This report is largely the work of the DBED Research and Economic Analysis Division, headed by Richard Y. P. Joun, Ph.D. It was compiled and edited by Robert C. Schmitt, State Statistician, with the assistance of Sharon N. Nishi, Emogene K. Estores, Jan N. Nakamoto, and Michele Nishimoto. The camera-ready copy was typed and proofread by Judy F. Noda, Charlotte N. L. Chow, and Jolly I. Ige. Stewart A. Wastell, illustrator in the Office of State Planning, drew the maps. Printing arrangements were handled by the DBED's Information Office.

Copies of this report are available from the DBED Information Office, 220 South King Street, P. O. Box 2359, Honolulu, Hawaii 96804. The price per copy is \$8.00 in Hawaii, \$18.00 air-mailed postpaid to the Mainland United States, and \$35.00 air-mailed postpaid to foreign countries.

ABOUT THIS BOOK

The State of Hawaii Data Book: A Statistical Abstract is the standard official summary of statistics on the social, economic, and political organization of our island state.

In addition to serving as a reference, it is a guide to other sources of statistics.

The State of Hawaii State Data Book closely follows the organization and format of its counterpart, the Statistical Abstract of the United States, thus facilitating comparison of Hawaii and national data.

The State of Hawaii Data Book places the major emphasis on statewide data and less on counties, islands, urban places, and smaller areas. Source references for additional statistical detail are given in the introductions to the various sections and at the end of each table.

This is the 24th such abstract published by the State of Hawaii. Earlier editions appeared in 1962, 1967, 1968, and annually beginning in 1970. All before 1989 are now out of print, but copies can be found in many libraries in Hawaii.

Many Federal, State, County, and private organizations cooperated with the DBED Research and Economic Analysis Division in the preparation of this book. They are credited in the source references that accompany the tables to which they contributed.

GUIDE TO TABULAR PRESENTATION

The tables in this report generally follow the principles of tabular presentation used by the U.S. Bureau of the Census in its annual publication, Statistical Abstract of the United States, and described in Bureau of the Census Manual of Tabular Presentation, published by the Bureau in 1950. These principles have been accepted by the Department of Business and Economic Development for use in its publications and recommended to all other State agencies for official use.

Headnotes immediately below table titles provide information important for correct interpretation or evaluation of the table as a whole or for a major segment of it.

Unit indicators ("In thousands," "In millions of dollars," etc.) are usually given as the first element of the headnote. In tables where several units are used, the unit indicators are generally given in the stub or in the column headings.

Footnotes below the bottom rule of tables give information relating to specific items, figures or symbols within the table.

Parallel vertical rules are used to the right of a total column to indicate --

- (1) that the components which follow add to the total;
- (2) in the case of derived figures, that the underlying data are additive to their total.

A dash (-) represents zero in references to absolute values. In rates and percentages, a zero (0) is used.

In many tables, details will not add exactly to the totals shown because of rounding.

Geographic coverage should be understood as Statewide, unless otherwise indicated in the table title, headnote, boxhead, or stub. All annual statistics should be understood as referring to calendar years unless otherwise indicated.

Section 1

POPULATION

This section presents statistics on the growth, geographic distribution, and composition of the population of Hawaii, and on the number and characteristics of migrants moving to and from the State.

Provisional estimates for 1989 (to be revised after the release of 1990 census results) indicate a resident population of 1,112,000. This total is well above the 1980 census count of 964,691 and the earlier counts of 422,770 in 1940, 154,001 in 1900, and 84,165 in 1850. These censuses and estimates include members of the armed forces stationed in Hawaii and their local dependents, a group making up 10.5 percent of the resident total when last surveyed. The 1989 de facto population--which included 170,000 visitors present on an average day in that year but excluded 19,000 residents temporarily absent--was 1,263,000. Almost three-fourths of the 1989 de facto total was on Oahu, giving that island a density of 1,536 persons per square mile. The population of the State is mostly male (51 percent), relatively young--the median age in 1989 was 32.3 years--and racially diversified. The major unmixed groups, based on a 1987 sample survey, were Caucasians (24 percent of the non-barracks, non-institutional population) and Japanese (23 percent). In addition, 31 percent were of mixed race, primarily part Hawaiian. There were approximately 361,000 households in the State in 1989, with an average household size of 2.97. Migration has been a major factor in the growth of the population: between 1980 and 1989, there was a net in-migration (excluding military personnel and dependents) of 67,000, accounting for 44 percent of the total civilian population growth during that time. Immigrant arrivals in fiscal 1989 numbered 7,000, mostly from the Philippines.

The principal sources for these data are the decennial population censuses conducted by the U.S. Bureau of the Census, the estimates developed annually by the Hawaii State Department of Health and Department of Business, Economic Development & Tourism in cooperation with the Bureau of the Census, the Hawaii Health Surveillance Program conducted regularly since 1969 by the Department of Health, the ongoing series on visitors present and residents absent provided by the Hawaii Visitors Bureau, and the U.S. Immigration and Naturalization Service tabulations on immigration. Earlier figures on population and migration are given in Historical Statistics of Hawaii, Section 1 and 3. Comparable national statistics on population and migration appear in Section 1 of Statistical Abstract of the United States: 1990.

Data through 1896 are on a de facto or unspecified basis; data for 1900 and later years are on a resident basis, and include armed forces stationed or homeported in Hawaii]

1/ The resident population is defined as the number of persons whose usual place of residence is in an area, regardless of physical location on the estimate or census date. It includes military personnel stationed or homeported in the area but excludes persons of local origin attending school or in military service outside the area.

2/ Averages for 12-month periods centered on the estimate or census dates.

3/ The de facto population is defined as the number of persons physically present in an area, regardless of military status or usual place of residence; it includes visitors present but excludes residents temporarily absent.

4/ De facto population per 1,000 resident population.

Section 2

VITAL STATISTICS AND HEALTH

This section presents data on births, deaths, marriages, divorces, diseases, accidents, alcohol and drug use, height and weight, hospitals, and health personnel.

Vital indexes generally reflect the high health standards of Hawaii. Expectation of life at birth in 1984-86 was 75.37 years for males and 80.92 years for females. There were 6,380 resident deaths in 1989, or 5.7 per 1,000 resident population. Deaths under one year of age per 1,000 live births numbered 7.4 in 1989. Diseases of the heart have accounted for almost a third of all deaths in recent years; cancer, for one-fourth. Resident live births in 1989 numbered 19,335, or 17.4 per 1,000 resident population. The total fertility rate for civilians fell from 3,360 per 1,000 women in 1960 to 2,013 in 1988. Fully 98.3 percent of all babies were born in hospitals in 1989, and one-fifth were born to military couples. Almost one out of four births was to an unmarried woman. There were 7,409 fetal deaths in 1988, including 5,998 elective abortions. Marriages numbered 19,974 in 1989, with about 45 percent accounted for by nonresidents. Divorces reached a 1989 total of 5,613. The State had 22 acute care hospitals (with 2,855 beds), 38 long-term care facilities (with 3,191 beds), and nine specialty care facilities (with 808 beds) in 1989. There were 2,425 physicians and surgeons, 882 dentists, 8,218 professional nurses, and 516 pharmacists licensed and living in Hawaii as of March 1989. Acute conditions per 100 persons numbered 228 in 1987, with respiratory conditions the most common complaint (at 165 cases per 100 persons). Among chronic conditions reported in the 1987 survey data, the most frequently mentioned were hypertension without heart involvement (8.7 per 100 persons), gout (6.2), and impairments of the back or spine (6.1). The most common communicable diseases reported to authorities in 1988 were scarlet fever, with 5,671 cases, and gonorrhea, with 875, but the most fatal was AIDS (43 deaths). State mental health facilities served 8,389 patients in 1988, but the number of in-patients at the end of the year was only 260. Among persons 18 years old and over in 1984, 53 percent used alcohol, eight percent were heavy drinkers, 43 percent used drugs, and three percent were heavy drug users. The average adult male was 67.5 inches tall and weighed 159.5 lbs.; the average adult female was 62.6 inches and 127.9 lbs.

The major source for data on vital statistics and health is the annual statistical report of the Hawaii State Department of Health. Long-term trends are traced in Historical Statistics of Hawaii, Section 2. Sections 2 and 3 of the Statistical Abstract of the United States: 1990 contain similar data for the nation as a whole.

Section 3

EDUCATION

This section presents statistics on enrollment in public and private schools, colleges and universities; students graduated and degrees awarded; the highest grade of school completed; achievement test results; school facilities, personnel, and expenditures; and libraries.

