		Moanalua Rd (site #13); located on mauka side from Moanalua Loop to Pearlridge ES	‘Aiea	96701			2	Erosion Control Improvements at Moanalua Road Near Pearlridge Elementary School: The project includes, but is not limited to: removal of sediment along the benches and restoring the existing concrete ditches, reconstructing any uncovered damaged concrete ditches, removal of select shower trees, re-establishment and hardening of the eroded diversion ditch near the top of the site, and slope flattening with installation erosion control blanket on the eastern end of the project site.	
		St. Louis Drive	Honolulu	96816			3, 4	Rock Slide Mitigative Improvements at St. Louis Drive, Site 057-A: The project includes installation of reinforced shotcrete covering an approximately 300-foot-long by 12-foot-wide, steep cut slopes adjacent to Saint Louis Drive. Prior to the installation of shotcrete, vegetation and loose rocks will be the removed from within the shotcrete limits. A drainage mat will be installed beneath the shotcrete layer to relieve hydrostatic pressure behind the shotcrete. The shotcrete will be reinforced with steel mesh, rebar, and grouted anchors. The top layer of shotcrete will be sculpted and color-tinted to match the surrounding geology.
