Final Environmental Impact Statements

<u>Project Name, Location, Responsible Agency</u>	<u>Description</u>	<u>Suspense Date for Comments</u>
1. <u>Puukapu Flood Control Project, Waimea, Hawaii Department of Land and Natural Resources</u>	Previously reported in EIS Newsletter	Currently Being Processed by this Office
2. <u>Honolulu Harbor Terminal Annex of Foreign-Trade Subzone 9A, Honolulu, Cahu-U.S. Department of Commerce</u>	Previously reported in EIS Newsletter	Currently Being Processed by this Office
3. <u>Expansion of Foreign-Trade Subzone 9A (HIRI OIL Refinery, Honolulu, Hawaii - U.S. Department of Commerce</u>	Previously reported in EIS Newsletter	Currently Being Processed by this Office
4. <u>Proposed Telescope and Observatory Facilities- Mauna Kea (Summit), Hawaii- Canada-France-Hawaii Telescope Corporation</u>	The proposed development program consists of the construction of a large optical telescope of 3.6m aperture (141.2 inches), in conjunction with laboratories, a workshop and other facilities required for the operation and maintenance of the telescope. The proposed development would be a four-year construction program which will consist of the placing of the observatory foundation and piers in 1974, construction of the cylinders in 1975, construction of the hemisphere in 1976 and installation of the telescope in 1977.	Currently Being Processed by this Office
5. <u>Eleele-Hanapepe Wastewater Management System, Eleele and Hanapepe, Kauai - Depart- ment of Public Works, County Of Kauai</u>	The proposed ultimate plan calls for the collection of and diversion of sewage from Eleele and Hanapepe to a secondary treatment plant. The proposed area of the plant is presently planted	Currently Being Processed by this Office

in sugar cane. It is located off the Waialo Road, adjacent to the Kauai Electric Company. The ultimate method of disposal of the sewage effluent will be decided upon in the future, but the initial disposal method will be either by deep well injection or discharge of effluent at the shoreline. Initial flows are anticipated to be up to 0.4 mgd, ultimate plant capacity is 1.4 mgd (based on the conditions projected for the County's General Plan.)

The proposed stream improvements project starts 250 feet beyond Makanani Drive. The project consists of a modified boulder basin and about 1,400 lineal feet of reinforced concrete lined channel. The channel is designed for a basin area of 306 acres and a peak flow of 1,500 cfs. The project alignment follows the existing stream bed and the new stream right-of-way requires little acquisition of land.

Currently Being Processed by this Office

The available State owned land for the Governor's Low Cost Housing Program in Kealahou, North Kona, totals 1550.0 acres, designated by TDK 7-4-08.17. The proposed project involves the subdivision of 160.0 acres of the parcel into seventy (70) houselots of approximately 15,000 square feet. The subdivision project includes improvement of the access roadway and extension of utility lines.

3. Relocation of Hanalei Elementary School, Hanalei, Kauai - Department of Accounting and General Services

4. Proposed Flood Control Improvements, Wailupe Stream, Honolulu, Oahu - U.S. Army Corps of Engineers

The proposed plan of improvement provides for excavation of an outlet channel to a distance of 200 feet seaward of the stream mouth, construction of a 30-foot long riprap channel, lining of 8,650 feet of the Wailupe channel with concrete, lining of 1,000 feet of the Kului tributary with concrete, excavation of the debris basin from a capacity of 550 to 1,300 cubic yards and installation of a 4-foot high chain link fence on both sides of the channel.

5. Site Selection Study of the Honolulu District Court, Honolulu, Oahu - Department of Accounting and General Services

The site recommended for the New District Court is located in the Honolulu Central Business District. The site is designated by TMK:2-1-17: 3 and 4 and contains 51,151 square feet. It is located adjacent to the Armed Services YMCA and across the street from the Hawaiian Telephone Company. Upon completion of the new court facility, the existing court building will be vacated and will possibly be utilized by another agency.

6. Disposition of Orange Herbicide by Incineration, Department of the Air Force

The proposed action is the incineration of approximately 2.3 million gallons of Orange Herbicide in a remote area near or on Johnston Island in the Pacific Ocean. The 2.3 million gallons include approximately 1.4 million gallons already stored on Johnston Island and 0.86 million gallons currently stored at the Naval Construction Battalion Center, Mississippi. The incineration would either take place during a 22-26 day period on-board a specially designed vessel in the open tropical ocean west of Johnston Island or during a 200 day period in an incineration facility that would be constructed on Johnston Island.

7. Mahelelona Hospital Sewerage System, Kapaa, Kauai - Department of Accounting and General Services

The action proposed is the construction of interim facilities for sewage treatment and disposal to eliminate about 100,000 gallons per day of cesspool effluent now discharging into the near shore coastal waters. The present sewage flows originate from the Samuel Mahelelona Memorial Hospital and Kapaa School (future sewage contribution will occur from the proposed Elderly Citizen's Housing). This project is a temporary measure to be operational until the County of Kauai can complete construction of the Kapaa regional sewerage system. July 8

8. Corporation Yard, Honolulu, Oahu - Building Department, City and County of Honolulu

The proposed project is the development of a new Corporation Yard at a proposed site in Halawa Valley (TRK:9-9-10.27). The 43 acre site will house some of the facilities from the present Kewalo Corporation Yard, the Department of Building Maintenance Yard and the Department of Recreation Service Centers. July 8

9. Fire and Police Training Facilities, Waipahu, Oahu - Building Department, City and County of Honolulu

The proposed project is a joint training facility for the Fire and Police Departments of the City and County of Honolulu. The total project will occupy approximately fifteen (15) acres of land in an area immediately mauka of the existing Waipahu Incinerator (bordered by Waipahu Depot Road and Ted Makalena Golf Course). The project will include the following: Administration/Classroom Bldg., gymnasium, Training Pool, Outdoor Fire-training area with fire-training bldg., radiological bldg., firing range, canine training bldg., driver-training course, drill field with helicopter landing pad, and parking area. July 8

10. New Baseball Diamond and Appurtenances for the University of Hawaii's Manoa Campus, Honolulu, Oahu - Department of Accounting and General Services

The proposed Baseball Diamond will be constructed on open lands immediately kokohead of Cooke Field, presently being utilized as a temporary parking area. In addition to the baseball diamond, a backstop, fences, a scoreboard, illumination for night games and bleachers for about 2,000 spectators will be provided. July 12

and County of Honolulu

3. Hawaii State Correctional
Master Plan: Phases I and
II--Oahu Intake Service
Center/Community Correctional
Center, Honolulu, Oahu -
State Law Enforcement
and Juvenile Delinquency
Planning Agency

The proposed project consists of grading and paving an existing parking area, and constructing a walkway and light fixtures.

The proposed project involves the construction of a single story, wood-framed building to house the first of several State Human Service Team in Kalihi-Palama under the Progressive Neighborhood Program of the Governor's Office. Included are areas for children's den, conference rooms, general office area, reception area, waiting room, toilet and storage rooms.

The proposed project involves the establishment of a criminal justice system in Hawaii based primarily on in-community programs. Implementation of the Correctional Master Plan is projected by phases to gradually replace the existing structures of the present Hawaii State Prison. All phases of the Master Plan will be constructed on seven acres; approximately 125,522 square feet will be building space. A module design system consisting of low rise, two story modules is proposed with no structure to be higher than the present structures.
