The OEQC Bulletin is a semi-monthly publication. The publication dates of the bulletin are the eighth and twenty-third of each month. Applicants should deliver an appropriate number of Draft and Final EISs to the accepting authority before submitting copies to OEQC for distribution and publication. Environmental Assessments should be submitted to the accepting authority directly. Based on the assessment, the accepting authority will submit to OEQC a determination of a Negative Declaration or a Preparation Notice for publication in the bulletin. Draft and Final Environmental Impact Statements must be received by the fifth and twentieth days of the month for publication in the respective issue. Negative Declarations and Preparation Notices must be received at least five working days prior to the publication date. All documents submitted for publication in the OEQC Bulletin should be delivered to the Office of Environmental Quality Control, 465 South King Street, Room 104, Honolulu, Hawaii 96813. To ensure proper processing of documents, please attach OEQC Bulletin Publication Form with all submittals. These forms can be obtained by calling OEQC at 548-6915.

NEGATIVE DECLARATIONS

The following actions have been determined to have little or no impact upon the environment. Environmental Impact Statements are not required for these projects. Those who wish to contest this determination have a 60-day period, from this publication date, in which to initiate litigation. Any questions regarding the following projects should be directed to the listed contacts:

HAWAI'I

PULU KOHALA HEIAU ROAD

Location: South Kohala, Hawaii
TMX: 6-2-02:06, 08 & 16

Permitting Agency: County of Hawaii
Contact: Connie Kiri (961-8288)

Applicant: National Park Service

The National Park Service proposes to construct a paved road within a 40-foot wide corridor approximately 1,900 feet in length from Queen Kaahumanu Highway to Spencer Beach Park and Puukohola Heiau National Historic Park. The two land road would be constructed with three feet of stabilized shoulder on each side and installed with underground water lines and electrical conduits. Upon completion of the new road, the National Park Service would remove all surface material on the existing road to Spencer Beach Park together with the power poles, overhead wires and surface pipeline. The road corridor would then be covered with fill material and revegetated, as appropriate.

KAUPULEHU CRATER

TELECOMMUNICATION FACILITY

MODIFICATION AND EXPANSION

Location: North Kona, Hawaii
TMX: 7-2-01:01

Permitting Agency: Department of Land and Natural Resources
Contact: Ed Henry (548-7837)

Applicant: West Hawaii Electronics, Inc.

The applicant is proposing to establish a new 80-foot co-habitation telecommunication tower with up to thirty-one antennas, expand the existing equipment building, expand the existing facility area, with security fencing and dismantle the existing twin 40-foot towers, and relocate all antennas.
be parcel is located on Mount Hualalai and a general area is part of the Kaupulehu forest reserve, while the specific site is located in the designated protected subzone. The site is located at the 6100 foot elevation. At present the use of the parcel is limited to two unmanned communication facilities. One consists of a 100' x 100' lot owned by Hawaii Electric Light Company on which sits a passive, microwave reflector. The other is a 20' x 20' fenced area containing two antenna towers, a 8' x 10' building, propane gas tanks, and other related equipment operated by the applicant.

Construction plans are an extension, and expansion to an existing facility. This will include extending the existing 20' x 20' fenced area to 20' x 40'. The extended enclosure will not require any grading as it is relatively flat within +/- one foot. Surface vegetation will not be removed except for an area of 6' x 6' which will be excavated to a depth of 5' to provide a concrete footing for a new 80' antenna tower. Fencing will consist of a 6' barbed wire or chain link configuration supported by appropriate fence poles.

The present building structure is planned to be enlarged from its present dimensions of 8' x 10' to 11' x 10'. This will be accomplished by extending the roof line approximately three feet to the south-west side of the structure. Additional solar panels will be deployed on the roof top. Also a battery storage structure will be added to the north-eastern side of the building. Again this will be an extension of the existing building consisting of a wood frame-sheet metal construction of dimensions 2' x 8', 4' in height, with a flat roof.

The gas storage tanks and thermal electric generators will be relocated. These units are not enclosed but rather sit on portable concrete slabs. With the deployment of a central 80' antenna tower, the existing two 40' tower structures will be removed from the site. The new antenna tower will consist of an 80' steel structure of a free standing design. It will be implanted in an excavated hole of approximately 5' x 5' x 5' dimensions, and finished with 6' x 6' concrete cap. Antennas will be deployed at various heights of the tower and antenna cables will be routed overhead to the equipment building.

