This report is largely the work of the DBED Research and Economic Analysis Division, headed by Richard Y. P. Joun, Ph.D. It was compiled and edited by Robert C. Schmitt, State Statistician, with the assistance of Sharon N. Nishi, Emogene K. Estores, and Juli Ann R. Oshiro. The camera-ready copy was typed and proofread by Judy F. Noda and Charlotte N. L. Chow. Stewart A. Wastell, illustrator in the Office of State Planning, drew the maps. Printing arrangements were handled by the DBED's Information Office.

Copies of this report are available from the DBED Information Office, 220 South King Street, P. O. Box 2359, Honolulu, Hawaii 96804. The price per copy is \$8.00 in Hawaii, \$18.00 air-mailed postpaid to the Mainland United States, and \$35.00 air-mailed postpaid to foreign countries.

## ABOUT THIS BOOK

The State of Hawaii Data Book: A Statistical Abstract is the standard official summary of statistics on the social, economic, and political organization of our island state.

In addition to serving as a reference, it is a guide to other sources of statistics.

The State of Hawaii State Data Book closely follows the organization and format of its counterpart, the Statistical Abstract of the United States, thus facilitating comparison of Hawaii and national data.

The State of Hawaii Data Book places the major emphasis on statewide data and less on counties, islands, urban places, and smaller areas. Source references for additional statistical detail are given in the introductions to the various sections and at the end of each table.

This is the 23rd such abstract published by the State of Hawaii. Earlier editions appeared in 1962, 1967, 1968, and annually beginning in 1970. All before 1989 are now out of print, but copies can be found in many libraries in Hawaii.

Many Federal, State, County, and private organizations cooperated with the DBED Research and Economic Analysis Division in the preparation of this book. They are credited in the source references that accompany the tables to which they contributed.

# GUIDE TO TABULAR PRESENTATION

The tables in this report generally follow the principles of tabular presentation used by the U.S. Bureau of the Census in its annual publication, Statistical Abstract of the United States, and described in Bureau of the Census Manual of Tabular Presentation, published by the Bureau in 1950. These principles have been accepted by the Department of Business and Economic Development for use in its publications and recommended to all other State agencies for official use.

Headnotes immediately below table titles provide information important for correct interpretation or evaluation of the table as a whole or for a major segment of it.

Unit indicators ("In thousands," "In millions of dollars," etc.) are usually given as the first element of the headnote. In tables where several units are used, the unit indicators are generally given in the stub or in the column headings.

Footnotes below the bottom rule of tables give information relating to specific items, figures or symbols within the table.

Parallel vertical rules are used to the right of a total column to indicate --

- (1) that the components which follow add to the total;
- (2) in the case of derived figures, that the underlying data are additive to their total.

A dash (-) represents zero in references to absolute values. In rates and percentages, a zero (0) is used.

In many tables, details will not add exactly to the totals shown because of rounding.

Geographic coverage should be understood as Statewide, unless otherwise indicated in the table title, headnote, boxhead, or stub. All annual statistics should be understood as referring to calendar years unless otherwise indicated.

## Section 1

# POPULATION

This section presents statistics on the growth, geographic distribution, and composition of the population of Hawaii, and on the number and characteristics of migrants moving to and from the State.

Provisional estimates for 1988 indicate a resident population of 1,098,000. This total is well above the 1980 census count of 964,691 and the earlier counts of 422,770 in 1940, 154,001 in 1900, and 84,165 in 1850. These censuses and estimates include members of the armed forces stationed in Hawaii and their local dependents, a group making up 11.5 percent of the resident total when last surveyed. The 1988 de facto population--which included 141,000 visitors present on an average day in that year but excluded 21,000 residents temporarily absent--was 1,219,000. Almost three-fourths of the 1988 de facto total was on Oahu, giving that island a density of 1,514 persons per square mile. The population of the State is mostly male (51 percent), relatively young--the median age in 1988 was 31.9 years--and racially diversified. The major unmixed groups, based on a 1986 sample survey, were Caucasians (23 percent of the non-barracks, non-institutional population) and Japanese (also 23 percent). In addition, 31 percent were of mixed race, primarily part Hawaiian. There were approximately 353,000 households in the State in 1988, with an average household size of 2.99. Migration has been a major factor in the growth of the population: between 1980 and 1988, there was a net in-migration (excluding military personnel and dependents) of 52,000, accounting for 40 percent of the total civilian population growth during that time. Immigrant arrivals in fiscal 1988 numbered 6,600, mostly from the Philippines.

The principal sources for these data are the decennial population censuses conducted by the U.S. Bureau of the Census, the estimates developed annually by the Hawaii State Department of Health and Department of Business and Economic Development in cooperation with the Bureau of the Census, the Hawaii Health Surveillance Program conducted regularly since 1969 by the Department of Health, the ongoing series on visitors present and residents absent maintained by the Hawaii Visitors Bureau, and the U.S. Immigration and Naturalization Service tabulations on immigration. Earlier figures on population and migration are given in Historical Statistics of Hawaii, Section 1 and 3. Comparable national statistics on population and migration appear in Section 1 of Statistical Abstract of the United States: 1989.

Table 1.-- POPULATION: 1831-32 TO 1989

[Missionary censuses for 1831-32 and 1835-36, Hawaiian government censuses for 1850-1896, U.S. government censuses for 1900-1980, and official estimates for 1876, 1944, and 1989. Data through 1896 are on a de facto or unspecified basis; data for 1900 and later years are on a resident basis, and include armed forces stationed or homeported in Hawaii]

1988: July 1 ...	1,098,200	20,800	1,218,800	141,400	1,110

1/ The resident population is defined as the number of persons whose usual place of residence is in an area, regardless of physical location on the estimate or census date. It includes military personnel stationed or homeported in the area but excludes persons of local origin attending school or in military service outside the area.

2/ Averages for 12-month periods centered on the estimate or census dates.

3/ The de facto population is defined as the number of persons physically present in an area, regardless of military status or usual place of residence; it includes visitors present but excludes residents temporarily absent.

4/ De facto population per 1,000 resident population.

2010 .....	1,674.2	1,094.7	579.5	243.0	120.3	216.2

1/ Includes Kalawao.

2/ The resident population is defined as the number of persons whose usual place of residence is in an area, regardless of physical location on the estimate or census date. It includes military personnel stationed or homeported in the area but excludes persons of local origin attending school or in military service outside the area.

3/ The de facto population is defined as the number of persons physically present in an area, regardless of military status or usual place of residence; it includes visitors present but excludes residents temporarily absent.

Spanish origin .....	71,399	54,619	8,261	1	3,226	5,292
Not of Spanish origin ..	893,292	707,946	83,792	143	35,856	65,555

n.e.c. Not elsewhere classified.

<sup>1/</sup> Persons of mixed race classified by self-identification or race of mother. Data are not comparable either to earlier censuses or to such surveys as the Hawaii Health Surveillance Program. The latter survey reported that 27.3 percent of the population in households in 1980 was of mixed race (17.9 percent Part Hawaiian and 9.4 percent non-Hawaiian).

<sup>2/</sup> For detailed composition, see Census of Population: 1980, Asian and Pacific Islander Population in the United States: 1980 (2 parts), PC80-2-1E (1988), table 2.

<sup>3/</sup> For a cross-tabulation of Spanish origin by race, see Data Book 1985, table 27.

Source: U.S. Bureau of the Census, Census of Population: 1980, General Social and Economic Characteristics, Hawaii, PC80-1-C13 (1983), tables 58 and 59.

Table 23.-- ANCESTRY: 1980

Ancestry group <u>1/</u>	Persons who reported --		
	At least one specific ancestry group	A single ancestry group	A multiple ancestry group
Total <u>2/</u> .....	901,210	632,972	268,238

## Section 2

# VITAL STATISTICS AND HEALTH

This section presents data on births, deaths, marriages, divorces, diseases, accidents, alcohol and drug use, height and weight, hospitals, and health personnel.

Vital indexes generally reflect the high health standards of Hawaii. Expectation of life at birth in 1984-86 was 75.37 years for males and 80.92 years for females. There were 5,970 resident deaths in 1988, or 5.4 per 1,000 resident population. Deaths under one year of age per 1,000 live births numbered 10.8 in 1988. Diseases of the heart have accounted for almost a third of all deaths in recent years; cancer, for one-fourth. Resident live births in 1988 numbered 18,937, or 17.2 per 1,000 resident population. The total fertility rate for civilians fell from 3,360 per 1,000 women in 1960 to 2,013 in 1988. Fully 98.6 percent of all babies were born in hospitals in 1988, and 20 percent were born to military couples. More than one out of five births was to an unmarried woman. There were 7,409 fetal deaths in 1988, including 5,998 elective abortions. Marriages numbered 17,281 in 1988, with about 44 percent accounted for by nonresidents. Divorces reached a 1988 total of 5,020. The State had 22 acute care hospitals (with 2,855 beds), 38 long-term care facilities (with 3,191 beds), and nine specialty care facilities (with 808 beds) in 1989. There were 2,425 physicians and surgeons, 882 dentists, 8,218 professional nurses, and 516 pharmacists licensed and living in Hawaii as of March 1989. Acute conditions per 100 persons numbered 210 in 1986, with respiratory conditions the most common complaint (at 148 cases per 100 persons). Among chronic conditions reported in the 1986 survey data, the most frequently mentioned were hypertension without heart involvement (7.7 per 100 persons), hayfever (5.7), and impairments of the back or spine (5.1). The most common communicable diseases reported to authorities in 1987 were scarlet fever, with 3,620 cases, and chickenpox, with 1,484, but the most fatal was AIDS (41 deaths). State mental health facilities served 8,389 patients in 1988, but the number of in-patients at the end of the year was only 260. Among persons 18 years old and over in 1984, 53 percent used alcohol, eight percent were heavy drinkers, 43 percent used drugs, and three percent were heavy drug users. The average adult male was 67.5 inches tall and weighed 159.5 lbs.; the average adult female was 62.6 inches and 127.9 lbs.

The major sources for data on vital statistics and health are the annual statistical reports of the Hawaii State Department of Health. Long-term trends are traced in Historical Statistics of Hawaii, Section 2. Sections 2 and 3 of the Statistical Abstract of the United States: 1989 contain similar data for the nation as a whole.

1988 ...	18,937	5,970	17.2	5.4	223.3	10.8	7.4

1/ Events occurring in Hawaii. Data include births to military couples and deaths of armed forces and their dependents, but exclude nonresident births and deaths, as well as resident births and deaths occurring out of State.

2/ Based on estimates in present report, table 2.

3/ Place of occurrence basis.

4/ 20 weeks gestation and over. Includes elective abortions.

5/ Under 1 year of age.

Source: Hawaii State Department of Health, Statistical Report (annual), and records.

