REGISTER OF DOCUMENTS PREPARED UNDER CHAPTER 343, HAWAII REVISED STATUTES

The OEQC Bulletin is a semi-monthly publication. The publication dates of the OEQC Bulletin are the eighth and twenty-third of each month. Environmental Assessments should be submitted to the appropriate agency directly. For environmental assessments (EA) for which a Negative Declaration is anticipated, agencies should submit four copies of the Draft EA with a letter stating that a Negative Declaration is anticipated and that notice of the Draft EA should be published in the OEQC Bulletin. (When an agency initially determines that an EIS will be required for a project, an EIS Preparation Notice determination is made. No Draft EA is required since those projects undergo two comment periods throughout the EIS process.) After the Draft EA comment period ends, the agency will submit to OEOC, four copies of the document and a determination of a Negative Declaration or an EIS Preparation Notice for publication in the OEQC Bulletin. Applicants should deliver an appropriate number of Draft and Final Environmental Impact Statements (EIS) to the accepting authority before submitting copies to OEOC for publication. All documents submitted for publication in the OEQC Bulletin should be delivered to the Office of Environmental Quality Control, 220 South King Street, 4th Floor, Honolulu, Hawaii 96813. The deadline for all submittals is eight working days prior to the publication date. To ensure proper processing of documents, please attach OEQC Bulletin Publication Form (Revised July, 1992) with all submittals. This form can be obtained by calling OEOC at (808) 586-4185.

Please contact the approving or proposing agency to request copies of any Draft EAs, Negative Declarations, EISPs or EISs. Any questions related to the content of these documents should be directed to the listed agency contact person.

DRAFT ENVIRONMENTAL ASSESSMENTS

A negative declaration determination is anticipated for the following actions. Act 241, SLH 1992, was approved by the Governor on June 17, 1992, and became effective on that same date. The Act requires draft environmental assessments, for projects for which a negative declaration is anticipated, to undergo a 30-day comment period before a final determination is made. The comment period begins when the notice of availability of the draft EA is published in the OEQC Bulletin and ends 30 calendar days later. For agency actions, the proposing agency shall respond to all comments postmarked within the 30-day period. For applicant actions, the applicant shall respond to all comments postmarked within the 30-day period. See the deadlines below for comment period and dates.

Please send the original copy of your comments to the agency and duplicate copies of the comments to the applicant, consultant, and OEQC.

KAUAI

HALEHAKA LANDFILL CLOSURE

District: Lihue
TMK: 3-3-03: Por. 1
Agency: County of Kauai, Department of Public Works
121 Umi Street
Lihue, Hawaii 96766
Attention: Dale Burton (246-2729)
Consultant: R. W. Beck and Associates
2101 Fourth Avenue, Suite 600
Seattle, Washington 98121
Attention: Allen Fitz (206-441-7500)
Deadline: January 22, 1994

The Halehaka Landfill is located on approximately 20 acres of land 1.5 miles southwest of Lihue, on the island of Kauai. The landfill, which is unlined, began accepting mixed municipal waste from the Lihue area in 1973 and was closed to the public in June, 1991.

As part of the original landfill permit, the Department of Health (DOH) obligated the County of Kauai to close the landfill in an approved, environmentally sound manner. Closure requirements applicable to the Halehaka Landfill call for two feet of compacted soil cover, adequately sloped to allow surface water to run off the waste area, with a final layer of tillable soil to be seeded for erosion control.

The landfill property and all immediately surrounding property is owned by Grove Farm Company, Incorporated (Grove Farm). Grove Farm is planning to develop the existing cane fields adjacent to the north and east sides of the landfill into a golf course with adjacent single family housing, as part of its Lihue/Puhi Project. Due to the imminent proximity of residents and recreational users, the closure used for the Halehaka Landfill is substantially more stringent than is required by applicable regulations. These more stringent measures, adopted by the County of Kauai, will ensure the health and safety of the nearby residents/users, improve the aesthetics of the site, and address the long-term environmental issues associated with closed landfills.

The landfill closure work involves regrading unstable slopes on the south and west sides of the landfill, moving excess solid waste from the regrading to the south side of the landfill, placing an impervious cover system on the top and side slopes, installation of an active gas extraction and monitoring system, installation of groundwater monitoring wells, construction of a stormwater management system, and seeding and vegetation of the final cover system.

MAUI

HONOAPIILANI HIGHWAY SHORELINE PROTECTION
AT LAUNIPOKO

District: Lahaina
TMK: 4-7-01:17
Agency: Department of Transportation, Maui District, Highways Division
650 Palapala Drive
Kahului, Hawaii 96732
Attention: Ferdinand Cajigal (877-5601)
Consultant: ECM, Inc.
486 Waiale Drive
Waikuku, Hawaii 96793
Attention: Charles Willson (531-8070)
Deadline: January 7, 1994

The U.S. Army Engineering District, Honolulu, Hawaii, under Section 14 of the Flood Control Act of 1945, at the behest of the State of Hawaii, Department of Transportation, Highways Division, Maui District, proposes construction of a rubble mound revetment to provide protection for two shoreline reaches, totaling 500 feet long, fronting Honoapiilani Highway at Launiupo. Similar protection may be provided for an additional shoreline segment of about 150 feet, funds permitting.

The rubble mound revetment consists of an underlayer of 50 to 150 pound stones over plastic filter cloth to prevent leaching of subbase materials through the underlayer voids, and a single layer of fitted, 1,000 to 2,500 pound armor stones. The project area affects 0.2 acre of the existing 80-foot-wide Honoapiilani Highway right-of-way and 0.5 acre of Launiupo Wayside Park (5,697 acre) along a narrow portion of rocky shoreline not normally exposed to the traffic of park users. If the additional area is also protected, the affected area will increase to about 1 acre.

This project falls under the Environmental Assessment preparation requirements of Chapter 343, Hawaii Revised Statutes because it proposes the use of state lands, it uses state and county funds, and it falls within a conservation district (resource subzone).

This action will protect Honoapiilani Highway -- the only improved road into West Maui -- from scour, erosion damage, and possible closure due to the effects of waves, current action, and storm
urge in moderate to severe storms. This action will benefit the community by safeguarding access to West Maui. Sloped rubble mound revetments preserve public access to the water and provide improved habitat for shoreline organisms. A Finding of No Significant Impact (FONSI) for this action was previously prepared and distributed by the Corps of Engineers in August 1991.

KENOLIO PARK COMFORT STATION AND PARKING LOT IMPROVEMENTS

**District:** Wailuku  
**TMK:** 3-8-77:4

**Agency:** County of Maui, Department of Parks and Recreation  
200 South High Street  
Wailuku, Hawaii 96793  
Attention: Leonard Costa (243-7388)

**Consultant:** Hiyakumoto and Higuchi Architects, Inc.  
1860 Main Street  
Wailuku, Hawaii 96793  
Attention: Calvin Higuchi (242-9705)

**Deadline:** January 22, 1994

The Department of Parks and Recreation-County of Maui proposes to construct a masonry comfort station of 600 square feet for both men and women with a covered entry area with a drinking fountain and a 70 stall asphalt concrete paved parking lot including 5 handicap stalls plus two loading stalls. The roof structure will be wooden framed with asphalt shingles. The project is located at Kenolio Park, Kihei, Maui, Hawaii and is approximately 34,600 square feet. The project is bordered by Kenolio Road and Kihei Road, Kenolio Park playfield is to the north, Kihei Youth Center and other County buildings to the West and South, and Kihei Villages apartment project exists to the East and across the 60 feet wide Kenolio Road right of way. The project will be landscaped and automatic landscape irrigation system installed. Parking area will be provided with non-glare lights to avoid glare to Kihei Villages.

MAUI MEMORIAL HOSPITAL PROPOSED HELIPAD

**District:** Wailuku  
**TMK:** 3-8-48:Por. 29

**Agency:** County of Maui, Office of the Mayor  
200 South High Street  
Wailuku, Hawaii 96793  
Attention: Richard Haake (243-7856)

**Applicant:** Mercy Air Hawaii, Inc.  
P.O. Box 29909  
Honolulu, Hawaii 96820  
Attention: Tom Jones (847-1760)

**Consultant:** Michael T. Munekiyo Consulting, Inc. (244-2015)  
1823 Wells Street, Suite 3  
Wailuku, Hawaii 96793

**Deadline:** January 7, 1994

The applicant proposes to construct a helipad on the grounds of the Maui Memorial Hospital in Wailuku, Maui, Hawaii. The helipad will serve as a landing and take off area for an emergency helicopter ambulance service. The proposed project site measuring approximately 10,000 square feet, will be located on the grassed area between the south side of the hospital and the hospital's employee apartments.