Enrollment in elementary, intermediate and high schools in 1989-1990 totaled 206,000, slightly more than in the preceding year but well below the all-time high of 216,000 reached in 1971-1972. There were 238 public schools with 9,200 classroom teachers and 170,000 students (82.6 percent of the total). There were also 136 private schools with 2,600 teachers and over 35,000 pupils. Students graduating from public and private high schools in 1988-1989 numbered 13,100. Some 54,300 students attended colleges and universities in the State in 1989-1990, including 18,600 on the Manoa Campus of the University of Hawaii, 600 at UH-West Oahu, 4,000 at UH-Hilo, 20,600 at six community colleges, and 10,500 in four private colleges and universities. Ninety-two percent of the children 5 and 6 years old were in school in 1980 (compared with 87 percent in 1970), and 47 percent in the 18- and 19-year-old group were enrolled (compared with 53 percent a decade earlier). The expenditure per pupil in public schools rose from \$1,981 in 1978-1979 to \$4,172 in 1988-1989. In scholastic aptitude tests, Hawaii students scored somewhat above national norms in the math component but considerably below in the verbal component. Among adults, an estimated 19 percent were functionally illiterate in English as of 1988. Almost one-fourth of all residents 25 years of age or more have completed four or more years of college. The Hawaii State Library System, with 49 locations on six islands, had 2.3 million books, 9,700 periodical subscriptions, and 78,000 phonodisks and phonotapes in 1989, with an annual circulation of 6.6 million. The University of Hawaii libraries in the same year counted 2.8 million volumes.

The principal sources of data on education are the U.S. Bureau of the Census, Hawaii State Department of Education, University of Hawaii, and private colleges and universities. Historical Statistics of Hawaii, Section 9, contains Island data back to 1820. Section 4 of the Statistical Abstract of the United States: 1990 presents comparable information for the nation as a whole.

Section 4

LAW ENFORCEMENT, COURTS AND PRISONS

Statistics in this section refer to crimes committed, stolen property, arrests, the police, attorneys, the judiciary system, prisons, and youth correctional facilities.

Major offenses reported to the police in 1989 numbered 69,300, compared with 65,700 in 1988 and 71,300 in 1980. The rate per 1,000 resident population increased from 53 in 1985 to 62 in 1989. Seventy-six percent of the serious crimes in 1989 occurred on Oahu. For the State as a whole, major offenses known to police in 1989 included 53 murders or cases of non-negligent manslaughter, 479 rapes, 912 robberies, 1,462 aggravated assaults, 14,379 burglaries, 47,257 cases of larceny, and 4,330 auto thefts. The value of property reported stolen in 1989 amounted to \$45 million, exclusive of motor vehicles; only 5.1 percent was recovered. Authorities confiscated 1,615,000 marijuana plants, with an estimated value of \$1.6 billion, during the year. Confirmed instances of child abuse and neglect numbered 2,619 in 1989. Fifteen percent of the major offenses known to police were cleared by arrest or otherwise in 1989. Forty-three percent of the persons arrested for major crimes and 21 percent of those arrested for lesser offenses in 1989 were less than eighteen years of age. The number of inmates in the ten State correctional institutions averaged 2,203 during fiscal 1989; of this number, 1,428 were adults serving time for felonies. Cases concluded in the State Supreme Court, Intermediate Court of Appeals, four circuit courts, and four district courts and their divisions during fiscal 1989 numbered 945,000, including 821,000 traffic cases. Filings in the United States District Court for Hawaii in 1989 included 983 civil cases, 1,447 criminal cases, and 855 bankruptcy cases. The last legal execution in Hawaii took place in 1947. There were 4,768 attorneys licensed in Hawaii as of mid-1990, eleven times the 1960 total. Criminal justice system expenditures amounted to \$270 million in fiscal 1987.

Statistics on law enforcement, courts, and corrections in Hawaii appear in the annual reports of the county police departments, the State Judiciary, the Department of Public Safety (formerly Corrections), and the Administrative Office of the United States Courts. The Hawaii Criminal Justice Data Center issues quarterly and annual reports titled Crime in Hawaii. Figures on crime, the courts, and corrections in earlier years appear in Historical Statistics of Hawaii, Section 10. National data are summarized in the Statistical Abstract of the United States: 1990, Section 5.

1/ For Honolulu prior to 1989 and the Neighbor Island counties in all years, annual data on clearances include prior years' offenses cleared in the current year. The 1989 data for Honolulu, in contrast, are limited to 1989 offenses cleared as of June 1, 1990, and exclude 1989 clearances of offenses committed in earlier years. Also in Honolulu, effective February 1989, reclassified offenses are not being unfounded and clearance information is not being updated once an offense has been reported to the Uniform Crime Reports (UCR). This generally results in Honolulu offenses being slightly overreported to UCR, while clearances are substantially underreported.

Section 5

GEOGRAPHY AND ENVIRONMENT

This section relates to land and water areas, physical geography, climate, air and water quality, noise, and other geographic and environmental measurements of Hawaii. Most statistics on land use and ownership, however, appear in Section 6.

The State consists of eight major islands and 124 minor islands with a total land area of 6,425 square miles and a general coastline of 750 miles. Honolulu is 214 miles from Hilo, 1,367 miles from Kure Atoll (the westernmost end of the State), 2,397 miles from San Francisco, and 4,829 miles from Washington, D.C. The highest peak in the State is Mauna Kea, 13,796 feet above sea level; the longest stream is Kaukonahua Stream, Oahu, 33 miles in length; the most extensive lake or similar body is Kawainui Marsh, 1,000 acres; and the highest named waterfall is Kahiwa, Molokai, a 1,750-foot cascade. Various measures of air pollution, such as suspended particulate matter, indicate that Honolulu is one of the cleanest cities in the nation. There is also relatively little water pollution: the 104 major beaches and streams surveyed in 1989 were found to have enterococci levels per 100 ml. ranging from 0.5 to 150.3, and four out of five were within EPA standards. More than 1,200 species, subspecies, and varieties of native fauna and flora have been proposed or accepted for inclusion on lists of endangered, threatened, or extinct organisms.

Climatically, Hawaii is marked by remarkably balmy temperatures and wide variations in rainfall. The all-time temperature range at Honolulu International Airport, for example, was from 53° to 94°F. Average precipitation, however, ranges from less than nine inches at Kawaihae to 444 inches atop Waialeale. The largest volcanic eruption in Island history (begun in 1983) had produced more than 1.6 billion cubic yards of lava by August 1990. The worst earthquake (1868) attained 7.5 on the Richter scale, the highest tsunami wave (1946) reached 56 feet, and the most destructive hurricane (Iwa, 1982) gusted to 117 miles per hour. Water withdrawn for use in 1985 averaged 1.4 billion gallons per day, compared with 2.9 billion in 1980 and 2.8 billion in 1975. Among 31 neighborhoods on Oahu, median noise levels in 1981-1982 ranged from 37 decibels (in Mililani) to 57 decibels (in Pawaa).

Important sources of data include the U.S. Geological Survey, National Ocean Survey, National Weather Service, U.S. Bureau of the Census Geography Division, the Division of Water and Land Development of the State Department of Land and Natural Resources, the State Department of Health, and the University of Hawaii Institute of Geophysics. Detailed information is given in Atlas of Hawaii, 2nd edition, published by the University of Hawaii Press in 1983. National data are reported in Statistical Abstract of the United States: 1990, Section 6.

2/ Width measured in statute miles between designated points on National Ocean Survey and Coast and Geodetic Survey charts. Width in kilometers calculated from miles (1 mile = 1.60934 km.).

3/ Depths given are the deepest soundings noted at or near the line joining the two designated points, on National Ocean Survey and Coast and Geodetic Survey charts. Depths measured in fathoms and converted to feet and meters (1 fathom = 6 feet = 1.8288 meters).

1/ Figures are lengths of general outline of seacoast. Data for the four islands of Maui County are not consistent with the reported county total.

2/ Shoreline of outer coast, offshore islands, bays, rivers, and creeks is included to the head of tidewater or to a point where tidal waters narrow to a width of 100 feet.

3/ Derived from data expressed in statute miles; independently rounded and accordingly may not add exactly to indicated totals and subtotals.
1 mi. = 1.609 km.

4/ Data are not available for five minor islands: Molokini, Lehua, Gardner Pinnacles, Maro Reef, and Pearl and Hermes Atoll.

5/ Excludes the Midway Islands, which are part of the Hawaiian Archipelago but not legally part of the State of Hawaii. Midway has a general coastline of 20 miles and a tidal shoreline of 33 miles.

1/ Areas in square kilometers and acres were calculated directly from the figures shown for square miles; these equivalents were independently rounded, and hence may not add exactly to the indicated totals and subtotals. 1 square mile = 640 acres = 2.58999 square kilometers.