KAWAIHAE HARBOR DREDGING AND OVERSEAS PIER EXTENSION
Location: South Kohala, Hawaii

TMK: 6-1-03/23
Proposing Agency: Department of Transportation
Harbors Division
Contact: Calvin Tsuda (548-2505)

The Department of Transportation is proposing the dredging and overseas pier extension of the Kawaihane Harbor. The project consists of the following:

- Inter-island Barge Pier Area - The existing inter-island barge pier has a limited barge back-up area. The project calls for the dredging of the southeast end of the pier to a project depth of (-) 16.00 feet below the Mean Lower Low Water (MLLW) line. Anticipated dredge volume is 100 cubic yards. This will increase barge docking maneuver space, accommodate the anticipated larger future barges, and increase the utilization of the existing limited container storage shoreside area.

- Overseas Pier Area - This portion of the project involves a 600 foot extension of the existing 602 foot long concrete pier to the southeast, dredging as required to a project depth of (-) 35.00 feet MLLW, and the completion of paving of the overseas container yard immediately shoreside of the pier extension. Anticipated dredge volume is 16,000 cubic yards. Completion of this portion of the project will increase the capacity of the overseas pier by allowing for multiple berthing of ships and barges, and provide a safe and organized area for overseas container storage.

- Marginal Wharf Area - The existing six foot wide marginal wharf will be extended 38 feet to the southeast to provide more berthing space for small boats. Open wooden boat racks will also be built to store small dinghies and rubber rafts. In addition, a 6-foot by approximately 70-foot long small boat loading dock will be built southeast of the marginal wharf extension. This loading dock will replace an existing finger pier which must be demolished to accommodate the overseas pier extension. There is expected to be 217 cubic yards of dredging to bring the project depth to (-) 5.00 to (-) 10.00 feet MLLW.

The dredging work at the project areas calls for the removal of materials consisting primarily of sand, silt, limestone, rubble and boulders. All areas to be dredged have been previously dredged to create the existing harbor basin.

KAUAI

HANAMAULU AFFORDABLE HOUSING
PROJECT
Location: Lihue, Kauai
TMK: 5-7-03/20
Permitting Agency: Housing Finance and Development Corporation
Contact: Al Ahana (543-2040)
Applicant: Amfac/JMB Hawaii, Inc.

Amfac/JMB Hawaii, Inc. is proposing to develop a primarily affordable housing community on approximately 60 acres at Hanamaulu. The project will consist of approximately 450 single- and multi-family dwelling units and a 2 acre public park, and may include a number of housing units priced at prevailing market rates. The environmental impact analysis contained in this assessment is based on a maximum projected unit count of 450 units, and would remain applicable if market-priced units are introduced to the development.

The State of Hawaii, Housing Finance and Development Corporation (HFDC) will provide construction and permanent financing for the affordable housing units. Amfac/JMB will be the master developer of the project, providing the land, developing the housing, and selling the single-family house and lot packages to the public in accordance with HFDC guidelines. The multi-family turnkey rental units will be sold to HFDC and subsequently, turned over to the Hawaii Housing Authority, which will manage the rentals.

MOLOKAI

MOLOKAI SENIOR/YOUTH AND MAUI ECONOMIC OPPORTUNITY FACILITY
Location: Kaunakakai, Molokai
TMK: 5-3-02/167
Proposing Agency: Office of the Managing Director
Contact: Barry Helle (243-7783)

The County of Maui is proposing the construction of a public facility to house a Molokai Youth Center, Senior Citizen Center...
and the Molokai operations of Maui Economic Opportunity. This facility will be located in downtown Kaunakakai, on a vacant parcel bordered by Kaunakakai Elementary, Home Puea, and the Mitchell Pauole Center/softball field and public tennis courts. This parcel is 5.411 acres, presently occupied by only the tennis courts, which will remain.

The complex has been designed in a U-shaped configuration with each of the three components occupying one wing with an open courtyard in the middle. Separating the Youth and Senior portions will be an assembly/dining hall which will be available for use by all three tenants and the general public.

Each wing of the facility will consist of general office space, classrooms and additional space relevant to each occupant’s particular needs, including a child day care center on the Economic Opportunity wing and an elderly day care center on the Senior Citizen wing.

