

File No.	Island	Street Address	City	ZIP Code	TMK	Applicant (as appropriate)	Exempt. HAR 11-200.1-15(c)	Action: Title & Description
HWY-M 2.481-25	Maui	Emergency Repairs, Honoapiilani Highway, Route 30, Mile Post 13.72 to 14.49	Lahaina, Olowalu	96761	Highway right-of-way (ROW) in vicinity of TMKs:(2) 4-8-002 and 4-8-003		Type 1: Part 3, Item 3 and Type 2: Part 1, Item 3	Emergency repairs are necessary because failure of the roadway due to shoreline erosion would cause a closure of Honoapiilani Highway and cut off the primary access to all areas of the island west of the project site, including Lahaina. The proposed action involves shifting the highway travel lanes roughly twelve (12) feet mauka of their current location but remain within the highway ROW. The shift will move the travel lanes roughly twelve (12) feet away from the shoreline, which has been eroding at a rate of up to roughly 0.86 foot per year according to the University of Hawaii’s Coastal Research Collaborative. The repair is a short- to mid-term response to shoreline erosion; HDOT is planning a long-term response that will realign the highway mauka.
