In thousands," "In millions of dollars," etc.) are usually given as the first element of the headnote. In tables where several units are used, the unit indicators are generally given in the stub or in the column headings.

Footnotes below the bottom rule of tables give information relating to specific items, figures or symbols within the table.

Parallel vertical rules are used to the right of a total column to indicate --

- (1) that the components which follow add to the total;
- (2) in the case of derived figures, that the underlying data are additive to their total.

A dash (-) represents zero in references to absolute values. In rates and percentages, a zero (0) is used.

In many tables, details will not add exactly to the totals shown because of rounding.

Geographic coverage should be understood as Statewide, unless otherwise indicated in the table title, headnote, boxhead, or stub. All annual statistics should be understood as referring to calendar years unless otherwise indicated.

Section 1

POPULATION

This section presents statistics on the growth, geographic distribution, and composition of the population of Hawaii, and on the number and characteristics of migrants moving to and from the State.

Provisional estimates for 1987 indicate a resident population of 1,083,000. This total is well above the 1980 census count of 964,691 and the earlier counts of 422,770 in 1940, 154,001 in 1900, and 84,165 in 1850. These censuses and estimates include members of the armed forces stationed in Hawaii and their local dependents, a group making up 11.4 percent of the resident total when last surveyed. The 1987 de facto population--which included 134,000 visitors present on an average day in that year but excluded 16,000 residents temporarily absent--was 1,201,000. Almost three-fourths of the 1987 de facto total was on Oahu, giving that island a density of 1,498 persons per square mile. The population of the State is relatively young--the median age in 1987 was 31.5 years--and racially diversified. The major unmixed groups, based on a 1986 sample survey, were Caucasians (23 percent of the non-barracks, non-institutional population) and Japanese (also 23 percent). In addition, 31 percent were of mixed race, primarily part Hawaiian. There were approximately 345,000 households in the State in 1987, with an average household size of 3.02. Migration has been a major factor in the growth of the population: between 1980 and 1987, there was a net in-migration (excluding military personnel and dependents) of 48,000, accounting for 42 percent of the total civilian population growth during that time. Immigrant arrivals in fiscal 1987 numbered 6,800, mostly from the Philippines.

The principal sources for these data are the decennial population censuses conducted by the U.S. Bureau of the Census, the estimates developed annually by the Hawaii State Department of Health and Department of Business and Economic Development in cooperation with the Bureau of the Census, the Hawaii Health Surveillance Program conducted regularly since 1969 by the Department of Health, the ongoing series on visitors present and residents absent maintained by the Hawaii Visitors Bureau, and the U.S. Immigration and Naturalization Service tabulations on immigration. The Department of Business and Economic Development summarizes these data in two series of reports, both issued annually: The Population of Hawaii and Hawaii's Migrants. Earlier figures on population and migration are given in Historical Statistics of Hawaii, Section 1 and 3. Comparable national statistics on population and migration appear in Section 1 of Statistical Abstract of the United States: 1988.

Data through 1896 are on a de facto or unspecified basis; data for 1900 and later years are on a resident basis, and include armed forces stationed or homeported in Hawaii]

1/ The resident population is defined as the number of persons whose usual place of residence is in an area, regardless of physical location on the estimate or census date. It includes military personnel stationed or homeported in the area but excludes persons of local origin attending school or in military service outside the area.

2/ Averages for 12-month periods centered on the estimate or census dates.

3/ The de facto population is defined as the number of persons physically present in an area, regardless of military status or usual place of residence; it includes visitors present but excludes residents temporarily absent.

4/ De facto population per 1,000 resident population.

1/ Based on a sample; data may therefore differ somewhat from comparable data in table 37.

2/ A subfamily is a married couple (husband and wife enumerated as members of the same household) with or without children, or one parent with one or more never married children under 18 years of age, living in a household and related to either the householder or householder's spouse. The number or percentage of subfamilies is sometimes treated as a measure of the "doubling up" of households.

Section 2

VITAL STATISTICS AND HEALTH

This section presents data on births, deaths, marriages, divorces, diseases, accidents, alcohol and drug use, height and weight, hospitals, and health personnel.

Vital indexes generally reflect the high health standards of Hawaii. Expectation of life at birth in 1984-86 was 75.37 years for males and 80.92 years for females. There were 6,149 resident deaths in 1987, or 5.7 per 1,000 resident population. Deaths under one year of age per 1,000 live births numbered 9.2 in 1987. Diseases of the heart have accounted for almost a third of all deaths in recent years; cancer, for almost one-fourth. Resident live births in 1987 numbered 18,555, or 17.1 per 1,000 resident population. The total fertility rate for civilians fell from 3,360 per 1,000 women in 1960 to 1,891 in 1985. Fully 98 percent of all babies were born in hospitals in 1987, and 21 percent were born to military couples. One out of five births was to an unmarried woman. There were 7,264 fetal deaths in 1987, including 5,971 elective abortions. Marriages numbered 16,597 in 1987, with about 41 percent accounted for by nonresidents. Divorces reached a 1987 total of 4,419. The State had 22 acute care hospitals (with 2,855 beds), 36 long-term care facilities (with 2,995 beds), and nine specialty care facilities (with 821 beds) in 1988. There were 2,277 physicians and surgeons, 881 dentists, 7,070 professional nurses, and 520 pharmacists licensed and living in Hawaii as of February 1988. Acute conditions per 100 persons numbered 210 in 1986, with respiratory conditions the most common complaint (at 148 cases per 100 persons). Among chronic conditions reported in the 1986 survey data, the most frequently mentioned were hypertension without heart involvement (7.7 per 100 persons), hayfever (5.7), and impairments of the back or spine (5.1). The most common communicable diseases reported to authorities in 1987 were scarlet fever, with 3,620 cases, and chickenpox, with 1,484, but the most fatal was AIDS (41 deaths). State mental health facilities served 8,220 patients in 1987, but the number of in-patients at the end of the year was only 248. Among persons 18 years old and over in 1984, 53 percent used alcohol, eight percent were heavy drinkers, 43 percent used drugs, and three percent were heavy drug users. The average adult male was 67.5 inches tall and weighed 159.5 lbs.; the average adult female was 62.6 inches and 127.9 lbs.

The major sources for data on vital statistics and health are the annual statistical reports of the Hawaii State Department of Health. Long-term trends are traced in Historical Statistics of Hawaii, Section 2. Sections 2 and 3 of the Statistical Abstract of the United States: 1988 contain similar data for the nation as a whole.

Section 3

EDUCATION

This section presents statistics on enrollment in public and private schools, colleges and universities; students graduated and degrees awarded; the highest grade of school completed; achievement test results; school facilities, personnel, and expenditures; and libraries.

Enrollment in elementary, intermediate and high schools in 1987-1988 totaled 202,000, slightly more than in the preceding year but well below the all-time high of 216,000 reached in 1971-1972. There were 231 public schools with 8,632 classroom teachers and 166,000 students (82.1 percent of the total). There were also 138 private schools with 2,536 teachers and over 36,000 pupils. Students graduating from public and private high schools in 1986-1987 numbered 13,097. Some 52,600 students attended colleges and universities in the State in 1987-1988, including 18,400 on the Manoa Campus of the University of Hawaii, 500 at West Oahu College, 3,600 at UH-Hilo, 20,600 at six community colleges, and 9,600 in four private colleges and universities. Ninety-two percent of the children 5 and 6 years old were in school in 1980 (compared with 87 percent in 1970), and 47 percent in the 18- and 19-year-old group were enrolled (compared with 53 percent a decade earlier). The expenditure per pupil in public schools rose from \$1,718 in 1976-1977 to \$3,748 in 1986-1987. In scholastic aptitude tests, Hawaii students scored somewhat above national norms in the math component but considerably below in the verbal component. Among adults, an estimated 15 percent were illiterate in English as of 1980. More than one-fifth of all residents 25 years of age or more have completed four or more years of college. The Hawaii State Library System, with 49 locations on six islands, had 2.1 million books, 6,500 periodical subscriptions, and 68,000 phonodisks and phonotapes in 1987, with an annual circulation of 6.5 million. The University of Hawaii libraries in the same year counted 2.6 million volumes.

The principal sources of data on education are the U.S. Bureau of the Census, Hawaii State Department of Education, University of Hawaii, and private colleges and universities. Historical Statistics of Hawaii, Section 9, contains Island data back to 1820. Section 4 of the Statistical Abstract of the United States: 1988 presents comparable information for the nation as a whole.

Section 4

LAW ENFORCEMENT, COURTS AND PRISONS

Statistics in this section refer to crimes committed, victims of crime, arrests, the police, attorneys, the judiciary system, prisons, and youth correctional facilities.