KALAOHE HIGH SCHOOL ATHLETIC LOCKER/SHOWER FACILITY
Location: Kailua, Oahu
TMK: 4-4-34-24, 28 and 29

Proposing Department of Accounting and Agency: General Services
Contact: Mark Yamabe (548-7560)

The Department of Accounting and General Services is proposing the construction of an approximately 8,300 net square foot reinforced concrete and masonry athletic locker/shower facility. It will be predominately single-story structure and be equipped with a weight room. The project will provide the school with a much-needed facility to implement its program in accordance with Educational Specifications. Since the project will be constructed within the existing school campus, no land will be removed from the tax base. The estimated cost of the project is $2,724,000.

CHEMICAL FISH COLLECTION
Location: Kaneohe Bay, Oahu
TMK: N/A

Proposing University of Hawaii
Agency: Department of Zoology
Contact: Ralph Horii, Jr.

The University of Hawaii, Department of Zoology is proposing a planned chemical fish collection in the vicinity of Kaneohe Bay. The purpose of this project is to investigate the community structure of smaller, more sedentary, cryptic species such as the gobies and bennies that cannot be censused using visual techniques. Although visual censusing has been used to provide baseline data on the larger fishes present in and around Kaneohe Bay, comparable data for the smaller species are not available.

One liter of liquid rotenone (which interferes with the respiratory process in fishes, resulting in suffocation and death) will be used at each collection site. This is enough to cover an area of approximately 25 square meters. It is estimated that a total of 48 separate collections will need to be made. No collections will be repeated at the same site and the collecting effort will be spread over the period of a year.

OAHU

KAMEHAMEHA HIGHWAY 20 INCH MAIN FROM PUNALUU TO HAUULA
Location: Hauula, Oahu
TMK: 5-3-06
5-3-09

Proposing City and County of Honolulu
Agency: Board of Water Supply
Contact: Lawrence Whang (527-6138)

The Board of Water Supply is proposing the installation of about 6,500 feet of 20-inch transmission main along Kamehameha Highway from Halihoa Road in Punalu'u to Sacred Falls Trail road in Hauula. The main will be buried along the seaward side of the road right-of-way and have a minimum cover of three feet.

The main will be installed under four box culverts and one stream. At all of these crossings, the main will be concrete-jacketed with a minimum thickness of twelve inches.

The project’s objective is to increase the carrying capacity of the Windward Water Distribution System to allow the assimilation of new wells being developed at Kahana into the existing water system. The main is being oversized to allow the assimilation of other future water sources being planned for development north of Kahana. Estimated cost of the project is $1,240,000.

EIS PREPARATION NOTICES

The following actions have been determined to have significant impacts upon the environment. Environmental Impact Statements will be prepared for these projects. A 30-day consultation period commences with the initial publication of these projects in the bulletin (see deadline dates). The purpose of soliciting comments during the consultation period is to establish the scope and the depth of coverage that the Draft EIS should have.

KAUAI

LIHUE AIRPORT MASTER PLAN AND UPDATED IMPROVEMENTS
Location: Lihue, Kauai
TMK: 3-5-01-05, 08, 09, 13, 109, 111, and 128

Please send your comments to:

Accepting Governor, State of Hawaii
Authority: c/o Marvin T. Miura, Director
Office of Environmental Quality Control
465 South King Street, Room 104
Honolulu, Hawaii 96813

with a copy of your comments to:

Proposing Department of Transportation
Agency: Airports Division
Contact: c/o Wally Nishigata, Wilson Okamoto and Associates
1150 South King Street, Suite 800
Honolulu, Hawaii 96813

Deadline: July 8, 1990

The Department of Transportation, Airports Division proposes to implement the Lihue Airport Master Plan with updated improvements between 1990 and the year 2010. The Master Plan is proposed to be implemented in two phases: Phase I (1990 - 1995) and Phase II (1996 - 2010). The development phases include the following elements: land acquisitions or easements, airfield navigational aids, terminal area complex, and infrastructure.

Acquisition of approximately 95 acres of existing cane land for the planned development of the Lihue Airport improvements is proposed. The land...
acquisition is required to accommodate the
extension of Runway 17-35 and to allow the
Department of Transportation, Airport
Division to maintain control of lands which are
subjected to significant airport noise as
determined by the Federal Aviation
Regulation Part 150 Noise Compatibility
Program requirements. Acquisition of an
aviation easement and a line-of-sight
easement are also proposed.

