REGISTER OF CHAPTER 343, HRS DOCUMENTS

The OEQC Bulletin is a semi-monthly publication. The publication dates of the bulletin are the eighth and twenty-third of each month. Applicants should deliver an appropriate number of Draft and Final EISes to the accepting authority before submitting copies to OEQC for distribution and publication. Environmental Assessments should be submitted to the accepting authority directly. Based on the assessment, the accepting authority will submit to OEQC a determination of a Negative Declaration or a Preparation Notice for publication in the bulletin. Draft and Final Environmental Impact Statements must be received by the fifth and twentieth days of the month for publication in the respective issue. Negative Declarations and Preparation Notices must be received at least five working days prior to the publication date. All documents submitted for publication in the OEQC Bulletin should be delivered to the Office of Environmental Quality Control, 465 South King Street, Room 104, Honolulu, Hawaii 96813. To ensure proper processing of documents, please attach OEQC Bulletin Publication Form with all submittals. These forms can be obtained by calling OEQC at 548-6915.

NEGATIVE DECLARATIONS

The following actions have been determined to have little or no impact upon the environment. Environmental Impact Statements are not required of these projects. Those who wish to contest this determination have a 60-day period, from this publication date, in which to initiate litigation. Any questions regarding the following projects should be directed to the listed contacts.

HAWAI'I

HOIKI-KAPOHO TRANSMISSION PIPELINE

Location: Puna, Hawaii
TMK: 1-3-02:14, 69 & 70

Proposing Agency: County of Hawaii
Agency: Department of Water Supply
Contact: H. William Sewake (969-1421)

The Hawaii County, Department of Water Supply is proposing a water transmission pipeline project which will involve the alignment of new piping within an existing easement except for the portion of piping within agricultural lands owned by Amfac and A & O International. The new easement through these properties will facilitate the new pipeline, service roads and necessary cuts and fills.

The excavation and pipeline emplacement involves a corridor approximately 26,000 feet long running from Pohiki County Road to County Road 137 near Pohiki. Disturbance will involve a swath associated with construction vehicles maximum 50 feet in width, and also the trench itself, which will measure approximately 3 1/2 feet in depth and 3 feet in width.

The seaward 3,000 feet of the corridor cuts through a mostly native forest, while the upper 7,000 feet intersect papaya orchards and a few thin sections of native forest. Improvement of water quality is to be achieved by connecting the current Kapoho system to the existing Pahoa system by way of constructing the 26,000 linear feet of 8" water transmission pipeline.

HANA LIKE INC. - MOORINGS
Location: South Kona, Hawaii
TMK: N/A

Permitting Agency: Department of Land and Natural Resources
Contact: Jay Lembeck (548-7337)
Applicant: Hana Like, Inc.

The applicant has submitted an after-the-fact application to maintain commercial mooring use of State-owned submerged lands at Kealakekua Bay, South Kona. The existing moorings are a conditional use within the Protective subzone of the Conservation District and are also within the State's Kealakekua Bay Marine Life Conservation District, established in 1969 to conserve and protect aquatic resources. Additionally, boating in Kealakekua Bay is specially regulated by the Department of Transportation since 1970 (amended Chapter 75-30, 1981) and set aside by Executive Order in 1971 to the Division of State Parks. Due to the lack of small boat harbors and boat ramps in the Kona area, it is reported to be imperative to the livelihood of this company to maintain their current moorings in Kealakekua Bay.

HAWAIIAN CRUISES MOORING
Location: South Kona, Hawaii
TMK: N/A
Permitting Department of Land and Agency: Natural Resources Contact: Jay Lembeck (548-7837)
Applicant: Hawaiian Cruises, Ltd.

The applicant is proposing the continuation of use of the existing mooring installed in 1953. Due to the need to protect the natural underwater environment in Kealakekua Bay, it is reported to be imperative to the livelihood of the applicant to maintain their current mooring(s) in Kealakekua Bay.

The moorings are within the State's Kealakekua Bay Marine Life Conservation District, which was established originally in 1969 to conserve and protect aquatic resources. Additionally, boating in Kealakekua Bay is specially regulated by the Department of Transportation since 1970 (amended Chapter 75-30, 1981) and set aside by Executive Order in 1971 to the Division of State Parks.