2/ Dry land and land temporarily or partially covered by water, as marshland, swamps, etc.; streams and canals under one-eighth statute mile wide; and lakes, reservoirs, and ponds under 40 acres of area.

3/ Permanent inland water surface, such as lakes, reservoirs, and ponds having 40 acres or more of area; streams, sloughs, estuaries, and canals one-eighth statute mile or more in width; deeply indented embayments and sounds, and other coastal waters behind or sheltered by headlands or islands separated by less than 1 nautical mile of water, and islands having less than 40 acres of area.

4/ Because of rounding, island figures may not add to county figures.

5/ Reflects inclusion of Kaula in the County of Kauai rather than in the City and County of Honolulu. Kaula was transferred to the County of Kauai by Act 245, S.L.H. 1988, approved June 9, 1988.

6/ Molokini, offshore of Maui, not measured; other sources give the area of Molokini as 18.6 acres (0.03 square miles or 0.075 square kilometers).

7/ Includes Lehua, elsewhere reported as 243 acres (0.38 square miles or 0.98 square kilometers).

8/ Exclusive of the Midway Islands, which are part of the Hawaiian Archipelago but not legally part of the State of Hawaii.

1/ Modified Mercalli Scale of 1931, 1956 abridged version further simplified. This scale, which extends from I to XII, reads in part:

IV. Hanging objects swing. Vibration like passing of heavy trucks or sensation of a jolt. Standing autos rock. Windows, dishes, doors rattle. Crockery clashes. In the upper part of range wooden construction creaks.

V. Felt outdoors; direction estimated. Sleepers wakened. Liquids disturbed, some spilled. Small unstable objects displaced or upset. Doors, shutters, pictures swing. Pendulum clocks stop.

VI. Felt by all. Many frightened, run outdoors. Persons walk unsteadily. Windows, dishes, glassware broken. Knickknacks, books thrown off shelves, pictures off walls. Furniture moved, overturned. Weak plaster and masonry cracked. Small bells ring. Trees, bushes noticeably shaken.

VII. Difficulty in standing. Noticed by drivers of autos. Hanging objects quiver. Furniture broken. Damage to weak masonry. Weak chimneys broken at roof line. Fall of plaster, loose bricks, etc. Some cracks in ordinary masonry. Waves on ponds. Small slides on sand and gravel banks. Large bells ring. Irrigation ditches damaged.

Section 6

LAND USE AND OWNERSHIP

General statistics on the use, ownership, and tenure of land appear in this section. Information on specific use or ownership categories is given elsewhere: parks in Section 7, military land in Section 10, agriculture in Section 19, forests in Section 20, and cane land in Section 22.

Out of the 4,112,000 acres in the State in 1982, 333,000 were in cropland and 974,000 in pastureland. Other major categories included forestland, with 1,473,000 acres, urban and built-up, with 126,000, and miscellaneous nonfarm, with 852,000. On Oahu, land in residential use increased from 22,600 acres in 1969 to 29,200 in 1989; during the same 20-year span, agricultural land declined from 88,900 to 74,200 acres. For the State as a whole, the Land Use Commission has zoned 175,000 acres as urban, 1,961,000 as conservation, 1,966,000 as agricultural, and 10,000 as rural.

Recent data on land ownership indicate that the Federal government owns 8.4 percent of all land, the State and counties own 29.8 percent, and private owners (chiefly large estates) have 61.8 percent. Total Federal holdings reported by the General Services Administration in 1988 came to 673,000 acres, exclusive of leased land (7,400 acres); most of the Federal land was in wildlife, park and military use. The State Department of Hawaiian Home Lands holds about 187,000 acres, divided among 5,800 lessees. Total land parcels in the State as of 1990 numbered 424,000.

Considerable caution is necessary in comparing statistics from different sources on land use, ownership, or tenure. Variations in definitions and survey dates seriously affect comparability in many instances, even where terminology is relatively unambiguous and misinterpretation seems unlikely. An example of such difficulties is the wide range in estimates of Federal land, with totals ranging from 338,000 acres to 673,000.

Tabulations by the U.S. Department of Agriculture and General Services Administration, Hawaii State Department of Hawaiian Home Lands, Department of Land and Natural Resources, Department of Business, Economic Development & Tourism, and Land Use Commission, Honolulu Department of Finance, and Honolulu Department of General Planning provided the data for this section. Historical Statistics of Hawaii, Section 12, contains limited information for earlier years. Statistics for the nation as a whole are available in Sections 6, 7, 10, 23, and 24 of the Statistical Abstract of the United States: 1990.

1/ Because of the omission of public thoroughfares and for other reasons, totals by island may differ considerably from official area estimates in other tables in this volume.

2/ State land ceded by presidential proclamation or governor's executive order to the federal government appears in most cases to have been classified for this table as federal land, even though title to it technically remains with the state. Land ceded by the state to the counties, in contrast, has probably been classified as state land. For both types of ceded land, treatment may have varied from parcel to parcel.

3/ Data exclude the Northwestern Hawaiian Islands (1,722 acres).

Section 7

RECREATION AND TRAVEL

Statistics on tourism, recreation, sports, museums, parks, pets, and the performing arts appear in this section. Additional information on recreational and resort land use is given in Section 6; on transportation, in Section 18; and on hotels and hotel workers, in Sections 12, 13, 15 and 23.

Approximately 6,642,000 visitors stayed overnight or longer in Hawaii during 1989, compared with 3,961,000 in 1979 and only 1,527,000 in 1969. The average number present at any given time during 1989 was 170,000. Total visitor expenditures (exclusive of trans-Pacific fares) in 1989 were estimated by the Hawaii Visitors Bureau at \$10.9 billion, compared with \$2.5 billion a decade earlier. The 1989 visitor total included 4.3 million from other States, 353,000 from Canada, and 1,319,000 from Japan. Expenditures per visitor day in 1989 averaged \$127 for westbound visitors and \$589 for the Japanese. Visitor-related spending in 1987 resulted in tax revenues of \$831 million and generated 213,000 jobs.

Both visitors and residents have access to a wide range of recreational and cultural facilities. The State has seven national parks and similar areas, 77 State parks, 575 county parks, 61 golf courses, 282 public tennis courts, 2,100 small-boat moorages, 1,600 recognized surfing sites, and 24.4 miles of safe, sandy, accessible beach. Recreational, scenic and cultural facilities reporting more than two million annual visits each in 1989 included Waikiki Beach, the National Memorial Cemetery of the Pacific, Wailua River State Park, Hanauma Bay, and Hawaii Volcanoes National Park. Total visits to 73 museums, State monuments, zoos, and similar attractions in 1989 numbered 19.4 million. About 479,000 Hawaii residents traveled to the Mainland or abroad in 1989. Twelve theatrical groups on Oahu reported 1,545 performances of 382 productions for the 1988-1989 season, with a combined audience of 1.15 million. During the 1988-1989 season, the Honolulu Symphony Orchestra gave 134 concerts, with a total attendance of 216,000. During the 1989-1990 school year, attendance at UH-Manoa varsity baseball, basketball, football and volleyball home games was 718,000.

Information on recreation and tourism is issued periodically by the Hawaii Visitors Bureau (particularly in its annual research reports), the State Parks Division of the Department of Land and Natural Resources, the Hawaii State Department of Business, Economic Development & Tourism, U.S. National Park Service, County park and recreation departments, and other organizations. Long-term trends are summarized in Historical Statistics of Hawaii, Section 11. National statistics are given in Section 7 of Statistical Abstract of the United States: 1990.

^{2/} Decline in 1985 reflects use of new benchmark data for Hawaii Volcanoes National Park estimates, rather than an actual drop in visits.

Section 8

ELECTIONS

This section presents data on election districts, registered voters, votes cast, campaign expenditures, elected officials, and legislative activity.

About 444,000 persons were registered to vote in the general election of November 8, 1988, and more than 368,000 actually voted. The number voting amounted to 43 percent of the 815,000 Hawaii residents of voting age at that time. The latter figure included around 148,000 aliens, inmates of mental and penal institutions, and members of the armed forces and their dependents, groups that are either ineligible or unlikely to vote in Island elections. Among registered voters, females outnumbered males and Democrats were far more numerous than Republicans. Campaign expenditures for the 1988 primary and general elections (other than for federal offices) exceeded \$10.8 million.

Hawaii has 2 Congressional, 25 Senatorial, 51 Representative, and 9 Councilmanic districts. It also contains 15 Soil Conservation districts, 30 active Neighborhood Board districts, and 292 election precincts.

Elected officials in Hawaii include the President and Vice President, two U.S. Senators, two U.S. Representatives, the Governor and Lieutenant Governor, 25 State Senators, 51 State Representatives, and various county officials. Persons of Hawaiian blood also vote for the Board of Trustees of the Office of Hawaiian Affairs. The minimum voting age is 18 years.