To accommodate the demand for non-stop
wide-body airline service to the Mainland
and the Far East, the proposed ultimate
extension of Runway 17-35 to 10,000 feet is
assessed herein as the ultimate runway
length. The project will involve extending
the present 6,500-foot length by 2,000 feet
at the northern end towards vacant cane
fields and 1,500 feet toward the southern
end. Taxiway "D" will be extended, and new
taxiways will be constructed. Navigational
aids will be installed or relocated for the
lengthened runway, along with modifications
to the instrument landing system, approach
lighting system, navigational aids, and the
runway thresholds.

The extension of Runway 17-35 and the
repositioning of the instrument landing
system to the north will require a
2,500-foot realignment of Ahukini road to
ensure public access around the airport
perimeter. Other infrastructure
improvements will include construction of
emergency access/service and perimeter
roads.

Major terminal area expansion will include
the extension to the southwest and northeast
of the air carrier aircraft parking apron,
passenger terminal concourse, and
construction of four new connecting
taxiways. An additional 20 T-Hangars will
be planned for the general aviation area.

Improvements to Airport support facilities
will include the relocation of the FAA Air
Traffic Control Tower and a site for a new
Aircraft Rescue and Fire Fighting (ARFF)
facility. The existing National Weather
Service balloon launch facility and offices
will be relocated. Space for a
consolidated fuel storage area and a new
sewage lift station will be provided.

TMK: 9-1-16:25
9-1-17:02, 04, 36 - 39, 46 -
48, 49, & 51

Accepting Authority: Department of General
Planning

Proposing Agency: Department of Housing and
Community Development

Please send your comments to:

Mr. Michael Scarfone
Director, DHCD
650 South King Street, 5th Floor
Honolulu, Hawaii 96813
Attn: Ms. Gail Kaito

and a copy to OEQC, Dr. Marvin Miura,
Director

Deadline: June 22, 1990

The City and County of Honolulu,
Department of Housing and Community
Development, is proposing the development
of three projects in the Ewa plain as part of
the West Loch Bluffs and Ewa Villages
Master Plan currently in process. The
master plan components include: the West
Loch Bluffs (hereinafter, the "Bluffs")
residential development; the Ewa Villages
Revitalization/Restoration program
(hereinafter, the "Villages"); and golf
courses.

The proposed project is located in the Ewa
Plain. The north/northwestern project limit
is Farrington Highway, while the
south/southeastern limit is Renton Road and
the railroad right-of-way. The Ewa By
Gentry project, currently under construction,
abuts the makai side of the railroad right-of-
way. The eastern boundary of the project is
old Fort Weaver Road. The western
boundary is currently under review, and will
determine the area in the near term. Kaloi Gulch
is being considered as the probable western
limit.

The proposed land area will encompass
approximately 850 acres. Of this total area,
460 acres will be planned for residential use,
commercial, public facilities, recreation areas
and open space. In addition, 300 to 400
acres will be developed into one 27-hole
golf course, or two 18-hole golf courses. The
projected project is as follows:

0 The Bluffs is proposed as a residential
development that will offer
approximately 1,650 residential units to
be divided into affordable (60%) and
market (40%) priced homes. Of the
planned 1,650 units, approximately

1,000 units will be single-family
structures, and the remaining 650 units
will be multi-family.

0 The Villages component, comprising 350
acres, will include the existing Tonney
and Renton Villages, and Ewa
Elementary School. The intent of the
development-revitalization program is to
create the flavor and design character
of a plantation village within a portion
of the total development area. The
principal consideration of this program is
provide opportunities for home
ownership for the residents currently
residing in the existing villages. Approximately 850 units will be
programmed for the Villages. Most of
the dwellings will be single-family units
with a small number planned as multi-
family units.

0 A golf course development strategy will
consider one of the two development
scenarios - the creation of two 18-hole
courses, or one 27-hole course for
public use.

The principal landowner is the Estate of
James Campbell who, in turn, has leased all
of this land to Oahu Sugar Company for the
Ewa Villages community as well as
sugarcane cultivation. This lease agreement
will expire in 1995.
The Aloha Tower Development Corporation is proposing the Waterfront at Aloha Tower which will integrate cruise ship and intra-island vessel terminal facilities with hotel, office, retail and restaurant use. Specifically, proposed development components will include: the Maritime Building and Passenger Terminal with commercial and governmental offices at Piers 5 and 6; the Pedestrian Promenade extending from Piers 5 to 14 with retail emphasis between Piers 6 and 9; Pier 8 Marketplace retain and office space at Piers 8 and 9; a refurbished and beautified Aloha tower; the Harbor Centre hotel at Piers 10 and 11; an international cruise ship terminal at Piers 10 and 11; the Harbor Centre office complex at Pier 11; Honolulu Fort Historic Park at Pier 12; and Honolulu Harborside condominiums at Piers 13 and 14.