WILLIAM BLOK - MOORINGS
Location: South Kona, Hawaii
TMK: N/A
Permitting Department of Land and Agency: Natural Resources Contact: Jay Lembeck (548-7837)
Applicant: William Blok

The applicant has submitted an after-the-fact application to maintain commercial mooring use of State-owned submerged lands at Kealakekua Bay, South Kona. The existing moorings are a Conditional use within the Protective subzone of the Conservation District and are also within the State's Kealakekua Bay Marine Life Conservation District, established in 1969 to conserve and protect aquatic resources. Additionally, boating in Kealakekua Bay is specially regulated by the Department of Transportation since 1970 (amended Chapter 75-30, 1981) and set aside by Executive Order in 1971 to the Division of State Parks. Due to the lack of small boat harbors and boat ramps in the Kona area, it is reported to be imperative to the livelihood of this company to maintain their current moorings in Kealakekua Bay.

PANAEOA AGRICULTURAL PRODUCT MARSHALLING AND PROCESSING CENTER
Location: Waimea, Hawaii
TMK: 2-2-56:55
Proposing State of Hawaii Agency: Department of Agriculture Contact: Yukio Kitagawa (548-7101)

The State Department of Agriculture is proposing the development of an agricultural product marshalling and processing center. The project site is on State land within the Panaewa Agricultural Park. The site's 4.415 acres, was set aside for such use in the planning of the Panaewa Agricultural Park. Approximately 1.5 acres will be utilized for the initial construction of the marshalling/processing center, and consists of a 10,000 square feet building to assemble, process, package and ship agricultural products. The facility will be of fabricated steel and provide storage, chill reefer space, office, conference room and restroom on prepared site with paved loading and parking areas. The construction will not entail any special requirements as the facility will be of standard construction materials. Further, since the existing infrastructure is adequate to handle the development, construction and building permits will not require any special consideration. The estimated project cost including site preparation, construction, engineering and inspection is estimated at $1.5 million.

MAUI

BEACH ACCESS CONSTRUCTION AND LANDSCAPE IMPROVEMENTS
Location: Kapalua, Maui
TMK: 4-2-01:34 & "Offshore" Beach
Permitting Department of Land and Agency: Natural Resources Contact: Jay Lembeck (548-7837)
Applicant: Maui Land & Pineapple, Co.

The applicant, Maui Land & Pineapple Company, Inc., is proposing to install two improved mauka-makai pedestrian access from the proposed Ritzi Carlton project to Honokahua Beach. The accesses will be approximately 4' to 5' wide, constructed of portland cement or asphaltic concrete pavement and lit with low pathway lights.
lights will be directional pointing toward the pathway, and each access will have a sign to identify its purpose. The pathway along the Ritz Carlton western boundary will be for public use and the access from the beach/luau facility will be provided for the Ritz Carlton guests.

The proposed project is part of a larger planned development which the applicant is proposing to initiate within the next year. This larger area is within the Urban District and is for a new 550-room resort hotel that will include a luau/beam facility and tennis club. The planned hotel is presently in the Special Management Area Permit Application review process with the County of Maui. The total project area encompasses approximately 22,000 square feet. To the south of the project site is the Lower Honoapilani Road. The section of the road which is located within Kapalua is owned by the applicant, and the owner has requested and obtained approval from the County to close the right-of-way so pedestrian use may be allowed in the area. Traffic will be rerouted onto Office Road and the Honoapilani Highway.

In addition to the proposed pedestrian pathways, the applicant proposes to remove the existing koa haule and ironwood trees and replace them with appropriate landscaping such as ground cover or grass that would more effectively help the property's soil in place. The replanting should help to stabilize the steep area of the property as well as improve views through the shoreline area.

WAHIKULI EXPLORATORY WELL
Location: Lahaina, Maui
TMK: 4-5-21:92
Proposing Agency: Department of Land and Natural Resources
Contact: K. Gordon Akita (548-7496)

The Department of Land and Natural Resources is proposing a project which involves the drilling, casing and testing of a well 16' in diameter. It is about one mile north of Lahainaluna High School and two miles inland from the coast.

The project is part of the "Statewide Exploratory Well Drilling Program." The program’s goal is to locate and to gather hydro-geological data on the quality and quantity of new groundwater resources.

If the well proved successful, it will be turned over to the State's Housing Finance Development Corporation as a water source for their housing project in Lahaina. If not, the well will be sealed and the area restored, as much as practical, to its natural condition.