The 1989 State Legislature, with 76 members, included 58 males, 24 persons under 40 years of age, 28 persons of Japanese ancestry, 20 persons born in places other than Hawaii, and 66 Democrats.

In its 1990 session, the State Legislature considered 6,422 bills; 384 were passed and 349 became law. The Legislature also considered 1,287 resolutions, of which 549 were adopted.

The official results of primary, general, and special elections are published by the Office of the Lieutenant Governor. Additional information is often available from the various county clerks. Earlier figures for Hawaii appear in Historical Statistics of Hawaii, Section 24. National statistics appear in the Statistical Abstract of the United States: 1990, Section 8.

Section 9

GOVERNMENT FINANCES AND EMPLOYMENT

This section presents statistics relating to the revenues, expenditures, debt, and civilian employment of Federal, State and county governments in Hawaii.

Local government is vested in one combined city-county (Honolulu, consisting of the Island of Oahu and several outlying islets), three non-metropolitan counties (Hawaii, Kauai, and Maui), and one area (Kalawao County) administered by the State Department of Health. Separate municipal governments do not exist.

Tax collections by Federal, State and county governments in fiscal 1989 reached \$6.5 billion, twice the level reported eight years earlier. The 1989 total included \$3.7 billion in U.S. taxes, \$2.3 billion in State taxes, and \$449 million in county taxes, licenses and fees. Individual income taxes accounted for 86 percent of Federal collections and 34 percent of State collections in Hawaii in 1989. State revenue receipts totaled \$3.6 billion, chiefly from the general excise and use tax (\$1.0 billion), individual income tax (\$767 million) and Federal grants-in-aid (\$480 million). The largest expenditure item in the State accounts for 1989 was education, with \$987 million (out of \$3.3 billion) going to the University of Hawaii and public schools and libraries. The counties, in contrast, depended largely on the real property tax and grants-in-aid for their revenues, and reported police and fire protection as their largest single expenditure item. Assessed valuation of the State doubled between 1984 and 1990, reaching \$100 billion by the end of the period; of this total, \$27 billion was exempt from taxation. Public bonded debt outstanding at the end of 1989 stood at \$3.7 billion.

Total government employment in 1989 averaged 101,000, about 14 percent over the 1980 average. The 1989 total included 34,000 Federal workers, 54,000 persons employed by the State, and 14,000 persons on county payrolls. State civil service employees as of mid-1989 numbered 20,000.

Important sources for statistics on government in Hawaii include the U.S. Census of Governments and various annual publications of the Bureau of the Census, reports of the U.S. Treasury Department, Hawaii State Departments of Accounting and General Services, Budget and Finance, and Taxation, and the County auditors and finance directors, and an annual compilation issued by the Tax Foundation of Hawaii, Government in Hawaii: A Handbook of Financial Statistics. Data extending back to the middle of the 19th century are summarized in Historical Statistics of Hawaii, Section 25. Comparable Mainland statistics appear in the Statistical Abstract of the United States: 1990, Sections 9 and 10.

Section 10

NATIONAL DEFENSE

This section presents statistics relating to the armed forces and their dependents, national guard strength, civilian employment in national defense, veterans, land controlled by the Department of Defense, military housing, and expenditures by the armed forces. Further information appears in sections 1, 2, 6, 12, 13, 14, and 23.

There were approximately 54,000 officers and enlisted men (including 3,200 aboard ships homeported in Hawaii) and 61,000 military dependents in the Islands as of April 1, 1990. This number has been relatively stable in recent years, but at the height of World War II more than 400,000 uniformed personnel were present. The Army accounts for 37 percent of the current total. More than 10,000 Hawaii residents were in the armed forces worldwide in 1990. The importance of national defense in Hawaii can be further measured by total expenditures (\$2 billion), military prime contract awards (\$579 million), civilian employment (20,000), veterans in civil life (100,000), military personnel receiving retired pay (11,200, receiving \$14 million monthly), military-connected pupils in public schools (20,100), military housing (19,400 units), and land owned or controlled by the armed forces (over 265,000 acres). Defense expenditures are second only to tourism as a source of income to Hawaii.

The Department of Business, Economic Development & Tourism has compiled periodic reports on military personnel and dependents since 1959. Other published sources include reports of the U.S. Department of Defense, U.S. Bureau of the Census, Administrator of Veterans Affairs, and the Hawaii State Department of Labor and Industrial Relations, Department of Defense, and Department of Education. Definitions used by these sources frequently differ to some degree, and care is accordingly necessary in comparing data issued by two or more agencies. In mid-1988, for example, the number of armed forces in Hawaii was reported as 45,843 by DOD, 56,815 by the Bureau of the Census, and 64,053 by the local commanding officers reporting to DBED. Historical Statistics of Hawaii, Section 26, includes series on the armed forces dating back to 1795. Section 11 of the Statistical Abstract of the United States: 1990 presents data on national defense and veterans affairs for other states and the entire nation.

Section 11

SOCIAL INSURANCE AND HUMAN SERVICES

This section presents data related to governmental expenditures on social welfare; programs for old-age, survivors, disability and health insurance; public employee retirement; unemployment insurance; aid to the needy; and child and other welfare services. Also included here are selected statistics on United Way campaigns, foundations, and the quality of life. Related data are cited in Sections 9 and 13.

Total social welfare costs reached \$376 million in fiscal 1989, compared with \$245 million a decade earlier. About 55 percent of the 1989 total came from State funds and the remainder from the Federal government. The monthly average number of persons served by major welfare programs in 1989 was 49,000, or 4.4 percent of the resident population of the State. Fifty-seven percent of all public assistance payments and 43 percent of all recipient cases were accounted for by aid to families with dependent children. The average monthly payment per case for public assistance was \$473, or 41 percent more than in 1979. Participation in the food stamp program included 32,000 households and 80,000 persons. Among workers receiving unemployment compensation in 1989, weekly benefits averaged \$170. About 142,000 Hawaii residents were receiving Social Security benefits in December 1988, and about 122,000 were enrolled for Medicare the following year. There were also 20,000 State and county government pensioners in 1989, with annual benefits of \$218 million. Child adoptions in 1989 numbered 830. Ninety-five foundations reported assets of \$230 million when most recently surveyed. The United Way reported revenues of \$14.3 million and agency allocations of \$11.3 million in 1988. A recent comparative study of the "quality of life" in 300 American metropolitan areas ranked Honolulu 27th.

Major data sources include reports and records of the U.S. Department of Health and Human Services, the Hawaii State Department of Human Services (formerly Social Services and Housing), the Hawaii State Department of Labor and Industrial Relations, the Hawaii State Employees' Retirement System, and the United Way. Historical Statistics of Hawaii, Section 8, contains data for earlier years. Section 12 of the Statistical Abstract of the United States: 1990 presents comparable Mainland data.

Section 12

LABOR FORCE, EMPLOYMENT, AND EARNINGS

This section presents statistics on the size and composition of the labor force, employment by occupation, industry, class of worker, and place of work, payrolls, wage rates, hours, industrial safety, work disability, unionization, and strikes. Related series appear in Sections 3, 9, 10, and 19 through 23.

The civilian labor force averaged 525,000 in 1989; of this total, 511,000 persons were employed and 13,000 were unemployed and seeking work. The civilian jobcount rose from 434,000 in 1979 to 551,000 a decade later. (The jobcount differs from employment because the latter counts multiple jobholders--"moonlighters"--only once. Eight percent of all persons currently employed in the summer of 1988 held two or more jobs.) Areas with large concentrations of workers in 1980 included downtown Honolulu (46,000), Waikiki (30,000), and Pearl Harbor-Hickam (15,000). The unemployment rate averaged 2.6 percent in 1989, with individual island levels ranging from 2.1 to 9.5 percent. By occupation, one out of four civilian workers is classified as professional or managerial. Activities with especially large numbers of employees include services (145,000 in 1989), retail trade (111,000), and government (101,000). The average annual earnings of wage and salary workers under the Hawaii Employment Security Law reached \$20,454 in 1988, or 3.3 percent less than the 1978 average after adjustment for inflation. Average weekly hours in 1989 were 39.4 for all civilian workers and 46.0 for those on full-time schedules, and ranged from 30.4 (for retail trade) to 44.8 (for communication and utilities). Labor union membership was estimated at 161,000 in 1990. Work stoppages in 1989 involved only 48 workers.

Principal sources for the data on labor force, employment, place of work, hours, earnings, unions and strikes are the decennial reports of the U.S. Bureau of the Census, the same agency's Current Population Survey, reports by the U.S. Bureau of Labor Statistics, monthly and annual tabulations by the Hawaii State Department of Labor and Industrial Relations, and annual surveys of pay rates by the Hawaii Employers Council. Historical Statistics of Hawaii, Section 4, includes figures for earlier years. Statistics for the nation as a whole are published in Section 13 of the Statistical Abstract of the United States: 1990.