Table 45.-- BIRTHS AND DEATHS, BY MILITARY STATUS: 1987 AND 1988

[Place of occurrence basis]

Subject	All groups	Armed forces	Civilians <u>1/</u>			Armed forces and dependents
			All civilians	Military dependents	Other civilians	
Live births:						
1987 .....	18,698	-	18,698	3,966	14,732	3,966
1988 .....	19,054	-	19,054	3,821	15,233	3,821
Deaths:						
1987 .....	6,490	64	6,426	83	6,343	147
1988 .....	6,315	60	6,255	90	6,165	150
Birth rates: <u>2/</u>						
1987 .....	15.6	0	16.4	61.2	13.7	32.3
1988 .....	15.6	0	16.4	54.7	13.9	30.2
Death rates: <u>2/</u>						
1987 .....	5.4	1.1	5.6	1.3	5.9	1.2
1988 .....	5.2	1.1	5.4	1.3	5.6	1.2

1/ Death rates for military dependents based on 1980 age and sex composition of military dependents and 1980 age-sex-specific death rates for all civilians. Deaths of civilians other than military dependents calculated as residual.

2/ Per 1,000 de facto population in each group, based on estimates in present report, tables 2 and 3.

Table 49.-- FERTILITY RATES, BY MILITARY STATUS: 1980 AND 1988

[Military dependents are included in the military category. For 1960 and 1970 data, see Data Book 1987, table 60]

Military status	Crude birth rate <u>1/</u>		General fertility rate <u>2/</u>		Total fertility rate <u>3/</u>	
	1980	1988	1980	1988	1980	1988
Total .....	18.8	17.4	78.7	73.5	2,084	2,158
Civilian .....	16.5	15.7	68.9	66.5	1,871	2,013
Military .....	35.0	30.2	147.5	126.9	3,496	2,930

1/ Annual number of live births per 1,000 resident population.

2/ Annual number of live births per 1,000 women 15-44 years of age.

3/ Average number of children to whom 1,000 women would give birth according to a set of fertility rates providing the women survive the childbearing years.

Source: 1980 calculated by Eleanor C. Nordyke, East-West Population Institute; 1988 estimated by Hawaii State Data Center.

Table 50.-- RESIDENT BIRTHS, MIXED AND UNMIXED, BY MILITARY STATUS OF FATHER: 1988

Military status of father	Total births	Unmixed	Mixed <u>1/</u>	Not certain <u>2/</u>
All groups .....	19,054	8,473	9,305	1,276
Military .....	3,821	2,972	819	30
Civilian or not reported .....	15,233	5,501	8,486	1,246

1/ Includes all Part Hawaiian births, including those in which both parents were Part Hawaiian.

2/ One or both parents of unspecified race (unless one was Part Hawaiian) or both parents classified as "other."

Source: Hawaii State Department of Health, records.

Table 51.-- MOST COMMON FIRST NAMES ON BIRTH CERTIFICATES, BY SEX: 1988

[A total of 6,352 first names, including variant spellings, was reported for the 19,054 babies born in Hawaii in 1988]

Rank	Boys' names		Girls' names	
	Name	Number	Name	Number
1 .....	Michael .....	198	Ashley .....	172
2 .....	Joshua .....	190	Jessica .....	157
3 .....	Christopher .....	184	Nicole .....	119
4 .....	Matthew .....	163	Jennifer .....	106
5 .....	Justin .....	156	Amanda .....	92
6 .....	Ryan .....	140	Sarah .....	89

Table 53.-- SELECTED LIFE TABLE VALUES, BY SEX: 1984-1986

[For earlier years and rankings relative to other States, see  
Data Book 1987, tables 69 and 70]

Age in years (period of life between two exact ages stated)	Of 100,000 born alive				Average remaining lifetime at beginning of year of age <u>1/</u>	
	Number living at be- ginning of year of age		Number dying during year of age		Male	Female
	Male	Female	Male	Female		
0-1 .....	100,000	100,000	1,020	833	75.37	80.92
5-6 .....	98,814	99,023	17	22	71.27	76.72
15-16.....	98,573	98,831	57	31	61.43	66.85
25-26 .....	97,650	98,453	117	36	51.96	57.09
35-36 .....	96,469	98,013	134	67	42.53	47.32
45-46 .....	94,660	96,998	281	162	33.24	37.76
55-56 .....	90,060	94,310	719	430	24.64	28.67
65-66 .....	80,321	88,116	1,387	923	16.95	20.29
75-76 .....	61,250	75,146	2,492	1,946	10.53	12.83
85-86 .....	31,274	49,110	( <u>2/</u> )	( <u>2/</u> )	5.56	6.73

1/ For males and females combined, the average remaining lifetime at birth was 77.98 years. For the entire United States in 1985, the corresponding figure was 74.7 years (71.2 years for males and 78.2 years for females).

2/ Not calculated for this and higher ages.

## Section 3

# EDUCATION

This section presents statistics on enrollment in public and private schools, colleges and universities; students graduated and degrees awarded; the highest grade of school completed; achievement test results; school facilities, personnel, and expenditures; and libraries.

Enrollment in elementary, intermediate and high schools in 1988-1989 totaled 203,000, slightly more than in the preceding year but well below the all-time high of 216,000 reached in 1971-1972. There were 235 public schools with 8,973 classroom teachers and 168,000 students (82.6 percent of the total). There were also 141 private schools with 2,512 teachers and over 35,000 pupils. Students graduating from public and private high schools in 1987-1988 numbered 13,448. Some 52,400 students attended colleges and universities in the State in 1988-1989, including 18,500 on the Manoa Campus of the University of Hawaii, 500 at West Oahu College, 3,600 at UH-Hilo, 20,200 at six community colleges, and 9,600 in four private colleges and universities. Ninety-two percent of the children 5 and 6 years old were in school in 1980 (compared with 87 percent in 1970), and 47 percent in the 18- and 19-year-old group were enrolled (compared with 53 percent a decade earlier). The expenditure per pupil in public schools rose from \$1,884 in 1977-1978 to \$3,950 in 1987-1988. In scholastic aptitude tests, Hawaii students scored somewhat above national norms in the math component but considerably below in the verbal component. Among adults, an estimated 19 percent were functionally illiterate in English as of 1988. More than one-fifth of all residents 25 years of age or more have completed four or more years of college. The Hawaii State Library System, with 49 locations on six islands, had 2.2 million books, 8,500 periodical subscriptions, and 74,000 phonodisks and phonotapes in 1988, with an annual circulation of 6.6 million. The University of Hawaii libraries in the same year counted 2.7 million volumes.

The principal sources of data on education are the U.S. Bureau of the Census, Hawaii State Department of Education, University of Hawaii, and private colleges and universities. Historical Statistics of Hawaii, Section 9, contains Island data back to 1820. Section 4 of the Statistical Abstract of the United States: 1989 presents comparable information for the nation as a whole.

## Section 4

# LAW ENFORCEMENT, COURTS AND PRISONS

Statistics in this section refer to crimes committed, victims of crime, arrests, the police, attorneys, the judiciary system, prisons, and youth correctional facilities.

Major offenses reported to the police in 1988 numbered 65,700, compared with 63,600 in 1987 and 71,300 in 1980. The rate per 1,000 resident population increased from 53 in 1985 to 60 in 1988. Seventy-six percent of the serious crimes in 1988 occurred on Oahu. For the State as a whole, major offenses known to police in 1988 included 45 murders or cases of non-negligent manslaughter, 353 rapes, 914 robberies, 1,502 aggravated assaults, 13,665 burglaries, 44,859 cases of larceny, and 3,927 auto thefts. The value of property reported stolen in 1988 amounted to \$38 million, exclusive of motor vehicles; only 5.2 percent was recovered. Authorities confiscated 1,923,000 marijuana plants, with an estimated value of \$1.9 billion, during the year. Confirmed instances of child abuse and neglect numbered 2,572 in 1988. Eighteen percent of the major offenses known to police were cleared by arrest or otherwise in 1988. Forty-four percent of the persons arrested for major crimes and 23 percent of those arrested for lesser offenses in 1988 were less than eighteen years of age. The number of inmates in the ten State correctional institutions averaged 2,194 during fiscal 1988; of this number, 1,414 were adults serving time for felonies. Cases concluded in the State Supreme Court, Intermediate Court of Appeals, four circuit courts, and four district courts and their divisions during fiscal 1988 numbered 820,000, including 708,000 traffic cases. Filings in the United States District Court for Hawaii in 1989 included 983 civil cases, 1,447 criminal cases, and 855 bankruptcy cases. The last legal execution in Hawaii took place in 1947. There were 3,949 attorneys licensed in Hawaii as of mid-1989. Criminal justice system expenditures amounted to \$241 million in fiscal 1986.

Statistics on law enforcement, courts, and corrections in Hawaii appear in the annual reports of the county police departments, the State Judiciary, the Department of Corrections, and the Administrative Office of the United States Courts. The Hawaii Criminal Justice Data Center issues quarterly and annual reports titled Crime in Hawaii. Figures on crime, the courts, and corrections in earlier years appear in Historical Statistics of Hawaii, Section 10. National data are summarized in the Statistical Abstract of the United States: 1989, Section 5.

Table 106.-- ACTUAL MAJOR (PART I) OFFENSES KNOWN TO THE  
POLICE, BY COUNTIES: 1978 TO 1988

[Part I offenses include murder, negligent and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft, and, since 1979, arson. Arson, however, is excluded from this table through 1984. Actual offenses include reported or known offenses, less unfounded cases]

Year	State total		City and County of Honolulu	Hawaii County	Kauai County	Maui County

## Section 5

# GEOGRAPHY AND ENVIRONMENT

This section relates to land and water areas, physical geography, climate, air and water quality, noise, and other geographic and environmental measurements of Hawaii. Most statistics on land use and ownership, however, appear in Section 6.

The State consists of eight major islands and 124 minor islands with a total land area of 6,425 square miles and a general coastline of 750 miles. Honolulu is 214 miles from Hilo, 1,367 miles from Kure Atoll (the westernmost end of the State), 2,397 miles from San Francisco, and 4,829 miles from Washington, D.C. The highest peak in the State is Mauna Kea, 13,796 feet above sea level; the longest stream is Kaukonahua Stream, Oahu, 33 miles in length; the most extensive lake or similar body is Kawainui Marsh, 1,000 acres; and the highest named waterfall is Kahiwa, Molokai, a 1,750-foot cascade. Various measures of air pollution, such as suspended particulate matter, indicate that Honolulu is one of the cleanest cities in the nation. There is also relatively little water pollution: the 43 major beaches surveyed in 1988 were found to have fecal coliform levels per 100 ml. ranging from 2.0 to 256.9, and all but two of them were within EPA standards. More than 1,200 species, subspecies, and varieties of native fauna and flora have been proposed or accepted for inclusion on lists of endangered, threatened, or extinct organisms.

Climatically, Hawaii is marked by remarkably balmy temperatures and wide variations in rainfall. The all-time temperature range at Honolulu International Airport, for example, was from 53° to 94°F. Average precipitation, however, ranges from less than nine inches at Kawaihae to 444 inches atop Waialeale. The largest volcanic eruption in Island history (begun in 1983) had produced more than 1.5 billion cubic yards of lava by September 1989. The worst earthquake (1868) attained 7.5 on the Richter scale, the highest tsunami wave (1946) reached 56 feet, and the most destructive hurricane (Iwa, 1982) gusted to 117 miles per hour. Water withdrawn for use in 1985 averaged 1.4 billion gallons per day, compared with 2.9 billion in 1980 and 2.8 billion in 1975. Among 31 neighborhoods on Oahu, median noise levels in 1981-1982 ranged from 37 decibels (in Mililani) to 57 decibels (in Pawaa).