The well site is already cleared and graded. A working pad, approximately 5,000 square feet, will be used for the drilling equipment and material storage. An existing road will be used to provide access to the site. The ground elevation of the well is 1,050 feet. The well will be approximately 1,100 feet deep with 1,050 feet of casing. The estimated cost of this project is $821,000 and is anticipated to take six months to complete.

HOOKIPA PARK IMPROVEMENTS
Location: Makawao, Maui
TMK: 2-5-04:25
Proposing Agency: Department of Parks and Recreation
Contact: Masaru Ahe (245-7230)

The County of Maui, Department of Parks and Recreation is proposing several minor repairs and improvements for Hookipa Park. These improvements will include roadway and shoulder widening, additional parking, road resurfacing, guard rail and curb additions, minor grading, drainage system additions, rock wall repair and reconstruction, walkway construction, and outdoor shower reconstruction. The Hana Highway is located on the mauka boundary of the park site with Lower Paia located to the east and Kuau located to the west. The estimated cost of the project is approximately $425,000.

KA HALE AKE OKA - A MAUI COMMUNITY HOMELESS SHELTER
Location: Walluku, Maui
TMK: 3-8-46:21B
Proposing Agency: Department of Human Concerns
Contact: Connie Anderson (243-7351)

The Catholic Charities of the Diocese of Honolulu is proposing to develop a homeless shelter to serve the needs of Maui County. The property that this facility will be located on is owned by the County and is within the Ka Hale Ake Oka Subdivision. Currently, this subdivision has preliminary approval from the Department of Public Works. The subject land, also referred to as County of
Garage and Dump Site is located just beyond Maui County Correctional Facility on Waiale Drive.

There are no buildings or utilities on this site except for a 24' water transmission line running parallel to Wailuku sugar haul road. The vegetation is dense forest and shrubs and the site slopes towards Waiale Reservoir.

The shelter is expected to accommodate approximately 200 residents/clients. The 5 acre site will essentially be divided in half with family housing on one side and dormitories with support facilities on the other side totaling 30,000 square feet. Access will be along Waiale Drive. The following is a space program outline:

30 Family Units (12 Buildings, 12,400 sq. ft); Single Dormitories (1 Building, 4,500 sq. ft); Kitchen & Dining (1 Building, 3,900 sq. ft); Thrift Store & Food Bank (1 Building, 3,600 sq. ft); Child Care (1 Building, 2,000 sq. ft); Administration (1 Building, 3,600 sq. ft).

The design of the shelter is expected to be all single story buildings having Hawaiian character in both form and scale with an emphasis on outdoor spaces and landscaping.

---

**OAHU**

**GREG REESER - ADDITION/RENOVATION TO EXISTING SINGLE FAMILY DWELLING**

**Location:** Honolulu, Oahu

**TMK:** 2-9-33:24

**Permitting:** Department of Land and Natural Resources

**Agency:** Ed Henry (548-7837)

**Contact:** Greg Reeser

The applicant is proposing the remodeling of an existing one-story single family dwelling of approximately 2,000 square feet floor area. The dwelling consists of three bedrooms, one kitchen, a living room, and a rumpus room. The construction is of a combination hollow tile and wood frame method. Access is provided by a combination of easements comprising Huelani Street and its tributary Huelani Place. The applicant wishes to remodel the first floor and add the structural modifications necessary for support of an additional floor above. The home is located approximately 500 foot elevation on a level plateau bounded by a sharp rise at the mauka side of the property.

The project site is located on the upper slopes of Manoa Valley at the boundary between the Residential and Conservation Zones. The lot itself is a level grassy area bounded by the tree line of the ridge beginning immediately above the existing residence. The property is serviced by an existing driveway/approach with all city services in place underground along the driveway.

---

**SAND ISLAND INFRASTRUCTURE IMPROVEMENTS**

**Location:** Honolulu, Oahu

**TMK:** 1-5-41

**Proposing Agency:** Department of Land and Natural Resources

**Contact:** Russell Fukumoto (548-7519)

The Sand Island Business Association (SIBA) consists of 116 small businesses, such as contractors and warehouses that currently operate in the 73 acre district mauka of Sand Island State Park. All tenants are on a month-to-month lease agreement with the landowner, the State of Hawaii. SIBA has negotiated an agreement with the State to privately finance the necessary improvement to bring the subject parcel up to County standards in return for a 55-year lease. This agreement would pay for improvements to the storm drainage system, underground utilities, paved streets, sewer and water systems.

