Name: Herbert K. Horita Realty, Inc.*
Address: 2024 North King Street  
Honolulu, HI  96819
Telephone No.: 847-4241

II. AGENT
Name: Community Planning, Inc.
Address: 745 Fort Street, Suite 400  
Honolulu, HI  96813
Telephone No.: 521-7491

Interest in Property (indicate interest in property; submit written evidence of this interest): Civil engineer and planner for landowner/applicant

SIGNATURE**  
Bernard P. Kea, President
Date: August 30, 1991

III. TYPE OF PERMIT(S) APPLYING FOR
( ) A. State lands

*See Exhibit I, Letter of Authorization, for agent.
**If for a corporation, partnership, agency or organization, must be signed by an authorized officer.
(X) B. Conservation District Use
( ) C. Withdraw water from a ground water control area
( ) D. Supply water from a ground water control area
( ) E. Well drilling/modification

IV. LAND PARCEL LOCATION REQUESTED
District: Waimalu, Ewa
Island: Oahu
County: Honolulu
Tax Map Key: 9-8-02: 47
Area of Parcel: 82.357 acres

(See attached General Information and City Zoning Map, Exhibit IA)

Term (if lease): --

(See Exhibit II, Location Maps, Sheets 1 to 5, for division, zone, section and plat and parcel tax maps of the project site.)

INFORMATION REQUIRED FOR ALL USES

I. DESCRIPTION OF PARCEL

A. Location. The project area is situated in the Newtown Estates community of Waimalu, located in the Ewa district of Oahu's leeward area. The site is in proximity to the Aloha Stadium, Neal S. Blaisdell Park and Pearl Ridge Shopping Center and the Waimalu Valley, Waiau and Royal Summit residential and apartment districts.

The project site is located on portion of a vacant landscaped area of an 82.357-acre Royal Summit entry parcel (Lot 881-6-5 of Land Court Application 950; Tax Map Key: 9-8-02: 47) on the south side of the intersection of Kaahale Street and Koko Mai Drive.

The affected area is located in proximity to the following major highways and access roads: Interstate Highway H-1 (1/2 mile), Moanalua Road (3/4 mile), Kaahumanu Street (1/2 mile), and Kamehameha Highway (1-1/4 miles).
B. **Existing Land Uses of Surrounding Area.** The project site is located near many condominium, residential and apartment developments. The A-1 Apartment Harbor Terrace, Chateau, Ke Kumulani and Newtown Villas and Meadows projects are located southwest to southeast of the subject property. Royal Summit and Newtown Estates R-5 zoned subdivisions are situated on the east and north. The A-1 Apartment Newtown Hillside Terrace and P-2 zoned Newtown Golf Driving Range and the private recreational center are located to the northwest and west.

C. **Existing Structures/Use.** Except for a subdivision entrance CRM wall and sign logo in a landscaped area, the project site is vacant. (See colored photo view analysis, Exhibit IIA, pages 1 to 9.)

D. **Existing Access.** Access to the property is obtained over existing public roadways: Komo Mai Drive (60-foot wide right-of-way and 44-foot a. c. pavement) and Kaahele Street (80-foot wide right-of-way and 60-foot a. c. pavement).

E. **Existing Utilities**

Water service: 16-inch main in Komo Mai Drive.
12-inch main in Kaahele Street.

Sewer service: 12-inch main in Kaahele Street.

Electrical and telephone: Underground system located in Komo Mai Drive and Kaahele Street.

F. **Vegetation.** The following trees and plants were observed on the project site: kukui nut (about one-half dozen on the southeast side of the erected CRM wall); "be-still" (one, southwest of the CRM wall, some 26 feet away); wedelias (thickly surrounding the wall and covering much of the landscaped area); and bougainvilleas (large number within the planting space of the wall).

G. **Topography.** The existing wall sign is situated on the south side of Kaahele Street between the 226- and 234-foot elevations. The land slopes steeply into Waimalu Valley below the 226-foot elevation.

H. **Soils.** According to the Soil Conservation Service of the U. S. Department of Agriculture in its "Soil Survey of Islands of Kauai, Oahu, Maui, Molokai and Lanai, State of Hawaii, August 1972," the soils on the project site are the Manana silty clay loam 2 to 6 percent

S. M. K. K. (rev. 9/13/91)
slopes (MoB). This classification consists of well-drained soils on uplands of the Island of Oahu which were developed in material weathered from basic igneous rock. Permeability is moderate to moderately rapid, and the shrink-swell potential is also moderate. Runoff is slow and erosion hazard is slight.