Important sources of data include the U.S. Geological Survey, National Ocean Survey, National Weather Service, U.S. Bureau of the Census Geography Division, the Division of Water and Land Development of the State Department of Land and Natural Resources, the State Department of Health, and the University of Hawaii Institute of Geophysics. Detailed information is given in Atlas of Hawaii, 2nd edition, published by the University of Hawaii Press in 1983. National data are reported in Statistical Abstract of the United States: 1989, Section 6.

1/ Listed in geographic order, from east to west. The channels between major islands were measured between the following points:

- Alenuihaha: Upolu Pt., Hawaii, to Puhilele Pt., Maui;
- Alalakeiki: Lae o ka Ule, Kahoolawe, to Nukuele Pt., Maui;
- Kealaikahiki: Makaalae, Kahoolawe, to Kamaiki Pt., Lanai;
- Auau: Kikoa Pt., Lanai, to Lahaina, Maui;
- Kalohi: Wahie Pt., Lanai, to Kamalo, Molokai;
- Pailolo: Lipoa Pt., Maui, to Pohakuloa, Molokai;
- Kaiwi: Ilio Pt., Molokai, to Makapuu Pt., Oahu;
- Kauai: Kaena Pt., Oahu, to Kamilo Pt., Kauai;
- Kaulakahi: Mana Pt., Kauai, to Kaunuopou, Niihau.

2/ Width measured in statute miles between designated points on National Ocean Survey and Coast and Geodetic Survey charts. Width in kilometers calculated from miles (1 mile = 1.60934 km.).

3/ Depths given are the deepest soundings noted at or near the line joining the two designated points, on National Ocean Survey and Coast and Geodetic Survey charts. Depths measured in fathoms and converted to feet and meters (1 fathom = 6 feet = 1.8288 meters).

Source: Compiled by Lee S. Motteler, Geography and Map Division, Bernice P. Bishop Museum, in November 1980.

Table 131.-- GENERAL COASTLINE AND TIDAL SHORELINE OF COUNTIES AND ISLANDS

Kure Atoll .....	5	8	5	8

1/ Figures are lengths of general outline of seacoast. Data for the four islands of Maui County are not consistent with the reported county total.

2/ Shoreline of outer coast, offshore islands, bays, rivers, and creeks is included to the head of tidewater or to a point where tidal waters narrow to a width of 100 feet.

3/ Derived from data expressed in statute miles; independently rounded and accordingly may not add exactly to indicated totals and subtotals.  
1 mi. = 1.609 km.

4/ Data are not available for five minor islands: Molokini, Lehua, Gardner Pinnacles, Maro Reef, and Pearl and Hermes Atoll.

5/ Excludes the Midway Islands, which are part of the Hawaiian Archipelago but not legally part of the State of Hawaii. Midway has a general coastline of 20 miles and a tidal shoreline of 33 miles.

1/ Areas in square kilometers and acres were calculated directly from the figures shown for square miles; these equivalents were independently rounded, and hence may not add exactly to the indicated totals and subtotals. 1 square mile = 640 acres = 2.58999 square kilometers.

2/ Dry land and land temporarily or partially covered by water, as marshland, swamps, etc.; streams and canals under one-eighth statute mile wide; and lakes, reservoirs, and ponds under 40 acres of area.

Continued on next page.

Table 132.-- LAND AND WATER AREA OF COUNTIES AND ISLANDS: 1989 -- Con.

3/ Permanent inland water surface, such as lakes, reservoirs, and ponds having 40 acres or more of area; streams, sloughs, estuaries, and canals one-eighth statute mile or more in width; deeply indented embayments and sounds, and other coastal waters behind or sheltered by headlands or islands separated by less than 1 nautical mile of water, and islands having less than 40 acres of area.

4/ Because of rounding, island figures may not add to county figures.

5/ Reflects inclusion of Kaula in the County of Kauai rather than in the City and County of Honolulu. Kaula was transferred to the County of Kauai by Act 245, S.L.H. 1988, approved June 9, 1988.

6/ Molokini, offshore of Maui, not measured; other sources give the area of Molokini as 18.6 acres (0.03 square miles or 0.075 square kilometers).

7/ Includes Lehua, elsewhere reported as 243 acres (0.38 square miles or 0.98 square kilometers).

8/ Exclusive of the Midway Islands, which are part of the Hawaiian Archipelago but not legally part of the State of Hawaii.

Source: Unpublished data supplied by the Geography Division, U.S. Bureau of the Census, May 5, 1983; cited in the Hawaii State Department of Planning and Economic Development, Remeasurements of the Area of Hawaii, 1982 (Statistical Memorandum 83-6, May 18, 1983).

1/ Modified Mercalli Scale of 1931, 1956 abridged version further simplified. This scale, which extends from I to XII, reads in part:

IV. Hanging objects swing. Vibration like passing of heavy trucks or sensation of a jolt. Standing autos rock. Windows, dishes, doors rattle. Crockery clashes. In the upper part of range wooden construction creaks.

V. Felt outdoors; direction estimated. Sleepers wakened. Liquids disturbed, some spilled. Small unstable objects displaced or upset. Doors, shutters, pictures swing. Pendulum clocks stop.

VI. Felt by all. Many frightened, run outdoors. Persons walk unsteadily. Windows, dishes, glassware broken. Knickknacks, books thrown off shelves, pictures off walls. Furniture moved, overturned. Weak plaster and masonry cracked. Small bells ring. Trees, bushes noticeably shaken.

VII. Difficulty in standing. Noticed by drivers of autos. Hanging objects quiver. Furniture broken. Damage to weak masonry. Weak chimneys broken at roof line. Fall of plaster, loose bricks, etc. Some cracks in ordinary masonry. Waves on ponds. Small slides on sand and gravel banks. Large bells ring. Irrigation ditches damaged.

1/ Mean monthly frequency of trade winds in Hawaiian waters.

2/ Expected number of hazardous days in Hawaiian waters due to strong trade winds.

3/ Observations at Sunset Beach, Oahu. Annual averages were: flat or 1 foot, 71 days; 2-5 feet, 184 days; 6-10 feet, 71 days; 11-15 feet, 26 days; 16 feet or higher, 13 days.

4/ Observations at Kaneohe, Oahu. The mean ranged from 73.0 in January and February to 80.2 in August. Absolute maximums and minimums were respectively 84 (in July, August, and October) and 68 (December and February).

Ruddy Turnstone .....	268	317	272	373

1/ Separate data are shown for endemic birds averaging more than 25 individuals in 1975-1979, indigenous birds more than 200, introduced birds more than 500, and migratory species and stragglers more than 100. Endemic birds are those peculiar to a particular region, in this case Hawaii, and therefore found nowhere else in the world; indigenous birds are those native to a given region, in this case Hawaii, but with a total range of distribution encompassing a much wider area. The classification is that in Andrew J. Berger, Hawaiian Birdlife (1972).

## Section 6

# LAND USE AND OWNERSHIP

General statistics on the use, ownership, and tenure of land appear in this section. Information on specific use or ownership categories is given elsewhere: parks in Section 7, military land in Section 10, agriculture in Section 19, forests in Section 20, and cane land and industrial parks in Section 22.

Out of the 4,112,000 acres in the State in 1982, 333,000 were in cropland and 974,000 in pastureland. Other major categories included forestland, with 1,473,000 acres, urban and built-up, with 126,000, and miscellaneous nonfarm, with 852,000. On Oahu, land in residential use increased from 22,600 acres in 1969 to 29,100 in 1988; during the same 19-year span, agricultural land declined from 88,900 to 75,700 acres. For the State as a whole, the Land Use Commission has zoned 167,000 acres as urban, 1,967,000 as conservation, 1,969,000 as agricultural, and 10,000 as rural.

Recent data on land ownership indicate that the Federal government owns 8.4 percent of all land, the State and counties own 29.8 percent, and private owners (chiefly large estates) have 61.8 percent. Total Federal holdings reported by the General Services Administration in 1987 came to 674,000 acres, exclusive of leased land (9,400 acres); most of the Federal land was in wildlife, park and military use. The State Department of Hawaiian Home Lands holds about 187,000 acres, divided among 5,800 lessees. Total land parcels in the State as of 1989 numbered 418,000.

Considerable caution is necessary in comparing statistics from different sources on land use, ownership, or tenure. Variations in definitions and survey dates seriously affect comparability in many instances, even where terminology is relatively unambiguous and misinterpretation seems unlikely. An example of such difficulties is the wide range in estimates of Federal land, with totals ranging from 338,000 acres to 674,000.

Tabulations by the U.S. Department of Agriculture and General Services Administration, Hawaii State Department of Hawaiian Home Lands, Department of Land and Natural Resources, Department of Business and Economic Development, and Land Use Commission, Honolulu Department of Finance, and Honolulu Department of General Planning provided the data for this section. Historical Statistics of Hawaii, Section 12, contains limited information for earlier years. Statistics for the nation as a whole are available in Sections 6, 7, 10, 23, and 24 of the Statistical Abstract of the United States: 1989.

1/ Because of the omission of public thoroughfares and for other reasons, totals by island may differ considerably from official area estimates in other tables in this volume.

2/ State land ceded by presidential proclamation or governor's executive order to the federal government appears in most cases to have been classified for this table as federal land, even though title to it technically remains with the state. Land ceded by the state to the counties, in contrast, has probably been classified as state land. For both types of ceded land, treatment may have varied from parcel to parcel.

3/ Data exclude the Northwestern Hawaiian Islands (1,722 acres).

## Section 7

# RECREATION AND TRAVEL

Statistics on tourism, recreation, sports, museums, parks, pets, and the performing arts appear in this section. Additional information on recreational and resort land use is given in Section 6; on transportation, in Section 18; and on hotels and hotel workers, in Sections 12, 13, 15 and 23.

Approximately 6.1 million visitors stayed overnight or longer in Hawaii during 1988, compared with 3,670,000 in 1978 and only 1,315,000 in 1968. The average number present at any given time during 1988 was 141,000. Total visitor expenditures (exclusive of trans-Pacific fares) in 1988 were estimated by the Hawaii Visitors Bureau at \$9.2 billion, compared with \$2.1 billion a decade earlier. The 1988 visitor total included 4.0 million from other States, 248,000 from Canada, and 1,217,000 from Japan. Expenditures per visitor day in 1988 averaged \$119 for westbound visitors and \$586 for the Japanese. Visitor-related spending in 1987 resulted in tax revenues of \$831 million and generated 213,000 jobs.