Major offenses reported to the police in 1987 numbered 63,600, compared with 55,400 in 1985 and 71,300 in 1980. The rate per 1,000 resident population increased from 53 in 1985 to 59 in 1987. Seventy-eight percent of the serious crimes in 1987 occurred on Oahu. For the State as a whole, major offenses known to police in 1987 included 53 murders or cases of non-negligent manslaughter, 396 rapes, 1,043 robberies, 1,364 aggravated assaults, 12,500 burglaries, 43,669 cases of larceny, and 3,986 auto thefts. The value of property reported stolen in 1987 amounted to \$32 million, exclusive of motor vehicles; only 9.6 percent was recovered. Authorities confiscated 1,902,000 marijuana plants, with an estimated value of \$1.9 billion, during the year. Confirmed instances of child abuse and neglect numbered 2,586 in 1986. Seventeen percent of the major offenses known to police were cleared by arrest or otherwise in 1987. Forty-six percent of the persons arrested for major crimes and 25 percent of those arrested for lesser offenses in 1987 were less than eighteen years of age. The number of inmates in the ten State correctional institutions averaged 2,094 during fiscal 1987; of this number, 1,429 were adults serving time for felonies. Cases concluded in the State Supreme Court, Intermediate Court of Appeals, four circuit courts, and four district courts and their divisions during fiscal 1986 numbered 861,000, including 731,000 traffic cases. Filings in the United States District Court for Hawaii in 1987 included 1,223 civil cases, 1,297 criminal cases, and 982 bankruptcy cases. The last legal execution in Hawaii took place in 1947. There were 3,762 attorneys licensed in Hawaii as of mid-1988. Criminal justice system expenditures amounted to \$210 million in fiscal 1985.

Statistics on law enforcement, courts, and corrections in Hawaii appear in the annual reports of the county police departments, the State Judiciary, the Department of Corrections, and the Administrative Office of the United States Courts. The Hawaii Criminal Justice Data Center issues quarterly and annual reports titled Crime in Hawaii. Figures on crime, the courts, and corrections in earlier years appear in Historical Statistics of Hawaii, Section 10. National data are summarized in the Statistical Abstract of the United States: 1988, Section 5.

Section 5

GEOGRAPHY AND ENVIRONMENT

This section relates to land and water areas, physical geography, climate, air and water quality, noise, and other geographic and environmental measurements of Hawaii. Most statistics on land use and ownership, however, appear in Section 6.

The State consists of eight major islands and 124 minor islands with a total land area of 6,425 square miles and a general coastline of 750 miles. Honolulu is 214 miles from Hilo, 1,367 miles from Kure Atoll (the westernmost end of the State), 2,397 miles from San Francisco, and 4,829 miles from Washington, D.C. The highest peak in the State is Mauna Kea, 13,796 feet above sea level; the longest stream is Kaukonahua Stream, Oahu, 33 miles in length; the most extensive lake or similar body is Kawainui Marsh, 1,000 acres; and the highest named waterfall is Kahiwa, Molokai, a 1,750-foot cascade. Various measures of air pollution, such as suspended particulate matter, indicate that Honolulu is one of the cleanest cities in the nation. There is also relatively little water pollution: the 34 major beaches surveyed in 1987 were found to have fecal coliform levels per 100 ml. ranging from 2.0 to 89.7, and all of them were within EPA standards. More than 1,200 species, subspecies, and varieties of native fauna and flora have been proposed or accepted for inclusion on lists of endangered, threatened, or extinct organisms.

Climatically, Hawaii is marked by remarkably balmy temperatures and wide variations in rainfall. The all-time temperature range at Honolulu International Airport, for example, was from 53° to 94°F. Average precipitation, however, ranges from less than nine inches at Kawaihae to 444 inches atop Waialeale. The largest volcanic eruption in Island history (begun in 1983) had produced more than one billion cubic yards of lava by August 1988. The worst earthquake (1868) attained 7.5 on the Richter scale, the highest tsunami wave (1946) reached 56 feet, and the most destructive hurricane (Iwa, 1982) gusted to 117 miles per hour. Water withdrawn for use in 1985 averaged 1.4 billion gallons per day, compared with 2.9 billion in 1980 and 2.8 billion in 1975. Among 31 neighborhoods on Oahu, median noise levels in 1981-1982 ranged from 37 decibels (in Mililani) to 57 decibels (in Pawaa).

Important sources of data include the U.S. Geological Survey, National Ocean Survey, National Weather Service, U.S. Bureau of the Census Geography Division, the Division of Water and Land Development of the State Department of Land and Natural Resources, the State Department of Health, and the University of Hawaii Institute of Geophysics. Detailed information is given in Atlas of Hawaii, 2nd edition, published by the University of Hawaii Press in 1983. National data are reported in Statistical Abstract of the United States: 1988, Section 6.

1/ Listed in geographic order, from east to west. The channels between major islands were measured between the following points:

Alenuihaha: Upolu Pt., Hawaii, to Puhilele Pt., Maui;
 Alalakeiki: Lae o ka Ule, Kahoolawe, to Nukuele Pt., Maui;
 Kealaikahiki: Makaalae, Kahoolawe, to Kamaiki Pt., Lanai;
 Auau: Kikoa Pt., Lanai, to Lahaina, Maui;
 Kalohi: Wahie Pt., Lanai, to Kamalo, Molokai;
 Pailolo: Lipoa Pt., Maui, to Pohakuloa, Molokai;
 Kaiwi: Ilio Pt., Molokai, to Makapuu Pt., Oahu;
 Kauai: Kaena Pt., Oahu, to Kamilo Pt., Kauai;
 Kaulakahi: Mana Pt., Kauai, to Kaunuopou, Niihau.

2/ Width measured in statute miles between designated points on National Ocean Survey and Coast and Geodetic Survey charts. Width in kilometers calculated from miles (1 mile = 1.60934 km.).

3/ Depths given are the deepest soundings noted at or near the line joining the two designated points, on National Ocean Survey and Coast and Geodetic Survey charts. Depths measured in fathoms and converted to feet and meters (1 fathom = 6 feet = 1.8288 meters).

1/ Figures are lengths of general outline of seacoast. Data for the four islands of Maui County are not consistent with the reported county total.

2/ Shoreline of outer coast, offshore islands, bays, rivers, and creeks is included to the head of tidewater or to a point where tidal waters narrow to a width of 100 feet.

3/ Derived from data expressed in statute miles; independently rounded and accordingly may not add exactly to indicated totals and subtotals.
1 mi. = 1.609 km.

4/ Data are not available for five minor islands: Molokini, Lehua, Gardner Pinnacles, Maro Reef, and Pearl and Hermes Atoll.

5/ Excludes the Midway Islands, which are part of the Hawaiian Archipelago but not legally part of the State of Hawaii. Midway has a general coastline of 20 miles and a tidal shoreline of 33 miles.

1/ Areas in square kilometers and acres were calculated directly from the figures shown for square miles; these equivalents were independently rounded, and hence may not add exactly to the indicated totals and subtotals. 1 square mile = 640 acres = 2.58999 square kilometers.

2/ Dry land and land temporarily or partially covered by water, as marshland, swamps, etc.; streams and canals under one-eighth statute mile wide; and lakes, reservoirs, and ponds under 40 acres of area.

Continued on next page.

Table 142.-- LAND AND WATER AREA OF COUNTIES AND ISLANDS: 1982 -- Con.

3/ Permanent inland water surface, such as lakes, reservoirs, and ponds having 40 acres or more of area; streams, sloughs, estuaries, and canals one-eighth statute mile or more in width; deeply indented embayments and sounds, and other coastal waters behind or sheltered by headlands or islands separated by less than 1 nautical mile of water, and islands having less than 40 acres of area.

4/ Because of rounding, island figures may not add to county figures.

5/ Revised to reflect inclusion of Kaula in the County of Kauai rather than in the City and County of Honolulu, as shown in Data Book 1987, table 157. Kaula was transferred to the County of Kauai by Act 245, S.L.H. 1988, approved June 9, 1988.

6/ Molokini, offshore of Maui, not measured; other sources give the area of Molokini as 18.6 acres (0.03 square miles or 0.075 square kilometers).

7/ Includes Lehua, elsewhere reported as 243 acres (0.38 square miles or 0.98 square kilometers).

8/ Exclusive of the Midway Islands, which are part of the Hawaiian Archipelago but not legally part of the State of Hawaii.

1/ Modified Mercalli Scale of 1931, 1956 abridged version further simplified. This scale, which extends from I to XII, reads in part:

IV. Hanging objects swing. Vibration like passing of heavy trucks or sensation of a jolt. Standing autos rock. Windows, dishes, doors rattle. Crockery clashes. In the upper part of range wooden construction creaks.