The proposed project will consist of constructing a 100 feet by 100 feet landing and take off area which will encompass a concrete helipad measuring 30 feet by 30 feet. Additional improvements include installing an above ground 6,500 gallon fuel tank, constructing a fenceline around the perimeter of the landing area and the fuel tank, installing landing lights on each corner of the helipad, and the construction of a mini equipment and maintenance storage shed.

The helicopters that will be utilized are state-of-the art Bell 222 twin engine helicopters having the capability to transport two patients on advanced life support equipment.

Major maintenance and repair of the helicopters will be performed at Kahului Airport.

The helicopters will be piloted by Mercy Air Hawaii pilots and will be staffed with Mercy Air Hawaii’s flight nurses and paramedics. Mercy Air Hawaii’s pilots, flight nurses, and paramedics will be stationed adjacent to the project site at the hospital's employee apartments.

ROTERY PEACE PARK

**District:** Wailuku  
**TMK:** 3-9-04:1 and 61

**Agency:** County of Maui, Department of Parks and Recreation  
1580 Kahumano Avenue  
Wailuku, Hawaii 96793  
Attention: Patrick Matsui (243-7887)

**Deadline:** January 22, 1994

The Department of Parks and Recreation-County of Maui proposes to construct a masonry comfort station of 600 square feet for both men and women with an exterior water fountain and shower. Also proposed is a fifty (50) stall parking lot and a grassed performance platform. The project is located at Rotary Peace Park, which is 5.35 acres and the project site consists of 1.6 acres of this park. The site is located southerly of Kamaole III. There are condominiums to the east and the Kihei Boat Ramp is southerly to the site. Access to the site is Kihei road.

WAIHEE ELEMENTARY SCHOOL CAFETORIUM/MULTI-PURPOSE ROOM AND DEMOLISH BUILDING “B”

**District:** Wailuku  
**TMK:** 2-2-07:21

**Agency:** Department of Accounting and General Services  
1181 Punchbowl Street, Room 430  
Honolulu, Hawaii 96813  
Attention: Ralph Morita (586-0486)

**Deadline:** January 22, 1994

This project is to design and construct a new reinforced concrete/masonry cafetorium/multi-purpose room of approximate
6,161 square feet and to demolish Building "B". Also included are any site improvements, connection to public utilities and any assessments which may be required as a result of this project.

OAHU

AIKAHI FIRE STATION REPLACEMENT

District: Koolauapo
TMK: 4-4-02:38
Agency: City and County of Honolulu, Building Department
Honolulu, Hawaii 96813
Attention: Craig Nishimura (527-6370)
Consultant: Peter Hsi and Associates, Inc.
615 Piko Street, Suite 2001
Honolulu, Hawaii 96814
Attention: Dennis Lee (533-1878)
Deadline: January 7, 1994

The Building Department, City and County of Honolulu, proposes to demolish the existing Aikahi Fire Station and rebuild a new fire station on the same site. The existing Aikahi Fire Station is outdated and possibly structurally unsound. The facility has experienced settlement problems attributable to unstable soils and the Building Department recommends that the structure be demolished and replaced at the site as soon as possible.

The new fire station is designed as a two-story concrete structure set into the sloping terrain. The upper floor is approximately 4,350 square feet in area and the lower floor 3,175 square feet. The foundation and exterior walls will be constructed of poured in place reinforced concrete. The structure will be topped by a combination protected metal and built-up roofing with the upper roof measuring 32 feet high (from finish elevation to the high point of the ridge) and the lower roof 22 feet high. Portions of the station will be air conditioned to attenuate outside noises.

The cost of the project is estimated at $2.25 million for planning, engineering, and construction and will be funded by the City and County of Honolulu. The station will be built in one construction phase tentatively scheduled to begin in mid-1994 with completion projected for mid-1995.

Engine Company 19 which is based at the Aikahi Fire Station will relocate to the Kailua Fire Station until the new Aikahi Fire Station is completed.

BOOTH/BRUFFEY PETITION TO RECLASSIFY ACREAGE FROM CONSERVATION TO AGRICULTURAL

District: Koolauoa
TMK: 6-1-02:2; pc.
Agency: Department of Business, Economic Development and Tourism
Land Use Commission
335 Merchant Street, Room 104
Honolulu, Hawaii 96813
Attention: Esther Ueda (587-3822)

Applicants: Charles Booth, Sandra Booth, Edward Bruffey and Sharon Bruffey
P. O. Box 564
Haleiwa, Hawaii 96712
Attention: Charles Booth (638-9020)
Consultant: Ashford and Wriston, Attorneys at Law
P. O. Box 131
Honolulu, Hawaii 96810
Attention: Douglas MacDougal (539-0400)
Deadline: January 22, 1994

Applicants have petitioned the State of Hawaii Land Use Commission for a State Land Use District Boundary Amendment to reclassify approximately 15,385 square feet of an approximately 1,795 acre parcel of land from Conservation District to Agricultural District. Applicants do not intend to develop, alter or otherwise engage in use of the subject property which is characterized by steep grades and rugged terrain. Applicants are the current owners of an approximately 1.647 acre residential lot adjacent to the subject parcel in the North Shore Heights Subdivision in Pupukea, District of Waialua, City and County of Honolulu. Applicants' lot is currently under the Agricultural District classification, and is zoned for county purposes as County District. Current County zoning allows one dwelling per acre. Applicants are related to each other, with Mrs. Booth being the sister of Mrs. Bruffey. The two families currently reside in a single dwelling unit on the applicant's lot. The current housing market precludes either of the applicants' families from acquiring a separate single family dwelling at another location. The proposed action will allow applicants to acquire the land needed to increase applicants' lot to two acres and permit applicants to properly establish two dwelling units on the applicants' lot. No change will be made to the existing use or condition of the subject property and applicants are willing to condition any deed they receive on a restrictive covenant prohibiting the development of the subject property.

GTE HAWAIIAN TEL FIBER OPTIC TELECOMMUNICATIONS CABLE

District: Waialua and Waianae
TMK: 6-9-01:por. 04; 6-9-02:por. 01, 13; 6-9-04:06, 07, 13, 14, 17; 8-1-01:por. 07; 6-9-03:por. 05
Agency: City and County of Honolulu, Department of Land Utilization
650 South King Street
Honolulu, Hawaii 96813
Attention: Joan Takano (527-5038)
Applicant: GTE Hawaiian Tel
1177 Bishop Street
Honolulu, Hawaii 96813
Attention: J. Peterson (646-2378)
Consultant: R. M. Towill Corporation
420 Waikamilo Road, Suite 411
Honolulu, Hawaii 96817-4841
Attention: Chester Koga (842-1133)
Deadline: January 22, 1994

GTE Hawaiian Tel proposes to install a fiber optic telecommunication cable from Keawaula to Mokuleia on the
western end of the island of Oahu. The project involves the installation of a single continuous underground PVC ductile that will be approximately 28,000 linear feet and measure four inches in diameter. The ductile will begin where the Kaena Point Tracking Station (KPTS) access road meets Farrington Highway, and continue along the mauka shoulder of the access road in an uphill direction to the 1,200 foot elevation.

At this point, the line will traverse in a descending northwesterly direction along an existing dirt road parallel to the existing coaxial cable that runs along the ridge line toward Manini Pali which is a ridge overlooking the beach on the Mokuleia side of Kaena Point. Approximately 15,000 feet of ductile will be installed along the Kaena Point Tracking Station access road to Manini Pali over mild to moderately sloping ground. Beyond this point, the ductile will traverse down the steep grade to the base of the mountain. The ductile will then continue along the mauka shoulder of Farrington Highway and east toward Camp Erdman. The new cable will be linked to existing Hawaiian Tel Company facilities in the vicinity of Camp Erdman.

**HONOLULU POLICE DEPARTMENT COMMUNICATIONS FACILITIES UPGRADE LEʻAHI HOSPITAL COMMUNICATIONS FACILITY SITE**

- **District:** Honolulu
- **TMK:** 3-2-031:001
- **Agency:** City and County of Honolulu, Building Department
- **City and County of Honolulu, Building Department 650 South King Street Honolulu, Hawaii 96813**
- **Attention:** Clifford Morikawa (527-6350)
- **Consultant:** Lecayo Planning, Inc. 737 Bishop Street, Suite 1550 Honolulu, Hawaii 96813
- **Attention:** John Whalen (531-6824)
- **Deadline:** January 22, 1994

The City and County of Honolulu is proposing to upgrade its existing public safety telecommunications system. The new upgraded system would be supported by facilities at 26 sites on the island of Oahu, 22 of which are existing sites. The project is being funded jointly by the City and County of Honolulu and the State of Hawaii.