Maritime Building and Passenger Terminal - will be built on Piers 5 and 6, which will be extended to the U.S. Pier and Bulkhead Line (USPBL). As requested by the State, a future phase will extend this line even further to construct walkways and breasting dolphins to accommodate the length of larger ships from bow to stern. This will require moving both the USPBL and the Federal Project Line (FPL), which is the seaward limit of federal responsibility for channel maintenance.

The complex at Piers 5 and 6 will include on U-shaped building with two long wings located parallel to Piers 5 and 6, each five to six stories tall. Office space serving the Department of Transportation, Harbors Division, maritime related firms, and other wishing to relocate to the Waterfront will occupy the upper floors. Total office space at Piers 5 and 6 will be between 270,000 and 360,000 gross square feet.

Duke Kahanamoku Water Sports Center at Pier 7 - will provide a clubhouse with conference space, showers, and locker rooms for club members and athletes. The facility will be a collaborative effort with the staff of the Hawaii Maritime Center, also located at Pier 7.

The Pier 8 Marketplace at Piers 8 - 9 - the festive marketplace will be the primary destination of visitors to the Waterfront. The Marketplace will feature retail shops, a variety of small vendors with emphasis on local ownership, and food outlets with a distinctly local character in approximately 307,000 gross square feet. An eight-plex cinema and entertainment center will complement these attractions. The Marketplace will also function as an extension of the Pacific Canoe Museum at Pier 7. The two functions of the Marketplace will be reserved for approximately 100,000 gross square feet of commercial office space.

Hotel/Office Tower/Passenger Terminal at Piers 10 and 11 - A two-level cruise ship passenger terminal will front Piers 10 and 11, and the Harbor Centre Hotel will occupy the floors above. The adjoining Harbor Centre Office Complex at the mauka end of Pier 11 will be integrated with the hotel and will offer scenic views.

Hilton Fort Historic Park at Pier 12 - a monument to the history of Honolulu Harbor. Featured at the Historic Park will be an interpretive display and boardwalk leading to the waters' edge where the last remnants of the old Forts' coral blocks will be visible. The park will be pedestrian-oriented, with no vehicular access or parking.

Hilton Harborside Condominiums at Piers 13 and 14 - will include between 270 and 350 units, and consist of slender twin towers between 340 and 400 feet tall.

Pedestrian Promenade - will connect all components of the waterfront, from Piers 5 to 14. This feature is the first phase in a long-range plan to make sections of the coastline from Waikiki to the airport accessible to the public. There will be 9,600 square feet of retail space on the promenade, consisting of vendor-type small mobile facilities.

DRAFT ENVIRONMENTAL IMPACT STATEMENTS

A 45-day review period commences with the initial publication of these projects in the bulletin (see deadline dates). EISs listed in this section are available for review at the following repositories:

- Office of Environmental Quality Control
- Legislative Reference Bureau
- Municipal Reference and Records Center
- University of Hawaii Hamilton Library
- State Main Library
- Kailua Regional Library
- Kaneohe Regional Library
- Pearl City Regional Library
- Hilo Regional Library
- Waikiki Regional Library
- Li'ue Regional Library
- Branch libraries in closest proximity to the project

Please send your comments to the accepting authority with a copy to the applicant or proposing agency (see listed contacts). OBC would also appreciate a copy of your comments.

HAWAII

KAILUA PARK EXPANSION PROJECT

Location: North Kona, Hawaii
TMK: 7-5-05-07 & 83

Please send your comments to:

Accepting Governor, State of Hawaii
Authority: c/o Marvin T. Miura, Director
Office of Environmental Quality Control
465 South King Street, Room 104
Honolulu, Hawaii 96813

Deadline: July 24, 1990

The Department of Parks and Recreation, County of Hawaii is proposing a master plan for new site improvements and facilities at its present "old Kona Airport site."