Both visitors and residents have access to a wide range of recreational and cultural facilities. The State has seven national parks and similar areas, 76 State parks, 569 county parks, 56 golf courses, 278 public tennis courts, 2,000 small-boat moorages, 1,600 recognized surfing sites, and 24.4 miles of safe, sandy, accessible beach. Recreational, scenic and cultural facilities reporting more than two million annual visits each in 1988 included Waikiki Beach, the National Memorial Cemetery of the Pacific, Hanauma Bay, Wailua River State Park, and Ala Moana Park. Total visits to 74 museums, State monuments, zoos, and similar attractions in 1988 numbered 21.9 million. About 521,000 Hawaii residents traveled to the Mainland in 1988. Twelve theatrical groups on Oahu reported 1,610 performances of 385 productions for the 1987-1988 season, with a combined audience of 1.25 million. During the 1988-1989 season, the Honolulu Symphony Orchestra gave 134 concerts, with a total attendance of 216,000. During the 1988-1989 school year, attendance at UH-Manoa varsity baseball, basketball, football and volleyball home games was 641,000.

Information on recreation and tourism is issued periodically by the Hawaii Visitors Bureau (particularly in its Annual Research Report), the State Parks Division of the Department of Land and Natural Resources, the Hawaii State Department of Business and Economic Development, U.S. National Park Service, County park and recreation departments, and other organizations. Long-term trends are summarized in Historical Statistics of Hawaii, Section 11. National statistics are given in Section 7 of Statistical Abstract of the United States: 1989.

Table 188.-- WESTBOUND VISITOR ARRIVALS, BY COUNTIES VISITED:  
1983 TO 1988

[Covers westbound visitors staying overnight or longer anywhere in the State, and any overnight or non-overnight interisland trips reported by these visitors. Based on a 20-percent sample for 1983 and a 10-percent sample thereafter]

Year	State total <sup>1/</sup>	City and Co. of Honolulu	Hawaii County	Kauai County	Maui County
1983 ...	3,396,115	2,591,635	712,380	691,940	1,644,605
1984 ...	3,721,380	2,901,320	760,940	814,590	1,854,690
1985 ...	3,708,610	2,828,640	697,380	832,580	1,831,110
1986 ...	4,256,390	3,146,030	786,930	1,014,650	2,001,870
1987 ...	4,204,010	3,078,500	782,550	1,032,840	1,908,780
1988 ...	4,264,730	3,013,850	782,360	1,043,710	1,884,050

<sup>1/</sup> Because many visitors visited more than one county, county data sum to totals greater than the State totals shown here.  
Source follows next table.

Table 189.-- AVERAGE VISITOR CENSUS, BY COUNTIES: 1983 TO 1988

[Unlike the preceding table, this table includes eastbound and north-bound visitors (all of whom have been included with the City and County of Honolulu) as well as westbound visitors. Based on a 20-percent sample for 1983 and a 10-percent sample thereafter]

Year	State total	City and Co. of Honolulu	Hawaii County	Kauai County	Maui County
1983 ...	108,045	66,695	8,690	7,990	24,670
1984 ...	118,660	67,370	7,570	10,930	32,790
1985 ...	116,700	65,280	8,040	11,470	31,910
1986 ...	132,910	73,870	9,870	14,840	34,330
1987 ...	134,270	74,660	10,210	15,510	33,890
1988 ...	141,410	80,450	10,690	16,400	33,870

Table 190.-- SUMMARY CHARACTERISTICS OF WESTBOUND VISITORS TO HAWAII:  
1978 TO 1988 -- Con.

1/ Base includes estimated number of visitors arriving directly from Canada and usually omitted from the Hawaii Visitors Bureau Basic Data Survey.

2/ Party heads only. Calculated as the number of professional, technical, business, managerial and official workers as a percent of all party heads responding to this question.

3/ Party heads only.

4/ Excludes condominiums operating as hotels.

5/ Computed from total visitor days and total visitor arrivals for westbound visitors destined for Hawaii. These data may differ somewhat from corresponding data in the source, because of different computation procedures.

6/ Base includes passengers who did not answer this question.

Table 197.-- CHARACTERISTICS OF JAPANESE VISITORS TO HAWAII:  
1987 AND 1988

[Based on surveys of Japanese overnight and longer visitors interviewed at Honolulu International Airport while awaiting departure, during four widely spaced periods during each year. Because of methodological problems, the findings appear to be only approximately correct, and direct comparability of the 1987 and 1988 data is questionable]

Characteristic	1987	1988
Sample size .....	1,776	1,623
Average age (years) .....	34.0	30.6
Female (percent) .....	55.7	39.8
Honeymooners (percent) .....	30.6	50.3
Attended college (percent) .....	54.2	51.6
Median household income (million yen) .....	5.3	4.8
Average party size .....	2.5	2.5
Repeat visitors (percent) .....	32.1	22.6
Organized tour group/package (percent) .....	70.3	90.0
Islands visited, including day trips (percent):		
Oahu .....	94.8	97.8
Molokai .....	1.4	0.8
Maui .....	26.7	21.7
Big Island .....	11.2	6.7
Kauai .....	18.4	11.8
Length of stay (days):		
Median .....	4.7	4.9
Average .....	5.8	6.0
Expenditures, excluding transpacific fare (dollars):		
Per person per day .....	367	586
Per party during entire trip .....	3,943	6,074

NA Not available.

1/ Years ended June 30.

2/ Includes both the Makiki Heights facility opened in October 1988 (5,000 between October 22 and December 31, 1988) and the Honolulu Advertiser Gallery (27,100 for entire year).

3/ Closed for renovation during first 11 months of 1988.

4/ Includes Academy Theatre (85,697 in 1986, 82,135 in 1987, and 56,151 in 1988).

5/ Total admissions for calendar years. Before 1986, data referred to years ended September 30, and were limited to paid admissions.

6/ Includes regular admissions (1,382 in 1986, 1,024 in 1987, NA in 1988) and school program (6,861 in 1985-86, 10,092 in 1986-87, and 10,318 in 1987-88).

7/ Closed at end of May 1987.

8/ Opened April 11, 1988.

9/ Closed March 2-April 6, 1987 and April 23-June 19, 1987.

10/ Includes both adult (210,433 in 1988) and child (90,799) attendance. Closed several months during 1988 for renovation.

11/ Opened January 13, 1987.

12/ Officially opened December 1, 1988.

13/ Opened July 15, 1987.

14/ Closed September 1, 1988 to April 1, 1989 for repairs.

15/ Opened in April 1988.

16/ Opened April 1987.

17/ Opened in mid-1986.

18/ To open officially in 1989.

19/ Years ended December 31, 1986 and 1988 and September 30, 1987.

20/ Years ended June 30. Attendance estimates reflect heavy use of restrooms by tour bus passengers.

21/ Closed part of 1987 for maintenance.

22/ Opened to general public December 5, 1988.

## Section 8

# ELECTIONS

This section presents data on election districts, registered voters, votes cast, campaign expenditures, elected officials, and legislative activity.

About 444,000 persons were registered to vote in the general election of November 8, 1988, and more than 368,000 actually voted. The number voting amounted to 43 percent of the 824,000 Hawaii residents of voting age at that time. The latter figure included around 148,000 aliens, inmates of mental and penal institutions, and members of the armed forces and their dependents, groups that are either ineligible or unlikely to vote in Island elections. Among registered voters, females outnumbered males and Democrats were far more numerous than Republicans. Campaign expenditures for the 1988 primary and general elections (other than for federal offices) exceeded \$10.8 million.

Hawaii has 2 Congressional, 25 Senatorial, 51 Representative, and 9 Councilmanic districts. It also contains 15 Soil Conservation districts, 30 active Neighborhood Board districts, and 289 election precincts.

Elected officials in Hawaii include the President and Vice President, two U.S. Senators, two U.S. Representatives, the Governor and Lieutenant Governor, 25 State Senators, 51 State Representatives, and various county officials. Persons of Hawaiian blood also vote for the Board of Trustees of the Office of Hawaiian Affairs. The minimum voting age is 18 years.

The 1989 State Legislature, with 76 members, included 58 males, 24 persons under 40 years of age, 28 persons of Japanese ancestry, 20 persons born in places other than Hawaii, and 66 Democrats.

In its 1989 session, the State Legislature considered 3,970 bills; 432 were passed and 397 became law. The Legislature also considered 1,355 resolutions, of which 547 were adopted.

The official results of primary, general, and special elections are published by the Office of the Lieutenant Governor. Additional information is often available from the various county clerks. Earlier figures for Hawaii appear in Historical Statistics of Hawaii, Section 24. National statistics appear in the Statistical Abstract of the United States: 1989, Section 8.

Table 247.-- ELECTION DISTRICTS AND POPULARLY ELECTED OFFICIALS:  
NOVEMBER 1986 AND 1988

## Section 9

# GOVERNMENT FINANCES AND EMPLOYMENT

This section presents statistics relating to the revenues, expenditures, debt, and civilian employment of Federal, State and county governments in Hawaii.

Local government is vested in one combined city-county (Honolulu, consisting of the Island of Oahu and several outlying islets), three non-metropolitan counties (Hawaii, Kauai, and Maui), and one area (Kalawao County) administered by the State Department of Health. Separate municipal governments do not exist.

Tax collections by Federal, State and county governments in fiscal 1988 reached \$5.8 billion, more than twice the level reported eight years earlier. The 1988 total included \$3.3 billion in U.S. taxes, \$2.0 billion in State taxes, and \$422 million in county taxes, licenses and fees. Individual income taxes accounted for 87 percent of Federal collections and 31 percent of State collections in Hawaii in 1988. State revenue receipts totaled \$3.1 billion, chiefly from the general excise and use tax (\$920 million), individual income tax (\$626 million) and Federal grants-in-aid (\$438 million). The largest expenditure item in the State accounts for 1988 was education, with \$886 million (out of \$3.0 billion) going to the University of Hawaii and public schools and libraries. The counties, in contrast, depended largely on the real property tax and grants-in-aid for their revenues, and reported police and fire protection as their largest single expenditure item. Assessed valuation of the State quadrupled between 1979 and 1989, reaching \$77 billion by the end of the period; of this total, \$19 billion was exempt from taxation. Public bonded debt outstanding at the end of 1988 stood at \$3.4 billion.

Total government employment in 1988 averaged 99,100, about 11 percent over the 1980 average. The 1988 total included 33,000 Federal workers, 52,000 persons employed by the State, and 14,000 persons on county payrolls. State civil service employees as of mid-1988 numbered 19,000.

Important sources for statistics on government in Hawaii include the U.S. Census of Governments and various annual publications of the Bureau of the Census, reports of the U.S. Treasury Department, Hawaii State Departments of Accounting and General Services, Budget and Finance, and Taxation, and the County auditors and finance directors, and an annual compilation issued by the Tax Foundation of Hawaii, Government in Hawaii: A Handbook of Financial Statistics. Data extending back to the middle of the 19th century are summarized in Historical Statistics of Hawaii, Section 25. Comparable Mainland statistics appear in the Statistical Abstract of the United States: 1989, Sections 9 and 10.