SIBA will subdivide the larger parcel of 68 acres into light industrial lots in accordance with City & County standards. All existing infrastructure must also be brought up to applicable County standards. The smaller parcel of 3.5 acres will be developed by the landowner for limited commercial use. The adjacent portions of Sand Island Parkway Road will be improved by the State of Hawaii in conjunction with SIBA. These improvements to the road must be coordinated with the SIBA industrial park construction to assure continued access for the tenants. This will also apply to the construction of the major storm drains and major sewer main connections. The following are proposed project improvements to be implemented by the Sand Island Business Association:

**Grading Project** - The project site is relatively low with elevations of about 4.5 feet to 10 feet above mean sea level. Due to the low elevations and lack of drainage facilities, localized ponding occurs on roads and individual lots during and after rainstorms. To mitigate this localized ponding problem, it is proposed that new drainage systems consisting of catchbasins, grated inlets, and underground conduit systems will be built in the proposed street system and extended into the lots that will be subdivided. For certain lots that are larger in size, localized grading will be necessary to drain portions of their area to the new streets and on-site grated inlets.

**Street Project** - The State of Hawaii proposes to improve the roadway from the sewage treatment plant to the State Recreational park boundary with a 60 feet wide right-of-way and sufficient pavement width for two lanes in each direction, or one through lane with left-turn lanes. The parkway road will probably be constructed to State standards, and therefore, remain under State ownership and maintenance.

The interior roadway system will have 56 foot wide rights-of-way and will be built to City & County standards. These interior streets will consist of 36 foot wide asphaltic concrete pavement and 2 foot wide concrete gutters, concrete curb and 8-foot wide concrete sidewalks on each side of the streets. Openings will be provided in the sidewalks for street trees.

**Storm Drainage System Project** - It is proposed that the storm runoff from the project site will be collected in the street catch basins and grate inlets located in lots and conveyed by underground drain conduits to two proposed major drain outlet facilities planned by the State for construction within Sand Island Park Roadway. The northern major drain outlet facility is located across the sewage treatment plant and are planned to discharge into Honolulu Harbor at the Coast Guard Station-Matson container yard boundary. The southern major drain outlet facility is planned along the boundary of the fisheries station-State recreational park. Those drainage systems on the individual lots will remain private and will be maintained by the respective tenants.

**Sanitary Sewer System** - It is estimated that approximately 29 acres of the northwestern portion of the site and 8 acres of lots fronting the parkway road can be sewered by gravity flow to the existing and proposed municipal sewer system in the parkway road. The remaining southeastern area of about 29 acres must be served by a booster pump.
The beach area at the project site is construction of a sloping rock revetment of approximately 460 linear feet. The revetment is designed with a two-tonne thick armor layer of 300-500 pound stones placed on a slope. The crest elevation is +6.0 feet, which will not sustain significant over-topping during typical wave conditions, but which will be overtopped during storm conditions. The crest of the structure would be placed at the approximate location of the existing escarpment.

WAIKANE COUNTRY CLUB - SHORELINE PROTECTION
Location: Honolulu, Oahu
TMK: 1-5-5-23:03 & 38
Permitting Department of Land and Natural Resources
Agency: Ed Henry (548-7837)
Applicant: Waikele Country Club

The applicant is proposing the construction of a shoreline revetment, which lies within the Conservation District seaward of the certified shoreline, to protect the shoreline from erosion. The project site is located at Waialae, Kahala and the project site is bounded by the Waialae Beach Park to the southwest and the Kahala Beach Apartment to the northeast.

The proposed method for maintaining the...
Mr. Michael Scarfone  
Director, DHCD  
650 South King Street, 5th Floor  
Honolulu, Hawaii 96813  
Tel: Mr. Gail Kato

and a copy to OEQC, Dr. Marvin Miura,  
Director

Deadline: June 22, 1990

The City and County of Honolulu, Department of Housing and Community Development, is proposing the development of three projects in the Ewa Plain as part of the West Loch Bluffs and Ewa Villages Master Plan currently in process. The master plan components include: the West Loch Bluff (hereinafter, the "Bluffs") residential development; the Ewa Villages Revitalization/Restoration program (hereinafter, the "Villages"); and golf courses.

