The **OEQC Bulletin** is a semi-monthly publication. The publication dates of the bulletin are the eighth and twenty-third of each month. Applicants should deliver an appropriate number of Draft and Final Environmental Impact Statements (EIS) to the accepting authority before distributing copies and submitting copies to OEQC for publication. Environmental Assessments should be submitted to the appropriate agency directly. Based on the assessment, the appropriate agency will submit to OEQC a determination of a Negative Declaration or a Preparation Notice for publication in the bulletin. Draft and Final EISs must be received by the fifth and twentieth days of the month for publication in the respective issue. Negative Declarations and Preparation Notices must be received at least five working days prior to the publication date. All documents submitted for publication in the **OEQC Bulletin** should be delivered to the Office of Environmental Quality Control, 220 South King Street, 4th Floor, Honolulu, Hawaii 96813. To ensure proper processing of documents, please attach **OEQC Bulletin Publication Form (Form 91-1)** with all submittals. These forms can be obtained by calling OEQC at 586-4185.

---

**NOTICE**

Since the deadline for Draft and Final EIS is so close to the publication date for the OEQC Bulletin, please assist us by bringing the Document for Publication Form #91-1 and a computer disk with the project description (size 3 1/2" or 5 1/2" disk are acceptable; preferably WordPerfect 5.1) to the Office of Environmental Quality Control as early as possible. Thank you.

---

NEGATIVE DECLARATIONS

The following actions have been determined to have little or no impact upon the environment by the listed agency. As a consequence, Environmental Impact Statements are not required of those projects. Those who wish to contest the agency's determination have a 60-day period, from this publication date, in which to initiate litigation. Any questions regarding the following project(s) should be directed to the listed contacts.

HAWAI'I

UNIVERSITY OF HAWAI'I AT HILO
UTILITY GRID

District: South Hilo
TMK: Not Available
Agency: Department of Accounting and General Services
Contact: Earl Bethke (586-0484)

This project involves the modifications to the electrical power distribution, life safety and telecommunication/data systems requirements in order to upgrade the campus utility grid for the University of Hawai'i at Hilo. This upgrade is in accordance with the updated Campus Utility Grid Master Plan of the Long Range Development Plan (LRDP) for the university. The estimated cost of this project is $8,682,900.

HONOMALINO WORK CABIN AND NENE PENS

District: South Kona
TMK: (3) 8-9-01: 02
Agency: Department of Parks & Recreation, County of Hawai'i
Contact: Charmaine Kamaka (961-8311)

The Division of Forestry and Wildlife (DOFAW) plans to construct a work cabin and Nene propagation pens on the land of Honomalino located 33 miles south of Kailua-Kona. The project site is zoned 'Agriculture' and is located at the 3400 feet elevation. The Honomalino forest parcel contains 2701 acres. This parcel of land was first leased by the state for cattle grazing in 1950 and continued until 1974. The area selected for the project is a 30-acre grass area. In the early 1960s, the area was cleared of all existing vegetation, and the area was planted with kikuyu and pangoa grasses. Fortunately, this type of intensive pasture improvement was limited to about 200 acres.

This project will entail the use of a D-7 dozer to remove pasture grasses, level an area to accommodate the construction of a work cabin and a 3000-gal. water tank, and grade a 30-foot access road to the cabin from an existing gravel road. The cabin will have 654 square feet of floor space. The Nene propagation pens will be an open-top construction complex to accommodate 4 breeding pairs of Nene. The project will entail the construction of a woven wire fence around a 3-acre site to exclude pigs, dogs, cattle, and other large animals. Additional fencing with small mesh woven wire within the 3-acre enclosure will be constructed to build 4 open-top Nene breeding pens containing approximately 1,200 square feet per pen.

DOFAW has the responsibility to engage in endangered species protection and propagation, provide forest recreation, and improve and protect forest watersheds. This proposed project is consistent with DOFAW's programs and goals.

OLD KONA AIRPORT RECREATION AREA (HAWAII CANOE STORAGE FACILITY)

District: North Kona
TMK: 7-5-06: 07
Agency: Department of Parks & Recreation, County of Hawai'i
Contact: Charmaine Kamaka (961-8311)

The County of Hawai'i is proposing to develop a canoe storage facility on 5.7 acres of land situated within the Old Kona Airport Recreation Area, North Kona, Hawai'i. The former airport site, consisting of approximately 117 acres, has been set aside to the State Parks Division and the County Parks & Recreation Department for public recreational uses. Existing recreational uses include beach park facilities, an events pavilion, baseball/football/soccer fields, tennis courts, and a gymnasium (under construction).

The County of Hawai'i is requesting a lease agreement for the 5.7 acre site from the Board of Land & Natural Resources. Proposed to be developed on the site are eight canoe storage facilities (halau) where Hawaiian canoes can be constructed and maintained. These halau will be 60' x 100' open-type structures consisting of posts and roofs. Several canoe storage facilities are presently located in the former airport terminal and hanger buildings and it is the desire of the county to have these facilities centralized.