Table 348.-- JOBCOUNT, BY COUNTIES: ANNUAL AVERAGES, 1970 TO 1989

[Persons holding more than one job are counted in each position. As a result, these data differ from corresponding estimates of employment, reported elsewhere in this section. Active-duty armed forces are excluded, unless also employed in civilian jobs. Persons not working because of labor disputes are included. Because of a change in the method of estimating nonagricultural self-employed and unpaid family workers, jobcount estimates for 1987, 1988, and 1989 are not exactly comparable to those for earlier years]

Section 13

INCOME, EXPENDITURES, AND WEALTH

This section presents statistics on two different aspects of income and expenditures, one relating to the state income and product system and the other to the distribution of income to families, households and individuals. Specifically, information is given on gross state product, income by industry, personal, family and household income, poverty, personal wealth, and family expenditures. Data on wage rates, salaries, and earnings appear in Sections 3, 9, 12, and 22; on industrial payrolls, in Sections 12, 15, and 20 through 23; on the family income of visitors, in Section 7; on retirement payments and public assistance, in Sections 10 and 11; on taxable income, in Section 9.

Gross state product in 1989 was about \$24 billion. The major sources of outside income to Hawaii in 1989 were defense expenditures (\$2.0 billion), pineapple production (\$242 million), sugar production (\$322 million), and visitor expenditures (\$10.9 billion). Personal income in 1989 was \$20.4 billion, compared with \$9.0 billion only ten years earlier, and per capita personal income was \$18,500, almost twice the 1979 level. The per capita figure for Hawaii was 5.0 percent above the national average, reflecting in part the Islands' higher cost of living. The median annual income of families, based on data for 1988, was \$39,600; for unrelated individuals, the median was \$14,400. The official poverty threshold for a 4-person family in Hawaii was set in February 1990 at \$14,610. In 1988, 8.4 percent of Island families and 21.9 percent of unrelated individuals were below the U.S. poverty level. The most recent family expenditure survey, taken in 1986 and 1987, reported that the largest items in the family budget on Oahu were housing (accounting for 30.5 percent of total spending), food (17.0 percent), and transportation (15.0 percent). Top wealthholders in 1986 included 11,000 persons with assets of \$500,000 or more.

The chief sources of data shown in this section are the U.S. Bureau of Economic Analysis, U.S. Bureau of the Census, U.S. Bureau of Labor Statistics, U.S. Department of Health and Human Services, U.S. Department of Housing and Urban Development, Internal Revenue Service, Hawaii Agricultural Statistics Service, Hawaii State Department of Business, Economic Development & Tourism, and Hawaii Visitors Bureau. Sections 6 and 7 of Historical Statistics of Hawaii present data for earlier years. Comparable data for the country as a whole are given in Statistical Abstract of the United States: 1990, Section 14.

Section 14

PRICES

This section presents indexes of consumer prices for Honolulu, the implicit price deflator for gross state product, actual prices for selected foods, and comparisons of Honolulu and Hilo living costs with those in other urban areas. Other statistics on prices are reported in Sections 7, 16, 17, 18, 21, and 23.

During the first six months of 1990, the Honolulu all-items consumer price index for all urban consumers (CPI-U) averaged 135.5, with the 1982-1984 level equal to 100. The index had increased 7.2 percent over the first half of 1989, 27.5 percent since 1985, and 63.3 percent since 1980. Prices have risen most rapidly since the 1982-84 base period for shelter (50.7 percent) and medical care (49.8 percent) and have dropped most rapidly for electricity (19.0 percent). The implicit price deflator for expenditures on gross state product (a measure of price changes used in the state product accounts) rose 55.7 percent between 1979 and 1989.

An "intermediate" budget for a four-person family living on Oahu was unofficially estimated at \$47,361 as of 1989. This family budget was 29.9 percent higher than the corresponding urban United States average. Differences were particularly marked for renter shelter costs (47.2 percent higher) and personal income taxes (67.7 percent higher).

The Honolulu consumer price index has been compiled by the U.S. Bureau of Labor Statistics since December 1963. This index measures the average change in prices of goods and services purchased by urban households. Prices are expressed as a percent of the average levels reported in 1982-1984, the base date. Current data for Honolulu and other cities are published in CPI Detailed Report, issued monthly by BLS.

Important technical changes have been made in the consumer price index in recent years. In 1978, the Bureau of Labor Statistics added a new index, the CPI-U, covering all urban consumers, to the older index, the CPI-W, which was limited to urban wage earners and clerical workers and their families. In 1983, the basis for measuring homeowners' costs was substantially modified. In 1987, component weights based on a 1982-1984 survey replaced the older weights derived from 1972-1973 data. At the same time, the publication of the Honolulu indexes was moved from a bimonthly to a semi-annual basis. Beginning in 1988, the base period was shifted from 1967 to 1982-1984. Both the CPI-U and CPI-W have been linked by DBED to older indexes going back to 1940.

Official comparisons of Honolulu and Mainland living costs are no longer being made. The annual four-person family budgets estimated by the Bureau of Labor Statistics for Honolulu and the Mainland were discontinued after 1981, and are now maintained unofficially by the Bank of Hawaii. The annual comparison of prices in Hawaii and Washington,

D.C., compiled by the U.S. Office of Personnel Management to provide a basis for cost of living adjustments for Federal employees, has not been published since 1983. The American Chamber of Commerce Researchers Association (ACCRA) added Hilo to its list of participating cities for comparative living cost surveys in 1990.

No composite wholesale or producer price index is available for Hawaii. Average wholesale prices of agricultural products are reported in Statistics of Hawaiian Agriculture, issued by the Hawaii Agricultural Statistics Service, and in various other publications of the State Department of Agriculture. Wholesale price statistics of other commodities are seldom available.

Data on prices and living costs for the nation as a whole and other areas are summarized in Statistical Abstract of the United States: 1990, Section 15. Long-term trends for Hawaii are traced in Historical Statistics of Hawaii, Section 5.

Section 15

BANKING, INSURANCE, AND BUSINESS ENTERPRISE

Statistics in this section relate to banks and other financial institutions, stocks and bonds, insurance, fires, and business firms.

There were 10 banks with 188 locations, seven savings and loan associations with 152 locations, three trust companies with six branches, and 52 industrial loan or small loan licensees with 192 branch offices in Hawaii as of December 31, 1989. Deposits in insured commercial banks reached \$10.9 billion at the end of 1988, compared with \$4.5 billion in 1980. Assets of savings and loan associations stood at \$5.5 billion in December 1987, almost double their 1980 level of \$2.9 billion. There were 132 credit unions with combined assets of \$2.3 billion at the end of 1989.

Approximately 256,000 Hawaii residents held shares in U.S. public corporations or investment companies in 1985.

Life insurance in force in Hawaii at the end of 1988 amounted to \$41 billion, more than twice the figure reported ten years earlier. For all 805 insurance companies doing business in the Islands, Hawaii premiums amounted to \$1.5 billion in 1988 and losses, claims, and benefits paid came to \$788 million. Fire losses in fiscal 1990 amounted to \$27 million. Persons covered by the four major prepaid health insurance plans as of December 31, 1989 numbered 777,000, with annual membership dues of \$712 million.

By mid-1990, almost 46,000 corporations and partnerships were registered to do business in Hawaii: 31,800 local ("domestic") corporations, 5,700 out-of-State ("foreign") corporations, and 8,300 partnerships. Business establishments with one or more employees in 1987 numbered 27,300; over half had fewer than five employees. During fiscal 1990, 3,800 new local corporations were formed. Business receipts of corporations in 1987 exceeded \$26 billion; business receipts of partnerships and proprietorships in the same year amounted to respectively \$3.5 billion and \$1.8 billion. Hawaii's largest corporation, Castle & Cooke, reported annual sales of \$2.7 billion. Business failures numbered 167 in 1989.

Sources for statistics on these subjects include the Hawaii State Department of Commerce and Consumer Affairs (specifically its Financial Institutions, Insurance, and Business Registration Divisions), the State Department of Taxation, county fire departments, the New York Stock Exchange, Dun and Bradstreet, Inc., local health insurance plans, the Hawaii Credit Union League, and the annual report on County Business Patterns issued by the U.S. Bureau of the Census. Historical Statistics of Hawaii, Sections 22 and 23, provides information for earlier periods. Comparable Mainland data appear in Sections 16 and 17 of Statistical Abstract of the United States: 1990.

Section 16

COMMUNICATIONS

This section presents statistics on the usage, finances, and operations of the Postal Service and of various communications media: telephone, radio, television, newspapers, periodicals, and books. Sections 12 and 15 contain employment and payroll data for communications establishments.