The proposed project is located in the Ewa Plain. The north/northwestern project limit is Farrington Highway, while the south/southeastern limit is Renton Road and the railroad right-of-way. The Ewa By Gentry project, currently under construction, puts the makai side of the railroad right-of-way. The eastern boundary of the project is Kuuia Fort Weaver Road. The western boundary is currently under review, and will be determined in the near term. Kalo Gulch is being considered as the probable western limit.

The proposed land area will encompass approximately 850 acres. Of this total area, 460 acres will be planned for residential use, commercial, public facilities, recreation areas and open space. In addition, 300 to 400 acres will be developed into one 27-hole golf course, or two 18-hole golf courses. The proposed project is as follows:

- The Bluffs is proposed as a residential development that will offer approximately 1,650 residential units to be divided into affordable (60%) and market (40%) priced homes. Of the planned 1,650 units, approximately 1,060 units will be single-family structures, and the remaining 650 units will be multi-family.

- The Villages component, comprising 350 acres, will include the existing Tenney and Renton Villages, and Ewa Elementary School. The intent of the development-revitalization program is to create the flavor and design character of a plantation village within a portion of the total development area. The principal consideration of this program is to provide opportunities for home ownership for the residents currently residing in the existing villages. Approximately 850 units will be programmed for the Villages. Most of the dwellings will be single-family units with a small number planned as multi-family units.

- A golf course development strategy will consider one of two development scenarios - the creation of two 18-hole courses, or one 27-hole course for public use.

The principal landowner is the Estate of James Campbell who, in turn, has leased all of this land to Oahu Sugar Company for the Ewa Villages community as well as sugarcane cultivation. This lease agreement will expire in 1995.

DRAFT ENVIRONMENTAL IMPACT STATEMENTS

A 45-day review period commences with the initial publication of these projects in the bulletin (see deadline dates). EISs listed in this section are available for review at the following repositories:

- Office of Environmental Quality Control
- Legislative Reference Bureau
- Municipal Reference and Records Center (Oahu EIS's)
- University of Hawaii Hamilton Library
- State Main Library
- Kaimuki Regional Library
- Kaneohe Regional Library
- Pearl City Regional Library
- Hilo Regional Library
- Waialua Regional Library
- Kahuku Regional Library
- Branch Library in closest proximity to the project

Please send your comments to the accepting authority with a copy to the applicant or proposing agency (see listed contacts). OEQC would also appreciate a copy of your comments.

KAUA'I

HANALEI PIER RECONSTRUCTION

Location: Hanalei, Kauai

TMK: 5-5-01-08

Please send your comments to:

Accepting Authority: Governor, State of Hawaii

Office of Environmental Quality Control
465 South King Street, Room 104
Honolulu, Hawaii 96813

with a copy of your comments to:

Proposing Agency: Department of Land and Natural Resources
Division of State Parks, Outdoor Recreation and Historic Sites
P. O. Box 621
Honolulu, Hawaii 96809

Deadline: June 7, 1990

The State of Hawaii, Department of Land and Natural Resources is proposing the reconstruction of the Hanalei Pier. The proposed project involves the reconstruction of the existing pier consisting of the removal of the deteriorated pier and concrete pilings; installation of new concrete pilings and concrete pier; and the installation of handrails along the perimeter of the pier for public safety. The existing shed will be removed and replace upon completion of the concrete dock.

The pier extends 535 feet from Weke Road into the waters of Hanalei Bay. It consists of a 12’ 6” wide by 465’ long concrete approach ramp which extends approximately 305 feet into Hanalei Bay to a 30’ x 70’ concrete platform covered with a wooden shed. Railroad tracks sit within a bed of sand and gravel throughout the approach ramp and the platform area. The track bed in the platform area has been filled with concrete.

This project will involve the reconstruction of the pier in phases based upon the availability of funds. The project will begin with work on the outermost portion of the pier since this is the area that has suffered the most deterioration. The estimated construction cost for this project is approximately $2,204,000.

FINAL ENVIRONMENTAL IMPACT STATEMENTS

The following EIS's have been submitted for acceptance. All comments received by the
HONOKOHAI INDUSTRIAL PARK
Location: North Kona, Hawaii
TMK: 7-4-08:26 & 49
Applicant: Robert S. McClean
c/o Helber, Hastert & Kimura, Planners
Accepting Authority: State Land Use Commission
Status: Currently being processed by the State Land Use Commission.