Based on a review of potential environmental impacts, it has been determined that there are no significant environmental impacts that would warrant preparation of an environmental impact statement. Hence, a Negative Declaration is being filed by the County of Hawai'i.

KULANI CORRECTIONAL FACILITY
ISOLATION UNIT UPGRADE

District: Puna
TMK: 2-04-06: 9
Agency: Department of Accounting and General Services
Contact: Michael Shigetani (586-0434)

The Department of Public Safety proposes to implement improvements to the heating and ventilating system serving the isolation units at Kulani Correctional Facility including other work to make the affected area comply with Fire Code and Building Code requirements.

The work will involve approximately 3600 square feet of the existing Administrative Building.

The existing facility is situated on the slope of Mauna Kea at the 5190-foot elevation within the Upper Waiakea Forest Reserve.

WAIMEA IRRIGATION OFFICE
ADDITION

District: South Kohala
TMK: 5-6-05
Agency: Department of Accounting and General Services
OEOQ BULLETIN
March 23, 1992

Contact:
Ralph Yukumoto (586-0468)

Hilo Harbor Yard

Improvements

District:
South Hilo
TMK:
2-1-07-01 and 2-1-09: Por. 5 (3rd Division)
Agency:
Department of Transportation, Harbors Division
Contact:
Vernon Nakamura (587-1958)

The proposed project will be constructed
within the existing Hilo Harbor boundary
and consists of grading and paving
approximately one acre adjoining the Pier
2 storage yard. Also included in the
project scope is the removal of an existing
structure and clearing, grading and paving
of the approximately half-acre Fisherman's
site which is currently under the
jurisdiction of the Department of Land and
Natural Resources. There will be no
dredging in this project.

Hilo Harbor is the primary cargo handling
facility for the East side of the island of
Hawaii. Therefore, sufficient storage space
is vital to efficient and safe
operations at this harbor. The existing
container yard and storage areas are
being used to over 100% capacity with
overflow onto the unpaved project site.
The volume of cargo at Hilo Harbor is
steadily increasing and this project will
provide needed container and cargo
storage space.

U. S. Postal Service Land
Exchange

District:
North Kona and Wailuku
TMK:
4-3-8-06; 19 (Por) and 3-7-3-43: 3
Agency:
Department of Transportation

Contact:
Rex Johnson (587-2150)

The proposed action includes the state
exchanging 15,866 square feet of land for
21,126 square feet of land at Kahului
Airport and paying the U.S. Postal Service
$20,275 for the difference in land area.

At Kekaha Airport, the state will exchange
4 acres of land for the U.S. Postal Service
3 acres of land.

Kauai Veterans' Center

District:
Lihue
TMK:
3-6-02-1 (portion, 2.0 acres)
Agency:
Department of Defense
Contact:
Lt. Col. Jerry Matsuda (735-3522)

The Kauai Veterans' Council proposes to
construct the Kauai Veterans' Center in
Kapakal, Puna, Kauai. The veterans' center
is intended to serve as the central
headquartering facility for the Kauai
Veterans Council and its member
organizations. Currently vacant, the 2.0
acre site is located on a portion of TMK 3-
6-02-1 approximately one mile northeast
of the Lihue Airport. Situated on the northern
side of Kapule Highway, the site is located
next to the proposed expansion site for the
A. Vidinha Memorial Stadium.

The planned 11,300 square feet Veterans' Center is intended to provide a facility for
use by member organizations of the Kauai
Veterans Council. They include:

- Disabled American Veterans
- American Legion
- Veterans of Foreign Wars
- Club 100
- 442 Battalion
- Military Intelligence Service (MIS)
- Military Order of Purple Heart
- Kauai Veterans' Club
- Kauai Vietnam Era Veterans' Assn.
- Kauai Merchant Marines
- Kauai Military Women's Auxiliary

The Center will provide meeting and
workshop space for all veterans' services.
It will provide a permanent home for the
Council's community service programs,
youth and the educational activities its
membership conducts. A repository for
memorabilia collected and donated by
veterans, and a museum for display of
these items is also a vital part of the plan
for the facility.

MAUI

Kahikinui Forest Reserve Trail
AND CABIN

District:
Makena
TMK:
1-8:06
Agency:
Department of Land and Natural Resources
Contact:
Mayor Ueoka (243-5352)

A Capital Improvement Project is planned
for the development of approximately 7.0
miles of trail and a 12 feet by 16 feet trail
cabin with a water storage tank for the
3,531-acre State-owned Kahikinui Forest
Reserve on the South slope of Haleakala.
The project will provide a good access
route with a protective shelter to the more
remote eastern section of the forest
reserve. Public hunters would be more
adequately distributed in the area and be
able to make longer trips in the remote
area in pursuit of feral goats. The project
will also benefit other recreationists
with well defined access route with a
comfy shelter, encouraging overnight visits.

MOLOKAI

Ferry Passenger Shelter at
Kaunakakai Harbor, Molokai

District:
Molokai
TMK:
5-3-01
Agency:
Department of Transportation, Harbors
Division
Contact:
Marshall Ando (587-1950)

The State of Hawaii Department of
Transportation Harbors Division is
proposing to construct a timber shelter for
the passengers of the Molokai to Maui
ferry. The proposed site is at the north
end of Kaunakakai Harbor near the
berthing location of the ferry.