V. Felt outdoors; direction estimated. Sleepers wakened. Liquids disturbed, some spilled. Small unstable objects displaced or upset. Doors, shutters, pictures swing. Pendulum clocks stop.

VI. Felt by all. Many frightened, run outdoors. Persons walk unsteadily. Windows, dishes, glassware broken. Knickknacks, books thrown off shelves, pictures off walls. Furniture moved, overturned. Weak plaster and masonry cracked. Small bells ring. Trees, bushes noticeably shaken.

VII. Difficulty in standing. Noticed by drivers of autos. Hanging objects quiver. Furniture broken. Damage to weak masonry. Weak chimneys broken at roof line. Fall of plaster, loose bricks, etc. Some cracks in ordinary masonry. Waves on ponds. Small slides on sand and gravel banks. Large bells ring. Irrigation ditches damaged.

Section 6

LAND USE AND OWNERSHIP

General statistics on the use, ownership, and tenure of land appear in this section. Information on specific use or ownership categories is given elsewhere: parks in Section 7, military land in Section 10, agriculture in Section 19, forests in Section 20, and cane land and industrial parks in Section 22.

Out of the 4,112,000 acres in the State, 333,000 are in cropland and 974,000 in pastureland. Other major categories include forestland, with 1,473,000 acres, urban and built-up, with 126,000, and miscellaneous nonfarm, with 852,000. On Oahu, land in residential use increased from 22,600 acres in 1969 to 28,800 in 1987; during the same 18-year span, agricultural land declined from 88,900 to 76,800 acres. For the State as a whole, the Land Use Commission has zoned 166,000 acres as urban, 1,967,000 as conservation, 1,969,000 as agricultural, and 10,000 as rural.

Recent data on land ownership indicate that the Federal government owns 8.4 percent of all land, the State and counties own 29.8 percent, and private owners (chiefly large estates) have 61.8 percent. Total Federal holdings reported by the General Services Administration in 1986 came to 687,000 acres, exclusive of leased land (9,600 acres); most of the Federal land was in wildlife, park and military use. The State Department of Hawaiian Home Lands holds about 187,000 acres, divided among 5,800 lessees. Total land parcels in the State as of 1988 numbered 413,000.

Considerable caution is necessary in comparing statistics from different sources on land use, ownership, or tenure. Variations in definitions and survey dates seriously affect comparability in many instances, even where terminology is relatively unambiguous and misinterpretation seems unlikely. An example of such difficulties is the wide range in estimates of Federal land, with totals ranging from 338,000 acres to 687,000.

Tabulations by the U.S. Department of Agriculture and General Services Administration, Hawaii State Department of Hawaiian Home Lands, Department of Land and Natural Resources, Department of Business and Economic Development, and Land Use Commission, Honolulu Department of Finance, and Honolulu Department of General Planning provided the data for this section. Historical Statistics of Hawaii, Section 12, contains limited information for earlier years. Statistics for the nation as a whole are available in Sections 6, 7, 10, 23, and 24 of the Statistical Abstract of the United States: 1988.

1/ Because of the omission of public thoroughfares and for other reasons, totals differ considerably from official area estimates in other tables in this volume.

2/ State land ceded by presidential proclamation or governor's executive order to the federal government appears in most cases to have been classified for this table as federal land, even though title to it technically remains with the state. Land ceded by the state to the counties, in contrast, has probably been classified as state land. For both types of ceded land, treatment may have varied from parcel to parcel.

Section 7

RECREATION AND TOURISM

Statistics on tourism, recreation, sports, museums, parks, pets, and the performing arts appear in this section. Additional information on recreational and resort land use is given in Section 6; on transportation, in Section 18; and on hotels and hotel workers, in Sections 12, 13, 15 and 23.

Approximately 5,800,000 visitors stayed overnight or longer in Hawaii during 1987, compared with 3,434,000 in 1977 and only 1,125,000 in 1967. The average number present at any given time during 1987 was 134,000. Total visitor expenditures (exclusive of trans-Pacific fares) in 1987 amounted to \$6.6 billion, compared with \$1.8 billion a decade earlier. The 1987 visitor total included 3.7 million from other States, 242,000 from Canada, and 1,161,000 from Japan. Expenditures per visitor day in 1987 averaged \$102 for westbound visitors and \$367 for the Japanese. Visitor-related spending in 1986 resulted in tax revenues of \$657 million and generated 196,000 jobs.

Both visitors and residents have access to a wide range of recreational and cultural facilities. The State has seven national parks and similar areas, 76 State parks, 561 county parks, 56 golf courses, 278 public tennis courts, 2,027 small-boat moorages, 1,600 recognized surfing sites, and 24.4 miles of safe, sandy, accessible beach. Recreational, scenic and cultural facilities reporting more than two million annual visits each in 1987 included Waikiki Beach, Hanauma Bay, the National Memorial Cemetery of the Pacific, and Wailua River State Park. Total visits to 61 museums, State monuments, zoos, and similar attractions in 1987 numbered 17.8 million. Almost 400,000 Hawaii residents traveled to the Mainland in 1987. Twelve theatrical groups on Oahu reported 1,354 performances of 439 productions for the 1986-1987 season, with a combined audience of 875,000. During the same season, the Honolulu Symphony Orchestra gave 85 concerts, with a total attendance of 140,000. During the 1987-1988 school year, attendance at UH-Manoa varsity baseball, basketball, football and volleyball home games was 577,000.

Information on recreation and tourism is issued periodically by the Hawaii Visitors Bureau (particularly in its Annual Research Report), the State Parks Division of the Department of Land and Natural Resources, the Hawaii State Department of Business and Economic Development, U.S. National Park Service, County park and recreation departments, and other organizations. Long-term trends are summarized in Historical Statistics of Hawaii, Section 11. National statistics are given in Section 7 of Statistical Abstract of the United States: 1988.

Table 203.-- SUMMARY CHARACTERISTICS OF WESTBOUND VISITORS TO HAWAII:
1977 TO 1987 -- Con.

1/ Base includes estimated number of visitors arriving directly from Canada and usually omitted from the Hawaii Visitors Bureau Basic Data Survey.

2/ Party heads only. Calculated as the number of professional, technical, business, managerial and official workers as a percent of all party heads responding to this question.

3/ Party heads only.

4/ Excludes condominiums operating as hotels.

5/ Computed from total visitor days and total visitor arrivals for westbound visitors destined for Hawaii. These data may differ somewhat from corresponding data in the source, because of different computation procedures.

6/ Base includes passengers who did not answer this question.

Section 8

ELECTIONS

This section presents data on election districts, registered voters, votes cast, campaign expenditures, elected officials, and legislative activity.

About 420,000 persons were registered to vote in the general election of November 4, 1986, and more than 344,000 actually voted. The number voting amounted to 44 percent of the 784,000 Hawaii residents of voting age at that time. The latter figure included aliens, inmates of mental and penal institutions, and members of the armed forces and their dependents, groups that are either ineligible or unlikely to vote in Island elections. Among registered voters, females outnumbered males and Democrats were far more numerous than Republicans. Campaign expenditures for the 1986 primary and general elections (other than for federal offices) exceeded \$12.8 million.

Hawaii has 2 Congressional, 25 Senatorial, 51 Representative, and 9 Councilmanic districts. It also contains 15 Soil Conservation districts, 30 active Neighborhood Board districts, and 289 election precincts.

Elected officials in Hawaii include the President and Vice President, two U.S. Senators, two U.S. Representatives, the Governor and Lieutenant Governor, 25 State Senators, 51 State Representatives, and various county officials. Persons of Hawaiian blood also vote for the Board of Trustees of the Office of Hawaiian Affairs. The minimum voting age is 18 years.

The 1987 State Legislature, with 76 members, included 60 males, 36 persons under 40 years of age, 28 persons of Japanese ancestry, 18 persons born in places other than Hawaii, and 60 Democrats.

In its 1988 regular and special sessions, the State Legislature considered 6,381 bills; 438 were passed and 406 became law. The Legislature also considered 1,382 resolutions, of which 532 were adopted.

The official results of primary, general, and special elections are published by the Office of the Lieutenant Governor. Additional information is often available from the various county clerks. Earlier figures for Hawaii appear in Historical Statistics of Hawaii, Section 24. National statistics appear in the Statistical Abstract of the United States: 1988, Section 8.

Section 9

GOVERNMENT FINANCES AND EMPLOYMENT

This section presents statistics relating to the revenues, expenditures, debt, and civilian employment of Federal, State and county governments in Hawaii.

