Submitted via: SHPD HICRIS

Dear Dr. Downer:

Subject: National Historic Preservation Act (NHPA)
Request to Initiate Section 106 Consultation
North Kona Sewer Pump Station
Clean Water State Revolving Fund (CWSRF) Project No. C150080-31
Honokōhau and Kealakehe Ahupua'a, North Kona District, Island of Hawai'i
TMK: portions of (3) 7-4-008:072, 077, 078, and 090 (formerly 077 por. 1); and (3) 7-3-009:999
State Historic Preservation Division (SHPD) Project No. 2021PR00594

On behalf of the Environmental Protection Agency (EPA) and the U.S. Department of Commerce Economic Development Administration (EDA), the State of Hawai'i Department of Health (DOH) requests to initiate Section 106 consultation with the State Historic Preservation Officer (SHPO) for the proposed North Kona Sewer Pump Station project located in Honokōhau and Kealakehe Ahupua'a, North Kona District, Island of Hawai'i.

The proposed project may be eligible to utilize federal funding that is administered by the DOH through the CWSRF and potential grant funds from the EDA. It will be considered a federal action and undertaking, as defined by Section 106 of the NHPA of 1966 (as amended 2014), Title 54 of the United States Code (54 USC) Section 306108, and Title 36 of the Code of Federal Regulations (36 CFR) Part 800.

The EPA has authorized the DOH to act on behalf of the EPA regarding NHPA Section 106 notification and consultation. This letter requests to initiate the Section 106 consultation process with the SHPO and State Historic Preservation Division (SHPD) in accordance with 36 CFR, Section 800.3.

The DOH may provide funding under the CWSRF to the County of Hawai'i, Department of Environmental Management (DEM) for the North Kona Sewer Pump Station project, and the EDA may also provide grant funds for this project.

Overview of Undertaking

The County of Hawai'i DEM is proposing to develop a North Kona Sewer Pump Station (SPS) within TMK: (3) 7-4-008:090 (formerly 7-4-008:077 por. 1) in Honokōhau Ahupua'a. The North Kona SPS will consist of a below-grade pump station, above-grade operations, an emergency generator building, and a fuel storage tank. The North Kona SPS also includes the construction of two new sewer lines: a gravity line and a dual force main. The proposed pump station would be located *makai* (seaward) of the Māmalahoa Trail (State Inventory of Historic Places [SIHP] # 50-10-27-00002), and the above-grade operations building and fuel storage would be located *mauka* (inland, toward the mountains) of the trail, approximately 260 feet (ft) upslope of the pump station. Both portions of the facility will be connected by a 12- to 15-ft-wide access driveway crossing the Māmalahoa Trail. The below-grade pump station will be located just *mauka* from existing manholes to allow connection to sewer lines constructed by the State Department of Transportation along the Queen Ka'ahumanu Highway. Underground electrical and control lines and the potable water line will be placed below the access driveway. This configuration will minimize disturbance to the Māmalahoa Trail which lies between the two facilities.

To avoid additional impacts to the Māmalahoa Trail during construction, a temporary access route extending from TMK: (3) 7-4-008:090 (formerly 077 por. 1) through TMKs: (3) 7-4-008:077 and 078 is proposed. This temporary access route is within an existing planned easement for the Kanalani Street extension, which is part of the Lanihau subdivision. The temporary access corridor will extend approximately 265 m (870 ft) north of the pump station site, terminating at the northern boundary of TMK: (3) 7-4-008:078.

The project also involves the installation of new sewer lines. One of the proposed lines is an 8-inch gravity line within the Hina Lani right-of-way (ROW) in TMK: (3) 7-3-009 in Kaloko Ahupua'a. This line ends at the *mauka* side of the Queen Ka'ahumanu Highway ROW. This line extends from the sewer system located within the County Homes of Ulu Wini affordable housing development project to an existing stub located on the *mauka* side of the Queen Ka'ahumanu Highway ROW. Additionally, new force main lines (8- to 20-inch diameter) are proposed within a landscaping easement at TMK: (3) 7-4-008:072 in Kealakehe Ahupua'a, paralleling the Queen Ka'ahumanu Highway between Kealakehe Parkway and the Kealakehe Wastewater Treatment Plant. These force mains will connect to the two 20-inch diameter lines already in the ground between Kealakehe Parkway and the pump station.

Area of Potential Effect (APE)

The North Kona SPS Project APE is approximately 14.98 acres (6.06 hectares). The APE, which is depicted on a 2018 aerial map (*Attachment A*), includes:

- The proposed 2.596-acre SPS site located within TMK: (3) 7-4-008:090 (formerly 7-4-008:077 por. 1);
- The temporary access route extending from TMK: (3) 7-4-008:090 (formerly 7-4-008:077 por. 1) through TMKs: (3) 7-4-008:077 and 078;
- The proposed gravity sewer line corridor within the Hina Lani Street ROW; and
- The proposed force main sewer lines corridor located *makai* of Queen Ka'ahumanu Highway in TMK (3) 7-4-008:072.

All project staging will be confined within the APE limits shown in *Attachment A*.