This project consists of a timber shelter to
hold approximately fifty (50) passengers of
the ferry. Lighting and bench type seats
will also be provided.
OAHU
LANIKAI FLOOD CONTROL PROJECT, PHASE 2A

District: Koolaupoko
TMK: 4-3-01 thru 05
Agency: Department of Public Works, City & County of Honolulu
Contact: Mel Takakura (523-4931)

The City and County of Honolulu, Department of Public Works, is planning to proceed with the design and construction of Phase 2A of the Lanikai Flood Control Project to relieve the flooding problems in the area. The project will consist of widening the Lanipo open channel drainage ditch between Mokuleia Drive and the beach, constructing a new box culvert on Mokuleia Drive, and constructing drain inlets and pipe collection systems on Mokuleia Drive and Asapapa Drive.

The project is estimated to cost $2,000,000 and will be funded entirely by the City and County of Honolulu. Construction is tentatively scheduled to begin at the end of 1992 and will take approximately one year to complete. The widening of the drain channel between Mokuleia Drive to the outlet will be located within the existing drain easement and the drainage collection systems for Mokuleia Drive and Asapapa Drive will be located within the existing road right-of-way.

Adverse environmental impacts will be temporary and limited to increased traffic congestion, noise, and dust associated with construction activities. The impact of construction activities will be mitigated by rules and regulations imposed by construction permits, noise permits, Department of Health dust control regulations and temporary traffic control and detours.

The proposed project is subject to Chapter 343, Hawaii Revised Statutes (HRS), since it will involve the use of county funds and lands.

CONSTRUCTION OF 1 TO 1.5 SLOPED BOULDER REVETMENT

District: Koolaupoko

TMK: 5-5-02: 85
Agency: Department of Land Utilization, City & County of Honolulu
Contact: Leslie Murakami (947-4860)

The applicant is seeking after-the-fact approval to construct a 1 to 1.5 sloped boulder revetment entirely located within the 40-foot shoreline setback.

The proposed construction consists of 2 to 6-ton basalt armor stone with the use of geotextile fabric at the rock-sand contact surface.

The project is located across Kamahameha Highway from the Polynesian Cultural Center and has a shoreline frontage which is approximately 100 feet wide.

UNIVERSITY OF HAWAII AT MANOA MAKAI CAMPUS SITE IMPROVEMENTS, DRAINAGE

District: Honolulu
TMK: Not Available
Agency: Department of Accounting & General Services
Contact: Earl Bethke (586-0484)

Only a portion of drain "E" was constructed along Dole Street from its outlet at Manoa Stream to a point near Andrews Amphitheater. The remaining portion crossing Bachman Hall grounds and extending along University Avenue needs to be constructed to comply with agreements made with the City and County of Honolulu in exchange for modifications in the makai area drainage system. The total cost of this project is $1,911,800.

KALIHI ELEMENTARY SCHOOL LAND ACQUISITION

District: Honolulu
TMK: 1-4-7: 1
Agency: Department of Accounting & General Services
Contact: Earl Bethke (586-0484)

Kalihi Elementary School is located on a hill with very little level ground for the students to play. The proposed land to be acquired is located adjacent to the school and will facilitate the future expansion plans for the school. Furthermore, with modifications, this land can be used for an additional playground area.

TAKUSHI RESIDENCE TERRACE WALLS, STAIRS AND FENCE

District: Hawaii Kai
TMK: 3-9-26: 4
Agency: Department of Land Utilization, City & County of Honolulu
Contact: Joan Takano (527-5038)
Applicant: George and Violet Takushi
Contact: Lloyd Sueda (949-6644)

The applicant proposes to remove the following existing structures within the 40-foot shoreline setback area:

1. a 7-foot high hollow tile retaining wall, partially faced with rock (built atop a non-conforming seawall);
2. a wooden deck cantilevered over the above-mentioned retaining wall;
3. an approximately 3.5-foot high hollow tile fance wall built atop the above-mentioned retaining wall;
4. stairs located along the seaward side of the property;
5. a planter located at the right rear of the property;
6. a concrete barbecue pit at the right rear of the property;
7. a metal lamp post (approximately 7 feet high);
8. a portion of the patio roof at the right rear of the property; and
9. a makai portion of the concrete deck covering the rear of the property up to the retaining/fence wall.

The applicant proposes to construct four short (2 feet to 4.5 feet high) moss rock terrace walls that will be used as planters at the rear of the property, a stairway to provide private access to the beach, and a 3-foot high security gate at the top of the stairs. The terrace planters will be landscaped to soften the visual impact of the development.