A Draft EA was prepared in September 1992 and distributed to interested public agencies and community organizations. Various changes were made to the Draft EA as a result of comments by these parties and were reflected in the Final EA (Neg Dec) (published in December 1992). One of these changes involved relocating the existing Diamond Head Communications Facility. As a result of follow-up studies conducted during 1993, the City and County is proposing to relocate the Diamond Head Facility to the rooftop of Leʻahi Hospital in Kaimuki. This EA is intended to supplement the final EA (Neg Dec).

Improvements proposed for this facility include attaching two three-foot diameter microwave dishes and one 21-foot-tall mast onto an existing, unused equipment room, located on the fourth floor roof of a hospital building. Four 10-foot long 800 MHz vertical antennas will be attached to the mast. In addition, up to five 21-foot-long VHF vertical antennas will be attached along one side of the equipment room. Two ramps, a landing area and a guardrail will also be constructed along this side of the room.

**MANOA INNOVATION CENTER - NEW WING**

- **District:** Honolulu
- **TMK:** 2-9-26:03, 37, and 38
- **Agency:** Department of Accounting and General Services
- **1151 Punchbowl Street, Suite 430 Honolulu, Hawaii 96813**
- **Attention:** Ralph Yukumoto (586-0488)
- **Deadline:** January 22, 1994

This project is to add a two-story 6,000 square foot wing to the existing Manoa Innovation Center Building. The wing will be located in an area previously graded during construction of the original building. This addition will increase the Center’s much needed office space and enhance the promotion of technologically related business activities.

**MOKULELE ELEMENTARY SCHOOL LIBRARY EXPANSION AND RENOVATION**

- **District:** Honolulu
- **TMK:** 1-1-02:8 and Por. 5
- **Agency:** Department of Accounting and General Services
- **1151 Punchbowl Street, Room 430 Honolulu, Hawaii 96813**
- **Attention:** Ralph Morita (586-0488)
- **Deadline:** January 7, 1994

This project is to design and construct a new reinforced concrete/masonry library building addition of approximately 3,426 square feet. Also included are any site improvements, demolition work, connection to public utilities and easements which may be required as a result of this project. The renovation of the existing library (2,123 square feet) is also included.

**PIER 26 VAPOR EXTRACTION SYSTEM**

- **District:** Honolulu
- **TMK:** 1-5-38
- **Agency:** Department of Transportation, Harbors Division
- **79 South Nimitz Highway Honolulu, Hawaii 96813**
- **Attention:** Kelly Sato (587-1873)
- **Deadline:** January 7, 1994

The State Department of Transportation, Harbors Division, proposes to construct a vapor extraction system at Pier 26, Honolulu Harbor, Oahu, Hawaii. The work involves installing underground piping connected to an above-ground, mobile vapor treatment unit that will draw the vapors from the piping, burn the vapors for fuel and treat the emissions through a catalytic converter prior to release into the atmosphere.
The work will be scheduled so as not to interfere with shipping activities.

No major or significant adverse impacts are anticipated as a result of this project.

PIER 38 MASTER PLAN

District: Honolulu

TMK: 1-5-42:006; 1-5-42:07 (portion)

Agency: Department of Business, Economic Development and Tourism

Honolulu Waterfront Project

P. O. Box 2389

Honolulu, Hawaii 96804

Attention: Daniel Orodenker (586-2530)

Consultant: Lacyo Planning

737 Bishop Street, Suite 1550

Honolulu, Hawaii 96813

Attention: John Whalen (531-6824)

Deadline: January 7, 1994

In furtherance of the Honolulu Waterfront Master Plan, completed in October 1989, the Department of Business, Economic Development and Tourism (DBEDT), Honolulu Waterfront Project is proposing to develop an integrated marine research facility at Pier 38 in Honolulu Harbor. A master plan for the integrated marine research facility was completed in September 1993.

The project involves the development of shoreside facilities, pier improvements and infrastructure on a 6.35-acre site to accommodate the relocation of the University of Hawaii's Marine Expeditionary Center (Snug Harbor) from Kapalama and the J.K.K. Look Laboratory from the Kekakoo Peninsula. Limited space for other related marine research facilities will also be provided at Pier 38. Relocation of these facilities is necessary to proceed with other related, high-priority waterfront improvement projects.

The proposed marine research facility will consist of three main research buildings. The U.H. Marine Center/Storage Building will house all existing operations currently located at Snug Harbor including research, warehousing, storage, and necessary administrative functions related to facility management, port operations, and cruise staging. The Look Laboratory Building will include functions related to the fabrication, testing, and staging of in-ocean tests and experiments. The Hawaii Undersea Research Laboratory (HURL)/Machine Shop Building will house equipment repair and fabrication functions as well as manned and unmanned submersible vessels which conduct deep-ocean tests, data collection and experimentation. In addition, the development of the research facility will also involve pier improvements along the Makai (southern) and Ewa (western) shorelines of the Pier 38 site to accommodate berthing needs for ocean research vessels.

PIER 51 CONTAINER YARD LIGHTING IMPROVEMENTS

District: Honolulu

TMK: 1-2-25

Agency: Department of Transportation, Harbors Division

79 South Nimitz Highway

Honolulu, Hawaii 96813

755 Amana Street, Suite 401

Honolulu, Hawaii 96814

Attention: Rick Chong (941-9402)

Deadline: January 22, 1994

The Department of Transportation, Harbors Division is proposing to improve lighting at the Sand Island Pier 51A and Pier 51B container yard. These improvements include replacing and recircling existing light fixtures, erecting additional light poles, and adding fixtures to better illuminate the container yard areas.

UNIVERSITY OF HAWAII BATTING CAGE FACILITY

District: Honolulu

TMK: 2-8-29:1

Agency: University of Hawaii

Office of the Senior Vice President for Administration

Bachman Hall 201, 2444 Dole Street

Honolulu, Hawaii 96822

Attention: Wallace Gretz (956-8896)

Consultant: Sato and Associates, Inc.

2045 South King Street

Honolulu, Hawaii 96822

Attention: Don Sato (955-4441)

Deadline: January 22, 1994

The University of Hawaii is proposing to erect a 2800 square foot baseball batting cage facility. The facility will be a pre-engineered steel building and will be located within the baseball stadium on the Manoa (lower) campus. The purpose of the facility is for batting training and practice. Construction of the facility is being donated by the baseball booster club "Hui Kokua Kinipopo" and will not cost the State any money.

924 Bethel Street

Honolulu, Hawaii 96813

Attention: George Atta or Grant Murakami (523-5866)
Deadline: January 22, 1994

The National Oceanic and Atmospheric Administration, National Weather Service is proposing to relocate their existing Weather Forecast Office to the second floor of the Hawaii Institute of Geophysics (HIG) building on the University of Hawaii, Manoa Campus.

The proposed project would involve interior renovations to approximately 10,000 square feet of the second floor shop wing and a portion of the adjacent lab wing. Interior renovations include the removal and replacement of existing walls, doors and flooring and the installation of mechanical equipment. A number of exterior improvements are also proposed for the HIG building. These improvements include: the addition of hurricane shutters, installation of a new stairway, addition of a generator building and diesel fuel tank to the northeast corner of the building, reconfiguration of the existing parking area, concrete slab work, and the installation of air conditioning equipment and antennas on the roof of the building. Most of the area to be occupied by the Weather Forecast Office is currently vacant.

The proposed facility will have a staff of 50 employees. Besides providing an upgraded facility, the proposed project will enhance collaborative research between the University and the National Weather Service. Additionally, college students will be able to get hands-on experience at the facility. The construction of the proposed project will take approximately 8 months to complete.

### NEGATIVE DECLARATIONS

The following actions were previously published as Draft EAs and have been determined by the listed agency to have no significant impacts. As a consequence, Environmental Impact Statements are not required of these projects. Aggrieved parties who wish to contest the agency's determination have a 30-day period from this publication date, in which to initiate litigation. Any questions regarding the following project(s) should be directed to the listed contacts.

### KAUAI

#### ELEEEE ELEMENTARY SCHOOL SIX-CLASSROOM BUILDING

- **District:** Koloa
- **TMK:** 2-1-01:06 and 09
- **Agency:** Department of Accounting and General Services
- **Contact:** Ralph Morita (586-0486)

This project is to design and construct a reinforced concrete/masonry six-classroom building of approximately 7,178 square feet. Also included are any site improvements, connection to public utilities and easements which may be required as a result of this project.