Local government is vested in one combined city-county (Honolulu, consisting of the Island of Oahu and several outlying islets), three non-metropolitan counties (Hawaii, Kauai, and Maui), and one area (Kalawao County) administered by the State Department of Health. Separate municipal governments do not exist.

Tax collections by Federal, State and county governments in fiscal 1987 reached \$5.0 billion, more than twice the level reported ten years earlier. The 1987 total included \$2.8 billion in U.S. taxes, \$1.8 billion in State taxes, and \$412 million in county taxes, licenses and fees. Individual income taxes accounted for 88 percent of Federal collections and 31 percent of State collections in Hawaii in 1987. State revenue receipts totaled \$2.9 billion, chiefly from the general excise and use tax (\$818 million), individual income tax (\$542 million) and Federal grants-in-aid (\$404 million). The largest expenditure item in the State accounts for 1987 was education, with \$815 million (out of \$2.8 billion) going to the University of Hawaii and public schools and libraries. The counties, in contrast, depended largely on the real property tax and grants-in-aid for their revenues, and reported police and fire protection as their largest single expenditure item. Assessed valuation of the State tripled between 1980 and 1988, reaching \$68 billion by the end of the period; of this total, \$17 billion was exempt from taxation. Public bonded debt outstanding at the end of 1987 stood at \$3.3 billion.

Total government employment in 1987 averaged 95,600, about 7 percent over the 1980 average. The 1987 total included 32,300 Federal workers, 49,900 persons employed by the State, and 13,400 persons on county payrolls. State civil service employees as of mid-1987 numbered 19,000.

Important sources for statistics on government in Hawaii include the U.S. Census of Governments and various annual publications of the Bureau of the Census, reports of the U.S. Treasury Department, Hawaii State Departments of Accounting and General Services, Budget and Finance, and Taxation, and the County auditors and finance directors, and an annual compilation issued by the Tax Foundation of Hawaii, Government in Hawaii: A Handbook of Financial Statistics. Data extending back to the middle of the 19th century are summarized in Historical Statistics of Hawaii, Section 25. Comparable Mainland statistics appear in the Statistical Abstract of the United States: 1988, Sections 9 and 10.

Section 10

NATIONAL DEFENSE

This section presents statistics relating to the armed forces and their dependents, national guard strength, civilian employment in national defense, veterans, land controlled by the Department of Defense, military housing, and expenditures by the armed forces. Further information appears in sections 1, 2, 6, 12, 13, 14, and 23.

There were approximately 64,000 officers and enlisted men (including 3,400 aboard ships homeported in Hawaii) and 70,000 military dependents in the Islands as of July 1, 1988. This number has been relatively stable in recent years, but at the height of World War II more than 400,000 uniformed personnel were present. The Navy alone accounts for 41 percent of the current total. More than 10,000 Hawaii residents were in the armed forces worldwide in 1988. The importance of national defense in Hawaii can be further measured by total expenditures (\$1.86 billion), military prime contract awards (\$461 million), civilian employment (20,000), veterans in civil life (101,000), military personnel receiving retired pay (10,700, receiving \$12.7 million monthly), military-connected pupils in public schools (20,500), military housing (19,200 units), and land owned or controlled by the armed forces (over 265,000 acres). Defense expenditures are second only to tourism as a source of income to Hawaii.

The Department of Business and Economic Development has issued periodic reports on Military Personnel and Dependents in Hawaii since 1959. Other published sources include reports of the U.S. Department of Defense, U.S. Bureau of the Census, Administrator of Veterans Affairs, and the Hawaii State Department of Labor and Industrial Relations, Department of Defense, and Department of Education. Definitions used by these sources frequently differ to some degree, and care is accordingly necessary in comparing data issued by two or more agencies. In mid-1982, for example, the number of armed forces in Hawaii was reported as 53,915 by DOD, 54,879 by the Bureau of the Census, and 61,107 by the local commanding officers reporting to DBED. Historical Statistics of Hawaii, Section 26, includes series on the armed forces dating back to 1795. Section 11 of the Statistical Abstract of the United States: 1988 presents data on national defense and veterans affairs for other states and the entire nation.

Section 11

SOCIAL INSURANCE AND HUMAN SERVICES

This section presents data related to governmental expenditures on social welfare; programs for old-age, survivors, disability and health insurance; public employee retirement; unemployment insurance; aid to the needy; and child and other welfare services. Also included here are selected statistics on United Way campaigns, foundations, and the quality of life. Related data are cited in Sections 9 and 13.

Total social welfare costs reached \$314 million in fiscal 1987, compared with \$194 million a decade earlier. About 55 percent of the 1987 total came from State funds and the remainder from the Federal government. The monthly average number of persons served by major welfare programs in 1987 was 51,000, or 4.7 percent of the resident population of the State. Almost 56 percent of all public assistance payments and 45 percent of all recipient cases were accounted for by aid to families with dependent children. The average monthly payment per case for public assistance was \$367, or 19 percent more than in 1977. Participation in the food stamp program included 33,000 households and 87,000 persons. Among workers receiving unemployment compensation in 1987, weekly benefits averaged \$149. About 138,000 Hawaii residents were receiving Social Security benefits in 1987, and about 104,000 were enrolled for Medicare. There were also 19,000 State and county government pensioners in 1987, with annual benefits of \$199 million. Child adoptions in 1986 numbered 581. Seventy-six foundations reported assets of \$239 million when most recently surveyed. The United Way reported agency allocations of \$9.5 million on Oahu and \$1.8 million on the Neighbor Islands in 1987. A recent comparative study of the "quality of life" in 300 American metropolitan areas ranked Honolulu forty-third.

Major data sources include reports and records of the U.S. Department of Health and Human Services, the Hawaii State Department of Human Services (formerly Social Services and Housing), the Hawaii State Department of Labor and Industrial Relations, the Hawaii State Employees' Retirement System, and the Aloha United Way. Historical Statistics of Hawaii, Section 8, contains data for earlier years. Section 12 of the Statistical Abstract of the United States: 1988 presents comparable Mainland data.

Section 12

LABOR FORCE, EMPLOYMENT, AND EARNINGS

This section presents statistics on the size and composition of the labor force, employment by occupation, industry, class of worker, and place of work, payrolls, wage rates, hours, industrial safety, work disability, unionization, and strikes. Related series appear in Sections 3, 9, 10, and 19 through 23.

The civilian labor force averaged 514,000 in 1987; of this total, 495,000 persons were employed and 20,000 were unemployed and seeking work. The civilian jobcount rose from 399,000 in 1977 to 509,000 a decade later. (The jobcount differs from employment because the latter counts multiple jobholders--'moonlighters'--only once.) Areas with large concentrations of workers in 1980 included downtown Honolulu (46,000), Waikiki (30,000), and Pearl Harbor-Hickam (15,000). The unemployment rate averaged 3.8 percent in 1987, with individual island levels ranging from 3.5 to 14.9 percent. By occupation, one out of four civilian workers is classified as professional or managerial. Activities with especially large numbers of employees include services (126,000 in 1987), retail trade (103,000), and government (96,000). The average annual earnings of wage and salary workers under the Hawaii Employment Security Law reached \$19,060 in 1987, or 5.5 percent less than the 1977 average after adjustment for inflation. Average weekly hours in 1987 were 37.6 for all civilian workers and 44.1 for those on full-time schedules, and ranged from 30.7 (for retail trade) to 42.6 (for communication and utilities). Labor union membership was estimated at 154,000 in 1987-1988. Work stoppages in 1987 involved about 100 workers, the fewest in many years.

Principal sources for the data on labor force, employment, place of work, hours, earnings, unions and strikes are the decennial reports of the U.S. Bureau of the Census, the same agency's Current Population Survey, reports by the U.S. Bureau of Labor Statistics, monthly and annual tabulations by the Hawaii State Department of Labor and Industrial Relations, and annual surveys of pay rates by the Hawaii Employers Council. Historical Statistics of Hawaii, Section 4, includes figures for earlier years. Statistics for the nation as a whole are published in Section 13 of the Statistical Abstract of the United States: 1988.

Section 13

INCOME, EXPENDITURES, AND WEALTH

This section presents statistics on two different aspects of income and expenditures, one relating to the state income and product system and the other to the distribution of income to families, households and individuals. Specifically, information is given on gross state product, income by industry, personal, family and household income, poverty, personal wealth, and family expenditures. Data on wage rates, salaries, and earnings appear in Sections 3, 9, 12, and 22; on industrial payrolls, in Sections 12, 15, and 20 through 23; on the family income of visitors, in Section 7; on retirement payments and public assistance, in Sections 10 and 11; on taxable income, in Section 9.