Hawaii is served by all major communications media. In 1990 it had 144 post offices and stations handling 463 million pieces of mail and accounting for postal receipts of \$136 million. There were 556,000 telephone access lines in service, 385,000 telephone homes, about 2.6 billion local calls originated, and uncounted millions of interisland and transpacific calls in 1989. The 52 commercial, public and educational radio stations in the Islands in 1990 included 28 on the regular broadcast band and 24 FM stations. The State also had 21 television stations (19 commercial and 2 public), including satellites but excluding translators. Eight cable TV companies served 293,000 subscribers. An estimated 97 percent of all households in the State had television sets, and the average prime-time TV audience in May 1990 numbered 174,000 households. Island publishers printed nine daily newspapers, numerous magazines and other periodicals, and a wide diversity of books. Newspaper circulation reported by the two English-language dailies on Oahu averaged 191,000 in 1989-1990. Statistics on fax machines and cellular telephones are unavailable.

The major sources for statistics on communications are the reports and records of the U.S. Postal Service, Federal Communications Commission, the CATV Division of the Hawaii State Department of Commerce and Consumer Affairs, Hawaiian Telephone Company, Audit Bureau of Circulations, and A. C. Nielsen Co. Earlier figures appear in Historical Statistics of Hawaii, Section 18. Data on communications for other states and for the nation as a whole are carried in Statistical Abstract of the United States: 1990, Section 18.

Section 17

ENERGY AND SCIENCE

This section presents statistics on energy production and consumption, the electric and gas utility industries, research and development, and scientific resources. Related series are cited in Sections 12 (on utility employment), 14 (prices), and 18 (gasoline consumption).

Total energy consumption in 1988 amounted to 266 trillion British thermal units, compared with 236 trillion Btu a decade earlier. Transportation, including aviation fuels, accounted for 54 percent of the 1988 total. Total expenditures for fuels and electricity in 1988 were \$1.66 billion.

Electricity sales amounted to 8.0 billion kilowatt-hours in 1989, a total that has increased 29 percent since 1979. Manufactured gas sales reached 34 million therms in 1989, four percent below the figure ten years earlier. Residential rates in 1989 averaged 9.3 cents per kilowatt-hour and \$1.54 per therm, both significantly less than the corresponding rates a few years earlier. Average residential use (7,169 kWh and 192 therms in 1989) has declined since the early 1970s. By 1987, over 10 percent of the housing units in the State had solar heating devices.

The liquid fuel tax base for 1989 was approximately 1.3 billion gallons, compared with 961 million in 1979. The 1989 total included 369 million gallons of gasoline, 733 million of aviation fuel, and 160 million of diesel oil. The average price for automotive gasoline was \$1.36 per gallon during 1989.

The State is well served with scientific resources. Especially noteworthy is the cluster of large telescopes used for astronomical observations at the summits of Mauna Kea and Haleakala--twelve major facilities, including those under construction. Federal research and development obligations in Hawaii totaled \$82 million in 1988. Seventy-four patents were granted to Hawaii residents in 1989.

Information on energy and science can be obtained from reports and records of the U.S. Department of Energy, U.S. Patent and Trademark Office, U.S. Bureau of Labor Statistics, National Science Foundation, Hawaii State Department of Taxation, Hawaii State Department of Commerce and Consumer Affairs and its Division of Consumer Advocacy, the DBED Energy Division, UH Institute for Astronomy, and individual utility companies. Historical Statistics of Hawaii, Section 19, presents data for earlier years. Data for the nation as a whole can be found in the Statistical Abstract of the United States: 1990, Sections 19 and 20.

Section 18

TRANSPORTATION

This section presents statistics relating to public roads, motor vehicles, bicycles, traffic accidents, local public transit, civil aviation, harbors, and water traffic. Other information bearing on transportation appears in Sections 7, 12, 14, and 24.

Motor vehicle registration in Hawaii increased from 611,000 in 1979 to 855,000 in 1989. Vehicle miles rose during the same period from 4.8 billion to 7.7 billion. Hawaii residents purchased 71,000 new passenger cars and 15,000 trucks in 1989. By the end of that year, 657,000 licensed drivers had access to 4,087 miles of streets and highways throughout the State. Bus passengers carried by the Honolulu Mass Transit Lines increased from 69 million in 1979 to 75 million in 1989. Registered bicycles numbered 93,000 in 1989.

Almost all scheduled interisland travel is by air. In 1989, airlines and air taxis reported 9.6 million interisland passengers, some 27 percent more than in 1979, and carried 73,000 tons of cargo. The State has seven commercial airports, 15 general aviation, military or semi-private airports, 15 civilian heliports, 3,600 active pilots, and about 600 active civil aircraft in general aviation.

Rapid growth is similarly evident in transpacific air travel. In 1989, 7,023,000 overseas passengers arrived by air, a 10-year growth of 65 percent. Overseas air cargo received that year exceeded 150,000 tons.

Undocumented State-registered vessels as of December 31, 1989 numbered 13,500, compared with 8,000 in 1970. Median length was 17.4 feet, and four-fifths were stored on land. There were 1,700 documented vessels in the State in 1990, triple the 1970 total. Overseas vessels brought 10,000 passengers into the State in 1990. Receipts of cargo in 1988 included 11.0 million tons in overseas cargo and 5.3 million tons in interisland cargo.

The chief source for transportation statistics is the Hawaii State Department of Transportation and its Highways, Harbors and Airports Divisions. Other sources include the U.S. Coast Guard, Federal Aviation Administration, Federal Highway Administration, Army Corps of Engineers, Honolulu Department of Transportation Services and Department of Data Systems, county finance departments, Hawaii Automobile Dealers' Association, and individual transportation companies. Data for the entire period of record through 1976 appear in Historical Statistics of Hawaii, Section 17. Similar statistics for other areas are reported in Statistical Abstract of the United States: 1990, Sections 21 and 22.

Section 19

AGRICULTURE

This section presents statistics on agricultural land, farms, crops, livestock, dairy products, poultry, and aquaculture. Related information appears in Sections 6 (on land use), 12 and 15 (agricultural employment and earnings), and 22 (food processing).

There were 4,650 farms in Hawaii in 1989, with a total area of 1.72 million acres. The value of crop sales in 1989 was \$485 million, or 34 percent higher than the total for 1979. Livestock sales amounted to \$92 million, or 17 percent more than the 1979 level. Combined crop and livestock sales in 1989 ranged from \$65 million in Kauai County to \$203 million on the Big Island. Major crops were sugar (\$211 million in sales, down 3 percent over the decade), pineapple (\$95 million, or 38 percent over the 1979 total), flowers and nursery products (\$62 million, or 200 percent more than in 1979), and macadamia nuts (\$45 million, up 168 percent). Diversified crops, defined as all crops other than sugar and pineapple, rose from \$76 million in 1979 to \$180 million in 1989, or approximately 137 percent. About 710 farms sold \$62 million of flowers and nursery products in 1989, chiefly anthuriums, potted foliage, and orchids. Important products of livestock farms as of 1989 included cattle and calves (\$31 million in sales), milk (\$32 million), and eggs (\$15 million). In 1989, Hawaii produced 30 percent of the fresh market vegetables consumed locally, 45 percent of the fresh market fruits, 30 percent of the beef and veal, 18 percent of the pork, 17 percent of the chickens, and 92 percent of the eggs.

Aquaculture has been growing in importance in recent years, with an aggregate value rising from \$11,000 in 1970 to \$6.8 million in 1989. Shellfish production amounted to 706,000 pounds in 1989, with a value of \$3.8 million.

Statistics on Hawaiian agriculture exclude marijuana and other illicit plants. Authorities confiscated \$1.6 billion worth of marijuana in 1989, but the proportion escaping detection is unknown.

Important sources for data on agriculture include the United States Census of Agriculture, most recently conducted in 1987, the annual report on Statistics of Hawaiian Agriculture issued by the Hawaii Agricultural Statistics Service, and data compiled by the Hawaiian Sugar Planters' Association and the Aquaculture Development Program of the Department of Land and Natural Resources. Agricultural data for earlier years are summarized in Historical Statistics of Hawaii, Section 13. National statistics appear in Section 23 of the Statistical Abstract of the United States: 1990.

Section 20

FORESTS, FISHERIES, AND MINING

This section presents data on forests and forest products, commercial fishing, and mining and mineral products.

The most recent available statistics show 1.2 million acres of forest and water reserve and 700,000 acres of timberland in the State, most of it on the Big Island. Over 45,000 acres had been planted in eucalyptus and other species of trees by mid-1989. Recent surveys of vegetation on three islands show ohia lehua to be the most common type of tree on Oahu and Kauai (with acreages of 38,000 and 109,000, respectively) and kiawe the leading type (at 33,000 acres) on Molokai. Forest and brushland fires burned 10 square miles in fiscal 1989.