The applicant, Robert S. McClean, seeks incremental rezoning for the 89.5-acre property to develop the site for light industrial, commercial, and service-related uses. The proposed project is broken down into two increments:

Increment I is a 45.5-acre development intended to provide space for light industrial activities which generally require larger lots and open storage areas. Increment II proposes the following:

- continuation of ready-mix concrete and quarrying operations of West Hawaii Concrete;
- sale of boats and marine products and the continuation of the storage, construction, repair and maintenance of boats and other marine-related activities;
- sales of lumber, hardware and other construction materials and services, and the manufacture of lumber products;
- development of self-storage facilities;
- development of an automotive repair and service center, and an automotive sales lot for new and/or used cars;
- storage of trucks, buses and construction equipment;
- office and storage facilities for contractors and small businesses, and production and sale of nursery products.

Increment II is proposed to be developed for commercial and service-related uses. This includes uses intended to support proposed civic activities at Kealakehe, along with uses that would support the general economic development of the region. Specific types of activities might include offices, restaurants and other related commercial operations, as well as wholesale services to retail businesses, businesses which produce local consumer goods, services which support the local building industry, light manufacturing, etc.

The project site is located about three miles north of Kailua-Kona, approximately 1,000 feet mauka of the Queen Kaahumanu Highway northeast of the Honokohau Small Boat Harbor. The malikai 74.6 acres of the project site lie within the General Subzone of the State Conservation District. The mauka 14.9 acres are in the State Agricultural District.

OAHU

KAPOLEI BUSINESS-INDUSTRIAL PARK
Location: Ewa, Oahu
TMK: 9-1-14:02
9-1-15:01, 13, & 16
Applicant: James Campbell Estate
c/o William E. Wanket
Accepting Authority: City and County of Honolulu
Department of General Planning
Status: Currently being processed by the Department of General Planning.

Campbell Estate is proposing a Development Plan Amendment primarily from Agriculture to Industrial Use. Approximately 19 acres will be converted from Agriculture to Commercial Use. A total of approximately 552 acres are being proposed for rezoning.

Of this, 109 acres are being proposed for Maritime Industrial Use, 56 acres of which are destined to be used by the state for the expansion of Barber's Point Harbor. Approximately 423 acres will be for Intensive Industrial Use as an expansion to the existing James Campbell Industrial Park.

The land is adjacent to Campbell Industrial Park and is within the general vicinity of Barber's Point Harbor. The site also lies close to the City of Kapolei.

COUNTRY COURSES AT KAHUKU (Malaekahana)
Location: Koolauloa, Oahu
TMK: 5-6-06:02 & 06
Accepting City and County of Honolulu
Authority: Department of General Planning
Applicant: The Estate of James Campbell
c/o William E. Wanket, Inc.
Status: Currently being processed by the Department of General Planning.

The proposed Country Courses at Kahuku, Malaekahana site preliminary plans consist of a single 18-hole championship, daily-fee golf course and support facilities. Course completion is expected to be by 1994. A single clubhouse will serve the 18-hole course. The clubhouse would be approximately 10,000 to 12,000 square feet. Incorporated into the clubhouse would be a starting facility, pro-shop, lockers, restaurant/lounge, rest rooms, and cart storage and maintenance facilities for 90 golf carts. Cart storage is expected to accommodate approximately 5,000 square feet or approximately one-half of the clubhouse area. The clubhouse will be served by a driving range and putting green. The clubhouse will be provided with an appropriate number of parking stalls.

The site was once part of the Kahuku Sugar Company. Since the early 1970's when those operations ceased, the land has been vacant except for grazing operations. Currently, most of the property is being used by the Gunstock Ranch for grazing 100 head of cattle and 40 horses, and for boarding about a dozen horses. The Malaekahana State Park occupies the area across the highway, while the mauka area of the site adjoins the military lands of the Kahuku Training Area and pastures used for grazing.

Approximately 100 acres of the 200 acre project site will be reshaped to some extent. This will require grading of the golf course site itself, reshaping tees and greens, developing sand traps and swelling areas to guide surface runoff to retention areas or ponds. Project costs are estimated at about $9 million.