Koko Beach Park is located about 100 feet to the west.
KAELEPULO AND KAWAINUI STREAMS MAINTENANCE DREDGING PROJECT

District: Koolaupoko
TMK: Phase I: 4-2-02:32; 4-2-39:76; 4-2-49:87;
Phase II: 4-2-01: por 1, 5, 49, 50, 55; 4-2-03: por 29; 4-2-16: por 01; 4-2-75: por 01;
4-2-77: por 105,107 Stock piling/Drying area - 4-2-15: por 6
Agency: Department of Public Works, City and County of Honolulu
Contact: Michael Street (523-4341)

The proposed project involves the maintenance dredging/removal of accumulated silt, sediment, debris, and vegetation from the Kaelepulu and Kawainui Streams. This work will be done in two separate phases, with the first phase focusing on the Kaelepulu Stream alignment. This alignment is approximately 7050 feet in length, commencing at the entry point from Kaelepulu Pond, and terminating short of the stream estuary at Kailua Beach Park. The second phase will take Kaelepulu Stream as it turns northeast towards Kailua Road, running makai of the Kawainui Flood levee, and terminating short of the Kawainui Drainage Channel. This alignment is approximately 12,900 feet in length. The stock piling and drying is a 15.5 acre site owned by Kaneohe Ranch and is located adjacent to the Ameron Quarry. Approximately 190,000 tons of material is projected as dredge spoil for the two phases. Phase I will take approximately 12 months and cost $3.0 million. Phase II will be planned and designed during the work phase of the Kaelepulu Stream work.

EIS PREPARATION NOTICES

The following actions have been determined to have significant impacts upon the environment by the listed Agency (which may be the Accepting Authority). As a consequence, Environmental Impact Statements will be prepared for these projects. A 30-day consultation period commences with the initial publication of these projects in the bulletin (see listed deadline dates). The purpose of soliciting comments during the consultation period is to establish the scope and depth of coverage that the Draft EIS should have.

Please send the original copy of your comments to the accepting authority and duplicate copies of the comments to the proposing agency or applicant, consultant and OEQC.

HAWAII

HOOKENA ELEMENTARY SCHOOL EXPANSION

District: South Kona
TMK: 8-6-10: 09 and 12

Please send your comments to OEQC and the following:

Accepting Authority:
Governor, State of Hawaii,
c/o Office of Environmental Quality Control,
220 South King Street, 4th Floor
Honolulu, Hawaii 96813

Proposing Agency:
Department of Accounting & General Services,
1151 Punchbowl Street
Honolulu, Hawaii 96813

Attention: Earl Bethke (566-0454)

Consultant: Gima Yoshimori Miyabara Deguchi Architects, Inc.
7 Waterfront Plaza, Suite 400
500 Ali Moana Boulevard
Honolulu, Hawaii 96813

Attention: Wes Deguchi (533-0377)

Deadline: April 22, 1992

The Department of Education (DOE) proposes to expand the existing school site for Hookena Elementary School located in the South Kona District. The existing total land area for Hookena Elementary School is 4.033 acres.

The proposed expansion will provide for the school's projected increase of enrollment to 341 students in grades K-5. Current enrollment at Hookena Elementary School is 306 students with future enrollment of up to 500 students, if the school remains in grades K-8. An estimated classroom requirement for accommodating the projected increase of 341 students is placed at 14 permanent structures and 2 portables.

To best determine a site configuration for the expansion of Hookena Elementary School, a study will be done on the surrounding land parcels of the existing school.

A moderate extension of necessary water, sewer, power and communications facilities will be required to accommodate the expansion of Hookena Elementary School.

The expansion proposal/addition includes:

New Facilities:
- Special Education (1,292 sq. ft. Self Contained Unit)
- Resource Room (810 sq. ft.)
- Ninerian room (330 sq. ft.)
- Staff Dining area (255 sq. ft.)
- Custodial Center (251 sq. ft.)

Expansion or Construction of Support Facilities:
- 2,462 sq. ft. Administration facility (1,608 sq. ft. existing)
- 4,000 sq. ft. Library (468 sq. ft. existing)
- 900 sq. ft. Computer Resource Center (294 sq. ft. existing)
- 770 sq. ft. Faculty Center (133 sq. existing)
- 2,306 sq. ft. Kitchen (663 sq. existing)
- 2,100 sq. ft. Student Dining area (1,000 sq. ft. existing)

Expansion of Playgrounds:
- 98,000 sq. ft. Playground (55,000 sq. ft. existing)
- 6,000 sq. ft. Apparatus Area

Construction of New Kindergarten Playgrounds:
- 2,520 sq. ft. Playground
- 2,684 sq. ft. Apparatus Area

DRAFT ENVIRONMENTAL IMPACT STATEMENTS

A 45-day review period commences with the initial publication of these projects in the bulletin (see listed deadline dates). EIS's listed in this section are available for review at the following repositories:
Agricultural to Residential: 54-58 acres; Agricultural to Low Density Apartment: 8-10 acres; Residential to Commercial: ±60.5 acres; Agricultural to Public Facility: ±106 acres; Ag/PF to Industrial: ±15 acres; Industrial (reconfiguration): ±3 acres; Residential to Resort: 2.6 acres; Residential to Parks & Recreation: 3.5 acres; Agricultural to Commercial: ±21 acres.