The commercial fish catch in fiscal year 1989 amounted to 13.5 million pounds, with a value of \$28 million to primary producers. Ahi (yellowfin) and aku (skipjack) accounted for 35 percent of the total value. Other important species are spiny lobster, opakapaka, mahimahi, and ono. Commercial fishermen numbered 3,491. Among Marine Life Conservation Districts, those with the most fish per acre were Honolua-Mokuleia Bays (8,253), Molokini Shoal (2,711), and Hanauma Bay (2,532 offshore).

The value of mineral production reached \$93 million in 1989, almost all of it in cement (\$41 million) and crushed stone (\$48 million). The 1989 total was an all-time high.

Important sources of data on these subjects are the United States Census of Mineral Industries and reports and records of the U.S. Bureau of Mines and Hawaii State Department of Land and Natural Resources, Aquatic Resources Division and Forestry and Wildlife Division. Historical Statistics of Hawaii, Section 14, summarizes the data for earlier periods. Comparable Mainland statistics are reported in the Statistical Abstract of the United States: 1990, Sections 24 and 25.

Section 21

CONSTRUCTION AND HOUSING

This section presents statistics on construction activity and costs, the size and composition of the housing inventory, occupancy of housing units and office buildings, home sales, and residential financing. Related series are included in Sections 6 (land use) and 14 (prices).

There were 23,000 building permits issued in 1989, with an estimated value of \$2.0 billion. The total included \$911 million for new private residential construction, \$87 million for hotels, and \$475 million for private nonresidential structures. The value of government construction contracts awarded was \$758 million. Construction put in place, as indicated by the contracting tax base, totaled \$3.1 billion in 1989. The value of land transfers in fiscal 1990 was \$16.2 billion, 19 percent of the assessed value of all privately-owned real property in the State. The July 1990 construction cost index for Honolulu (1982=100) was 146 for single-family residences and 144 for high-rise buildings.

The number of housing units in the State increased from 334,000 in 1980 to 403,000 in 1990. Owner occupied units numbered 137,000 in 1980 and 168,000 in 1990; the latter total included 29,000 on leased land. Condominium units, first authorized in 1961, numbered 98,000 by 1987. Cooperative units, first built in 1956, totaled 2,800 in 1987. Government-owned housing, mostly military and public, accounted for 27,000 units as of 1990. Housing has been in short supply throughout most of the past decade: on Oahu, the vacancy rate in the spring of 1989, according to the Federal Home Loan Bank, was only 1.5 percent. The median selling price of single-family homes on Oahu during 1989, based on Multiple Listing Service data, was \$270,000; for condominium units it was \$135,000. The median gross monthly rent for Oahu rose from \$141 in 1970 to \$413 in 1983, and the median value of owner occupied single-family units increased from \$38,400 to \$163,400.

The principal sources for these data are the 1980 U.S. Census of Housing, the 1983 American Housing Survey, postal vacancy surveys sponsored by the Federal Home Loan Bank of Seattle, various series compiled by State and County agencies (primarily the Hawaii Housing Authority, Hawaii State Department of Business, Economic Development & Tourism, Department of Commerce and Consumer Affairs, Department of Taxation, and Bureau of Conveyances, and the four county building departments), the construction cost indexes prepared by the First Hawaiian Bank, and the Honolulu Board of Realtors reports on Multiple Listing Service activity. Many of these series are summarized in reports published by the Bank of Hawaii (particularly Construction in Hawaii, issued annually) and the First Hawaiian Bank. Persons interested in figures for earlier periods should consult Historical Statistics of Hawaii, Section 15. Mainland statistics appear in Section 26 of Statistical Abstract of the United States: 1990.

1/ As of April 1. Data for 1981-1990 are provisional.

2/ As indicated by the number of taxpayers claiming home exemptions. The number of owner occupied housing units reported by the U.S. Census of Housing is somewhat higher than the corresponding number based on taxpayer home exemptions, chiefly because of differences in definitions. Data for 1977 and later years refer to January 1; data for 1970-1976, to July 1.

3/ Calculated as a residual after accounting for the known components, some of which pertain to dates other than April 1, and thus not attributable to any specific date.

4/ As of April 1. Data include housing units leased from private owners.

Source follows table 620.

Section 22

MANUFACTURES

This section presents statistics on the manufacturing segment of the economy, including sugar processing and pineapple canning. Additional information on manufacturing workers appears in Sections 12 and 15.

The number of manufacturing establishments in Hawaii increased from 697 in 1967 to 1,020 in 1987. The value added by manufacture rose from \$326 million in 1967 to \$786 million in 1977 and \$1,411 million in 1987. More than three-fourths of all manufacturing activity in the State in 1982 was on Oahu. Food processing--mostly sugar and pineapple--accounted for 49 percent of the value added by manufacture in 1986. In 1989, the general excise and use tax base for diversified manufacturing (that is, manufacturing exclusive of sugar processing and pineapple canning) was \$631 million. There were two pineapple canneries and 11 sugar mills in Hawaii in 1989. Canned and fresh pineapple sales in 1989 totaled \$242 million, a level maintained for almost a decade. Sugar production in 1989 amounted to 864,000 short tons, the lowest total in 31 years. The value of sugar production (including commercial molasses) in 1989 was \$322 million, compared with the record of \$677 million set in 1974. Important manufactures other than food processing include apparel, printing and publishing, and stone, clay, and glass products.

Sources for data on this subject include the quinquennial United States Census of Manufactures, most recently conducted for 1987, the Annual Survey of Manufactures, publications of the Hawaii State Department of Agriculture and Department of Taxation, and the Hawaiian Sugar Planters' Association's annual report, HSPA Sugar Manual. Historical Statistics of Hawaii, Section 16, contains the figures for earlier years. Statistics for the nation as a whole appear in Section 27 of the Statistical Abstract of the United States: 1990.

Table 655.-- PLANT CAPACITY UTILIZATION RATES:
FOURTH QUARTER ESTIMATES, 1983 TO 1988

[The sample of manufacturing plants located in Hawaii was not selected specifically to represent the state but is a by-product of the national survey. Consequently, the state data are subject to high sampling variability that may disguise real movement in the series]

Type of rate	Fourth quarter estimates					
	1983	1984	1985	1986	1987	1988
Preferred rate $\frac{1}{}$	83	84	87	87	89	92
Practical rate $\frac{2}{}$	73	81	83	78	85	88

1/ The preferred level of operations is defined as a level, normally between actual operations and practical capacity, which the manufacturer would prefer not to exceed due to costs or other considerations. In this table, the preferred utilization rate represents the ratio of actual to preferred level of operations.

2/ Practical capacity is broadly defined as the greatest output the plant could achieve within the framework of a realistic work pattern. The practical capacity utilization rate is the ratio of actual operations to the practical capacity level.

Section 23

DOMESTIC TRADE AND SERVICES

This section presents statistics relating to retail and wholesale trade; hotels; and selected personal, business, automotive, repair, and amusement services, including the motion picture industry. Related data are included in Sections 7, 12, 14 and 15.

These activities have undergone rapid growth in recent decades, largely because of surging tourism and higher price levels. Retail sales increased from \$5.2 billion in 1982 to \$8.3 billion in 1987. Wholesale sales rose from \$4.1 billion in 1982 to \$5.4 billion in 1987. Hotels, amusements, and other services reported similar increases during this five-year period. General excise and use tax base data for 1989 indicate continued increases; between 1987 and 1989, the retailing tax base rose 23 percent, the wholesaling base by 27 percent, and the base for all services also by 27 percent. Major retail concentrations include Waikiki, Ala Moana Center, Pearlridge Center, and downtown Honolulu. In addition to civilian retail outlets, there are many commissaries, exchanges, clubs, package stores, gasoline stations and food services maintained by the armed forces; these facilities had sales of \$558 million in 1988.

Growth has been especially rapid for hotels and related facilities. The number of units in the State rose from 6,800 in 1959 to 68,000 in 1989. There were 453 hotels, motels and apartment-hotels in Hawaii on the latter date, including 296 on the Neighbor Islands. More than 28 percent of all transient units were in condominium structures. Occupancy rates averaged 87 percent in Waikiki and 67 percent on the Neighbor Islands during 1989. The average daily room rate was \$96 in 1989. Total hotel rentals in 1989 exceeded \$1.5 billion.

Fully 173 feature motion pictures and television specials and series were filmed in Hawaii in 1989, accounting for local expenditures of \$62 million. The latter was an all-time high.