### MAUI

#### KAMAOLE HEIGHTS/ROAD "F"

- **District:** Wailuku
- **TMK:** 3-9-18:por. 17, 3-9-19:por. 6, and 3-9-20:por. 20, por. 27
- **Agency:** County of Maui, Department of Public Works and Waste Management
- **Contact:** George Kay/Lloyd Lee (243-7845/243-7745)
- **Applicant:** KOAHE Limited Partnership
- **Contact:** Eager Dowling (244-1500)
- **Consultant:** Michael T. Munokiyo Consulting, Inc.
- **Contact:** Milton Arakawa (244-2015)

KOAE Limited Partnership proposes to construct Kamaole Heights, a zero lot line residential subdivision in Kihei, Maui, Hawaii. The subdivision site is 11.256 acres in size and would contain 62 h
To provide vehicular access to the project site, the project will also entail construction of Road "F", extending from South Kihei Road to Piilani Highway. Other project elements include an adjacent segment of the North-South Collector Road as well as a 24 stall parking lot intended to supplement beach parking for the Kamaole Beach Park I.

The proposed Road "F" will abut the north boundary of the Kamaole Heights subdivision. A 40 foot right-of-way is proposed for the area abutting the subdivision. An 80 foot right-of-way is provided for Road "F" in the vicinity of its intersections with Kanakaniu Road and Piilani Highway.

Makai of the Kamaole Heights subdivision, Road "F" would be comprised of two travel lanes within a 40 foot right-of-way, one lane in each direction. The project entails the construction of two lanes for Road "F" which would extend approximately 500 feet in a makai direction from the residential subdivision.

A 24 stall beach parking lot is proposed abutting Road "F" approximately 300 feet mauka of South Kihei Road. This parking lot is intended to provide additional beach parking for the Kamaole Beach Park I. From the parking lot to South Kihei Road, the project entails the construction of Road "F" within an 80 foot right-of-way.

The Road "F" improvements are proposed in connection with the new Kamaole Heights subdivision. Kamaole Heights is proposed to occupy the makai portion of lands. The mauka portion of this parcel totalling 12 acres is proposed as the second Kihei Elementary School site.

Kamaole Heights contains lots ranging in area from 5,500 square feet to 7,444 square feet. It is anticipated that dwellings would be constructed under the R-0 zero lot line overlay provisions noted in Chapter 19.84 of the Maui County Code. This allows housing which has the attributes of detached single family dwellings but which allows placement of dwellings against one of the property lines, permitting the outdoor space to be grouped and utilized to its maximum benefit.

Depending on market conditions, the project may entail the sale of improved lots to individual owner-builders or the sale of house and lot packages. Projected sales prices for the lots are approximately $120,000. Should the project involve the sale of improved lots, it is anticipated that covenants would guide the construction of zero lot line homes within the subdivision.

Typical zero lot line homes for the house and lot package include two-bedroom two-bath models as well as three-bedroom two-bath models. Interior living area could range from approximately 970 square feet to 1,450 square feet. Should house and lot packages be sold, sales prices are anticipated to be in the range of $225,000 to $260,000.

Depending on market conditions, the project may involve the construction of a recreation center intended for residents of the subdivision which could include a deck, swimming pool, and restroom facilities. Should a recreation center be included in the project it would occupy one of the lots in the subdivision.

The project also involves the construction and dedication of one of the right-of-way for the future North-South Collector Road for the area makai of the Kamaole Heights Subdivision. A 30-foot wide right-of-way would be dedicated to the County for the Kamaole Heights Subdivision parcel.

MAUI WAENA INTERMEDIATE SCHOOL NEW LIBRARY AND RENOVATION OF TEMPORARY CLASSROOMS

District: Wailuku
TMK: 3-8-07:por. 2
Agency: Department of Accounting and General Services
Contact: Ralph Morita (856-0486)

This project is to design and construct a new reinforced concrete/masonry library of approximately 5,150 square feet and to renovate the temporary facilities into general classrooms of approximately 1,800 square feet. Also included are any site improvements, connection to public utilities and any easements which may be required as a result of this project.

MAUI WAENA INTERMEDIATE SCHOOL NEW MUSIC BUILDING AND RENOVATION OF TEMPORARY CLASSROOMS

District: Wailuku
TMK: 3-8-07:por. 2
Agency: Department of Accounting and General Services
Contact: Ralph Morita (856-0486)

The project is to design and construct a new reinforced concrete/masonry structure of approximately 4,857 square feet and to renovate four (4) portable classrooms of 900 square feet each into general classrooms. Also included are any site improvements, connection to public utilities and any easements which may be required as a result of this project.

OAHU

KAHUHUI ELEMENTARY SCHOOL NEW ADMINISTRATION/LIBRARY BUILDING AND RENOVATION OF TEMPORARY CLASSROOMS

District: Koolau
TMK: 5-6-06:3, 9, 10 and 11
Agency: Department of Accounting and General Services
Contact: Ralph Morita (856-0486)

This project is to design and construct a new reinforced concrete/masonry administration/library building of approximately 8,012 square feet and to renovate the temporary facilities of approximately 2,754 square feet into general classrooms. Also included are any site improvements, connection to public utilities and any easements which may be required as a result of this project.

KAIMOLOA ELEMENTARY SCHOOL NEW ADMINISTRATION AND LIBRARY BUILDINGS

District: Ewa
TMK: 9-1-1:22
Agency: Department of Accounting and General Services
Contact: Gary Chong (856-0487)
This project is to construct an administration building of approximately 3,000 square feet and a library building of approximately 6,100 square feet. Also included are any site improvements and connections to public utilities, and any easements which may be required as a result of this project. The work is being done to implement the approved Kaimiloa Elementary School complex development plan and the incremental development schedule.

LAIE ELEMENTARY SCHOOL NEW ADMINISTRATION BUILDING AND RENOVATION OF TEMPORARY CLASSROOMS

District: Koolauloa
TMK: 5-5-18:23 and 33
Agency: Department of Accounting and General Services
Contact: Ralph Morita (886-0486)

This project is to design and construct a new reinforced concrete/masonry building of approximately 2,862 square feet of floor space and to renovate the temporary facilities of approximately 2,754 square feet into general classrooms. Also included are any site improvements, connection to public utilities and any easement which may be required as a result of this project.

MAUKA LANI ELEMENTARY SCHOOL NEW ADMINISTRATION/LIBRARY BUILDING AND RENOVATION OF CLASSROOMS

District: Ewa
TMK: 9-2-19:22
Agency: Department of Accounting and General Services
Contact: Ralph Morita (586-0486)

This project is to design and construct a new reinforced concrete/masonry administration/library building of approximately 9,345 square feet and to renovate the temporary administration/library facilities of approximately 3,600 square feet into four (4) general classrooms. Also included are any site improvements, connection to public utilities and easements which may be required as a result of this project.

MO USE OF CONSERVATION DISTRICT LAND

District: Honolulu
TMK: 3-9-10; por. 1
Agency: Department of Land and Natural Resources
Contact: Cathy Tilton (587-0377)
Applicant: Mr. and Mrs. Yoke Mo
Consultant: Gerald Park Urban Planner (533-0018)

The applicant requests a Conservation District Use Permit to remove an earth and rock berm along and fronting the western edge of their residential lot located in the Kamehame Ridge Subdivision, Maunalua, Oahu, Hawaii.

The berm is neither part of nor on the applicant's property. At one time, approximately one-half of the feature was on the applicant's property and was removed by rough grading. The remaining portion of the berm is estimated at 1,650 square feet and its volume at 185 cubic yards.

The berm is located on a parcel of approximately 894 acres owned by Kamehame School/Bernice Pauahi Bishop Estate. The Estate through its land manager has approved the applicant's request to remove the berm.

The cost of the project is estimated at $5,000 and will be completed within five working days after commencement.

VANCOUVER DRIVE HOUSING PROJECT

District: Honolulu
TMK: 2-8-16:27 and 29
Agency: City and County of Honolulu
Department of Housing and Community Development
Contact: Jason Ching (523-4368)

The Department of Housing and Community Development is proposing to acquire two adjoining properties with a total area of 26,700 square feet on Vancouver Drive in the University area. Both properties are vacant and were listed for sale in the Multiple Listing Service. Federal Community Development Block Grant and possibly HOME program funds will be used for acquisition and development of the project. Envisaged is a two to three-story multi-family building with 40-60 units with one level of parking below. The units are proposed to be rented at affordable prices.

WAIANAE INTERMEDIATE SCHOOL NEW SIX-CLASSROOM BUILDING

District: Waianae
TMK: 8-5-28:42
Agency: Department of Accounting and General Services
Contact: Ralph Morita (586-0486)

This project is to design and construct a new reinforced concrete/masonry six-classroom building of approximately 7,800 square feet. Also included are any site improvements, connection to public utilities and easements which may be required as a result of this project.