These amendments are the first step toward implementation of a long-term Master Plan for Laie. The redesignations are proposed to provide new affordable residential and employment opportunities for Laie residents; to reserve appropriate areas for long-term expansion of the BYU Hawaii campus and the Polynesian Cultural Center; to provide a limited amount of light industrial area for local small businesses and service establishments; to increase the viability of a future hotel on already zoned land in Laie through the provision of an ocean front amenities area; to provide additional parking at the Laie Shopping Center; to correct the designations of areas currently used for a park and a sewage treatment plant.

SAND ISLAND MARINE EDUCATION AND TRAINING CENTER AND PUBLIC BOAT LAUNCH

District: Honolulu
TMK: 1-5-41; por. 6 and 130

Please send your comments to OEOC and the following:

Accepting Authority:
Governor, State of Hawaii
c/o Office of Environmental Quality Control
220 South King Street, Fourth Floor
Honolulu, Hawaii 96813

Proposing Agency:
Department of Business and Economic Development and Tourism
Honolulu Waterfront Project
P.O. Box 2359
Honolulu, Hawaii 96804

Attention: Edgar Marcus (586-2532)
1150 South King Street, Suite 800
Honolulu, Hawaii 96814

Attention: Rodney Funakoshi (531-5261)
Deadline: April 8, 1992

The Marine Education and Training Center (METC) is an educational facility proposed by the Honolulu Community College (HCC) to provide training programs for the repair and maintenance of marine vessels and engines. The project is sponsored by the Department of Business, Economic Development and Tourism, which is charged with implementing the Honolulu Waterfront Master Plan. The METC will be located on part of an undeveloped eight-acre site (comprised of TMK 1-5-41; por. 6 and 130) on the northwest corner of Sand Island. Also sharing the use of the site will be a Department of Transportation public boat launch facility and the University of Hawaii Aquatic Center.

Proposed programs of the METC include Associate of Science degrees in Boat Maintenance and Repair and Marine Mechanics. Curricula for Marine Diesel Maintenance and repair, and Marine Electricity and Electronics are also planned. HCC estimates student enrollment of between 160 and 180 students per year when the facility is fully developed.

The METC will consist of two major facilities on approximately 4.96 acres. The Boat Maintenance Facility will function predominantly as a maintenance and repair facility for boat exteriors. The Marine Propulsion Facility will house multidisciplinary courses on internal functions of land and marine based diesel engines. Parking will be provided for approximately 60 cars. The 3.14-acre public boat launch facility will include a double ramp, washdown area, comfort station, and approximately 47 stalls.
HONOLULU RAPID TRANSIT
PROGRAM SUPPLEMENTAL DRAFT
ENVIRONMENTAL IMPACT STATEMENT

Location:
Ewa and Honolulu
TMK:
Various

Please send your comments to OEQC and the following:

Accepting Authority:
Governor, State of Hawaii,
c/o Office of Environmental Quality
Control,
220 South King Street, 4th Floor, Honolulu,
Hawaii 96813

Proposing Agencies:
Office of Rapid Transit, City & County of Honolulu,
711 Kapo‘olani Boulevard, Suite 300
Honolulu, Hawaii 96813
Attention: Frank Doyle (527-6975)
and,
Department of General Planning, City & County of Honolulu,
650 South King Street, 8th Floor,
Honolulu, Hawaii 96813
Attention: Benjamin Lee (523-4713)

Deadline: May 7, 1992

This Supplemental Draft Environmental Impact Statement (SDEIS) supplements the information in the March 19, 1990, Alternatives Analysis/Draft Environmental Impact Statement (AA/DEIS). Alternatives considered in the AA/DEIS included the No-Build, a Transportation System Management (TSM) Alternative, six full-length (approximately 18 miles) fixed guideway alternatives, and three Minimum Operable Segment (MOS) fixed guideway alternatives. The purpose of this SDEIS is to evaluate the social, environmental, and economic impacts of the amended (LPA) which is similar to AA/DEIS Alternative 8 (Kamehameha Nimitz) except the Waikiki segment is eliminated, and the University/Malae‘ula terminus is changed to the University/Hau‘ula terminus. One alignment option, the Hale‘iwa Option, which moves the alignment one block mauka of Pohukalana Street, is also evaluated as are three alternative locations for a University area park-and-ride lot.

The selected alignment would serve the central business district (CBD) from the Navy Ewa Drum storage site in Waimanalo, via Kamehamea Highway, past the Honolulu International Airport along the mauka side of the H-1 freeway and follow Dillingham Boulevard into the CBD. The CBD segment would be a standard aerial structure along Nimitz Highway, then follow Pohukalana Street, Ward Avenue, Wainama Street, and Kona Street to the Ala Moana Center. The Hale‘iwa Option, also under consideration, would have the aerial structure following Haleiwa Street instead of Pohukalana Street. From the Ala Moana Center, it would continue Koko Head to the University of Hawaii Quay, then Kona Street and Atkinson Drive, Kapolei Boulevard, and University Avenue. The entire alignment would consist of dual tracks operating in both directions. In summary, the alignment would be 16.0 miles long, have 22 stations, four park-and-ride lots associated directly with the alignment, and a maintenance yard at the Navy Ewa Drum storage site.