Gross state product in 1986 was about \$18 billion. The major sources of outside income to Hawaii in 1987 were defense expenditures (\$1.9 billion), pineapple production (\$252 million), sugar production (\$336 million), and visitor expenditures (\$6.6 billion). Personal income in 1987 was \$17.0 billion, compared with \$7.2 billion only ten years earlier, and per capita personal income was \$15,700, almost twice the 1977 level. The per capita figure for Hawaii was slightly above the national average, but not high enough to compensate for the Islands' much higher cost of living. The median annual income of families, based on data for 1987, was \$39,000; for unrelated individuals, the median was \$14,900. The official poverty threshold for a 4-person family in Hawaii was set in February 1988 at \$13,400. The most recent family expenditure survey, taken in 1984 and 1985, reported that the largest items in the family budget on Oahu were housing (accounting for 27.9 percent of total spending), transportation (18.9 percent), and food (17.5 percent). Top wealthholders in 1982 included 20,300 persons with assets of \$325,000 or more and 1,400 millionaires.

The chief sources of data shown in this section are the U.S. Bureau of Economic Analysis, U.S. Bureau of the Census, U.S. Bureau of Labor Statistics, U.S. Department of Health and Human Services, Internal Revenue Service, Hawaii Agricultural Statistics Service, Hawaii State Department of Business and Economic Development, and Hawaii Visitors Bureau. Sections 6 and 7 of Historical Statistics of Hawaii present data for earlier years. Comparable data for the country as a whole are given in Statistical Abstract of the United States: 1988, Section 14.

Section 14

PRICES

This section presents indexes of consumer prices for Honolulu, average prices for selected foods, and comparisons of Honolulu living costs with those in other metropolitan areas. Other statistics on prices are reported in Sections 7, 16, 17, 18, 21, and 23.

During the first six months of 1988, the Honolulu all-items consumer price index for all urban consumers (CPI-U) averaged 120.1, with the 1982-1984 level equal to 100. The index had increased 6.0 percent over the first half of 1987, 20.9 percent since 1983, and 79.5 percent since 1978. Prices have risen most rapidly since the 1982-84 base period for medical care (29.2 percent) and have dropped most rapidly for electricity (22.4 percent).

An "intermediate" budget for a four-person family living on Oahu was estimated at \$31,893 as of the Autumn of 1981. This family budget was 26 percent higher than the corresponding urban United States average, and was first among the 25 American metropolitan areas surveyed. The "lower" budget was 33 percent above the national figure; the "higher" budget, 32 percent. An unofficial 1988 survey of selected U.S. metropolitan areas ranked Honolulu third in overall living costs, 16.8 percent above the median area.

The Honolulu consumer price index has been compiled by the U.S. Bureau of Labor Statistics since December 1963. This index measures the average change in prices of goods and services purchased by urban households. Prices are expressed as a percent of the average levels reported in 1982-1984, the base date. Current data for Honolulu and other cities are published in CPI Detailed Report, issued monthly by BLS.

Technical changes made in the consumer price index during the past decade have affected its coverage, treatment of specific expenditure categories, weights, base period, and frequency of publication. In 1978, the Bureau of Labor Statistics added a new index, the CPI-U, covering all urban consumers, to the older index, the CPI-W, which was limited to urban wage earners and clerical workers and their families. In 1983, the basis for measuring homeowners' costs was substantially modified. In 1987, component weights based on a 1982-1984 survey replaced the older weights derived from 1972-1973 data. At the same time, the publication of the Honolulu indexes was moved from a bimonthly to a semi-annual basis. Beginning in 1988, the base period was shifted to 1982-1984 instead of 1967. Both the CPI-U and CPI-W have been linked to older indexes going back to 1940.

Official comparisons of Honolulu and Mainland living costs are no longer being made. The annual four-person family budgets estimated by the Bureau of Labor Statistics for Honolulu and 24 (previously 39) Mainland areas were discontinued after 1981. The annual comparison of prices in Hawaii and Washington, D.C., compiled by the U.S. Office of Personnel Management to provide a basis for cost of living adjustments for Federal employees, has not been published since 1983. The only current information on intercity differences is that provided by a private consultant firm, Runzheimer International. Annual surveys of food prices in Honolulu and other cities were regularly made by the Honolulu Advertiser in conjunction with the Tampa Tribune from 1979 to 1987.

No composite wholesale or producer price index is available for Hawaii. Average wholesale prices of agricultural products are reported in Statistics of Hawaiian Agriculture, issued by the Hawaii Agricultural Statistics Service, and in various other publications of the State Department of Agriculture. Wholesale price statistics of other commodities are seldom available.

Data on prices and living costs for the nation as a whole and other areas are summarized in Statistical Abstract of the United States: 1988, Section 15. Long-term trends for Hawaii are traced in Historical Statistics of Hawaii, Section 5.

Section 15

BANKING, INSURANCE, AND BUSINESS ENTERPRISE

Statistics in this section relate to banks and other financial institutions, stocks and bonds, insurance, fires, and business firms.

There were 10 banks with 181 branches, eight savings and loan associations with 185 locations, three trust companies with six branches, and 64 industrial loan or small loan licensees with 199 branch offices in Hawaii as of December 31, 1987. Deposits in Island banks reached \$9.3 billion at the end of 1986, compared with \$4.8 billion in 1980. Assets of savings and loan associations stood at \$4.9 billion in December 1984, almost three times their 1975 level. There were 136 credit unions with combined assets of \$2.1 billion at the end of 1987.

Approximately 256,000 Hawaii residents held shares in U.S. public corporations or investment companies in 1985.

Life insurance in force in Hawaii at the end of 1986 amounted to \$33 billion, more than twice the figure reported ten years earlier. For all 752 insurance companies doing business in the Islands, Hawaii premiums amounted to \$1.3 billion in 1986 and losses, claims, and benefits paid came to \$611 million. Fire losses in fiscal 1988 amounted to \$13 million. Persons covered by the four major prepaid health insurance plans as of December 31, 1987, numbered 722,000, with annual membership dues of \$551 million.

By mid-1988, almost 46,400 corporations and partnerships were registered to do business in Hawaii: 31,400 local ("domestic") corporations, 5,300 out-of-State ("foreign") corporations, and 9,700 partnerships. Business establishments with one or more employees in 1986 numbered 26,200; over half had fewer than five employees. During fiscal 1988, 3,459 new local corporations were formed. Business receipts of corporations in 1985 exceeded \$22 billion; business receipts of partnerships and proprietorships in the same year amounted to respectively \$1.9 billion and \$1.6 billion. Hawaii's largest corporation, Amfac, Inc., reported annual sales of \$2.2 billion. Business failures numbered 175 in 1987.

Sources for statistics on these subjects include the Hawaii State Department of Commerce and Consumer Affairs (specifically its Financial Institutions, Insurance, and Business Registration Divisions), the State Department of Taxation, county fire departments, the New York Stock Exchange, Dun and Bradstreet, Inc., local health insurance plans, the Hawaii Credit Union League, and the annual report on County Business Patterns issued by the U.S. Bureau of the Census. Historical Statistics of Hawaii, Sections 22 and 23, provides information for earlier periods. Comparable Mainland data appear in Sections 16 and 17 of Statistical Abstract of the United States: 1988.

D Withheld to avoid disclosing data for individual companies.

^{1/} Persons of mixed race were instructed to report the race with which they most closely identified. Whites (Caucasians), although only 34.4 percent of the 1980 population of Hawaii, were treated as the "majority" group for census purposes.

^{2/} Not corrected for double-counting. In this survey, it was possible for a minority-owned firm to be classified in more than one minority group.

^{3/} For the United States as a whole, Hawaiians owned 3,305 firms (291 with paid employees) with sales and receipts of \$85,579,000 (\$48,714,000 for those with paid employees).

COMMUNICATIONS

This section presents statistics on the usage, finances, and operations of the Postal Service and of various communications media: telephone, telegraph, radio, television, newspapers, periodicals, and books. Sections 12 and 15 contain employment and payroll data for communications establishments.

Hawaii is served by all major communications media. In 1988 it had 147 post offices and stations handling 400 million pieces of mail and accounting for postal receipts of \$120 million. There were 520,000 telephone access lines in service, 364,000 telephone homes, about 2.4 billion local calls originated, 12 million completed interisland calls (in 1981), and 32 million incoming and outgoing transpacific calls (in 1980). Telegraph messages to and from Hawaii in 1984 totaled 112,000. The 47 commercial, public and educational radio stations in the Islands in 1988 included 27 on the regular broadcast band and 20 FM stations. The State also had 18 television stations (16 commercial and 2 public), including satellites but excluding translators. Eight cable TV companies served 265,000 subscribers. An estimated 97 percent of all households in the State had television sets, and the average prime-time TV audience in May 1988 numbered 184,000 households. Island publishers printed nine daily newspapers, numerous magazines and other periodicals, and a wide diversity of books. Newspaper circulation reported by the two English-language dailies on Oahu averaged 191,000 in 1987-1988.