The County of Hawaii presently shares the old Kona Airport site with facilities belonging to the State of Hawaii, Department of Land and Natural Resources, State Parks Division. Present facilities provided and maintained by the County include two softball fields, a football field, two soccer fields, four tennis courts, a basketball court, a bicycle motorcross, horseshoe pits, playground equipment, and a community center structure. Parking is abundant at the site with unstructured parking areas on open portions of the old airport runway. The State of Hawaii provides a large special events pavilion and beach recreation facilities at the north end of the old airport site.

The proposed Kailua Park is located approximately 1/2 mile north of the center
Kailua-Kona in the district of North Kona. The site is bordered by a residential subdivision on the west (Kailua Bay Estates), the State Parks portion of the old Kona Airport on the north, and vacant land to the east and south. Kuakini Highway terminates at the park site. In 1986, twenty acres were added to the County park site, which is approximately 34 acres, through a 40-year lease with the State of Hawaii. It is on this added portion that the new improvements of the Kailua Park Master Plan are proposed for construction.

The Master Plan for Kailua Park proposes to provide the following improvements to the existing park site which will be developed in three phases:

**PHASE 1**
- Gymnasium - approximately 15,000 square feet in size with provisions for basketball, volleyball, multi-purpose recreation/meeting facilities, bathrooms, lockers, staff accommodations, and storage. The gymnasium proper would seat approximately 1,500 spectators.

**PHASE 2**
- Multi-Purpose Field - a large open field that would support various sport activities such as football, track and field events, soccer and softball.
- Tennis Courts - four new tennis courts to be placed adjacent to the existing ones.
- Parking - a total of 750 parking stalls for cars are to be provided at the park site.

Related development activities which may occur before Phase 1 is completed include:
- BMX Track - A relocated bicycle motocross track to replace the existing track.
- Horseshoe Throw - a horseshoe pitching area to replace the existing facility will be provided in the area makai of the existing ball fields.

**PHASE 3**
- Swimming Pool - pool with accessory locker and shower facilities areas. Bleachers are also proposed for the pool with seating capacity in the 300 spectators range.

Existing facilities to remain include tennis courts, soccer fields, ball fields, community center and playground. Estimated cost of this project is approximately $7.3 million.

---

**FINAL ENVIRONMENTAL IMPACT STATEMENTS**

The following EIS's have been submitted for acceptance. All comments received by the applicant or proposing agency, and corresponding responses, should be contained within the Final EIS. Those who wish to contest the acceptance of an EIS have a 60-day period in which to initiate litigation. The 60-day litigation period starts from the date of publication of an EIS's acceptance.

**HAWAII**

**HONOKOAHU INDUSTRIAL PARK**
Location: North Kona, Hawaii
TMK: 7-4-08:26 & 49
Applicant: Robert S. McClean
c/o Helber, Hastert & Kimura, Planners
Accepting Authority: State Land Use Commission
Status: Currently being processed by the State Land Use Commission.

The applicant, Robert S. McClean, seeks incremental districting of the 89.5-acre property to develop the site for light industrial, commercial, and service-related uses.

The proposed project is broken down into two increments:

- Increment 1 is a 45.5-acre development intended to provide space for light industrial activities which generally require larger lots and open storage areas. Increment 1 proposes the following:
  - continuation of ready-mix concrete and quarrying operations of West Hawaii Concrete;
  - sale of boats and marine products and the continuation of the storage, construction, repair and maintenance of boats and other marine-related activities;
  - sales of lumber, hardware and other construction materials and services, and the manufacture of lumber products;

  Increment 2 is proposed to be developed for commercial and service-related uses. This includes uses intended to support proposed civic activities at Kealakehe, along with uses that would support the general economic development of the region. Specific types of activities might include offices, restaurants and other related commercial operations, as well as wholesale services to retail businesses, businesses which produce local consumer goods, services which support the local building industry, light manufacturing, etc.

The project site is located about three miles north of Kailua-Kona, approximately 1,000 feet mauka of the Queen Kaahumanu Highway northeast of the Honokohau Small Boat Harbor. The makai 74.6 acres of the project site lie within the General Subzone of the State Conservation District. The mauka 14.9 acres are in the State Agricultural District.

**OAHU**

**KAPOLEI BUSINESS INDUSTRIAL PARK**
Location: Ewa, Oahu
TMK: 9-1-14:02
9-1-15:01, 13, & 16
Applicant: James Campbell Estate
c/o William E. Wanket
Accepting Authority: City and County of Honolulu
Status: Accepted by the Department of General Planning on May 25, 1990.