WAIPAHU INTERMEDIATE SCHOOL EIGHT-CLASSROOM BUILDING

District: Ewa
TMK: 9-4-01:1, 29 and 30
Agency: Department of Accounting and General Services
Contact: Ralph Morita (586-0486)

This project is to design and construct a reinforced concrete/masonry eight-classroom building of approximately 9,780 square feet. Also included are any site improvements, connection to public utilities and easements which may be required as a result of this project.

WAIPAHU HIGH SCHOOL WATERLINE AND FIRE HYDRANT EASEMENT

District: Ewa
TMK: 9-4-09:20
Agency: Department of Accounting and General Services
Contact: Gary Chong
The Department of Accounting and General Services proposes to convey waterline and fire hydrant easements to the City and County Board of Water Supply for fire protection improvements constructed at Waipahu High School.

DRAFT ENVIRONMENTAL IMPACT STATEMENTS

A forty-five day review period commences with the initial publication of these projects in the bulletin (see listed deadline dates). EIS's listed in this section are available for review at the following repositories:

- Office of Environmental Quality Control
- Legislative Reference Bureau
- Municipal Reference and Records Center (Oahu EISs)
- University of Hawaii Hamilton Library
- Hawaii State Library (Main Branch)
- Kaimuki Regional Library
- Kaneohe Regional Library
- Pearl City Regional Library
- Hilo Regional Library
- Kahului Regional Library
- Lihue Regional Library
- Branch library in closest proximity to the project

Please send the original copy of your comments to the accepting authority and duplicate copies of the comments to the applicant or proposing agency, consultant and OEQC.

HAWAII

AMANRESORT

District: Hamakua
TMK: 4-8-6:3, 13, 43, 44, por. 9 and 11

Accepting Authority:
County of Hawaii, Planning Department
25 Aupuni Street
Hilo, Hawaii 96720
Attention: Rodney Nakano/Daryn Arai 961-8288

Applicant:
Kukuihaele Development Company
P. O. Box 44394
Kawaihae, Hawaii 96743
Attention: Eugene McCain (882-7288)

Consultant:
Case and Lynch
460 Kilauea Avenue
Hilo, Hawaii 96720
Attention: Sandra Pechter Schutte (961-6611)
Deadline: January 7, 1994

Kukuihaele Development Company proposes the following uses on approximately 113 acres in Kukuihaele on the Hamakua Coast: 1) retreat resort consisting of Amanhideaway, a 36-unit resort hotel located near the cliff edge with views of the beautiful coastline, the Plantation Inn, a 4-suite inn in the renovated and preserved

85-year old Plantation Manager's Estate; 2) 1-acre lots (38 residential-agriculture lots and 7 residential-resort lots) to be sold in fee simple; and 3) various community benefits including boundary adjustments for existing residents bordering the project site, improvements to the Social Hall and Kukuihaele Park for community use, donation of land for expansion of cemeteries, establishment of a property tax trust fund to offset increases in property taxes resulting from the project, contribution of in-lieu affordable housing fee, granting of a lifetime lease to an existing elderly Kukuihaele resident, and voluntary commitment to comply with recommendations relating to Waipio Valley tours. The project site makai boundary follows the cliff top edge and excludes the cliff area to the shoreline. The design and operation objective is to integrate the project into the rural character and community of Kukuihaele. This resort project will add to the Amanresort chain which has eleven other world-ranked resorts in Thailand, French Polynesia, Bali and other areas.

Most of the project site consists of abandoned fields of sugar cane. The structures that do exist include: the 85-year old Plantation Manager's Estate, which will be preserved and converted into the Plantation Inn; a residence currently leased to an elderly resident, which will not be disturbed during the lifetime of the resident; and the Community Social Hall, which will be improved and dedicated to the community use. The extensive landscaping and low scale architecture will maintain the open space character of the area and minimize the view of the resort from Waipio Valley. Landscaped areas will buffer adjacent uses, including the existing Kukuihaele town, two cemeteries, and the Roman Catholic Church, from the resort.

The project is outside of the SMA. The project will require State Land Use District Boundary Amendment, General Plan Amendment and rezoning.

Attention: John Everingham (593-1116)
OEGC Bulletin
December 23, 1993

Deadline: February 7, 1994

Maui Electric Company is proposing to construct a new third 69KV transmission line to deliver power from the Maalea Power Plant to West Maui. The purposes of the Maalea-Leahiha Third 69KV Transmission Line Project are to: (1) maintain reliable electric service to West Maui in the event that one or both of the existing 69KV lines from the Maalea Power Plant to the region is out of service; and (2) provide additional transmission capacity to serve growth in West Maui.

The proposed project consists of: (1) a new 14.8-mile-long single-circuit 69KV transmission line between the Maalea Power Plant and Lahaina; (2) a new Lahainaluna Switching Station located off of Lahainaluna Road to distribute electrical power from the new line to the existing transmission system; and (3) a new 1,000-foot-long, double-circuit 69KV transmission line to connect the new switching station to the existing transmission system.

From the Maalea Power Plant, the proposed transmission line would be located along North Kihei Road to Honoapiilani Highway. The line would proceed across the West Maui Mountains to the base of Papalaua Gulch, and continue westward toward Lahaina meka of cane fields. Near Puu Hipe, the line would cross to the mauka side of the two existing 69KV lines to avoid crossing cane fields. The 1,060-foot-long segment of line crossing the existing 69KV lines would be placed underground to ensure that reliability would not be compromised by having the lines come in contact with one another. From Puu Hipe, the line would continue west and mauka of cane fields to Pilani Ditch Road, where it crosses cane fields for about one mile to the new three-acre Lahainaluna Switching Station site off of Lahainaluna Road. From the switching station, the double-circuit line would proceed makai along the edge of cane fields to connect with the existing transmission system.

The total length of the project would be 15.1 miles, of which 9.6 miles is State-owned land, and 4.8 miles is Conservation District land. The initial 1,000 feet of the line, and associated improvements within the Maalea Power Plant, would be located within the Special Management Area.

Honolulu, Hawaii 96813
Deadline: February 7, 1994

The Department of Land and Natural Resources (DLNR), Division of State Parks is proposing designation and low-key improvements for an approximately 20 acre State park in Makiki Valley and an approximately 80 acre State park at Puu Ualakae. One private parcel containing two houses will be acquired in Makiki Valley. The DLNR, Division of Forestry and Wildlife (DOFAW) is proposing minor improvements mauka of the proposed State park in Makiki.

Proposed park improvements will facilitate public picnicking, sightseeing, hiking, and meetings; accommodate interpretive and educational programs; and provide adequate facilities for Hawaii Nature Center. Proposed DOFAW improvements will provide adequate offices and storage for existing DOFAW staff.

NEW MANOA PUBLIC LIBRARY

District: Honolulu
TKM: 2-8-23:25, 2-8-23:1, 2-4-22:1 and 2-9-38:3
Accepting Authority:
Governor, State of Hawaii
c/o Office of Environmental Quality Control
220 South King Street, Suite 400
Honolulu, Hawaii 96813
Proposing Agency:
Department of Accounting and General Services
1151 Punchbowl Street, Room 430
Honolulu, Hawaii 96813
Attention: Ralph Morita (586-0486)
Consultant:
Facility Technics/Hawaii
1210 Auahi Street, Suite 104
Honolulu, Hawaii 96814
Attention: David Yamashita (591-0388)
Deadline: January 22, 1994

The Hawaii State Public Library System is proposing to expand or replace the Manoa Public Library. The recent Hawaii State Public Library System Master Plan reported that the 6,532 gross square feet (gsf) Manoa Public Library will require 22,862 gsf or an additional 16,000 gsf in order to provide services for the projected population over the next ten years.

The present site will be investigated for expansion capability. Other sites will be investigated for their capability to support a 23,000 gsf facility.

Eight sites were identified and, based on criteria established by the Hawaii State Public Library System, four were selected for further evaluation by the Environmental Impact Statement.

Candidate sites are Site 1, the existing site (TKM 2-9-23:25); Site 2, portion of the University of Hawaii Agriculture Research site (TKM 2-9-23:1); Site 3, a portion of the Manoa District Park site (TKM 2-9-38:3); and Site 4, a portion of the old Hawaii Sugar Planters' Association site (TKM 2-4-22:1).
The proposed library, when completed, will include an adult area, young adult area, children's area, reference desk, and other necessary library spaces. In accordance with the Land Use Ordinance of the City and County of Honolulu (Department of Land Utilization; December 1990), a minimum of one parking space will be required for every 300 square feet of building. Therefore, a minimum of 77 parking stalls will be required for a 23,000 square feet library.