The major sources for statistics on communications are the reports and records of the U.S. Postal Service, Federal Communications Commission, the CATV Division of the Hawaii State Department of Commerce and Consumer Affairs, Hawaiian Telephone Company, Audit Bureau of Circulations, A. C. Nielsen Co., and Hawaii Media Guide. Earlier figures appear in Historical Statistics of Hawaii, Section 18. Data on communications for other states and for the nation as a whole are carried in Statistical Abstract of the United States: 1988, Section 18.

Table 477.-- LOCAL TELEPHONE CALLS: 1977 TO 1987

[In thousands. The number of local calls is affected as central offices are being converted to Electronic Common Control (ECC). ECC records call attempts after the first digit is dialed. Non-ECC offices record the call attempts when the handset is lifted. Also significant in 1981 were an estimated 17 million fewer calls due to the implementation of Directory Assistance Charging. Because of these fundamental changes in data collection, more recent figures are not comparable to earlier years.]

Section 17

ENERGY AND SCIENCE

This section presents statistics on energy production and consumption, the electric and gas utility industries, research and development, and scientific resources. Related series are cited in Sections 12 (on utility employment), 14 (prices), and 18 (gasoline consumption).

Total energy consumption in 1985 amounted to 231 trillion British thermal units, compared with 219 trillion BTU a decade earlier. Transportation, including aviation fuels, accounted for 56 percent of the 1986 total. Total expenditures for fuels and electricity in 1986 were \$1.56 billion.

Electricity sales amounted to 7.3 billion kilowatt-hours in 1987, a total that has increased 25 percent since 1977. Manufactured gas sales reached 32 million therms in 1987, 7 percent below the figure ten years earlier. Residential rates in 1987 averaged 9.4 cents per kilowatt-hour and \$1.57 per therm, both almost double the corresponding rates a decade earlier. Average residential use (6,905 kWh and 195 therms in 1987) has declined since the early 1970s. By 1986, almost 11 percent of the housing units in the State had solar heating devices.

The liquid fuel tax base for 1987 was approximately 1.2 billion gallons, compared with 888 million in 1977. The 1987 total included 348 million gallons of gasoline, 694 million of aviation fuel, and 159 million of diesel oil. The average price for automotive gasoline was \$1.28 per gallon during the first half of 1988.

The State is well served with scientific resources. Especially noteworthy is the cluster of large telescopes used for astronomical observations at the summits of Mauna Kea and Haleakala--twelve major facilities, including those under construction. Federal research and development obligations in Hawaii totaled \$55 million in 1986. Fifty-two patents were granted to Hawaii residents in 1987.

Information on energy and science can be obtained from reports and records of the U.S. Department of Energy, U.S. Patent and Trademark Office, U.S. Bureau of Labor Statistics, National Science Foundation, Hawaii State Department of Taxation, Hawaii State Department of Commerce and Consumer Affairs and its Division of Consumer Advocacy, the DBED Energy Division, UH Institute for Astronomy, and individual utility companies. Historical Statistics of Hawaii, Section 19, presents data for earlier years. Data for the nation as a whole can be found in the Statistical Abstract of the United States: 1988, Sections 19 and 20.

Section 18

TRANSPORTATION

This section presents statistics relating to public roads, motor vehicles, bicycles, traffic accidents, local public transit, civil aviation, harbors, and water traffic. Other information bearing on transportation appears in Sections 7, 12, 14, and 24.

Motor vehicle registration in Hawaii increased from 564,000 in 1977 to 798,000 in 1987. Vehicle miles rose during the same period from 4.5 billion to 7.2 billion. Hawaii residents purchased 60,000 new passenger cars and 12,000 trucks in 1987. By the end of that year, 628,000 licensed drivers had access to 4,071 miles of streets and highways throughout the State. Bus passengers carried by the Honolulu Mass Transit Lines increased from 66 million in 1977 to 74 million in 1987. Registered bicycles numbered 111,000 in 1987.

Most scheduled interisland travel is by air. In 1987, airlines and air taxis reported 8.8 million interisland passengers, some 37 percent more than in 1977, and carried 61,000 tons of cargo. The State has seven commercial airports, 15 general aviation, military or semi-private airports, 10 civilian heliports, 3,300 active pilots, and about 366 active civil aircraft in general aviation.

Rapid growth is similarly evident in transpacific air travel. Although surface passenger arrivals dropped from 54,000 in 1959 to 870 in 1987, air arrivals increased during the same 28-year span from 224,000 to 6.3 million. Overseas cargo received in the State in 1986 amounted to 92,000 tons by air and 8.5 million tons by ship.

Undocumented State-registered vessels as of December 31, 1987 numbered 14,000, compared with 8,000 in 1970. Median length was 17.4 feet, and four-fifths were stored on land. There were 1,380 documented vessels in the State in 1988, more than double the 1970 total.

The chief source for transportation statistics is the Hawaii State Department of Transportation and its Highways, Harbors and Airports Divisions. Other sources include the U.S. Coast Guard, Federal Aviation Administration, Federal Highway Administration, Army Corps of Engineers, Honolulu Department of Transportation Services and Department of Data Systems, county finance departments, Hawaii Automobile Dealers' Association, and individual transportation companies. Data for the entire period of record through 1976 appear in Historical Statistics of Hawaii, Section 17. Similar statistics for other areas are reported in Statistical Abstract of the United States: 1988, Sections 21 and 22.

Section 19

AGRICULTURE

This section presents statistics on agricultural land, farms, crops, livestock, dairy products, poultry, and aquaculture. Related information appears in Sections 6 (on land use), 12 and 15 (agricultural employment and earnings), and 22 (food processing).

There were 4,400 farms in Hawaii in 1987, with a total area of 1.95 million acres. The value of crop sales in 1987 was \$469 million, or 80 percent higher than the total for 1977. Livestock sales amounted to \$88 million, or 35 percent more than the 1977 level. Combined crop and livestock sales in 1987 ranged from \$63 million in Kauai County to \$181 million on the Big Island. Major crops were sugar (\$218 million in sales, up 51 percent over the decade), pineapple (\$99 million, or 59 percent over the 1977 total), flowers and nursery products (\$56 million, or 298 percent more than in 1977), and macadamia nuts (\$36 million, up 347 percent). Diversified crops, defined as all crops other than sugar and pineapple, rose from \$54 million in 1977 to \$152 million in 1987, or approximately 183 percent. About 670 farms sold \$56 million of flowers and nursery products in 1987, chiefly anthuriums, potted foliage, and orchids. Important products of livestock farms as of 1987 included cattle (\$27 million in sales), milk (\$31 million), and eggs (\$14 million). In 1987, Hawaii produced 36 percent of the fresh market vegetables consumed locally, 28 percent of the fresh market fruits, 31 percent of the beef and veal, 19 percent of the chickens, and 84 percent of the eggs.

Aquaculture has been growing in importance in recent years, with an aggregate value rising from \$1,655,000 in 1980 to \$6.3 million in 1987. Shellfish production amounted to 1.2 million pounds in 1987, with a value of \$4.5 million.

Statistics on Hawaiian agriculture exclude pakalōlō (marijuana) and other illicit plants. Authorities confiscated \$1.9 billion worth of marijuana in 1987, but the proportion escaping detection is unknown.

Important sources for data on agriculture include the United States Census of Agriculture, most recently published for 1982, the annual report on Statistics of Hawaiian Agriculture issued by the Hawaii Agricultural Statistics Service, and data compiled by the Hawaiian Sugar Planters' Association and the Aquaculture Development Program of the Department of Land and Natural Resources. Agricultural data for earlier years are summarized in Historical Statistics of Hawaii, Section 13. National statistics appear in Section 23 of the Statistical Abstract of the United States: 1988.

Section 20

FORESTS, FISHERIES, AND MINING

This section presents data on forests and forest products, commercial fishing, and mining and mineral products.

The most recent available statistics show 1.2 million acres of forest and water reserve and 948,000 acres of commercial timberland in the State, most of it on the Big Island. Over 46,000 acres had been planted in eucalyptus and other species of trees by mid-1987. Recent surveys of vegetation on three islands show ohia lehua to be the most common type of tree on Oahu and Kauai (with acreages of 38,000 and 109,000, respectively) and kiawe the leading type (at 33,000 acres) on Molokai. Forest and brushland fires burned 10.5 square miles in fiscal 1987.