Subsequent to the adoption of the amended LPA by the City Council, a decision was made by the city administration to pursue the possibility of adding park-and-ride lots at Leeward Station and in the University area, in addition to the proposed Wai‘alea Hill-Aloha Stadium park-and-ride lots. The park-and-ride lot (450 spaces) for Lagoon Station would be located in a structure adjacent to the station. The following three alternative locations for the University area park-and-ride lot (100-200 spaces) are under consideration: (1) Oasii Nightclub and Lounge, (2) Varsity Theater parking lot, and (3) University/King intersection.

Consultant:
Stanley Yim & Associates, Inc.
2650 Peam Street, Suite 200,
Honolulu, Hawaii  96819
Attention: Stanley Yim (933-7313)
Deadline: May 7, 1992

The addendum report is prepared in response to Grove Farm Land Corporation offering an alternative site to Site C as contained in the Site Selection Report and Environmental Impact Statement for the Kauai Judiciary Complex. The EISP and DEIS phases of the process for the site selection report and environmental impact statement have already been finished. The 45 day review period has ended, comments were received during the review period, and responses to the comments have already been distributed. The addendum serves to supplement the site selection report and environmental impact statement in that it adds to the alternate site, referred to as Site C2, in the addendum, for consideration as a potential location for the proposed Kauai Judiciary Complex.

FINAL ENVIRONMENTAL IMPACT STATEMENTS

The following EISs have been submitted for acceptance. All substantive comments received by the applicant or proposing agency, and corresponding responses, should be contained within the Final EIS. Those who wish to contest the acceptance of an EIS have a 60 day period in which to initiate litigation. The 60-day litigation period starts from the date of publication of the notice of acceptance in the OEQC Bulletin.

HAWAII

MANIN’IOWALI RESIDENTIAL COMMUNITY

District:
North Kona
TMK:
7-2-04: por 17

Accepting Authority:
Hawaii County Planning Department
Applicant:
North Kona Development Group
Status:
Accepted by the Hawaii County Planning Department on March 10, 1992.

The applicant, North Kona Development Group (NKG), proposes to develop a medium density residential community and recreational amenities including a golf course, clubhouse, tennis center and supporting infrastructure. The project area consists of approximately 388 acres of open land situated mauka of Kua Bay, approximately 1,000 feet from the shoreline, and extends to the Queen Ka’ahumanu Highway in Manin’iowali and Kuki’o 2 shpupa’a in the North Kona District. The project area is bounded by Queen Ka’ahumanu Highway to the east, state lands to the south (Awa‘ae) and west, and the Kuki’o resort designated area to the north.

The overall goal of this project is to develop a residential community with recreational amenities of a golf course and tennis facility. The elements of this project include 900 to 1,100 single-family and multi-family residential units, an 18-hole golf course, a clubhouse, a driving range and a tennis facility. Infrastructure facilities to support this development include the access and circulation roadway network, a wastewater treatment facility, a potable water supply and fire protection system, and a non-potable water irrigation system and other utilities systems.

Additionally, as required by the terms of the land exchange with the State of Hawaii, NKG will provide continued and improved access to Kua Bay and provide park improvements at the state-owned coastal portions of the Manin’iowali shpupa’a, upon the receipt of all of its approvals and permits for the proposed residential project.

KAUAI

UPPER MAKALEHA SPRINGS WATER RESOURCE DEVELOPMENT

District:
Kawaihau
TMK:
4-6-01:01
Accepting Authority:
Governor, State of Hawaii

Proposing Agency:
Department of Land and Natural Resources
Status:
Currently being reviewed by the Office of Environmental Quality Control.

The Final EIS for the Upper Makaleha Springs Water Resource Development, originally dated December 1987, was withdrawn by the Department of Land and Natural Resources, Division of Water Resource Management in February 1991. No acceptance/nonacceptance determination was made for this document. The Final EIS for the Upper Makaleha Springs Water Resource Development has been resubmitted and the description is as follows:

The Hawaii Division of Water and Land Development proposes to tap natural springs on State Land in the Makaleha Mountains of East Kauai, and to pipe the water to Kapa‘a for domestic uses. The project involves the construction of a concrete intake basin and approximately 4000 feet of iron pipe. The proposed project will fulfill the primary purpose of the Kealia Forest Reserve which is to serve as a source of water supply.

Other project alternatives considered included the "no project" option, drilling a new well on Akuliki Ridge, enlarging existing water tunnels, and the construction of a surface impoundment.