Note: Due to changes in the DOE requirements for minimum school acreage, the Noeleani Elementary School site (Site 3 of the EIS Preparation Notice) was eliminated from the study and the Manoa District Park site has been included instead.

FINAL ENVIRONMENTAL IMPACT STATEMENTS

This section provides notice of EISs that have been submitted for acceptance. All substantive comments received by the applicant or proposing agency, and corresponding responses, should be contained within the Final EIS. This section also provides notice of acceptance determinations. Aggrieved parties who wish to contest the acceptance of an EIS have a sixty-day period in which to initiate litigation. The sixty-day litigation period starts from the date of publication of the notice of acceptance in the OEGC Bulletin.

PUAINAKO STREET EXTENSION AND WIDENING

District: South Hilo
TMK: 2-2, 2-4, 2-5
Accepting Authority: Governor, State of Hawaii
Proposing Agency: County of Hawaii, Department of Public Works
Contact: Donna Kiyosaki (961-8321)
Consultant: Okahara and Associates, Inc.
Contact: Masahiro Nishida (961-5527)
Status: Accepted by the Governor, State of Hawaii on December 3, 1993.

The Puainako Road Extension has been a part of the Hawaii County General Plan since 1967, when "A Plan for Metropolitan Area of Hilo" designated Puainako as a secondary arterial street. The proposed project involves the widening and extension of Puainako Street between Kilauea Avenue and Country Club Road in Kaumana, South Hilo, Big Island of Hawaii. The project is comprised of two major components, a widening and partial realignment of Puainako Street between Kilauea Avenue and Komohana Street, and the creation of a new highway between Komohana Street and Country Club Road. The total length of the roadway improvements is approximately 6.1 miles.

The Puainako Street Extension and Widening Project has long been envisioned as an opportunity to 1) improve the congested traffic conditions on Puainako Street and Keumana Drive, 2) improve traffic flow between Highway 11 (Volcano Highway) and the Saddle Road (Highway 20) thereby minimizing travel time and traffic hazards, and 3) provide an alternative evacuation route from Keumana in the event of volcanic hazard from Mauna Loa.

The project implementation would involve typical construction activities associated with building a roadway system. These would include effects on traffic, noise, air quality, scenic resources, and flora and fauna. There are numerous archaeological features within a portion of the project area. These features are plantation-era in age and primarily reflect activities associated with sugar cultivation. Proposed mitigation measures include additional data recovery from the features that will be destroyed by construction. The project might also necessitate the relocation of as many as six houses. Thus, short-term construction related impacts on the environment would be generated by the project. Mitigative measures would be implemented to minimize these impacts.

OAHU
LIHI LANI

District: Koolauloa
TMK: 5-9-06:6, por. 38, 82; 5-9-06:1, 18, 24
Accepting Authority: City and County of Honolulu, Planning Department
Contact: Robin Foster (527-4713)
Applicant: Obayashi Hawaii Corporation
Contact: Craig Yamagishi (236-4851)
Consultant: Group 70 International
Contact: Jeff Overton (523-5866)
Status: Currently being reviewed by the City and County of Honolulu, Planning Department.

Obayashi Hawaii Corporation has revised its land use plans for 1,143 acres in Pupukea on the North Shore of Oahu. The City and County of Honolulu Department of General Planning accepted a Final Environmental Impact Statement for the Lihi Lani Recreational Community project in May 1991. A Final Supplemental Environmental Impact Statement (Final SEIS) is now being circulated to address changes to the project concept, and to fully evaluate and disclose potential environmental impacts.

Lihi Lani will consist of residential uses, farming areas, a horse ranch, community facilities, horseback and hiking trails, and nearly 700 acres of unaffected open space. Residential uses will include 315 Country lots (one to three acres), 50 single-family affordable homes and 80 elderly affordable rentals (to be developed by the City). Agricultural uses will be integrated within portions of the Country lots as contiguous orchard, nursery and pasture areas. Reclaimed water from an oxidation pond/wetlands wastewater treatment facility will be land applied to irrigate grazing pasture and a tree nursery area.

Land use approvals required to implement the project include: State Land Use District Boundary Amendment, North Shore Development Plan Land Use Map and Public Facilities Map Amendments, Change of Zone, Special Management Area Use Permit and Conditional Use Permit, Infrastructure development could begin in 1995, followed by four phases of residential build-out over approximately 10 to 12 years.
The previous (1991) plan for Lihi Lani called for a mixed-use residential and recreational development, which included an 18-hole golf course, clubhouse, driving range, along with 120 country lots (one acre), 180 affordable housing units (single family and multifamily), horse ranch, community facilities and hiking and horse riding trails. Amendments to the North Shore Development Plan Land Use Map for the golf course, affordable housing and community facilities were granted in January 1992. The golf course and its supporting facilities have since been deleted from the project.

PAWAA REDEVELOPMENT PROJECT

District: Honolulu

TMK: 2-4-05:13, 14, 18, 19, 21, 22, 23, 26, 27, 28, 29, 31, 46

Accepting Authority: City and County of Honolulu
Planning Department

Contact: Tim Hata (527-6070)

Proposing Agency: City and County of Honolulu
Department of Housing and Community Development

Contact: Karen Iwamoto (523-4377)

Contact: Frances Yamada (946-2277)

Status: Currently being reviewed by the City and County of Honolulu, Planning Department.

The City and County of Honolulu Department of Housing and Community Development and the State of Hawaii Housing Finance and Development Corporation propose a mixed-use residential, commercial, retail, and community facility development in the Makiki District. The Pawaa Redevelopment Project site encompasses approximately 461,080 square feet of land within a portion of two blocks and is bounded by King, Keeauumoku and Beretania Streets and Kaheke Lane and bisected by Young Street.

Major elements of the redevelopment include:

- Approximately 1,768 residential units located within five high-rise residential towers and two mid-rise residential towers.

Sixty (60) percent of the residential units, or approximately 1,061 units, will be designated as affordable rental units. Approximately half of the affordable rental units will be offered to gap group households earning between 81 and 120 percent of the median income. The remaining half of the affordable rental units will be rented to low and moderate income households earning below 80 percent of the median income. Approximately 177 of the affordable rental units will be designated for elderly housing.

The remaining approximately 707 residential units will be designated as market-rate units and will be sold in fee at prevailing market rates.

- Approximately 145,000 square feet of commercial/retail space, including approximately 65,000 square feet of leasable retail space, approximately 40,000 square feet for a supermarket, and approximately 40,000 square feet for an 8-plex cinema.

- Approximately 10,000 square feet for a community recreation center.

- Approximately 10,000 square feet for development of classroom facilities for a Kindergarten through Grade 2 public elementary school, and an approximately 9,000 square-foot school playground.

- A total of approximately 2,897 on-site parking stalls, including approximately 1,237 stalls to accommodate the market-rate residential units, approximately 928 stalls for the affordable rental units, approximately 670 parking stalls to accommodate the commercial/retail component, approximately 50 stalls to accommodate the community recreation center, and approximately 12 stalls for the Kindergarten through Grade 2 public elementary school.

- Transition of a portion of Young Street within the project site to below-grade to allow for contiguous on-grade development and a proposed on-grade bikeway flanking both sides of Young Street.

- Preservation and inclusion of the one-level portion of the existing stone building and landscaped grounds located on the State Department of Agriculture parcel at the corner of King and Keeauumoku Streets.

- Widening of Kaheka Lane to provide for improved ingress/egresses.

- A landscaped open park area located mid-block and adjacent to and between Beretania and Young Streets.

In addition to the five City- and State-owned parcels, the City and State plan to acquire the eight privately-owned parcels within the site to consolidate ownership and create the mixed-use and mixed-income urban community. The portion of Young Street traversing through the project site will remain open to through traffic, while serving as the main residential vehicular entryway into the project. Roadway improvements, including the provision of additional turn lanes, will be implemented as part of the redevelopment to accommodate project-related traffic. The project will be developed within a 300-foot height limit and will be built in two major phases. The project components will be situated on seven levels, including three below-grade levels, one on-grade level, and three levels above-grade.

Development of the affordable rental residential towers, the commercial/retail component, the community recreation center, the Kindergarten through Grade 2 public elementary school, and the Phase 1 parking facility will be undertaken by the City and State. Development of the market-rate residential towers and the Phase 1 parking facility will be undertaken by a private developer.
2 parking facility will be undertaken by private developers through the Request for Proposals (RFP) process. The City and State will initiate the RFP process for private operation/ownership of the completed improvements of the commercial/retail component. Total development cost for the affordable residential towers, the commercial/retail component, the Phase 1 parking facility, and the community facilities is estimated to be $290,000,000. Financing for the project will be provided by a combination of City, State and private resources.