## Section 10

# NATIONAL DEFENSE

This section presents statistics relating to the armed forces and their dependents, national guard strength, civilian employment in national defense, veterans, land controlled by the Department of Defense, military housing, and expenditures by the armed forces. Further information appears in sections 1, 2, 6, 12, 13, 14, and 23.

There were approximately 56,000 officers and enlisted men (including 3,100 aboard ships homeported in Hawaii) and 60,000 military dependents in the Islands as of July 1, 1989. This number has been relatively stable in recent years, but at the height of World War II more than 400,000 uniformed personnel were present. The Navy alone accounts for 36 percent of the current total. More than 10,000 Hawaii residents were in the armed forces worldwide in 1988. The importance of national defense in Hawaii can be further measured by total expenditures (\$1.89 billion), military prime contract awards (\$541 million), civilian employment (20,000), veterans in civil life (100,000), military personnel receiving retired pay (10,900, receiving \$13.5 million monthly), military-connected pupils in public schools (20,100), military housing (19,400 units), and land owned or controlled by the armed forces (over 265,000 acres). Defense expenditures are second only to tourism as a source of income to Hawaii.

The Department of Business and Economic Development has issued periodic reports on Military Personnel and Dependents in Hawaii since 1959. Other published sources include reports of the U.S. Department of Defense, U.S. Bureau of the Census, Administrator of Veterans Affairs, and the Hawaii State Department of Labor and Industrial Relations, Department of Defense, and Department of Education. Definitions used by these sources frequently differ to some degree, and care is accordingly necessary in comparing data issued by two or more agencies. In mid-1988, for example, the number of armed forces in Hawaii was reported as 45,843 by DOD, 56,815 by the Bureau of the Census, and 64,053 by the local commanding officers reporting to DBED. Historical Statistics of Hawaii, Section 26, includes series on the armed forces dating back to 1795. Section 11 of the Statistical Abstract of the United States: 1989 presents data on national defense and veterans affairs for other states and the entire nation.

## Section 11

# SOCIAL INSURANCE AND HUMAN SERVICES

This section presents data related to governmental expenditures on social welfare; programs for old-age, survivors, disability and health insurance; public employee retirement; unemployment insurance; aid to the needy; and child and other welfare services. Also included here are selected statistics on United Way campaigns, foundations, and the quality of life. Related data are cited in Sections 9 and 13.

Total social welfare costs reached \$342 million in fiscal 1988, compared with \$230 million a decade earlier. About 56 percent of the 1988 total came from State funds and the remainder from the Federal government. The monthly average number of persons served by major welfare programs in 1988 was 48,000, or 4.4 percent of the resident population of the State. Fifty-five percent of all public assistance payments and 38 percent of all recipient cases were accounted for by aid to families with dependent children. The average monthly payment per case for public assistance was \$414, or 29 percent more than in 1978. Participation in the food stamp program included 31,000 households and 81,000 persons. Among workers receiving unemployment compensation in 1988, weekly benefits averaged \$162. About 142,000 Hawaii residents were receiving Social Security benefits in 1988, and about 117,000 were enrolled for Medicare. There were also 19,000 State and county government pensioners in 1988, with annual benefits of \$189 million. Child adoptions in 1988 numbered 611. Seventy-six foundations reported assets of \$239 million when most recently surveyed. The United Way reported revenues of \$14.3 million and agency allocations of \$11.3 million in 1988. A recent comparative study of the "quality of life" in 300 American metropolitan areas ranked Honolulu fourteenth.

Major data sources include reports and records of the U.S. Department of Health and Human Services, the Hawaii State Department of Human Services (formerly Social Services and Housing), the Hawaii State Department of Labor and Industrial Relations, the Hawaii State Employees' Retirement System, and the Aloha United Way. Historical Statistics of Hawaii, Section 8, contains data for earlier years. Section 12 of the Statistical Abstract of the United States: 1989 presents comparable Mainland data.

## Section 12

# LABOR FORCE, EMPLOYMENT, AND EARNINGS

This section presents statistics on the size and composition of the labor force, employment by occupation, industry, class of worker, and place of work, payrolls, wage rates, hours, industrial safety, work disability, unionization, and strikes. Related series appear in Sections 3, 9, 10, and 19 through 23.

The civilian labor force averaged 516,000 in 1988; of this total, 500,000 persons were employed and 16,000 were unemployed and seeking work. The civilian jobcount rose from 417,000 in 1978 to 523,000 a decade later. (The jobcount differs from employment because the latter counts multiple jobholders--"moonlighters"--only once. Eight percent of all persons currently employed in the summer of 1988 held two or more jobs.) Areas with large concentrations of workers in 1980 included downtown Honolulu (46,000), Waikiki (30,000), and Pearl Harbor-Hickam (15,000). The unemployment rate averaged 3.2 percent in 1988, with individual island levels ranging from 2.8 to 8.9 percent. By occupation, one out of four civilian workers is classified as professional or managerial. Activities with especially large numbers of employees include services (132,000 in 1988), retail trade (107,000), and government (99,000). The average annual earnings of wage and salary workers under the Hawaii Employment Security Law reached \$20,454 in 1988, or 3.3 percent less than the 1978 average after adjustment for inflation. Average weekly hours in 1988 were 39.0 for all civilian workers and 44.6 for those on full-time schedules, and ranged from 30.6 (for retail trade) to 44.5 (for communication and utilities). Labor union membership was estimated at 154,000 in 1987-1988. Work stoppages in 1988 involved about 400 workers.

Principal sources for the data on labor force, employment, place of work, hours, earnings, unions and strikes are the decennial reports of the U.S. Bureau of the Census, the same agency's Current Population Survey, reports by the U.S. Bureau of Labor Statistics, monthly and annual tabulations by the Hawaii State Department of Labor and Industrial Relations, and annual surveys of pay rates by the Hawaii Employers Council. Historical Statistics of Hawaii, Section 4, includes figures for earlier years. Statistics for the nation as a whole are published in Section 13 of the Statistical Abstract of the United States: 1989.

Table 341.-- JOBCOUNT, BY COUNTIES: ANNUAL AVERAGES, 1970 TO 1988

[Persons holding more than one job are counted in each position. As a result, these data differ from corresponding estimates of employment, reported elsewhere in this section. Active-duty armed forces are excluded, unless also employed in civilian jobs. Also excludes persons not working because of labor disputes. Because of a change in the method of estimating nonagricultural self-employed and unpaid family workers, jobcount estimates for 1987 and 1988 are not exactly comparable to those for earlier years]

Year	State total	City and County of Honolulu	Hawaii County	Kauai County	Maui County
1970 .....	331,580	270,310	28,410	12,540	20,320

## Section 13

# INCOME, EXPENDITURES, AND WEALTH

This section presents statistics on two different aspects of income and expenditures, one relating to the state income and product system and the other to the distribution of income to families, households and individuals. Specifically, information is given on gross state product, income by industry, personal, family and household income, poverty, personal wealth, and family expenditures. Data on wage rates, salaries, and earnings appear in Sections 3, 9, 12, and 22; on industrial payrolls, in Sections 12, 15, and 20 through 23; on the family income of visitors, in Section 7; on retirement payments and public assistance, in Sections 10 and 11; on taxable income, in Section 9.

Gross state product in 1988 was about \$21 billion. The major sources of outside income to Hawaii in 1988 were defense expenditures (\$1.9 billion), pineapple production (\$247 million), sugar production (\$324 million), and visitor expenditures (\$9.2 billion). Personal income in 1988 was \$18.4 billion, compared with \$8.0 billion only ten years earlier, and per capita personal income was \$16,800, almost twice the 1978 level. The per capita figure for Hawaii was slightly above the national average, but not high enough to compensate for the Islands' much higher cost of living. The median annual income of families, based on data for 1987, was \$39,000; for unrelated individuals, the median was \$14,900. The official poverty threshold for a 4-person family in Hawaii was set in February 1989 at \$13,920. In 1987, 7.3 percent of Island families and 18.1 percent of unrelated individuals were below the poverty level. The most recent family expenditure survey, taken in 1984 and 1985, reported that the largest items in the family budget on Oahu were housing (accounting for 27.9 percent of total spending), transportation (18.9 percent), and food (17.5 percent). Top wealthholders in 1982 included 20,300 persons with assets of \$325,000 or more.

The chief sources of data shown in this section are the U.S. Bureau of Economic Analysis, U.S. Bureau of the Census, U.S. Bureau of Labor Statistics, U.S. Department of Health and Human Services, Internal Revenue Service, Hawaii Agricultural Statistics Service, Hawaii State Department of Business and Economic Development, and Hawaii Visitors Bureau. Sections 6 and 7 of Historical Statistics of Hawaii present data for earlier years. Comparable data for the country as a whole are given in Statistical Abstract of the United States: 1989, Section 14.

Table 374.-- DIRECT INCOME FROM MAJOR EXPORT INDUSTRIES: 1970 TO 1988

[In millions of dollars]

Year	Total for four major industries	Value of production		Defense expenditures <u>2/</u>	Visitor expenditures <u>3/</u>
		Raw sugar and molasses <u>1/</u>	Fresh and processed pineapple		
1970 ...	1,561	187.8	138.6	639.4	595
1971 ...	1,758	202.9	141.4	708.8	705

## Section 14

# PRICES

This section presents indexes of consumer prices for Honolulu, the implicit price deflator for gross state product, actual prices for selected foods, and comparisons of Honolulu living costs with those in other urban areas. Other statistics on prices are reported in Sections 7, 16, 17, 18, 21, and 23.

During the first six months of 1989, the Honolulu all-items consumer price index for all urban consumers (CPI-U) averaged 126.4, with the 1982-1984 level equal to 100. The index had increased 5.2 percent over the first half of 1988, 23.3 percent since 1984, and 70.1 percent since 1979. Prices have risen most rapidly since the 1982-84 base period for shelter (37.4 percent) and medical care (36.0 percent) and have dropped most rapidly for electricity (27.5 percent). The implicit price deflator for expenditures on gross state product (a measure of price changes used in the state product accounts) rose 61.5 percent between 1978 and 1988.

An "intermediate" budget for a four-person family living on Oahu was unofficially estimated at \$44,614 as of 1988. This family budget was 28.7 percent higher than the corresponding urban United States average. Differences were particularly marked for renter shelter costs (43.0 percent higher) and personal income taxes (66.4 percent higher).

The Honolulu consumer price index has been compiled by the U.S. Bureau of Labor Statistics since December 1963. This index measures the average change in prices of goods and services purchased by urban households. Prices are expressed as a percent of the average levels reported in 1982-1984, the base date. Current data for Honolulu and other cities are published in CPI Detailed Report, issued monthly by BLS.

Important technical changes have been made in the consumer price index in recent years. In 1978, the Bureau of Labor Statistics added a new index, the CPI-U, covering all urban consumers, to the older index, the CPI-W, which was limited to urban wage earners and clerical workers and their families. In 1983, the basis for measuring homeowners' costs was substantially modified. In 1987, component weights based on a 1982-1984 survey replaced the older weights derived from 1972-1973 data. At the same time, the publication of the Honolulu indexes was moved from a bimonthly to a semi-annual basis. Beginning in 1988, the base period was shifted from 1967 to 1982-1984. Both the CPI-U and CPI-W have been linked to older indexes going back to 1940.