The commercial fish catch in fiscal year 1987 amounted to 12.1 million pounds, with a value of \$20 million to primary producers. Ahi (yellowfin) and aku (skipjack) accounted for 38 percent of the total value. Other important species are spiny lobster, opakapaka, mahimahi, and ono. Commercial fishermen numbered 3,008. Among Marine Life Conservation Districts, those with the most fish per acre were Hanauma Bay (6,225 inshore), Manele-Hulopoe Bays (4,417), and Kealakekua Bay (4,149).

The value of mineral production reached \$73 million in 1987, almost all of it in cement (\$27 million) and crushed stone (\$43 million). The 1987 total was an all-time high.

Important sources of data on these subjects are the United States Census of Mineral Industries and reports and records of the U.S. Bureau of Mines and Hawaii State Department of Land and Natural Resources, Aquatic Resources Division and Forestry and Wildlife Division. Historical Statistics of Hawaii, Section 14, summarizes the data for earlier periods. Comparable Mainland statistics are reported in the Statistical Abstract of the United States: 1988, Sections 24 and 25.

Section 21

CONSTRUCTION AND HOUSING

This section presents statistics on construction activity and costs, the size and composition of the housing inventory, occupancy of housing units and office buildings, home sales, and residential financing. Related series are included in Sections 6 and 14.

There were 24,000 building permits issued in 1987, with an estimated value of \$1.3 billion. The total included \$507 million for new private residential construction and \$254 million for private nonresidential structures. The value of government construction contracts awarded was \$372 million. Construction put in place, as indicated by the contracting tax base, totaled \$1.8 billion in 1986 and \$2.1 billion in 1987. The value of land transfers in fiscal 1988 was \$8.0 billion. The June 1988 construction cost index for Honolulu (1982=100) was 130 for single-family residences and 125 for high-rise buildings.

The number of housing units in the State increased from 316,000 in 1978 to 385,000 in 1988. Owner occupied units numbered 129,000 in 1978 and 160,000 in 1988; the latter total included 34,000 on leased land. Condominium units, first authorized in 1961, numbered 98,000 by 1987. Cooperative units, first built in 1956, totaled 2,800 in 1987. Government-owned housing, mostly military and public, accounted for 26,000 units as of 1988. Housing has been in short supply throughout most of the past decade: on Oahu, the vacancy rate in May 1986, according to the Federal Home Loan Bank of Seattle, was only 2.3 percent. The median selling price of single-family homes on Oahu during 1987, based on Multiple Listing Service data, was \$185,000; for condominium units it was \$104,000. The median gross monthly rent for Oahu rose from \$141 in 1970 to \$413 in 1983, and the median value of owner occupied single-family units increased from \$38,400 to \$163,400.

The principal sources for these data are the 1970 and 1980 U.S. Censuses of Housing, the 1976, 1979, and 1983 Annual Housing Surveys, postal vacancy surveys issued by the Federal Home Loan Bank of Seattle, various series compiled by State and County agencies (primarily the Hawaii Housing Authority, Hawaii State Department of Business and Economic Development, Department of Commerce and Consumer Affairs, Department of Taxation, and Bureau of Conveyances, and the four county building departments), the construction cost indexes prepared by the First Hawaiian Bank, and the Honolulu Board of Realtors reports on Multiple Listing Service activity. Many of these series are summarized in reports published by the Bank of Hawaii (particularly Construction in Hawaii, issued annually) and the First Hawaiian Bank. Persons interested in figures for earlier periods should consult Historical Statistics of Hawaii, Section 15. Mainland statistics appear in Section 26 of Statistical Abstract of the United States: 1988.

1/ As of April 1.

2/ As indicated by the number of taxpayers claiming home exemptions. The number of owner occupied housing units reported by the U.S. Census of Housing is somewhat higher than the corresponding number based on taxpayer home exemptions, chiefly because of differences in definitions. Data for 1977 and later years refer to January 1; data for 1970-1976, to July 1.

3/ Calculated as a residual after accounting for the known components, some of which pertain to dates other than April 1, and thus not attributable to any specific date.

4/ As of April 1. Data include housing units leased from private owners.

5/ Revised.

Section 22

MANUFACTURES

This section presents statistics on the manufacturing segment of the economy, including sugar processing and pineapple canning. Additional information on manufacturing workers appears in Sections 12 and 15.

The number of manufacturing establishments in Hawaii increased from 697 in 1967 to 966 in 1982. The value added by manufacture rose from \$326 million in 1967 to \$786 million in 1977 and \$1,174 million in 1986. More than three-fourths of all manufacturing activity in the State in 1982 was on Oahu. Food processing--mostly sugar and pineapple--accounted for 49 percent of the value added by manufacture in 1986. In 1987, the general excise and use tax base was \$386 million for sugar processing, \$2 million for pineapple canning (mostly exempted), and \$595 million for all other manufacturing. There were two pineapple canneries and 11 sugar mills in Hawaii in 1987. The production of canned pineapple fruit and juices in 1981 (the most recent year available) was 18 million actual cases, well below the levels of earlier years. Sugar production in 1987 amounted to 979,000 short tons. The value of sugar production (including commercial molasses) in 1987 was \$336 million, compared with the record of \$677 million set in 1974. Important manufactures other than food processing include apparel, printing and publishing, and stone, clay, and glass products.

Sources for data on this subject include the United States Census of Manufactures, most recently published for 1982, the Annual Survey of Manufactures, publications of the Hawaii State Department of Agriculture and Department of Taxation, and the Hawaiian Sugar Planters' Association's annual report, HSPA Sugar Manual. Historical Statistics of Hawaii, Section 16, reviews the figures for earlier years. Statistics for the nation as a whole appear in Section 27 of the Statistical Abstract of the United States: 1988.

Table 658.-- PLANT CAPACITY UTILIZATION RATES: FOURTH QUARTERS,
1981 TO 1986

[Data based on limited samples and subject to high sampling variability. Comparability of 1984 and later rates with earlier figures is further affected by the use of a new survey sample in that year. Considerable caution is thus urged in making any year-to-year comparisons, and particularly between 1983 and 1984]

	1981	1982	1983	1984	1985	1986
Preferred rate <u>1/</u>	80	80	83	84	87	87
Practical rate <u>2/</u>	73	72	73	81	83	78

1/ The preferred level of operations is defined as a level, normally between actual operations and practical capacity, which the manufacturer would prefer not to exceed due to costs or other considerations. In this table, the preferred utilization rate represents the ratio of actual to preferred level of operations.

2/ Practical capacity is broadly defined as the greatest output the plant could achieve within the framework of a realistic work pattern. The practical capacity utilization rate is the ratio of actual operations to the practical capacity level.

Section 23

DOMESTIC TRADE AND SERVICES

This section presents statistics relating to retail and wholesale trade; hotels; and selected personal, business, automotive, repair, and amusement services. Related data are included in Sections 7, 12, 14 and 15.

These activities have undergone rapid growth in recent decades, largely because of surging tourism and higher price levels. Retail sales increased from \$1.9 billion in 1972 to \$5.2 billion in 1982. Wholesale sales rose from \$1.6 billion in 1972 to \$4.1 billion in 1982. Hotels, amusements, and other services reported receipts exceeding \$2.6 billion in 1982, compared with \$665 million in 1972. General excise and use tax base data for more recent years indicate continued increases; between 1982 and 1987, the retailing tax base rose 47 percent, the wholesaling base by 62 percent, and the base for services by 63 percent. Major retail concentrations include Waikiki, Ala Moana Center, Pearlridge Center, and downtown Honolulu. In addition to civilian retail outlets, there are many commissaries, exchanges, clubs, package stores, gasoline stations and food services maintained by the armed forces; these facilities had sales of \$465 million in 1987.

Growth has been especially rapid for hotels and related facilities. The number of units in the State rose from 6,800 in 1959 to 69,000 in 1988. There were 481 hotels, motels and apartment-hotels in Hawaii on the latter date, including 298 on the Neighbor Islands. Almost 31 percent of all transient units were in condominium structures. Occupancy rates averaged 87 percent in Waikiki and 71 percent on the Neighbor Islands during 1987. The average daily room rate was \$80 in 1987. Total hotel rentals in 1987 exceeded \$1.45 billion, or \$34,000 per unit.

Fully 109 feature motion pictures and television specials and series were filmed in Hawaii in 1987, accounting for local expenditures of \$51 million. Both totals were all-time highs.

The major source of these data are the United State Censuses of Retail Trade, Wholesale Trade, and Service Industries, most recently published for 1982. Statistics on the retailing, wholesaling, and services tax bases are available from the Hawaii State Department of Taxation. Data on hotel room counts, occupancy and other characteristics are published by the Hawaii Visitors Bureau and the firm of Pannell Kerr Forster. The Film Industry Branch of the Department of Business and Economic Development compiles data on motion picture and television production. A summary of figures on trade and services in earlier years appears in Historical Statistics of Hawaii, Section 20. The Statistical Abstract of the United States: 1988, Section 28, presents similar data for other states and the nation as a whole.