NOTICES

The following notices are not under the authority of Chapter 343, Hawaii Revised Statutes and the Office is publishing such notices to direct the attention of interested persons to environmental issues.

MOLOKAI

NOTICE OF AVAILABILITY
IPUKA'IOLE FISHPOND, KAINALU, DEPARTMENT OF THE ARMY
PERMIT APPLICATION FOR RESTORATION
(Environmental Assessment/FONSI)

The U. S. Army Corps of Engineers, Honolulu District is evaluating a permit application by Mr. Lance "Kip" Dunbar to restore Ipukea’Iole Fishpond at Kainalu Molokai. An Environmental Assessment (EA) and Findings of No Significant Impact (FONSI) documents have been prepared for this project. The EA/FONSI documents and a coastal study are available for public review at the following locations:

County of Maui
Planning Department
250 South High Street
Wailuku, Hawaii

County Office
Mitchell Paulele Center
Kaunakakai, Hawaii

Office of State Planning
CZM Program Office
1177 Alakea Street
Honolulu, Hawaii

Corps of Engineers
Honolulu District
Building T-1, Room 105
Fort Shafter, Hawaii

In summary, the EA/FONSI documents indicate that the fishpond restoration will not have a significant impact on the quality of human environment at Kainalu. With conditions, the restoration of the fishpond would not cause a significant environmental impact and the preparation of a Federal environmental impact statement (EIS) is not required.

Interested parties are encouraged to submit in writing any comments that they may have on the proposed activity. Comments should be submitted to this District by January 10, 1994. Written inquiries and comments should be mailed to: District Engineer (CEPOD-CD-O), U. S. Army Corps of Engineers, Building 230, Fort Shafter, Hawaii 96858 and should make reference to public notice number: PODCO 2241-C. For further information, please contact the Operations Division at (808) 438-9258 and refer to file number PODCO 2241.

DEPARTMENT OF HEALTH
WASTEWATER BRANCH
OAHU

LAIE WATER RECLAMATION FACILITY
(Draft Environmental Impact Statement)

District: Koolauloa
TMK: 5-5-06:pr. 1
Agency: Department of Health, Wastewater Branch
500 Ale Moana Boulevard, Suite 250
Five Waterfront Plaza
Honolulu, Hawaii 96813
Attention: Dennis Tulang (586-4294)
Applicant: Hawaii Reserves, Inc.
56-510 Kamehameha Highway
Laie, Hawaii 96762
Attention: M. Brett Borup (293-2161)
Consultant: Group 70 International, Inc.
924 Bethel Street
Honolulu, Hawaii 96813
Attention: Jeffrey Overton (523-5866)
Deadline: January 22, 1994

Hawaii Reserves, Inc. is planning to develop the Laie Water Reclamation Facility (LWRF) to replace the existing Laie Wastewater Treatment Plant. HRI is now carrying out responsibilities of Zions Securities Corporation under a Federal Consent Decree. The existing treatment plant is an extended aeration facility designed to treat approximately 0.445 million gallons per day (mgd), and was upgraded over the past two years to an advanced secondary level of treatment. The existing wastewater system serves the Hawaii Temple, Brigham Young University - Hawaii campus, Polynesian Cultural Center, Laie Shopping Center and portions of the Laie residential area.

A new oxidation channel wastewater treatment system is planned for an approximately 11.5 acre site on agricultural land in the southern portion of the Laie community. This facility will provide an advanced secondary level of treatment, with tertiary filtration and ultraviolet light disinfection. The proposed LWRF will accommodate the planned development of a new residential area and limited commercial and institutional facilities expansion in Laie over the next 20 years.

The current disposal method involves an existing subsurface leach field located approximately 4,000 feet southeast of the existing treatment plant. The leach field is currently accepting 100 percent of reclaimed water from the existing facility, which will be expanded for long-term disposal use. The former effluent discharge to the Pooha’ai Wetlands was terminated in April 1993.

One long-term disposal method being presented is water reclamation for agricultural land irrigation purposes. Another long-term disposal method being presented is the potential use of injection wells. Excess reclaimed water not used in land application...
will be disposed at the expanded leach field, with the injection wells used for back-up disposal. Biosolids generated by the new treatment facility will either be aerobically digested/dewatered or stabilized and co-composted with green waste from the community. The resulting product will be land applied as a soil amendment in the reuse areas.

The proposed Laie Water Reclamation Facility does not trigger legal requirements for preparation of an EIS pursuant to Chapter 343, Hawaii Revised Statutes (HRS); however, the DOH and Zions Securities Corporation agreed to prepare an EIS as part of the planning and permitting process. The EIS process will allow the potential environmental effects of the proposed project to be fully addressed and disclosed to agencies and interested organizations and individuals. Standard EIS processing procedures and timetables will be followed in the preparation and review of the environmental documents for the LWRF project, even though the documents are not being prepared pursuant to Chapter 343, HRS.

NATIONAL ENVIRONMENTAL POLICY ACT (NEPA) DOCUMENTS

The following are notices of availability of NEPA-related environmental documents. Questions associated with these documents should be directed to the listed contact person.

HAWAII

IMPLEMENTATION PLAN FOR THE GEOTHERMAL PROJECT EIS (DOE/EIS-0187) AND EIS MAILING LIST
(Notice of Availability)

Copies of the Implementation Plan have been distributed to press contacts; Federal, State and local agencies; business and special interest groups; community, environmental and Native Hawaiian Organizations; geothermal developers; and utilities who have expressed interest in the Hawaii Geothermal Project EIS. Copies of the Implementation Plan and the EIS mailing list have also been placed in the DOE reading rooms identified in the enclosures. (Call OEQC for information about a reading room in your area). Questions about the Implementation Plan or requests for copies may be directed to:

Ms. Judith C. Stroud, ER-10
Program Director, Hawaii Geothermal Project
Environmental Impact Statement
U. S. Department of Energy, Oak Ridge Operations
P. O. Box 2001
Oakridge, TN 37831-8600
Telephone: (615) 576-0723
FAX: (615) 576-0006

To help facilitate communications, the Department of Energy has established a toll-free telephone line for the Hawaii Geothermal Project Environmental Impact Statement. The phone, which will be answered by voice mail, will be accessed regularly for messages. The toll free number is: 1 + 800-HGP-EIS6 (1 + 800-447-3476)

ENVIRONMENTAL COUNCIL

PUBLIC NOTICE: ENVIRONMENTAL COUNCIL MAILING LIST

To further increase public involvement and to implement the provisions of Section 92-7(c), Hawaii Revised Statutes, the Environmental Council requests that persons interested in receiving notification of its meetings call 586-4185 to be placed on a meeting notification mailing list. Requests to be placed on the mailing list may also be sent to:

Environmental Council, State of Hawaii
220 South King Street, Suite 400
Honolulu, Hawaii 96813

MELVIN DAVID L. KALAHIKI
Chairperson, Environmental Council

PUBLIC NOTICE OF AVAILABILITY: 1992 ANNUAL REPORT OF THE ENVIRONMENTAL COUNCIL

The Environmental Council announces that the "1992 Annual Report of the Environmental Council" is available at no charge to the public. Interested persons may obtain a copy by calling 586-4185 or by writing to:

Office of Environmental Quality Control
220 South King Street, Suite 400
Honolulu, Hawaii 96813

MELVIN DAVID L. KALAHIKI
Chairperson, Environmental Council

OTHER NOTICES

GUIDELINES FOR PREPARING ENVIRONMENTAL ASSESSMENTS

These guidelines are intended to provide help to the agencies and the public regarding the environmental review process; specifically for the preparation of environmental assessments. The reader is referred to Chapter 343 of the Hawaii Revised Statutes, Chapter 200 of Title 11, Department of Health Administrative Rules, and to Act 241, Session Laws of Hawaii 1992, prior to any document preparation. (References in brackets refer to either Chapter 343, Hawaii Revised Statutes, Act 241, SLH 1992, or Title 11, Chapter 200, Department of Health Administrative Rules.)

For an overview of the EA/EIS Process, see the process flowcharts, included as Figures 1 and 2 in the new Guidebook.
WHAT IS THE PURPOSE OF PREPARING AN ENVIRONMENTAL ASSESSMENT? The purpose of preparing an environmental assessment is to determine if the impacts of a proposed action are significant enough to warrant the preparation of an Environmental Impact Statement (§11-200-2).