**COUNTRY COURSES AT KAHUKU (MAMEKAHANA)**
Location: Koolauloa, Oahu
TMK: 5-6-06:02 & 06
Accepting City and County of Honolulu
COUNTRY COURSES AT KAHUKU
(PUNAMANO)
Location: Koolauloa, Cahu
TMK: 5-6-05-01, 02, 05, 06 & 07
5-6-01-21

Accepting Authority: City and County of Honolulu

Applicant: The Estate of James Campbell
c/o William E. Wanket, Inc.

Status: Currently being processed by the Department of General Planning.

The proposed Country Courses at Kahuku, Punamano site preliminary plans consist of three 18-hole championship, daily-fee golf courses. Two clubhouses are proposed to serve the three courses. A driving range and two putting greens as well as an appropriate amount of parking will be provided.

The approximately 605-acre proposed project site at Punamano is located at the north end of the windward side of Cahu, within the Koolauloa Development Plan area. The property lies along the mauka side of Kamehameha Highway, approximately two miles west of the Kahuku community and is immediately east of the Turtle Bay Resort at Kuliima. The project area and all adjacent areas are designated as agriculture by the State Land Use Maps and the Koolauloa Development Plan Land Use Map. There are no existing or proposed public facilities in the project boundary, however, a sewer treatment plant (presently under construction) and a Hawaiian Electric Company facility are located adjacent to the site. Improvements within the Kamehameha Highway right-of-way (water) are also proposed along a portion of the site.

Land uses of properties adjoining the Punamano site include military to the southwest, agricultural to the south and east, and aquaculture on the northeast. Across Kamehameha Highway, north of the site is the Tanaka Store, a well-known landmark, which is a small grocery store and gas station. Farther west along Kamehameha Highway lies the Kuliima Resort complex. The site was once part of the Kahuku Sugar Company; and until the early 1970s was cultivated in sugar cane. Since 1973, the project site has been leased to Amoment Aquaculture International, a local company. The lands currently lie fallow.

Clubhouse (1) will serve the two 18-hole courses located in the southeastern area of the site. The clubhouse will be approximately 17,000 to 20,000 square feet, with a starting facility, pro-shop, lockers, restaurant/lounge, rest rooms, an administrative office and storage and maintenance facilities. Approximately 10,000 square feet of the clubhouse area will be dedicated to cart storage.

Clubhouse (2) will serve the 18-hole golf course located on the northwest side of the site and would be approximately 10,000 to 12,000 square feet. Incorporated into the clubhouse would be a starting facility, pro-shop, lockers, restaurant/lounge, rest room and cart storage and maintenance facilities. Cart storage is expected to account for approximately 3,000 square feet of the clubhouse area. Completion of all courses is estimated to be by 1998.

Approximately 255 acres of the site will be developed into tees, greens fairways, driving range and putting greens. The remaining 280 acres will serve as roughs, or be improved into clubhouses, parking areas or maintenance facilities. This will require grading of the golf course site itself, reshaping tees and greens, developing sand traps and swaling areas to guide surface runoff to retention areas or ponds. Project costs are estimated at approximately $28,500,000 for the three courses to include engineering, surveys and on and off site costs.

WOMEN'S COMMUNITY CORRECTIONAL CENTER
Location: Koolaupoko, Oahu
TMK: 4-2-06:02

Accepting Authority: Governor, State of Hawaii

Proposing Agency: Department of Accounting & General Services

Status: Currently being processed by the Office of Environmental Quality Control

The State of Hawaii, Department of Accounting and General Services, and Department of Corrections, is proposing to replace and expand the Main Facility of the Women's Community Correctional Center, which is on a 573-acre parcel of land owned by the State. The new Main Facility will be developed mauka of Kalaniaule Highway on a 14-acre site encompassing the existing Women's Community Correctional Center's Main Facility.

The proposed project's development will occur in several construction phases. PHASE I construction involves the development of two cottages, supporting facilities and infrastructure. When completed, this phase of construction will replace the existing security elements of the Main Facility and create space for 96 female offenders. PHASE II construction will be limited to the construction of additional supporting facilities and infrastructure.

PAGE 8
Construction of three additional cottage units presently planned as "Future Cottage Construction." Future Cottage Construction will involve the construction of additional bedspace up to the facility's maximum size of 250 beds. The Department of Corrections is currently conducting a detailed population analysis and alternative sanctioning study. Should this study conclude that additional bedspace is not needed, the facility's population will be capped at 96 beds and no additional cottage construction will take place.