Official comparisons of Honolulu and Mainland living costs are no longer being made. The annual four-person family budgets estimated by the Bureau of Labor Statistics for Honolulu and the Mainland were discontinued after 1981, and are now maintained unofficially by the Bank of Hawaii. The annual comparison of prices in Hawaii and Washington,

D.C., compiled by the U.S. Office of Personnel Management to provide a basis for cost of living adjustments for Federal employees, has not been published since 1983. Annual surveys of food prices in Honolulu and other cities were regularly made by the Honolulu Advertiser in conjunction with the Tampa Tribune from 1979 to 1987.

No composite wholesale or producer price index is available for Hawaii. Average wholesale prices of agricultural products are reported in Statistics of Hawaiian Agriculture, issued by the Hawaii Agricultural Statistics Service, and in various other publications of the State Department of Agriculture. Wholesale price statistics of other commodities are seldom available.

Data on prices and living costs for the nation as a whole and other areas are summarized in Statistical Abstract of the United States: 1989, Section 15. Long-term trends for Hawaii are traced in Historical Statistics of Hawaii, Section 5.

## Section 15

# BANKING, INSURANCE, AND BUSINESS ENTERPRISE

Statistics in this section relate to banks and other financial institutions, stocks and bonds, insurance, fires, and business firms.

There were 10 banks with 182 locations, seven savings and loan associations with 158 locations, four trust companies with seven branches, and 54 industrial loan or small loan licensees with 185 branch offices in Hawaii as of December 31, 1988. Deposits in insured commercial banks reached \$10.2 billion at the end of 1987, compared with \$4.5 billion in 1980. Assets of savings and loan associations stood at \$5.5 billion in December 1987, almost double their 1980 level of \$2.9 billion. There were 136 credit unions with combined assets of \$2.3 billion at the end of 1988.

Approximately 256,000 Hawaii residents held shares in U.S. public corporations or investment companies in 1985.

Life insurance in force in Hawaii at the end of 1987 amounted to \$37 billion, more than twice the figure reported ten years earlier. For all 782 insurance companies doing business in the Islands, Hawaii premiums amounted to \$1.5 billion in 1987 and losses, claims, and benefits paid came to \$694 million. Fire losses in fiscal 1989 amounted to \$20 million. Persons covered by the four major prepaid health insurance plans as of December 31, 1988 numbered 744,000, with annual membership dues of \$611 million.

By mid-1989, almost 51,000 corporations and partnerships were registered to do business in Hawaii: 34,600 local ("domestic") corporations, 5,900 out-of-State ("foreign") corporations, and 10,400 partnerships. Business establishments with one or more employees in 1986 numbered 26,200; over half had fewer than five employees. During fiscal 1989, 4,600 new local corporations were formed. Business receipts of corporations in 1985 exceeded \$22 billion; business receipts of partnerships and proprietorships in the same year amounted to respectively \$1.9 billion and \$1.6 billion. Hawaii's largest corporation, Castle & Cooke, reported annual sales of \$2.5 billion. Business failures numbered 179 in 1988.

Sources for statistics on these subjects include the Hawaii State Department of Commerce and Consumer Affairs (specifically its Financial Institutions, Insurance, and Business Registration Divisions), the State Department of Taxation, county fire departments, the New York Stock Exchange, Dun and Bradstreet, Inc., local health insurance plans, the Hawaii Credit Union League, and the annual report on County Business Patterns issued by the U.S. Bureau of the Census. Historical Statistics of Hawaii, Sections 22 and 23, provides information for earlier periods. Comparable Mainland data appear in Sections 16 and 17 of Statistical Abstract of the United States: 1989.

D Withheld to avoid disclosing data for individual companies.

1/ Persons of mixed race were instructed to report the race with which they most closely identified. Whites (Caucasians), although only 34.4 percent of the 1980 population of Hawaii, were treated as the "majority" group for census purposes.

2/ Not corrected for double-counting. In this survey, it was possible for a minority-owned firm to be classified in more than one minority group.

3/ For the United States as a whole, Hawaiians owned 3,305 firms (291 with paid employees) with sales and receipts of \$85,579,000 (\$48,714,000 for those with paid employees).

## **COMMUNICATIONS**

This section presents statistics on the usage, finances, and operations of the Postal Service and of various communications media: telephone, radio, television, newspapers, periodicals, and books. Sections 12 and 15 contain employment and payroll data for communications establishments.

Hawaii is served by all major communications media. In 1989 it had 148 post offices and stations handling 434 million pieces of mail and accounting for postal receipts of \$129 million. There were 530,000 telephone access lines in service, 375,000 telephone homes, about 2.5 billion local calls originated, and uncounted millions of interisland and transpacific calls in 1988. The 49 commercial, public and educational radio stations in the Islands in 1989 included 28 on the regular broadcast band and 21 FM stations. The State also had 19 television stations (17 commercial and 2 public), including satellites but excluding translators. Eight cable TV companies served 307,000 subscribers. An estimated 97 percent of all households in the State had television sets, and the average prime-time TV audience in May 1989 numbered 178,000 households. Island publishers printed nine daily newspapers, numerous magazines and other periodicals, and a wide diversity of books. Newspaper circulation reported by the two English-language dailies on Oahu averaged 194,000 in 1988-1989. Statistics on fax machines and cellular telephones are unavailable.

The major sources for statistics on communications are the reports and records of the U.S. Postal Service, Federal Communications Commission, the CATV Division of the Hawaii State Department of Commerce and Consumer Affairs, Hawaiian Telephone Company, Audit Bureau of Circulations, A. C. Nielsen Co., and Hawaii Media Guide. Earlier figures appear in Historical Statistics of Hawaii, Section 18. Data on communications for other states and for the nation as a whole are carried in Statistical Abstract of the United States: 1989, Section 18.

Source: Hawaiian Telephone Company, data provided May 15, 1989.

Table 449.-- LOCAL TELEPHONE CALLS: 1978 TO 1988

[In thousands. The number of local calls is affected as central offices are being converted to Electronic Common Control (ECC). ECC records call attempts after the first digit is dialed. Non-ECC offices record the call attempts when the handset is lifted. Also significant in 1981 were an estimated 17 million fewer calls due to the implementation of Directory Assistance Charging. Because of these fundamental changes in data collection, more recent figures are not comparable to earlier years.]

## Section 17

# ENERGY AND SCIENCE

This section presents statistics on energy production and consumption, the electric and gas utility industries, research and development, and scientific resources. Related series are cited in Sections 12 (on utility employment), 14 (prices), and 18 (gasoline consumption).

Total energy consumption in 1987 amounted to 235 trillion British thermal units, compared with 233 trillion Btu a decade earlier. Transportation, including aviation fuels, accounted for 54 percent of the 1987 total. Total expenditures for fuels and electricity in 1986 were \$1.56 billion.

Electricity sales amounted to 7.7 billion kilowatt-hours in 1988, a total that has increased 29 percent since 1978. Manufactured gas sales reached 33 million therms in 1988, six percent below the figure ten years earlier. Residential rates in 1988 averaged 8.8 cents per kilowatt-hour and \$1.55 per therm, both significantly less than the corresponding rates a few years earlier. Average residential use (7,011 kWh and 189 therms in 1988) has declined since the early 1970s. By 1986, almost 11 percent of the housing units in the State had solar heating devices.

The liquid fuel tax base for 1988 was approximately 1.2 billion gallons, compared with 917 million in 1978. The 1988 total included 358 million gallons of gasoline, 702 million of aviation fuel, and 152 million of diesel oil. The average price for automotive gasoline was \$1.29 per gallon during 1988.

The State is well served with scientific resources. Especially noteworthy is the cluster of large telescopes used for astronomical observations at the summits of Mauna Kea and Haleakala--twelve major facilities, including those under construction. Federal research and development obligations in Hawaii totaled \$64 million in 1987. Fifty-two patents were granted to Hawaii residents in 1987.

Information on energy and science can be obtained from reports and records of the U.S. Department of Energy, U.S. Patent and Trademark Office, U.S. Bureau of Labor Statistics, National Science Foundation, Hawaii State Department of Taxation, Hawaii State Department of Commerce and Consumer Affairs and its Division of Consumer Advocacy, the DBED Energy Division, UH Institute for Astronomy, and individual utility companies. Historical Statistics of Hawaii, Section 19, presents data for earlier years. Data for the nation as a whole can be found in the Statistical Abstract of the United States: 1989, Sections 19 and 20.

## Section 18

# TRANSPORTATION

This section presents statistics relating to public roads, motor vehicles, bicycles, traffic accidents, local public transit, civil aviation, harbors, and water traffic. Other information bearing on transportation appears in Sections 7, 12, 14, and 24.

Motor vehicle registration in Hawaii increased from 584,000 in 1978 to 818,000 in 1988. Vehicle miles rose during the same period from 4.7 billion to 7.4 billion. Hawaii residents purchased 61,000 new passenger cars and 14,000 trucks in 1988. By the end of that year, 635,000 licensed drivers had access to 4,092 miles of streets and highways throughout the State. Bus passengers carried by the Honolulu Mass Transit Lines increased from 68 million in 1978 to 74 million in 1988. Registered bicycles numbered 113,000 in 1987.

Almost all scheduled interisland travel is by air. In 1988, airlines and air taxis reported 9.0 million interisland passengers, some 22 percent more than in 1978, and carried 65,000 tons of cargo. The State has seven commercial airports, 15 general aviation, military or semi-private airports, 12 civilian heliports, 3,400 active pilots, and about 486 active civil aircraft in general aviation.

Rapid growth is similarly evident in transpacific air travel. In 1988, 6,653,000 overseas passengers arrived by air, a 10-year growth of 61 percent. Overseas air cargo received that year exceeded 123,000 tons.

Undocumented State-registered vessels as of December 31, 1988 numbered 14,000, compared with 8,000 in 1970. Median length was 17.3 feet, and four-fifths were stored on land. There were 1,600 documented vessels in the State in 1989, almost triple the 1970 total. Overseas vessels brought 5,815 passengers into the State in 1988. Receipts of cargo in 1986 included 8.5 million tons in overseas cargo and 4.2 million tons in interisland cargo.

The chief source for transportation statistics is the Hawaii State Department of Transportation and its Highways, Harbors and Airports Divisions. Other sources include the U.S. Coast Guard, Federal Aviation Administration, Federal Highway Administration, Army Corps of Engineers, Honolulu Department of Transportation Services and Department of Data Systems, county finance departments, Hawaii Automobile Dealers' Association, and individual transportation companies. Data for the entire period of record through 1976 appear in Historical Statistics of Hawaii, Section 17. Similar statistics for other areas are reported in Statistical Abstract of the United States: 1989, Sections 21 and 22.

## Section 19

# AGRICULTURE

This section presents statistics on agricultural land, farms, crops, livestock, dairy products, poultry, and aquaculture. Related information appears in Sections 6 (on land use), 12 and 15 (agricultural employment and earnings), and 22 (food processing).

