## PRICES

This section presents indexes of consumer prices for Honolulu, the implicit price deflator for gross state product, actual prices for selected foods, and comparisons of Honolulu living costs with those in other urban areas. Other statistics on prices are reported in Sections 7, 16, 17, 18, 21, and 23.

During the first six months of 1989, the Honolulu all-items consumer price index for all urban consumers (CPI-U) averaged 126.4, with the 1982-1984 level equal to 100. The index had increased 5.2 percent over the first half of 1988, 23.3 percent since 1984, and 70.1 percent since 1979. Prices have risen most rapidly since the 1982-84 base period for shelter (37.4 percent) and medical care (36.0 percent) and have dropped most rapidly for electricity (27.5 percent). The implicit price deflator for expenditures on gross state product (a measure of price changes used in the state product accounts) rose 61.5 percent between 1978 and 1988.

An "intermediate" budget for a four-person family living on Oahu was unofficially estimated at \$44,614 as of 1988. This family budget was 28.7 percent higher than the corresponding urban United States average. Differences were particularly marked for renter shelter costs (43.0 percent higher) and personal income taxes (66.4 percent higher).

The Honolulu consumer price index has been compiled by the U.S. Bureau of Labor Statistics since December 1963. This index measures the average change in prices of goods and services purchased by urban households. Prices are expressed as a percent of the average levels reported in 1982-1984, the base date. Current data for Honolulu and other cities are published in CPI Detailed Report, issued monthly by BLS.

Important technical changes have been made in the consumer price index in recent years. In 1978, the Bureau of Labor Statistics added a new index, the CPI-U, covering all urban consumers, to the older index, the CPI-W, which was limited to urban wage earners and clerical workers and their families. In 1983, the basis for measuring homeowners' costs was substantially modified. In 1987, component weights based on a 1982-1984 survey replaced the older weights derived from 1972-1973 data. At the same time, the publication of the Honolulu indexes was moved from a bimonthly to a semi-annual basis. Beginning in 1988, the base period was shifted from 1967 to 1982-1984. Both the CPI-U and CPI-W have been linked to older indexes going back to 1940.

Official comparisons of Honolulu and Mainland living costs are no longer being made. The annual four-person family budgets estimated by the Bureau of Labor Statistics for Honolulu and the Mainland were discontinued after 1981, and are now maintained unofficially by the Bank of Hawaii. The annual comparison of prices in Hawaii and Washington, D.C., compiled by the U.S. Office of Personnel Management to provide a basis for cost of living adjustments for Federal employees, has not been published since 1983. Annual surveys of food prices in Honolulu and other cities were regularly made by the <u>Honolulu Advertiser</u> in conjunction with the Tampa Tribune from 1979 to 1987.

No composite wholesale or producer price index is available for Hawaii. Average wholesale prices of agricultural products are reported in <u>Statistics of Hawaiian Agriculture</u>, issued by the Hawaii Agricultural Statistics Service, and in various other publications of the State Department of Agriculture. Wholesale price statistics of other commodities are seldom available.

Data on prices and living costs for the nation as a whole and other areas are summarized in <u>Statistical Abstract of the United States</u>: 1989, Section 15. Long-term trends for Hawaii are traced in <u>Historical</u> Statistics of Hawaii, Section 5.

## **BANKING, INSURANCE, AND BUSINESS ENTERPRISE**

Statistics in this section relate to banks and other financial institutions, stocks and bonds, insurance, fires, and business firms.

There were 10 banks with 182 locations, seven savings and loan associations with 158 locations, four trust companies with seven branches, and 54 industrial loan or small loan licensees with 185 branch offices in Hawaii as of December 31, 1988. Deposits in insured commercial banks reached \$10.2 billion at the end of 1987, compared with \$4.5 billion in 1980. Assets of savings and loan associations stood at \$5.5 billion in December 1987, almost double their 1980 level of \$2.9 billion. There were 136 credit unions with combined assets of \$2.3 billion at the end of 1988.

Approximately 256,000 Hawaii residents held shares in U.S. public corporations or investment companies in 1985.

Life insurance in force in Hawaii at the end of 1987 amounted to \$37 billion, more than twice the figure reported ten years earlier. For all 782 insurance companies doing business in the Islands, Hawaii premiums amounted to \$1.5 billion in 1987 and losses, claims, and benefits paid came to \$694 million. Fire losses in fiscal 1989 amounted to \$20 million. Persons covered by the four major prepaid health insurance plans as of December 31, 1988 numbered 744,000, with annual membership dues of \$611 million.

By mid-1989, almost 51,000 corporations and partnerships were registered to do business in Hawaii: 34,600 local ("domestic") corporations, 5,900 out-of-State ("foreign") corporations, and 10,400 partnerships. Business establishments with one or more employees in 1986 numbered 26,200; over half had fewer than five employees. During fiscal 1989, 4,600 new local corporations were formed. Business receipts of corporations in 1985 exceeded \$22 billion; business receipts of partnerships and proprietorships in the same year amounted to respectively \$1.9 billion and \$1.6 billion. Hawaii's largest corporation, Castle & Cooke, reported annual sales of \$2.5 billion. Business failures numbered 179 in 1988.

Sources for statistics on these subjects include the Hawaii State Department of Commerce and Consumer Affairs (specifically its Financial Institutions, Insurance, and Business Registration Divisions), the State Department of Taxation, county fire departments, the New York Stock Exchange, Dun and Bradstreet, Inc., local health insurance plans, the Hawaii Credit Union League, and the annual report on <u>County Business</u> Patterns issued by the U.S. Bureau of the Census. <u>Historical Statistics</u> <u>of Hawaii</u>, Sections 22 and 23, provides information for earlier periods. Comparable Mainland data appear in Sections 16 and 17 of <u>Statistical</u> Abstract of the United States: 1989.