WHAT IS AN ENVIRONMENTAL ASSESSMENT? An environmental assessment is a document which is prepared for a proposed action which triggers the Environmental Impact Statement Process. Briefly summarized, the eight triggers that require the preparation of an environmental assessment (§343-6) are:

1. Use of State or County lands or funds
2. Use within Conservation District Lands
3. Use within the Shoreline Setback Area
4. Use within any Historic Site or District
5. Use within the Waikiki Special District
6. Amendments to a County General Plan (except for those initiated by the County)
7. Reclassification of Conservation Lands
8. Construction or modification of helicopter facilities

IS THERE A NEED TO CONSULT WITH OTHERS EARLY IN THE PROCESS? YES. During the preparation of an environmental assessment, the procedures listed in §11-200-9, Early Assessment, must be followed. Historically, one of the steps frequently overlooked has been §11-200-9 (a)(4). This section requires consultation with agencies having jurisdiction or expertise as well as consultation with citizen groups and individuals.

CAN ACTIONS OR PROJECTS BE SEGMENTED? NO. The proposed action must be described in its entirety; therefore, projects should not be done on an incremental basis to avoid the preparation of an environmental impact statement (§343-6(a)(2), §11-200-7).

WHAT HAPPENS IF AN ACTION IS SUBJECT TO MORE THAN ONE TRIGGER TO THE EIS PROCESS? If an action is subject to more than one trigger to the EIS process, all applicable approving agencies are encouraged to be involved in the preparation of the environmental assessment and determination as to whether an environmental impact statement is required for the action. Otherwise, the action would be subject to separate environmental assessment processes (including separate 30-day review periods for anticipated negative declarations) and determinations for each approval. Notice of each separate determination will be published in the OEQC Bulletin.

WHAT IS REQUIRED IN AN ENVIRONMENTAL ASSESSMENT? Draft and final environmental assessments must include (but are not limited to) the following (§11-200-10):

1. Identification of applicant or proposing agency;
2. Identification of approving agency, if applicable;
3. Identification of agencies consulted;
4. General description of the action's technical, economic, social, and environmental characteristics; (Some GENERAL guidelines to the content of each characteristic are listed below):

This section should generally answer the "What, Why, Where, When, Who and How" of the proposed action and its short and long-term impacts.

Technical: Describe the purpose of the project and in general terms how the project will be accomplished. If applicable, the spatial dimensions of the project and its timing should be included.

Socio-economic: Describe the economic impacts on the immediate community as well as on the community at large. The assessment may include, but not be limited to, providing income for the county/state and creating employment opportunities in areas with high unemployment rates.

Describe issues pertinent to the specific project. If an action involves a targeted segment of the population, any/all positive or negative effects must be discussed. In addition, any other issues pertinent to the action (such as: population density, recreational facilities, child care provisions, relocation of residences, etc.) must be discussed.

The Socio-Economic Impact does not apply to the impact of the action on the proposing agency or applicant. For state or county projects, the cost of the proposed action should be included in the assessment.

Environmental Characteristics: Describe, as applicable, aesthetics, the generation of air pollution, traffic congestion, noise levels, effects on water quality or any other aspect of the environment which may be affected by the proposed action.

Summary description of the affected environment, including suitable and adequate location and site maps;

Include descriptions of flora, fauna, significant habitats, historical/ archeological and cultural sites. Describe adjacent natural resources. Sensitive habitats (such as a refuge or bodies of water (stream, river, ocean, estuary, encheliane pond) adjacent to a proposed project need to be addressed.

Identification and summary of major impacts and alternatives considered, if any; identify positive as well as negative major impacts. The impacts of concern are of the proposed action on the surrounding environment and community, not the impact of the environment on the action. The alternatives considered should be included when applicable.

Proposed mitigation measures, if any: It is not sufficient to write one sentence stating that appropriate mitigation measures shall be instituted wherever necessary. The potential problems must be identified and appropriate mitigation described in general terms. If a mitigation measure is identified, the corresponding impact should be described in the impacts section. Best Management Practices should be cited whenever possible. For
Program; and 2) a copy of the approval letter for the plans from the State Historic Preservation Program.

Determination;

The agency shall consider every phase of a proposed action, the expected consequences, both primary and secondary, and the cumulative as well as the short and long-term effects of the action in making a determination. For environmental assessments for which a negative declaration is anticipated, a draft environmental assessment shall be made available for public review and comment for a period of thirty days. Subsequently, a final environmental assessment shall be prepared to determine whether an EIS is required (Act 241, SLH 1992).

After reviewing the comments received during the 30-day review period for anticipated negative declarations, the responsible agency may make a Negative Declaration or EISPN determination. If an EISPN is determined, the project must undergo an additional 30-day consultation period to define the scope of the Draft EIS.

A determination letter from the Agency must be submitted with the final environmental assessment identifying it as either a Negative Declaration or Environmental Impact Statement Preparation Notice. This letter is a formal declaration stating that the document has been reviewed and the action will or will not have significant impacts on the environment. This must be the Approving Agency’s determination, not the consultant’s determination (§343-5(c)).

Findings and reasons supporting the determination;

Evidence justifying the statement that the proposed action will or will not result in any significant environmental impact must be included.

Agencies to be consulted in the preparation of the environmental impact statement, if applicable. This is necessary only for assessments which are determined to require environmental impact statements.

WHAT HAPPENS AFTER AN ENVIRONMENTAL ASSESSMENT IS SUBMITTED?

- If the agency determines the action will have a significant impact, an Environmental Impact Statement Preparation Notice is issued. Publication of this determination in the OEQC Bulletin will initiate a 30-day consultation period to define the scope of the Draft EIS.

- If the agency anticipates the action will not have a significant impact, the document will be published in the OEQC Bulletin as a Draft environmental assessment and will undergo a formal 30-day review period beginning on the date of publication in the OEQC Bulletin. Following the end of this 30-day review period, any comments received along with their responses must be incorporated into the Final environmental assessment. If appropriate, the text, figures, tables, maps and other ancillary parts of the environmental assessment should be revised. After undergoing the 30-day review period required by Act 241, SLH 1992, if the agency determines that:

a) the action will not have a significant impact, a negative declaration will be issued. Publication of this determination in the OEQC Bulletin will initiate the 30-day period to legally challenge the determination in court.

b) the action may have a significant impact, an EISPN will be issued and the project will undergo an additional 30-day consultation period to define the scope of the Draft EIS.

WHAT IS REQUIRED IN A NOTICE OF DETERMINATION?

The Notice of Determination (Negative Declaration or EIS Preparation Notice) which is issued by the Approving Agency must include (§11-200-11(c)):

1) Identification of applicant or proposing agency
2) Identification of approving agency
3) Brief description of proposed action
4) Determination
5) Reasons supporting the determination
6) Name, address and phone number of contact person for further information

HOW IS THE PUBLIC MADE AWARE OF PROJECTS FOR WHICH EAS HAVE BEEN PREPARED? Draft Environmental Assessments, Negative Declarations and EIS Preparation Notices must be submitted by the appropriate agency to OEQC for publication in the OEQC Bulletin (§11-200-11(b)). OEQC has an "OEQC Bulletin Publication Form" which should be filled out and submitted to OEQC with the Draft Environmental Assessment, Negative Declaration or Environmental Impact Statement Preparation Notice.

CHALLENGING NEGATIVE DECLARATIONS. Once a final negative declaration determination has been made, the determination stands as a Negative Declaration until it is challenged in court and reversed by the same. There is a 30-day period (§343-7(b)/Act 241, SLH 1992) starting when the determination is published in the OEQC Bulletin for an aggrieved party to challenge the determination of "negative declaration.”

CHALLENGING ENVIRONMENTAL IMPACT STATEMENT PREPARATION NOTICES (EISPN). There is a 60-day period (§343-7(b), Act 241, SLH 1992) starting when the EISPN determination is first published in the OEQC Bulletin for an aggrieved party to challenge in court the agency determination that an EIS is required.

PRE-ASSESSMENT CONSULTATION LIST FOR ENVIRONMENTAL ASSESSMENTS

During the preparation of an environmental assessment, the procedures listed in Hawaii Administrative Rules, §11-200-9, Early Assessment, must be followed. Historically, one of the steps frequently overlooked has been §11-200-9(a). This section requires consultation with agencies having jurisdiction or expertise as well as consultation with citizen groups and individuals.

The appropriate agencies and groups from the list below should be consulted before the preparation of an environmental assessment. This list is not meant to be comprehensive. Each proposed action is unique in itself and may require consultation with other agencies and concerned groups.