COUNTRY COURSES AT KAHUKU (Punamanu)
Location: Koolauloa, Oahu
TMK: 5-6-05:01, 02, 05, 06 & 07
5-6-01:21
Clubhouse (2) will serve the 18-hole golf course located on the northwest side of the site and would be approximately 10,000 to 12,000 square feet. Incorporated into the clubhouse would be a starting facility, pro-shop, lockers, restaurant/lounge, rest rooms, and cart storage and maintenance facilities. Cart storage is expected to account for approximately 5,000 square feet of the clubhouse area. Completion of all courses is estimated to be by 1998.

Approximately 325 acres of the site will be developed into tees, greens fairways, driving range and putting greens. The remaining 280 acres will serve as roughs, or be improved into clubhouses, parking areas or maintenance facilities. This will require grading of the golf course site itself, reshaping tees and greens, developing sand traps and swelling areas to guide surface runoff to retention areas or ponds. Project costs are estimated at approximately $26,500,000 for the three courses to include engineering, surveys and on and off site costs.

WOMEN’S COMMUNITY CORRECTIONAL CENTER
Location: Koolauapoko, Oahu
TMK: 4-2-06:02
Accepting Authority: Governor, State of Hawaii
Proposing Agency: Department of Accounting and General Services
Status: Currently being processed by the Office of Environmental Quality Control

The State of Hawaii, Department of Accounting and General Services, and Department of Corrections, is proposing to replace and expand the Main Facility of the Women’s Community Correctional Center, which is on a 573-acre parcel of land owned by the State. The new Main Facility will be developed mauka of Kalanianoale Highway on a 14-acre site encompassing the existing Women’s Community Correctional Center’s Main Facility.

The proposed project’s development will occur in several construction phases. PHASE I construction involves the development of two cottages, supporting facilities and infrastructure. When completed, this phase of construction will replace the existing security elements of the Main Facility and create space for 96 female offenders. PHASE II construction will be limited to the construction of additional supporting facilities and infrastructure. The construction of three additional cottage units is presently planned as “Future Cottage Construction.” Future Cottage Construction will involve the construction of additional bedspace up to the facility’s maximum size of 250 beds. The Department of Corrections is currently conducting a detailed population analysis and alternative sanctioning study. Should this study conclude that additional bedspace is not needed, the facility’s population will be capped at 96 beds and no additional cottage construction will take place.

The facility will be grouped in the following functional areas:

- Branch Administration - The existing Hookipa cottage will be rehabilitated into office spaces for the correctional staff.
- Housing - During PHASE I, two new housing cottages, totaling 22,778 square feet, will be constructed to house female offenders. Three additional housing cottages totaling 33,647 square feet may be constructed as part of Future Cottage Construction.
- Support-Services Building - A one-story building, totaling 31,056 square feet, will be constructed to house support services for the correctional center.
- Support-Programs Building - A one-story building, totaling 34,041 square feet, will be constructed to house support programs for the center.
- Outdoor Facilities - Outdoor facilities will include a covered recreation area, maintenance yard, and a warehouse apron. There will be 153 paved parking stalls in the designated outdoor parking areas, including stalls for the handicapped, staff and visitors.

The new buildings will be located mauka of the existing Hookipa Cottage. The vehicular access to the facility will remain from Kalanianoale Highway with a new 900 linear foot access roadway, comprising a total of 2 acres, being developed from the current access road entrance to the proposed facility.

OCEANIC INSTITUTE MASTER PLAN FOR THE CENTER FOR APPLIED AQUACULTURE
Location: Makapuu Point, Oahu

PROPOSED DEVELOPMENTS AT NAVAL BASE PEARL HARBOR
Location: Pearl Harbor, Oahu
TMK: 9-9-01

Please send your comments to:

Commander
Pacific Division, Naval Facilities Engineering Command
Pearl Harbor, Hawaii 96860-7300
Attention: Mr. Gordon Ishikawa, Code 09P2
Telephone (808) 471-3088

Deadline: June 7, 1990

A Draft Environmental Impact Statement has been prepared by the Department of the Navy in cooperation with the U.S. Coast Guard and Army Corps of Engineers for the actions described below, as required by the National Environmental Policy Act of 1969 and the Council on Environmental Quality Regulations. A 45-day review period commences with publication of the Notice of Availability of the DEIS in the Federal Register on April 15, 1990.

The Department of the Navy proposes the following actions at Naval Base Pearl Harbor: (1) improvement of access to Ford Island; (2) further development of Ford Island; and (3) construction of various operational and personnel support facilities at Ford Island, the Naval Shipyard, and the Naval Station to support the relocation of a battleship and two cruisers, in accordance with the Base Realignment and Closure Act of 1988.