I. Existing Easements Affecting Project Site. Existing water and electrical easements, as shown on Map 33, Land Court Application 950.

J. Historic Sites Affected. Since the project site was previously disturbed by grading in the mid-1970's in accordance with approved construction plans for Keahele Street (see Exhibit IIB), it is highly unlikely that there are any significant archaeological or historical features which may still exist.

II. DESCRIPTION: Describe the activity proposed, its purpose and all operations to be conducted.

A. Design Concept (See Exhibit III). The applicant seeks an after-the-fact CDUA permit to construct a CRM wall structure with the Royal Summit "logo" sign and associated perimeter landscaping and irrigation system and designation of an easement containing 2,000 square feet for wall sign, maintenance and utility purposes. These improvements were installed somewhere in the late 1970s.

This request is submitted as a result of a Notice of Violation issued by the City Building Department for the CRM wall and subdivision sign. The City seeks to have the owner obtain necessary permits to legalize this structure.

(See Exhibit IV for relationship of project site to State Land Use Boundary Districts.)

B. Landscaping. The use of the CRM wall has added to the natural setting and selective use of trees, shrubs and ground cover has given the area a garden-type atmosphere and appearance.

C. Grading. Grading was limited to an approximately 2,000 square foot area of the State Conservation District. The project site was graded with slopes of less than 5 percent.

Site grading was undertaken in accordance with the City and County of Honolulu's Grading Ordinance. As all of the project site was landscaped and planted with ground

518aferita

(rev. 9/13/91)
cover, there will be no adverse impacts from runoff to
down slope areas.

D. **Water Service.** The project site is served with a
sprinkler system from a meter which is connected with a
lateral from the existing 12-inch main in Kahele
Street. The use of potable water to irrigate the
landscape area surrounding the entrance sign should
pose no impact on the existing system.

E. **Electric Service.** Lighting of the Royal Summit
entrance sign was originally implemented by connection
to the existing underground electric system located in
Kahele Street. There is presently no visible
illumination of the project site. There should be no
significant impact on the existing electrical system.

III. **TYPE OF USE REQUESTED**

X **Conditional Use**

Area of Use: 2,000 square feet or 0.046 acre

Name and Distance of Nearest Town or Landmark: 1.0 mile
northeast of Neal S. Blaisdell Park on Kamehameha Highway

Existing Conservation District Subzone: General

(See Exhibit V)

Existing County General Plan Designation: Preservation

Existing County Zoning: P-1 Preservation

Environmental Assessment: See Exhibit VI

IV. **FILING FEE**

X Enclose $50. All fees shall be in the form of cash,
certified or cashier's check, and payable to the State of
Hawaii.

x Additional $50 public hearing fee for commercial use.

V. **SUBZONE OBJECTIVE AND CONCLUSIONS**

It is the intent of this application to obtain an after-the-
fact Conditional Use Permit for the construction and
maintenance of the Royal Summit entrance sign together with
accessory utilities, within a designated easement of
approximately 2,000 square feet of the State Conservation
District. The project will apparently have no adverse

(Rev. 9/13/91)
impacts on the topography, soils, climate or other related environmental factors of the surrounding area.

The area for the conditional use is justified and consistent with the characteristics and definition of General Conservation Subzones, because the project site of 2,000 square feet would not normally qualify, be adaptable or needed for urban uses.

The existing structure is not obtrusive and is surrounded by complementary vegetation and landscaping. This landmark always serves as a welcome sight for homebound residents of the Royal Summit and Newtown Estates areas.

Any previous adverse impacts which may have occurred by grading of the project site based on approved construction plans and construction of the CRM wall and sign were minimized through the compliance with accepted design practices of the State of Hawaii and the City and County of Honolulu.

Therefore, it may be concluded that this use will not adversely affect residents of the surrounding area and is appropriate and reasonable to be granted government approval.
August 8, 1991

State of Hawaii
Board of Land and Natural Resources
1151 Punchbowl Street
Honolulu, Hawaii 96813

Gentlemen:

Herbert K. Horita Realty, Inc., as owner, authorizes Community Planning, Inc. to act as agent to submit a Conservation District Use Application for property designated as Tax Map Key: 9-8-02: 47, situated at Waimalu, Ewa, Oahu, Hawaii.

Very truly yours,

HERBERT K. HORITA REALTY, INC.