The proposed project will help alleviate existing water shortages in the Kapaa-Wallace area by increasing the overall supply approximately 16%. Adverse environmental impacts include a slight degradation of aquatic habitats and surface water quality, especially during construction. In addition, the project will also include the diversion of water now being used by Lihue Plantation Company to irrigate 1000 acres of sugar cane. These impacts will be mitigated by 1) the use of cement rubble masonry for the intake and pipeline pedestal construction; 2) replanting of exposed riparian areas with indigenous vegetation; 3) the restriction of land vehicles past the mauka end of Kahuna Road; 4) the use of silt fences and fabric material to reduce potential sedimentation; and 5) the scheduling of excavation work during the dryer months of May through September. The project is consistent with the Kauai County General Plan and the Hawaii State Plan.
NEPA DOCUMENTS

KAUAI

STRATEGIC TARGET SYSTEM
BARKING SANDS, KAУAI
(Draft Environmental Impact Statement/ Notice of Public Hearing)

The U.S. Army Strategic Defense Command has begun the public comment period for the Strategic Target System draft Environmental Impact Statement (EIS). Copies of the draft EIS have been mailed to everyone on the Strategic Target System mailing list.

A public hearing will be held on Kauai on March 24 and 25, 1992, to allow members of the public the opportunity to comment verbally on the environmental issues covered in the EIS. Written comments can be submitted prior to or after the hearing. They should be postmarked no later than April 18, 1992, and mailed to:

Deputy Commander
U.S. Army Strategic Defense Command
CSSD-EN-V (D.R. Gallier)
P.O. Box 1500
Huntsville, Alabama 35807-3801

A copy of the Draft EIS may also be requested by calling 1-800-377-8552.

OAHU

U.S. AIR FORCE CONVERSION OF JP-4 TO JP-8 FUEL
(Finding of No Significant Impact/Notice of Availability)

District: Honolulu, Ewa, Waialua
TMK: Not available
Agency: U.S. Air Force
15th Air Base Wing
ATTN: 15 ABW/LG
Hickam AFB, Hawaii 96695-5000
Contact: Jack Yamauchi (414-7519)

The proposed high school will be comprised of approximately 70 classrooms as well as athletic, dining room, administrative, and library facilities. It will occupy about 35 acres.

The proposed action is the conversion of JP-4 to JP-8 jet fuel by the U.S. Air Force in Hawaii. The JP-8 fuel will be accommodated in the existing Air Force JP-4 fuel supply system. The Air Force will take delivery of the fuel at SOCAVL Valve Pit #29 on the Pearl City Peninsula. Line pressure will force the fuel up the pipeline to the Waiakalua Fuel Farm. Fuel is then transferred by gravity to the Hickam AFB fuel tanks for delivery to aircraft through a fuel hydrant system and by tank trucks.

JP-4 is a wide-cut naptha based fuel which is extremely flammable. It presents an unusual fire and explosion hazard because vapors can travel and explode. It is hazardous to human health because of the presence of benzene and n-hexane. JP-8 is a narrow-cut kerosine based fuel which is much less volatile and presents a much lower potential for explosion. JP-8 does not contain benzene and n-hexane. JP-4 has a vapor pressure in the 2-3 psi range at 100 degrees F. JP-8, on the other hand, has practically no vapor pressure; therefore, the volatile hydrocarbon (VHC) emissions into the atmosphere are greatly reduced. The incentive for this conversion is the increased safety factor provided by JP-8.

The proposed conversion will start when the existing JP-4 stock is drawn down replaced with JP-8. Initial receipt of JP-8 is expected in April 1992.

NOTICES

ENVIROMENTAL ASSESSMENT CONTENTS AND NOTICES OF DETERMINATION

This information is intended to provide guidance to the public regarding the environmental review process; specifically for the preparation of environmental assessments. The reader is referred to Chapters 341 and 343 of the Hawaii Revised Statutes and Chapter 200 of Title 11, Department of Health Administrative Rules, prior to any document preparation. (References in brackets refer to either Hawaii Revised Statutes, Chapter 343, or Title 11, Chapter 200, Department of Health Administrative Rules.)

The purpose of preparing an environmental assessment is to determine if the impacts of a proposed action are significant enough to warrant further...
preparation of an Environmental Impact Statement [§11-200-2].

An Environmental Assessment is a document which is prepared for a proposed action which triggers the Environmental Impact Statement Process. Briefly summarized, the eight triggers that require the preparation of an environmental assessment [§343-5] are:

1. Use of State or County lands or funds
2. Use within Conservation District Lands
3. Use within the Shoreline Setback Area
4. Use within any Historic Site or District
5. Use within the Waikiki Special District
6. Amendments to a County General Plan (except for those initiated by the County)
7. Reclamation of Conservation Lands
8. Construction or modification of helicopter facilities

During the preparation of an environmental assessment, the procedures listed in §11-200-9, Early Assessment, must be followed. Historically, one of the steps frequently overlooked has been §11-200-9 (a)(4). This section requires consultation with agencies having jurisdiction or expertise as well as consultation with citizen groups and individuals.

The proposed action must be described in its entirety; therefore, projects should not be done on an incremental basis to avoid the preparation of an environmental impact statement [§343-6(a)(2), §11-200-7].

Environmental assessments must include (but are not limited to) the following [§11-200-10]:

1. Identification of applicant or proposing agency;
2. Identification of approving agency, if applicable;
3. Identification of agencies consulted in making assessment; (Failure to identify consulted agencies will result in the delayed publication of the submitted environmental assessment in the OEOC Bulletin.)
4. General description of the action's technical, economic, social, and environmental characteristics; (Some GENERAL guides to the content of each characteristic are listed below:

This section should generally answer the "What, Why, Where, When, Who and How" of the proposed action and its short and long-term impacts.