The major sources of these data are the United State Censuses of Retail Trade, Wholesale Trade, and Service Industries, most recently published for 1987. Statistics on the retailing, wholesaling, and services tax bases are available from the Hawaii State Department of Taxation. Data on hotel room counts, occupancy and other characteristics are published by the Hawaii Visitors Bureau and the firm of Pannell Kerr Forster. The Film Industry Branch of the Department of Business, Economic Development & Tourism compiles data on motion picture and television production. A summary of figures on trade and services in earlier years appears in Historical Statistics of Hawaii, Section 20. The Statistical Abstract of the United States: 1990, Section 28, presents similar data for other states and the nation as a whole.

Section 24

FOREIGN AND INTERSTATE COMMERCE

This section includes data on the flow of goods, services, and capital between Hawaii and the rest of the world, with particular emphasis on trade and investment involving foreign countries.

Imports to Hawaii from foreign nations rose from \$1.2 billion in 1978 to \$1.8 billion in 1988. Exports to foreign countries amounted to only \$138 million in 1978, but by 1988 reached \$573 million. These figures, it should be noted, refer to merchandise imports and exports through the Honolulu Customs District. They do not necessarily represent exports of commodities originating in Hawaii, nor imports for direct consumption within the State. Adjusted for actual origin and destination, Hawaii imports in 1988 were \$1.1 billion; exports, \$131 million.

Trade with the Mainland United States has similarly risen in the past decade. Merchandise received from the Mainland increased from \$3.1 billion in 1978 to \$7.5 billion in 1988. Estimates of the value of merchandise shipped to the Mainland are no longer available.

Among the foreign nations, Hawaii's leading trading partner in 1988 was Japan for both imports and exports. Imports for consumption from Japan amounted to \$482 million, or 26 percent of the total, while exports to Japan reached \$255 million or 44 percent of all foreign exports. Almost 45 percent of all imports for consumption were petroleum and natural gas and integrated circuits.

Honolulu Foreign Trade Zone No. 9 handled merchandise valued at \$63 million in fiscal 1989. Merchandise handled by Subzone No. 9A, the PRI refinery, was valued at \$978 million, almost all of it in petroleum and petroleum products. The other three subzones accounted for a combined total of \$371 million.

Foreign-owned businesses in Hawaii had property, plant, and equipment with a gross book value of \$3.5 billion in 1987, owned 57,000 acres, and employed 27,300 persons. Foreign investments in Hawaii between 1959 and 1989 totaled \$8.7 billion, four-fifths of it Japanese. During the 15-month period ended in March 1988, Japanese investors spent \$890 million on Hawaiian real estate.

Sources for statistics on interstate and foreign commerce include the U.S. Bureau of the Census and Bureau of Economic Analysis, Foreign Trade Zone No. 9 and its four subzones, and the DBED Trade and Industry Development Branch. Further information is found in waterborne cargo data compiled by the Army Corps of Engineers and cited in Section 18.

Comparable data for the nation as a whole appear in Section 29 of Statistical Abstract of the United States: 1990. Long-term Island trends are summarized in Historical Statistics of Hawaii, Section 21.

Section 25

COMPARATIVE NATIONAL STATISTICS

This section presents statistics for the United States as a whole, the corresponding figures for Hawaii, and the rank of Hawaii among the 50 states. The 12 tables in this section contain 356 series, thought to include the most significant or frequently requested types of data for which national comparisons are available. Virtually all of the major subject-matter areas covered in the first 24 sections of the Data Book are represented. The comparisons include totals, averages, medians, percentages, and rates.

Ranked against other jurisdictions, Hawaii was first in 31 comparisons, second in 11, last in 8, and second last in 20. Hawaii ranked 39th in population, first in life expectancy at birth, third in public school pupil-teacher ratio, 14th in crime rate, 47th in land area, 13th in percent of land owned by the Federal government, 27th in visitor expenditures, 48th in votes cast as a percent of voting-age population, 14th in State and local government expenditures per capita, 22nd in defense spending, 27th in public aid recipients relative to population, 22nd in female labor force participation rate, 12th in per capita disposable personal income, sixth in family living costs (based on data for 100 metropolitan areas), sixth in per capita bank deposits, 30th in newspaper circulation per capita, 48th in energy consumption per capita, 50th in highway mileage, first in volume of crop marketings for pineapple, macadamia nuts, and bananas, 18th in value of commercial fish catch, 49th in percent of housing units owner occupied, 45th in value added by manufacture, fifth in retail sales per capita, ninth in hotel receipts, and second in percent of agricultural land that is foreign owned.

High ranks do not necessarily mean favorable scores, nor low ranks unfavorable scores. Hawaii was first (highest) in expectation of life at birth and 49th (second lowest) in crude death rate, for example, but both were highly desirable positions.

When Hawaii shared the same rank with other jurisdictions, the next lower rank (or ranks) was omitted. Although most comparisons were for the 50 areas, some ranked Honolulu against other large metropolitan areas, and a few were based on other groupings. Variations in comparison groups are noted in the stubs or footnotes.

Some of the values shown for Hawaii in this section differ from the corresponding figures given elsewhere in the Data Book, because of differences in sources or subsequent revisions in data.

This section was taken from other tables in this edition or their underlying sources, Statistical Abstract of the United States: 1990, pp. xii-xxi, and State and Metropolitan Area Data Book, 1986, table 1. Historical data on state rankings are not readily available for most series.

BIBLIOGRAPHY

This volume is the 24th of its type published by the Hawaii State Department of Business, Economic Development & Tourism (DBED) and its predecessor agencies. The first was Statistical Abstract of Hawaii, 1962, issued by the Department of Planning and Research in 1962. After a four-year hiatus, updated versions titled The State of Hawaii Data Book were published by the Department of Planning and Economic Development in 1967, 1968, and annually beginning in 1970. The 1987 edition was the first one issued by DBED. All of the volumes issued before 1989 are now out of print, but copies can be consulted in the DBED Library, Hawaii State Library, University of Hawaii and community college libraries, and other collections throughout the State.

Additional information regarding specific statistical sources can be found in the introductory statements to each section of the Data Book, in footnotes and source references to the various tables, and in the underlying reports.

Although most of the series in the Data Book are shown only for recent years, many earlier figures appear in Historical Statistics of Hawaii, by Robert C. Schmitt. This book, published by the University Press of Hawaii in 1977, contains 711 pages of narrative and tables on the development of statistics in Hawaii since the 18th century.

Privately published works of general statistical reference include Hawaii Facts and Figures 1989, sold by the Chamber of Commerce of Hawaii, and All About Business in Hawaii 1990, published by Crossroads Press, Inc.

Two of the four counties have produced statistical abstracts. In December 1989, the Kauai Economic Development Board issued 1989 Statistical Abstract of the Kauai Economy. The Hawaii County Department of Research and Development has published 1989 County of Hawaii Data Book.

Persons interested in data for other States or the nation as a whole should consult the Statistical Abstract of the United States and its companion volumes, the State and Metropolitan Area Data Book and County and City Data Book. The Abstract is an annual publication of the U.S. Bureau of the Census, initiated in 1878. The current edition is the 110th, dated 1990; copies are available from the Superintendent of Documents, U.S. Government Printing Office, Washington, D. C. 20402. The State and Metropolitan Area Data Book, 1986 and County and City Data Book, 1988 are sold by the same agency.

ON-LINE AVAILABILITY OF DATA BOOK TABLES TO PUBLIC

Early in 1988, the Hawaii State Department of Business and Economic Development initiated a pilot program to make Data Book tables and selected other statistical series available to anyone with a personal computer and a modem.

The program incorporates the full text of The State of Hawaii Data Book (including available updates to the current edition) and the data and analyses in the department's most recent Quarterly Statistical & Economic Report. Other publications and data series may be added if there is sufficient demand.

The DBED electronic bulletin board is available free 24 hours a day, seven days a week.

Until now, getting updated Data Book tables was a time-consuming process. Now the almost daily updates are available on-demand and in a format that is more convenient for people who use many of the popular electronic spreadsheets.

The system is easy to use. It is menu-driven and contains numerous "prompts" which guide the user to the data sets. It also has electronic mail features that permit users to leave messages on the system. User comments and suggestions are welcome.

The bulletin board is maintained on an IBM System 2 microcomputer which is located in the Department's Research and Economic Analysis Division. The system uses the PC Board version 14.5/E6 software. The bulletin board can be accessed at either 300, 1200, 2400 or 9600 baud. Anyone wishing to access the system can call (808) 946-5191. Neighbor Island residents can call toll free 1-800-421-3233. A users guide is available from the Department's Information Office (548-4025) or can be retrieved from the system.

For further information about available data or system specifications, users should call the Research and Economic Analysis Division at (808) 548-4355.