Alternatives are proposed to provide a transportation link between Ford Island and the mainland of Pearl Harbor, including various design options, terminals, and funding strategies. The preferred alternative is a 4,100-foot-long retractable floating bridge between Halawa Landing (near Richardson Recreation Center) and a site on Ford Island near Saratoga Boulevard. I would have the following navigational clearances:

- Horizontal: 100 feet between fenders in the closed position.
- Vertical: 30 feet above mean high water in the closed position.

Other proposed developments include up to 1,200 family housing units, troop housing, recreation facilities, neighborhood amenities, and waterfront, maintenance, storage, and training facilities.

As part of the DEIS, studies and surveys were conducted in various subject areas, including marine biology, water quality, historic and archaeological resources, air quality, noise, traffic, aesthetics, navigation, and socioeconomics. The DEIS presents the results of these studies and describes the impact of the proposed actions and the measures planned to mitigate those impacts.

A public hearing will be held on May 24, 1990, at 7:00 p.m., at the Makalapa Elementary School cafeteria, 4435 Salt Lake Boulevard. The hearing is being conducted by the Navy in conjunction with the U.S. Coast Guard and the U.S. Army Corps of Engineers. As a cooperating agency, the Fourteenth Coast Guard District will be reviewing and taking action on the required bridge permit application and will primarily consider the impacts of the Ford Island proposed bridge on reasonable navigation needs. The Corps of Engineers, also a cooperating agency, will primarily consider the impacts of work in navigable waters which require a Department of the Army Permit.

NOTICES

AVAILABILITY OF REPORT

HAWAII'S ENVIRONMENT 1988: THE ANNUAL REPORT OF THE ENVIRONMENTAL COUNCIL

Copies of this report may be obtained at no charge by writing to:

Environmental Council
465 South King Street, Room 104
Honolulu, Hawaii 96813

The number of copies is limited, so readers are advised to write early.

The report contains synopses of some of the important environmental events and issues of 1988. Submissions were received from many public and private agencies.

NEPA DOCUMENTS

The following documents have been prepared pursuant to the requirements of the National Environmental Policy Act of 1969. Should you require further information on these projects, please call the
EIS ADVISORY

ENVIRONMENTAL ASSESSMENTS AND NOTICES OF DETERMINATION

Agencies and applicants should be diligent in preparing environmental assessments to assure that they meet the letter and intent of the law.

Information should be contained in the documents which will substantiate statements and decisions. (i.e. There should be substantiating evidence to justify the statement that there will be no environmental impacts.)

Per Section 10, Chapter 200 of Title 11, Administrative Rules, Department of Health, environmental assessments shall contain:

(1) Identification of applicant or proposing agency;
(2) Identification of approving agency, if applicable;
(3) Identification of agencies consulted in making assessment;
(4) General description of the action's technical, economic, social, and environmental characteristics;
(5) Summary description of the affected environment, including suitable and adequate location and site maps;
(6) Identification and summary of major impacts and alternatives considered, if any;
(7) Proposed mitigation measures, if any;
(8) Determination;
(9) Findings and reasons supporting determination; and
(10) Agencies to be consulted in the preparation of the environmental impact statement, if applicable.

Projects should not be done on an incremental basis to avoid preparation of an environmental impact statement. Per Section 12, Chapter 200, the agency shall consider every phase of a proposed action, the expected consequences, both primary and secondary, and the cumulative as well as the short and long-term effects of the action.

Please refer to Chapter 200 for more information or call OEQC at 548-6915.

EIS EDUCATIONAL WORKSHOP

The Office of Environmental Quality Control has found that there are many people who have questions regarding the Environmental Impact Statement process. OEQC is currently developing educational materials which we hope will make the process more comprehensive. Our goal is to create a tool which will assist the public in the preparation and review of the EIS documents.

In the coming months, OEQC will be holding EIS Educational Workshops. At this time, we would like to get an indication of public interest in these workshops. If you would be interested in attending a workshop, please fill out the attached form and return it to:

Dr. Marvin T. Miura, Director
Office of Environmental Control
465 South King Street, Room 104
Honolulu, Hawaii 96813

or call our office at 548-6915 and ask for Ms. Lynn Delacruzham.

YES, I am interested in attending an educational workshop on the EIS process. Please notify me of workshop dates and locations.