There were 4,650 farms in Hawaii in 1988, with a total area of 1.72 million acres. The value of crop sales in 1988 was \$485 million, or 58 percent higher than the total for 1978. Livestock sales amounted to \$89 million, or 22 percent more than the 1978 level. Combined crop and livestock sales in 1988 ranged from \$65 million in Kauai County to \$195 million on the Big Island. Major crops were sugar (\$210 million in sales, up 15 percent over the decade), pineapple (\$107 million, or 70 percent over the 1978 total), flowers and nursery products (\$60 million, or 242 percent more than in 1978), and macadamia nuts (\$41 million, up 263 percent). Diversified crops, defined as all crops other than sugar and pineapple, rose from \$62 million in 1978 to \$168 million in 1988, or approximately 170 percent. About 675 farms sold \$60 million of flowers and nursery products in 1988, chiefly anthuriums, potted foliage, and orchids. Important products of livestock farms as of 1988 included cattle and calves (\$28 million in sales), milk (\$32 million), and eggs (\$14 million). In 1988, Hawaii produced 33 percent of the fresh market vegetables consumed locally, 35 percent of the fresh market fruits, 28 percent of the beef and veal, 20 percent of the pork, 18 percent of the chickens, and 90 percent of the eggs.

Aquaculture has been growing in importance in recent years, with an aggregate value rising from \$525,000 in 1978 to \$5.5 million in 1988. Shellfish production amounted to 703,000 pounds in 1988, with a value of \$3.5 million.

Statistics on Hawaiian agriculture exclude pakalolo (marijuana) and other illicit plants. Authorities confiscated \$1.9 billion worth of marijuana in 1988, but the proportion escaping detection is unknown.

Important sources for data on agriculture include the United States Census of Agriculture, most recently conducted in 1987, the annual report on Statistics of Hawaiian Agriculture issued by the Hawaii Agricultural Statistics Service, and data compiled by the Hawaiian Sugar Planters' Association and the Aquaculture Development Program of the Department of Land and Natural Resources. Agricultural data for earlier years are summarized in Historical Statistics of Hawaii, Section 13. National statistics appear in Section 23 of the Statistical Abstract of the United States: 1989.

## Section 20

# FORESTS, FISHERIES, AND MINING

This section presents data on forests and forest products, commercial fishing, and mining and mineral products.

The most recent available statistics show 1.2 million acres of forest and water reserve and 948,000 acres of commercial timberland in the State, most of it on the Big Island. Over 45,000 acres had been planted in eucalyptus and other species of trees by mid-1988. Recent surveys of vegetation on three islands show ohia lehua to be the most common type of tree on Oahu and Kauai (with acreages of 38,000 and 109,000, respectively) and kiawe the leading type (at 33,000 acres) on Molokai. Forest and brushland fires burned 54 square miles in fiscal 1988.

The commercial fish catch in fiscal year 1988 amounted to 11.1 million pounds, with a value of \$21 million to primary producers. Ahi (yellowfin) and aku (skipjack) accounted for 43 percent of the total value. Other important species are spiny lobster, opakapaka, mahimahi, and ono. Commercial fishermen numbered 2,627. Among Marine Life Conservation Districts, those with the most fish per acre were Hanauma Bay (4,660 inshore), Honolua-Mokuleia Bays (4,556), and Kealakekua Bay (3,828).

The value of mineral production reached \$78 million in 1988, almost all of it in cement (\$34 million) and crushed stone (\$41 million). The 1988 total was an all-time high.

Important sources of data on these subjects are the United States Census of Mineral Industries and reports and records of the U.S. Bureau of Mines and Hawaii State Department of Land and Natural Resources, Aquatic Resources Division and Forestry and Wildlife Division. Historical Statistics of Hawaii, Section 14, summarizes the data for earlier periods. Comparable Mainland statistics are reported in the Statistical Abstract of the United States: 1989, Sections 24 and 25.

## Section 21

# CONSTRUCTION AND HOUSING

This section presents statistics on construction activity and costs, the size and composition of the housing inventory, occupancy of housing units and office buildings, home sales, and residential financing. Related series are included in Sections 6 (land use) and 14 (prices).

There were 24,000 building permits issued in 1988, with an estimated value of \$1.8 billion. The total included \$686 million for new private residential construction, \$244 million for hotels, and \$295 million for private nonresidential structures. The value of government construction contracts awarded was \$650 million. Construction put in place, as indicated by the contracting tax base, totaled \$2.0 billion in 1987 and \$2.5 billion in 1988. The value of land transfers in fiscal 1989 was \$10.4 billion. The June 1989 construction cost index for Honolulu (1982=100) was 139 for single-family residences and 132 for high-rise buildings.

The number of housing units in the State increased from 324,000 in 1979 to 393,000 in 1989. Owner occupied units numbered 133,000 in 1979 and 164,000 in 1989; the latter total included 31,000 on leased land. Condominium units, first authorized in 1961, numbered 98,000 by 1987. Cooperative units, first built in 1956, totaled 2,800 in 1987. Government-owned housing, mostly military and public, accounted for 27,000 units as of 1989. Housing has been in short supply throughout most of the past decade: on Oahu, the vacancy rate in May 1986, according to the Federal Home Loan Bank of Seattle, was only 2.3 percent. The median selling price of single-family homes on Oahu during 1988, based on Multiple Listing Service data, was \$210,000; for condominium units it was \$114,000. The median gross monthly rent for Oahu rose from \$141 in 1970 to \$413 in 1983, and the median value of owner occupied single-family units increased from \$38,400 to \$163,400.

The principal sources for these data are the 1980 U.S. Census of Housing, the 1983 American Housing Survey, postal vacancy surveys issued by the Federal Home Loan Bank of Seattle, various series compiled by State and County agencies (primarily the Hawaii Housing Authority, Hawaii State Department of Business and Economic Development, Department of Commerce and Consumer Affairs, Department of Taxation, and Bureau of Conveyances, and the four county building departments), the construction cost indexes prepared by the First Hawaiian Bank, and the Honolulu Board of Realtors reports on Multiple Listing Service activity. Many of these series are summarized in reports published by the Bank of Hawaii (particularly Construction in Hawaii, issued annually) and the First Hawaiian Bank. Persons interested in figures for earlier periods should consult Historical Statistics of Hawaii, Section 15. Mainland statistics appear in Section 26 of Statistical Abstract of the United States: 1989.

Table 586.-- NUMBER AND VALUE OF BUILDING PERMITS,  
BY COUNTIES: 1978 TO 1988

Year	State total	City and County of Honolulu	Hawaii County	Kauai County	Maui County

1989 ..	393,354	132,691	30,996	202,959	19,421	7,287

1/ As of April 1.

2/ As indicated by the number of taxpayers claiming home exemptions. The number of owner occupied housing units reported by the U.S. Census of Housing is somewhat higher than the corresponding number based on taxpayer home exemptions, chiefly because of differences in definitions. Data for 1977 and later years refer to January 1; data for 1970-1976, to July 1.

3/ Calculated as a residual after accounting for the known components, some of which pertain to dates other than April 1, and thus not attributable to any specific date.

4/ As of April 1. Data include housing units leased from private owners.

## Section 22

# MANUFACTURES

This section presents statistics on the manufacturing segment of the economy, including sugar processing and pineapple canning. Additional information on manufacturing workers appears in Sections 12 and 15.

The number of manufacturing establishments in Hawaii increased from 697 in 1967 to 1,020 in 1987. The value added by manufacture rose from \$326 million in 1967 to \$786 million in 1977 and \$1,411 million in 1987. More than three-fourths of all manufacturing activity in the State in 1982 was on Oahu. Food processing--mostly sugar and pineapple--accounted for 49 percent of the value added by manufacture in 1986. In 1988, the general excise and use tax base for diversified manufacturing (that is, manufacturing exclusive of sugar processing and pineapple canning) was \$629 million. There were two pineapple canneries and 11 sugar mills in Hawaii in 1988. The production of canned pineapple fruit and juices in 1981 (the most recent year available) was 18 million actual cases, well below the levels of earlier years. Sugar production in 1988 amounted to 928,000 short tons, the lowest total in 30 years. The value of sugar production (including commercial molasses) in 1988 was \$324 million, compared with the record of \$677 million set in 1974. Important manufactures other than food processing include apparel, printing and publishing, and stone, clay, and glass products.

Sources for data on this subject include the quinquennial United States Census of Manufactures, most recently conducted for 1987, the Annual Survey of Manufactures, publications of the Hawaii State Department of Agriculture and Department of Taxation, and the Hawaiian Sugar Planters' Association's annual report, HSPA Sugar Manual. Historical Statistics of Hawaii, Section 16, reviews the figures for earlier years. Statistics for the nation as a whole appear in Section 27 of the Statistical Abstract of the United States: 1989.

Table 628.-- STATISTICAL SUMMARY OF MANUFACTURES: 1963 TO 1982

Subject	1963	1967	1972	1977	1982

D Withheld to avoid disclosing data for individual companies.

S Withheld because estimate did not meet publication standards.

<sup>1/</sup> Aggregate of cost of materials and value of shipments includes extensive duplication since products of some industries are used as materials by others.

Source: U.S. Bureau of the Census, 1986 Annual Survey of Manufactures, Geographic Area Statistics, M86(AS)-3 (July 1988), table 2.

Table 632.-- PLANT CAPACITY UTILIZATION RATES: FOURTH QUARTERS,  
1982 TO 1987

[Data based on limited samples and subject to high sampling variability. Comparability of 1984 and later rates with earlier figures is further affected by the use of a new survey sample in that year. Considerable caution is thus urged in making any year-to-year comparisons, and particularly between 1983 and 1984]

Type of rate	Fourth quarter estimates					
	1982	1983	1984	1985	1986	1987
Preferred rate <u>1/</u> .....	80	83	84	87	87	89
Practical rate <u>2/</u> .....	72	73	81	83	78	85

1/ The preferred level of operations is defined as a level, normally between actual operations and practical capacity, which the manufacturer would prefer not to exceed due to costs or other considerations. In this table, the preferred utilization rate represents the ratio of actual to preferred level of operations.

2/ Practical capacity is broadly defined as the greatest output the plant could achieve within the framework of a realistic work pattern. The practical capacity utilization rate is the ratio of actual operations to the practical capacity level.

Source: U.S. Bureau of the Census, "Survey of Plant Capacity, 1982," Current Industrial Reports, MQ-C19(82)-1, November 1983, p. 19, and unpublished estimates for 1983-1986.

## Section 23

# DOMESTIC TRADE AND SERVICES

This section presents statistics relating to retail and wholesale trade; hotels; and selected personal, business, automotive, repair, and amusement services. Related data are included in Sections 7, 12, 14 and 15.