1/ In 1979, several major distributors legally contested the State liquor tax law. Tax revenues that otherwise would have been collected under this law were held in escrow until the courts ruled on the case. After the courts finally ruled against the State, the collections held in escrow were divided in 1987 in an out-of-court settlement.

2/ As of July 1, 1986, the excise tax on liquor was replaced by a gallonage tax.

Section 24

FOREIGN AND INTERSTATE COMMERCE

This section includes data on the flow of goods, services, and capital between Hawaii and the rest of the world, with particular emphasis on trade and investment involving foreign countries.

Imports to Hawaii from foreign nations rose from \$1.04 billion in 1977 to \$1.77 billion in 1987. Exports to foreign countries amounted to only \$98 million in 1977, but by 1987 reached \$393 million. These figures, it should be noted, refer to merchandise imports and exports through the Honolulu Customs District. They do not necessarily represent exports of commodities originating in Hawaii, nor imports for direct consumption within the State.

Trade with the Mainland United States has similarly risen in the past decade. Merchandise received from the Mainland increased from \$2.0 billion in 1975 to \$5.6 billion in 1985. Estimates of the value of merchandise shipped to the Mainland are no longer available.

Among the foreign nations, Hawaii's leading trading partner in 1986 was Japan for both imports and exports. Imports for consumption from Japan amounted to \$447 million, or 31 percent of the total, while exports to Japan reached \$100 million or 43 percent of all foreign exports. About 42 percent of all imports for consumption were petroleum and natural gas products and monolithic integrated circuits.

Honolulu Foreign Trade Zone No. 9 handled merchandise valued at \$73 million in fiscal 1987. Merchandise handled by Subzone No. 9A, the PRI refinery, was valued at \$861 million, almost all of it in petroleum and petroleum products. The other three subzones accounted for a combined total of \$343 million.

Foreign-owned businesses in Hawaii had a gross book value of \$2.0 billion in 1986, owned 52,000 acres, and employed 18,900 persons. Foreign investments in Hawaii between 1959 and 1987 totaled \$4.7 billion, four-fifths of it Japanese. During the 15-month period ended in March 1988, Japanese investors spent \$890 million on Hawaiian real estate.

Sources for statistics on interstate and foreign commerce include the U.S. Bureau of the Census and Bureau of Economic Analysis, Foreign Trade Zone No. 9 and its four subzones, and the DBED International Services Branch. Further information is found in waterborne cargo data by origin and destination, compiled by the Army Corps of Engineers and cited in Section 18.

Comparable data for the nation as a whole appear in Section 29 of Statistical Abstract of the United States: 1988. Long-term Island trends are summarized in Historical Statistics of Hawaii, Section 21.

Section 25

COMPARATIVE NATIONAL STATISTICS

This section presents statistics for the United States as a whole, the corresponding figures for Hawaii, and the rank of Hawaii among the 50 states and District of Columbia. The 12 tables in this section contain 365 series, thought to include the most significant or frequently requested types of data for which national comparisons are available. Virtually all of the major subject-matter areas covered in the first 24 sections of the Data Book are represented. The comparisons include totals, averages, medians, percentages, and rates.

Ranked against other jurisdictions, Hawaii was first in 23 comparisons, second in 14, last in 7, and second last in 16. Hawaii ranked 39th in population, first in life expectancy, 11th in public school pupil-teacher ratio, 16th in crime rate, 47th in land area, 14th in percent of land owned by the Federal government, 27th in visitor expenditures, 47th in votes cast as a percent of voting-age population, 14th in State and local government expenditures per capita, 27th in defense spending, 25th in public aid recipients relative to population, 11th in female labor force participation rate, 15th in per capita personal income, 6th in family living costs (based on data for 100 metropolitan areas), 37th in bank deposits, 28th in commercial television stations, 44th in energy consumption per capita, 50th in highway mileage, first in volume of crop marketings for pineapple, macadamia nuts, and bananas, 17th in value of fish catch, 49th in percent of housing units owner occupied, 45th in value added by manufacture, 16th in retail sales per capita, 9th in hotel receipts, and 8th in percent of business establishments foreign owned.

High ranks do not necessarily mean favorable scores, nor low ranks unfavorable scores. Hawaii was first (highest) in expectation of life at birth and 50th (second lowest) in crude death rate, for example, but both were highly desirable positions.

When Hawaii shared the same rank with other jurisdictions, the next lower rank (or ranks) was omitted. Although most comparisons were for 51 areas (50 states and the District of Columbia), some ranked Honolulu against other large metropolitan areas, and a few were based on other groupings. Variations in comparison groups are noted in the stubs.

Some of the values shown for Hawaii in this section differ from the corresponding figures given elsewhere in the Data Book, because of differences in sources or subsequent revisions in data.

This section was taken from other tables in this edition or their underlying sources, Statistical Abstract of the United States: 1988, pp. xvii-xxvi, and State and Metropolitan Area Data Book, 1986, table 1. Historical data on state rankings are not readily available for most series.

BIBLIOGRAPHY

This volume is the 22nd in a series published by the Hawaii State Department of Business and Economic Development and its predecessor agencies. The first was Statistical Abstract of Hawaii, 1962, issued by the Department of Planning and Research in 1962. After a four-year hiatus, updated versions titled The State of Hawaii Data Book were published by the Department of Planning and Economic Development in 1967, 1968, and annually beginning in 1970. The 1987 edition is the first one issued under the new name of the department. All of the volumes issued before 1984 are now out of print, but copies can be consulted in the DBED Library, Hawaii State Library, University of Hawaii and community college libraries, and other collections throughout the State.

Additional information regarding specific statistical sources can be found in the introductory statements to each section of the Data Book, in footnotes and source references to the various tables, and in the underlying reports.

Although most of the series in the Data Book are shown only for recent years, earlier figures can usually be found in Historical Statistics of Hawaii, by Robert C. Schmitt. This book, published by the University Press of Hawaii in 1977, contains 711 pages of narrative and tables on the development of statistics in Hawaii since the 18th century.

Privately published works of general statistical reference include Hawaii Facts and Figures 1988, sold by the Chamber of Commerce of Hawaii, and All About Business in Hawaii 1988, published by Crossroads Press, Inc.

Two of the four counties have produced statistical abstracts. In 1988, the Kauai Economic Development Board issued 1987 Statistical Abstract of the Kauai Economy, prepared by the Center for Business and Economic Development, University of Hawaii at Hilo. The Hawaii County Department of Research and Development has published County of Hawaii Data Book 1980, now out of print.

Persons interested in data for other States or the nation as a whole should consult the Statistical Abstract of the United States and its companion volumes, the State and Metropolitan Area Data Book and County and City Data Book. The Abstract is an annual publication of the U.S. Bureau of the Census, initiated in 1878. The current edition is the 108th, dated 1988; copies are available from the Superintendent of Documents, U.S. Government Printing Office, Washington, D. C. 20402. The State and Metropolitan Area Data Book, 1986 and County and City Data Book, 1983 are sold by the same agency.

ON-LINE AVAILABILITY OF DATA BOOK TABLES TO PUBLIC

Early in 1988, the Hawaii State Department of Business and Economic Development initiated a pilot program to make Data Book tables and selected other statistical series available to anyone with a personal computer and a modum.

The pilot program incorporates the full text of The State of Hawaii Data Book (including available updates to the current edition) and the data and analyses in the department's most recent Quarterly Statistical & Economic Report. Other publications and data series may be added if there is sufficient demand.

The DBED electronic bulletin board is available free 24 hours a day, seven days a week.

Until now, getting updated Data Book tables was a time-consuming process. Now the almost daily updates are available on-demand and in a format that is more convenient for people who use many of the popular electronic spreadsheets.

The system is easy to use. It is menu-driven and contains numerous "prompts" which guide the user to the data sets. It also has electronic mail features that permit users to leave messages on the system. Since this is a pilot project, user comments and suggestions are solicited.

The bulletin board is maintained on an IBM System 2 microcomputer which is located in the Department's Research and Economic Analysis Division. The system uses the PC Board version 12.1/E3 software. The bulletin board can be accessed at either 300, 1200 or 2400 baud. Anyone wishing to access the system can call (808) 946-5191. Neighbor Island residents can call toll free 1-800-421-3233. A users guide is available from the Department's Information Office (548-4025) or can be retrieved from the system.

For further information about available data or system specifications, users should call the Research and Economic Analysis Division at (808) 548-4355.