Technical
Describe the purpose of the project and in general terms how the project will be accomplished. If applicable, the dimensions of the project should be included.

Socio-Economic
Describe the economic impacts on the immediate community as well as on the community at large. The assessment may include, but not be limited to, providing income for the county/state and creating employment opportunities in areas with high unemployment rates.

Describe issues pertinent to the specific project. If an action involves a targeted segment of the population, any/all positive or negative effects must be discussed. In addition, any other issues pertinent to the action (such as: population density, recreational facilities, child care provisions, relocation of residences, etc.) must be discussed.

The Socio-Economic Impact does not apply to the impact of the action on the proposing agency or applicant. For state or county projects, the cost of the proposed action should be included in the assessment.

Environmental Characteristics
Describe, as applicable, aesthetics, the generation of air pollution, traffic congestion, noise levels, effects on water quality or any other aspect of the environment which may be affected by the proposed action.

Summary description of the affected environment, including suitable and adequate location and site maps;

Include flora, fauna, significant habitats, historical/archaeological and cultural sites. Describe adjacent natural resources. Sensitive habitats (such as a refuge) or bodies of water (stream, river, ocean, estuary, anchialine pond) adjacent to a proposed project must be addressed.

Identification and summary of major impacts and alternatives considered, if any;

Identify positive as well as negative major impacts. The impacts of concern are of the proposed action on the surrounding environment and community, not the impact of the environment on the action. The alternatives considered should be included when applicable.

Proposed mitigation measures, if any; it is not sufficient to write one sentence stating that appropriate mitigation measures shall be instituted wherever necessary. The potential problems must be identified and appropriate mitigation described in general terms. Best Management Practices should be cited whenever possible. For mitigation at Historic Sites, the environmental assessment must include: 1) copies of the Mitigation and/or Preservation Plans prepared for the Department of Land and Natural Resources' State Historic Preservation Program; and 2) a copy of the approval letter for the plans from the State Historic Preservation Program.

Determination;
The agency shall consider every phase of a proposed action, the expected consequences, both primary and secondary, and the cumulative as well as the short and long-term effects of the action in making a determination.

A determination letter from the Approving Agency must be submitted with the environmental assessment identifying it as either a Negative Declaration or Environmental Impact Statement Preparation Notice. This letter is a formal declaration stating that the document has been reviewed and the action will or will not have significant impacts on the environment. This must be the Approving Agency's determination, not the consultant's determination.

Findings and reasons supporting the determination;
Evidence justifying the statement that the proposed action will or will not result in any significant environmental impact, must be included, and

Agencies to be consulted in the preparation of the environmental impact statement, if applicable. This is necessary only for assessments which are determined to require environmental impact statements.

An environmental assessment is submitted to an Approving Agency which determines if the proposed action will have a
significant impact (§11-200-11(a), §11-200-12). If the agency's review determines that the proposed action will not have a significant impact, a Negative Declaration is issued. If the agency determines the action will have a significant impact, an Environmental Impact Statement Preparation Notice is issued.

The Notice of Determination (Negative Declaration or EIS Preparation Notice) which is issued by the Approving Agency must include (§11-200-11(e)):

(1) Identification of applicant or proposing agency
(2) Identification of accepting authority
(3) Brief description of proposed action
(4) Determination
(5) Reasons supporting the determination
(6) Name, address and phone number of contact person for further information

Both Negative Declarations and EIS Preparation Notices must be submitted by the Approving Agency to OEQC for publication in the OEQC Bulletin (§11-200-11(b)). OEQC has a "Document for Publication Form" which should be filled out and submitted to OEQC with the Negative Declaration or Environmental Impact Statement Preparation Notice.

NEGATIVE DECLARATIONS ARE NOT "ACCEPTED." Once a determination has been made, the document stands as a Negative Declaration unless it is legally challenged. There is a 60 day "Statute of Limitations" (§343-7(b)) during which the public or other agencies may challenge the determination of negative declaration. A Negative Declaration is not considered "accepted" as with Final EIS’s, therefore, it is not republished in the OEQC Bulletin. If you have any questions or need further information on the Environmental Review Process, please call the Office of Environmental Quality Control at 586-4185.

PRE-ASSESSMENT CONSULTATION LIST FOR ENVIRONMENTAL ASSESSMENTS

During the preparation of an environmental assessment, the procedures listed in Hawaii Administrative Rules, §11-200-9, Early Assessment, must be followed. Historically, one of the steps frequently overlooked has been §11-200-9(a). This section requires consultation with agencies having jurisdiction or expertise as well as consultation with citizen groups and individuals. This consultation process is especially important for environmental assessments which result in Negative Declaration because it provides the public with a comment period before a determination is made.

The appropriate agencies and groups from the list below should be consulted before the preparation of an environmental assessment. This list is not meant to be comprehensive. Each proposed action is unique in itself and may require consultation with other agencies and concerned groups.