These activities have undergone rapid growth in recent decades, largely because of surging tourism and higher price levels. Retail sales increased from \$5.1 billion in 1982 to \$8.1 billion in 1987. Wholesale sales rose from \$4.1 billion in 1982 to \$5.4 billion in 1987. Hotels, amusements, and other services reported similar increases during this five-year period. General excise and use tax base data for 1988 indicate continued increases; between 1987 and 1988, the retailing tax base rose 10 percent, the wholesaling base also by 10 percent, and the base for services by 14 percent. Major retail concentrations include Waikiki, Ala Moana Center, Pearlridge Center, and downtown Honolulu. In addition to civilian retail outlets, there are many commissaries, exchanges, clubs, package stores, gasoline stations and food services maintained by the armed forces; these facilities had sales of \$558 million in 1988.

Growth has been especially rapid for hotels and related facilities. The number of units in the State rose from 6,800 in 1959 to 68,000 in 1989. There were 455 hotels, motels and apartment-hotels in Hawaii on the latter date, including 296 on the Neighbor Islands. More than 28 percent of all transient units were in condominium structures. Occupancy rates averaged 86 percent in Waikiki and 67 percent on the Neighbor Islands during 1988. The average daily room rate was \$88 in 1988. Total hotel rentals in 1988 exceeded \$1.4 billion, or \$29,000 per unit.

Fully 109 feature motion pictures and television specials and series were filmed in Hawaii in 1987, accounting for local expenditures of \$51 million. Both totals were all-time highs.

The major sources of these data are the United State Censuses of Retail Trade, Wholesale Trade, and Service Industries, most recently published for 1987. Statistics on the retailing, wholesaling, and services tax bases are available from the Hawaii State Department of Taxation. Data on hotel room counts, occupancy and other characteristics are published by the Hawaii Visitors Bureau and the firm of Pannell Kerr Forster. The Film Industry Branch of the Department of Business and Economic Development compiles data on motion picture and television production. A summary of figures on trade and services in earlier years appears in Historical Statistics of Hawaii, Section 20. The Statistical Abstract of the United States: 1989, Section 28, presents similar data for other states and the nation as a whole.

Table 641.-- GENERAL EXCISE TAX BASE FOR TRADE AND SERVICE ACTIVITIES:  
1978 TO 1988

[In thousands of dollars. Data are on a cash basis accounting]

Year reported <u>1/</u>	Retailing	Services <u>2/</u>	Amusement, etc. <u>3/</u>	Intermediary services	Wholesaling

## Section 24

# FOREIGN AND INTERSTATE COMMERCE

This section includes data on the flow of goods, services, and capital between Hawaii and the rest of the world, with particular emphasis on trade and investment involving foreign countries.

Imports to Hawaii from foreign nations rose from \$1.2 billion in 1978 to \$1.8 billion in 1988. Exports to foreign countries amounted to only \$138 million in 1978, but by 1988 reached \$573 million. These figures, it should be noted, refer to merchandise imports and exports through the Honolulu Customs District. They do not necessarily represent exports of commodities originating in Hawaii, nor imports for direct consumption within the State. Adjusted for actual origin and destination, Hawaii imports in 1988 were \$1.1 billion; exports, \$131 million.

Trade with the Mainland United States has similarly risen in the past decade. Merchandise received from the Mainland increased from \$2.9 billion in 1977 to \$6.7 billion in 1987. Estimates of the value of merchandise shipped to the Mainland are no longer available.

Among the foreign nations, Hawaii's leading trading partner in 1987 was Japan for both imports and exports. Imports for consumption from Japan amounted to \$464 million, or 30 percent of the total, while exports to Japan reached \$105 million or 27 percent of all foreign exports. Almost half of all imports for consumption were petroleum and natural gas products and monolithic integrated circuits.

Honolulu Foreign Trade Zone No. 9 handled merchandise valued at \$57 million in fiscal 1988. Merchandise handled by Subzone No. 9A, the PRI refinery, was valued at \$866 million, almost all of it in petroleum and petroleum products. The other three subzones accounted for a combined total of \$371 million.

Foreign-owned businesses in Hawaii had property, plant, and equipment with a gross book value of \$3.2 billion in 1987, owned 57,000 acres, and employed 22,400 persons. Foreign investments in Hawaii between 1959 and 1987 totaled \$4.7 billion, four-fifths of it Japanese. During the 15-month period ended in March 1988, Japanese investors spent \$890 million on Hawaiian real estate.

Sources for statistics on interstate and foreign commerce include the U.S. Bureau of the Census and Bureau of Economic Analysis, Foreign Trade Zone No. 9 and its four subzones, and the DBED Trade and Industry Development Branch. Further information is found in waterborne cargo data by origin and destination, compiled by the Army Corps of Engineers and cited in Section 18.

Comparable data for the nation as a whole appear in Section 29 of Statistical Abstract of the United States: 1989. Long-term Island trends are summarized in Historical Statistics of Hawaii, Section 21.

Table 674.-- INTERSTATE AND FOREIGN TRADE: 1970 TO 1988

## Section 25

# COMPARATIVE NATIONAL STATISTICS

This section presents statistics for the United States as a whole, the corresponding figures for Hawaii, and the rank of Hawaii among the 50 states and District of Columbia. The 12 tables in this section contain 358 series, thought to include the most significant or frequently requested types of data for which national comparisons are available. Virtually all of the major subject-matter areas covered in the first 24 sections of the Data Book are represented. The comparisons include totals, averages, medians, percentages, and rates.

Ranked against other jurisdictions, Hawaii was first in 24 comparisons, second in 13, last in 8, and second last in 12. Hawaii ranked 39th in population, first in life expectancy, third in public school pupil-teacher ratio, 16th in crime rate, 47th in land area, 14th in percent of land owned by the Federal government, 27th in visitor expenditures, 48th in votes cast as a percent of voting-age population, 16th in State and local government expenditures per capita, 22nd in defense spending, 28th in public aid recipients relative to population, 20th in female labor force participation rate, 15th in per capita personal income, sixth in family living costs (based on data for 100 metropolitan areas), 37th in bank deposits, 28th in commercial television stations, 47th in energy consumption per capita, 50th in highway mileage, first in volume of crop marketings for pineapple, macadamia nuts, and bananas, 18th in value of fish catch, 49th in percent of housing units owner occupied, 46th in value added by manufacture, 16th in retail sales per capita, 9th in hotel receipts, and third in percent of agricultural land that is foreign owned.

High ranks do not necessarily mean favorable scores, nor low ranks unfavorable scores. Hawaii was first (highest) in expectation of life at birth and 49th (third lowest) in crude death rate, for example, but both were highly desirable positions.

When Hawaii shared the same rank with other jurisdictions, the next lower rank (or ranks) was omitted. Although most comparisons were for 51 areas (50 states and the District of Columbia), some ranked Honolulu against other large metropolitan areas, and a few were based on other groupings. Variations in comparison groups are noted in the stubs.

Some of the values shown for Hawaii in this section differ from the corresponding figures given elsewhere in the Data Book, because of differences in sources or subsequent revisions in data.

This section was taken from other tables in this edition or their underlying sources, Statistical Abstract of the United States: 1989, pp. xv-xxiv, and State and Metropolitan Area Data Book, 1986, table 1. Historical data on state rankings are not readily available for most series.

Table 691.-- POPULATION, VITAL STATISTICS, AND HEALTH

Subject	United States	Hawaii	
		Number	Rank
Resident population, 1988 (1,000) .....	245,807	1,098	39

# BIBLIOGRAPHY

This volume is the 23rd in a series published by the Hawaii State Department of Business and Economic Development (DBED) and its predecessor agencies. The first was Statistical Abstract of Hawaii, 1962, issued by the Department of Planning and Research in 1962. After a four-year hiatus, updated versions titled The State of Hawaii Data Book were published by the Department of Planning and Economic Development in 1967, 1968, and annually beginning in 1970. The 1987 edition was the first one issued by DBED. All of the volumes issued before 1989 are now out of print, but copies can be consulted in the DBED Library, Hawaii State Library, University of Hawaii and community college libraries, and other collections throughout the State.

Additional information regarding specific statistical sources can be found in the introductory statements to each section of the Data Book, in footnotes and source references to the various tables, and in the underlying reports.

Although most of the series in the Data Book are shown only for recent years, many earlier figures appear in Historical Statistics of Hawaii, by Robert C. Schmitt. This book, published by the University Press of Hawaii in 1977, contains 711 pages of narrative and tables on the development of statistics in Hawaii since the 18th century.

Privately published works of general statistical reference include Hawaii Facts and Figures 1989, sold by the Chamber of Commerce of Hawaii, and All About Business in Hawaii 1989, published by Crossroads Press, Inc.

Two of the four counties have produced statistical abstracts. In 1988, the Kauai Economic Development Board issued 1987 Statistical Abstract of the Kauai Economy, prepared by the Center for Business and Economic Development, University of Hawaii at Hilo. The Hawaii County Department of Research and Development has published County of Hawaii Data Book 1980, now out of print.

Persons interested in data for other States or the nation as a whole should consult the Statistical Abstract of the United States and its companion volumes, the State and Metropolitan Area Data Book and County and City Data Book. The Abstract is an annual publication of the U.S. Bureau of the Census, initiated in 1878. The current edition is the 109th, dated 1989; copies are available from the Superintendent of Documents, U.S. Government Printing Office, Washington, D. C. 20402. The State and Metropolitan Area Data Book, 1986 and County and City Data Book, 1988 are sold by the same agency.

1/ The 1962 edition was titled Statistical Abstract of Hawaii, 1962. In addition, a 41-page, 57-table supplement, Historical Statistics of Hawaii, 1778-1962, was published and distributed without extra charge to persons receiving the regular edition.

2/ A 19-page supplement, State of Hawaii Census Tract Maps and Directory of Hawaii Map Sources, was included with each copy of the regular edition, and was not sold separately.

Source: DBED records.

## ON-LINE AVAILABILITY OF DATA BOOK TABLES TO PUBLIC

Early in 1988, the Hawaii State Department of Business and Economic Development initiated a pilot program to make Data Book tables and selected other statistical series available to anyone with a personal computer and a modem.

The pilot program incorporates the full text of The State of Hawaii Data Book (including available updates to the current edition) and the data and analyses in the department's most recent Quarterly Statistical & Economic Report. Other publications and data series may be added if there is sufficient demand.

The DBED electronic bulletin board is available free 24 hours a day, seven days a week.

Until now, getting updated Data Book tables was a time-consuming process. Now the almost daily updates are available on-demand and in a format that is more convenient for people who use many of the popular electronic spreadsheets.

The system is easy to use. It is menu-driven and contains numerous "prompts" which guide the user to the data sets. It also has electronic mail features that permit users to leave messages on the system. Since this is a pilot project, user comments and suggestions are solicited.

The bulletin board is maintained on an IBM System 2 microcomputer which is located in the Department's Research and Economic Analysis Division. The system uses the PC Board version 14.0/E3 software. The bulletin board can be accessed at either 300, 1200 or 2400 baud. Anyone wishing to access the system can call (808) 946-5191. Neighbor Island residents can call toll free 1-800-421-3233. A users guide is available from the Department's Information Office (548-4025) or can be retrieved from the system.

For further information about available data or system specifications, users should call the Research and Economic Analysis Division at (808) 548-4355.