Cultural, Historical, and Archaeological Background

Cultural Surveys Hawai'i, Inc. (CSH) completed a literature review and field inspection (LRFI) for the current undertaking (Bautista et al. 2021) for inclusion in the project's Draft EA. The LRFI was designed to determine the likelihood that historic properties may be affected by the project and, based on findings, consider cultural resource management recommendations to facilitate project planning and support the project's historic preservation and environmental review compliance.

The literature review identified 29 previously identified historic properties situated within approximately 30 m of the project APE (*Attachment C*); of these, 19 sites are indicated within the APE bounds. Site types include *pāhoehoe* excavations, trails, mounds, lava tubes, cairns, enclosures, walls, a modified outcrop, petroglyph, pecked *pāhoehoe* basin, and battered area. Site ages range from pre-Contact through the historic era. One of the trail sites, SIHP # 50-10-27-18099, is the centerpiece of an archaeological preservation easement on the former Lanihau property (current ownership is West Hawaii Business Park, LLC) referred to as the "Honokōhau Historic Trail" interpretive complex (Tuggle and Tomonari-Tuggle 2008). This interpretive complex also contains a portion of the Māmalahoa Trail that does not overlap the APE bounds.

The field inspection confirmed the presence of eight historic properties within the APE: SIHP #s 50-10-27-00002, -18084, -18091, -18099, -21588 (and likely an overlapping segment of -23023), -23026 (one of five component features), and SP-3 (*Attachment B*). SIHP # -18083 was not confirmed during the field inspection but may still be present within the pump station parcel. SIHP # -18097 is a large complex bisected by the pump station construction access corridor, however, none of its component features were observed within the project corridor. A branch of the SIHP # -23353 trail extends through the southeastern corner of the pump station parcel; while this branch was not found during the field inspection, its location was subsequently confirmed with Rick Gmirkin of Ala Kahakai National Historic Trail in March 2022 and therefore it is also depicted in *Attachment B*. The LRFI study noted that, while no newly identified potential historic properties were observed during the field inspection, there remains some potential for the discovery of additional sites during a more intensive survey, given the poor ground visibility, particularly within the pump station site. The results of the literature review indicated additional archaeological work may be warranted for the North Kona SPS Project in order to obtain a project finding of "no adverse effect" in accordance with federal regulations (36 CFR 800.5).

Consultations

Section 106 consultation letters have also been sent to Native Hawaiian organizations, consulting parties, and/or interested persons that might attach significance to this area and have invited them to participate in the process. The mailing list is provided in *Attachment D*.

We welcome any comments that you may have on this project's proposed improvements.

We are particularly interested in any information you may have on the historic and cultural sites that have been recorded in the area. In addition, if you are acquainted with any persons or organizations that are knowledgeable about the proposed project area or any descendants with ancestral, lineal, or cultural ties to, cultural knowledge or concerns for, and/or cultural or

Alan S. Downer, PhD, Administrator

religious attachment to the proposed project area, then we would appreciate receiving their names and contact information.

We would appreciate a written response within thirty (30) calendar days from receipt of this letter. Please address any written comments to email: Chane.Hayashida@doh.hawaii.gov or the following address:

Attn: Chane Hayashida
Department of Health, Wastewater Branch
2827 Waimano Home Road, Room 207
Pearl City, HI 96782

Should you have any questions, please contact Chane Hayashida at (808) 586-4294.

Sincerely,

SINA PRUDER, P.E., CHIEF
Wastewater Branch

Project Summary:

(Summarize proposed action and purpose/need in less than 200 words in the space below):

The original NHPA Section 106 notice was published in The Environmental Notice on September 8, 2023 and comments were due no later than October 9, 2023. The Department of Health (DOH) is republishing the original letter dated August 31, 2023 and is extending the comment period.

The DOH initiated Section 106 of the NHPA consultation with the State Historic Preservation Division (SHPD) in accordance with 36 CFR Part 800. In 1990, the U.S. Environmental Protection Agency (EPA) designated

the DOH to act on EPA's behalf, pursuant to 36 CFR §800.2 (c) (4), when initiating Section 106 of the NHPA process in connection with projects funded under the Hawai'i Clean Water State Revolving Fund (CWSRF). The DOH is providing funding under the CWSRF to the County of Hawai'i for the North Kona Sewer Pump Station. The proposed project will utilize federal funding and is considered an undertaking, as defined by Section 106 of the NHPA, 54 U.S.C. §306101 et seq., and 36 CFR Part 800.

The undertaking consists of a below-grade pump station, above-grade operations, an emergency generator building, and a fuel storage tank. The North Kona SPS also includes the construction of two new sewer lines: a gravity line and a dual force main. The work is located in Honokōhau and Kealakehe Ahupua'a, North Kona District, Island of Hawai'i. The proposed pump station would be located *makai* (seaward) of the Māmalahoa Trail (State Inventory of Historic Places [SIHP] #50-10-27-00002), and the above-grade operations building and fuel storage would be located *mauka* (inland, toward the mountains) of the trail, approximately 260 feet (ft) upslope of the pump station. Both portions of the facility will be connected by a 12- to 15-ft-wide access driveway crossing the Māmalahoa Trail. The below-grade pump station will be located just *mauka* from existing manholes to allow connection to sewer lines constructed by the State Department of Transportation along the Queen Ka'ahumanu Highway.

The DOH has engaged SHPD to determine the presence of potential sites of historic importance within the vicinity of the project area as well as the potential impact of the project on such sites, if present.