The facility will be grouped in the following functional areas:

- Branch Administration - The existing Hookipa cottage will be rehabilitated into office spaces for the correctional staff.
- Housing - During PHASE I, two new housing cottages, totaling 22,778 square feet, will be constructed to house female offenders. Three additional housing cottages totaling 33,647 square feet may be constructed as part of Future Cottage Construction.
- Support-Service Building - A one-story building, totaling 31,056 square feet, will be constructed to house support services for the correctional center.
- Support-Programs Building - A one-story building, totaling 34,041 square feet, will be constructed to house support programs for the center.
- Outdoor Facilities - Outdoor facilities will include a covered recreation area, maintenance yard, and a warehouse apron. There will be 153 paved parking stalls in the designated outdoor parking areas, including stalls for the handicapped, staff and visitors.

The new buildings will be located mauka of the existing Hookipa Cottage. The vehicular access to the facility will remain from Kalanianoe Highway with a new 900 linear foot access roadway, comprising a total of 2 acres, being developed from the current access road entrance to the proposed facility.

Utilization
Environmental Affairs

Status: Accepted by the Department of Land Utilization on May 8, 1990.

NEPA DOCUMENTS

The following documents have been prepared pursuant to the requirements of the National Environmental Policy Act of 1969. Should you require further information on these projects, please call the Office of Environmental Quality Control at 548-6915.

NOTICE OF AVAILABILITY

JOHNSON ATOLL CHEMICAL AGENT DISPOSAL SYSTEM (JACADS) - FINAL SECOND SUPPLEMENTAL ENVIRONMENTAL IMPACT STATEMENT

Copies of the Final Second Supplemental Environmental Impact Statement are available from:

Colonel Ralph Carestia
The Office of the Program Manager for Chemical Demilitarization
Arn: SAIL-FMM
Aberdeen Proving Ground
Maryland, 21010-5401
or call QEIC.

Comments of the Final Second SEIS will be considered by the Army in their Record of Decision and should be provided in writing to Colonel Carestia at the address given above.

Please send a copy of your comments to:
Dr. Marvin T. Miura, Director, Office of Environmental Quality Control.

Deadline for Comments: July 9, 1990

Location: Hamakua, Hawaii
MEETING NOTICE

LAND USE MANAGEMENT IN HAWAII
Location: American Lung Association
245 North Rukui Street
Date: July 10, 1990
Time: 4:00 - 5:00 p.m.

The Hawaii Association of Environmental Professionals is holding a public forum on Land Use Management In Hawaii, questioning whether environmental issues are being given adequate attention and what are some ideas for improvements.

Speakers will include Dr. Ken Lowry (Chairman UH Department of Urban and Regional Planning), William Paty (Director, Department of Land and Natural Resources), George Krasnick (Chairman, Hawaii Environmental Council), and Roy Takimoto (former Chairman of the Hawaii Environmental Quality Commission).

For more information, contact Wayne Miter at 949-1019.

EIS EDUCATIONAL WORKSHOP

The Office of Environmental Quality Control realizes that there are many people who have questions regarding the Environmental Impact Statement process. Due to the overwhelming response to our questionnaire in the past two OEQC Bulletins, OEQC will be conducting free EIS Educational Workshops at the following locations.

June 18, 1990 - Maui County Building, Civil Defense Conference Room, First Floor, Wailuku, Maui. Time: 8:30 a.m. - 4:30 p.m. (government officials) and 7:00 p.m. - 9:00 p.m. (public).

June 21, 1990 - State Capitol, House of Representative Conference Room #328, Honolulu, Oahu. Time: 8:30 a.m. - 4:30 p.m. (government officials) and 7:00 p.m. - 9:00 p.m. (public)

EIS ADVISORY

ENVIRONMENTAL ASSESSMENTS AND NOTICES OF DETERMINATION
OEQC BULLETIN PUBLICATION REMINDER

According to Section 11 and 20 of Chapter 200, Title 11 Administrative Rules, Department of Health, environmental assessments and notices of determination should be received by OEQC at least 5 working days prior to the date of publication and filings of draft and final EIS's should be received 3 days prior to publication. We are reprinting a calendar containing relevant dates for your use. Please Kokua!