ENVIRONMENTAL ASSESSMENT

CONSERVATION DISTRICT USE APPLICATION
WAIMALU, EWA, OAHU, HAWAII
TAX MAP KEY: 9-8-02: POR. 47

I. Landowner/Applicant:
   Name: Herbert K. Horita Realty, Inc.
   Address: 2024 North King Street
             Honolulu, HI 96819
   Telephone No.: 847-4241

II. Approving Agency:
   Name: Board of Land and Natural Resources

III. Agencies Consulted in Making Assessment:
   Name: Office of Conservation and Environmental Affairs, Department of Land and Natural Resources

IV. General Description of the Action's Technical, Economic, Social and Environmental Characteristics: The action involves obtaining an after-the-fact Conservation District Use Application (CDUA) permit. The construction was undertaken as part of the resultant development of Kaahele Street in the mid-1970's for the Newtown project at Waimalu, Ewa, Oahu. The project site was utilized in the late 1970's to provide a "Royal Summit" entry sign located on a CRM wall, surrounding landscaping and associated improvements at the intersection of Komo Mai Drive and Kaahele Street. This improvement could be socially identified as being economically appropriate only for this area of Oahu.

The value of the property is expected to nominally increase.

V. Summary Description of the Affected Environment:

A. Existing Land Uses of Surrounding Area: The project site is located near many condominium, residential and apartment developments. The A-1 Apartment Harbor Terrace, Chateau, Ke Kumulani and Newtown Villas and Meadows projects are located southwest to southeast of
the subject property. Royal Summit and Newtown Estates R-5 zoned subdivisions are situated on the east and north. The A-1 Apartment Newtown Hillside Terrace and P-2 zoned Newtown Golf Driving Range and the private recreational center are located to the northwest and west. See Plat A for location and site map.

B. Vegetation: The following trees and plants were observed on the project site: kukui nut (about one-half dozen on the southeast side of the erected CRM wall); "be-still" (one, southwest of the CRM wall, some 25 feet away); wedelias (thickly surrounding the wall and covering much of the landscaped area); and bougainvilleas (large number within the planting space of the wall).

C. Topography: The existing wall sign is situated on the south side of Kaahele Street between the 226- and 234-foot elevations. The land slopes steeply into Waimalu Valley below the 226-foot elevation.

D. Soils: The soils on the project site consist of well-drained soils on uplands which were developed in material weathered from basic igneous rock. Permeability is moderate to moderately rapid, and the shrink-swell potential is also moderate. Runoff is slow and erosion hazard is slight.

E. Historic Sites: Since the project site was previously disturbed by grading in the mid-1970's in accordance with approved construction plans for Kaahele Street, it is highly unlikely that there are any significant archaeological or historical features which may still exist.

VI. Identification of Major Impacts: Since all required work has been completed, there are no adverse impacts created within the immediate area of the project site.

VII. Mitigation Measures: As all improvements are existing, there is no need for mitigation measures.

VIII. Determination: Since no significant effects on the environment are expected from this appropriate existing use of the project site, a negative declaration for this action should be determined in lieu of the need for an environmental impact statement, pursuant to Chapter 343 of the Hawaii Revised Statutes.

IX. Findings and Reasons Supporting Determination: In considering the significance of potential environmental effects, the landowner/applicant has considered the sum of
effects on the quality of the environment and evaluated the overall cumulative effects of the proposed action. As a result of these considerations, the applicant has determined that:

A. The proposed action does not involve an irrevocable commitment to loss or destruction of any significant natural or cultural resource;

B. The proposed action increases the range of beneficial uses of the environment;

C. The proposed action is in concert with the State and County's long-term environmental policies, goals and guidelines as expressed in Chapter 343, HRS, and any revisions and amendments thereto, court decisions and executive orders;

D. The proposed action does not adversely affect the economic or social welfare of the community or state;

E. The proposed action does not involve secondary impacts, such as population changes or effects on public facilities that are not already contemplated;

F. The proposed action does not affect public health;

G. The proposed action does not involve degradation of environmental quality;

H. The proposed action does not affect rare, threatened or endangered species or habitats;

I. The proposed action does not affect air or water quality or ambient noise levels;

J. The proposed action does not affect an environmentally sensitive area such as floodplain, tsunami zone, erosion-prone area, geologically hazardous land, estuary or coastal waters; and

K. The proposed action is individually limited and cumulatively does not have any effect upon the environment.

Since the present use of the affected area within the State Conservation District has not been a cause of adverse impacts, a determination for negative declaration for the requested action is reasonable.
