Primary Urban Corridor Changes

The City Department of Transportation Services has submitted a suppplemental EIS preparation notice for its Primary Corridor project. As a result of follow-up public input, the routing of the in-town BRT (Bus Rapid Transit) lines in the Kaka'ako area has been changed. The proposed new routes will undergo a complete EIS review. Please note that comments will be accepted on the Primary Transportation Corridor in its entirety. See page 18 for details.

‘Iwilei Elderly Residential Complex Proposed

The Housing and Community Development Corporation of Hawai‘i (HCDCCH) is proposing to redevelop a portion of State-owned property in Iwilei. HCDCCH has issued a Request for Proposals to develop and manage an elderly residential complex. Selection of the developer is expected to occur in late August 2001. The project will be constructed on 1.6 acres located between the OR&L Terminal building and the ‘Iwilei Business Center. It will include up to 200 affordable rental units, an adult day care center with assisted and supportive living services, parking, and landscaping. Please see page 7 for more information.

Wilson Okamoto & Associates Responds Below to an OEQC article on Kaunala (see also p. 7)

The following is a response by Earl Matsukawa of Wilson Okamoto & Associates, Inc., agent for the applicant, to OEQC’s lead article in the May 8, 2001, Environmental Notice.

“Kaunala Subdivision FEIS Accepted”

“The City Department of Planning and Permitting (DPP) has accepted the Final EIS for the Kaunala Residential Subdivision. In the May 8, 2001 Environmental Notice, the OEQC declared that it had found the Draft EIS for the project to be incomplete under the requirements of Chapter 343, HRS (State EIS law). The OEQC erred in publishing this finding for several reasons. First, the Draft EIS was filed in conjunction with a Special Management Area permit application pursuant to City ordinance (Chapter 25, ROH) which has different requirements for completeness than Chapter 343. Secondly, OEQC overstepped the DPP, which is the only accepting authority under both Chapter 25 and Chapter 343 to determine completeness of the Draft EIS for public review. Third, the OEQC abused the purpose of the Environmental Notice, as specified by Chapter 343, in publishing its unauthorized “finding.” OEQC’s action confused the public and cast the integrity of the applicant and the competence of his agent in a poor light. Worst of all, the OEQC subverted the comment and response process that is the heart of EIS. OEQC’s “finding” suggests that it is absolute and incontestable. To the contrary, the Final EIS includes a response letter from the applicant’s agent offering point-by-point counter-arguments as to the completeness of the Draft EIS under Chapter 343 requirements, notwithstanding their inapplicability. We appreciate the opportunity to offer this perspective in the Environmental Notice.”
Draft Environmental Assessment

A project or action that may affect the environment cannot be implemented until an Environmental Assessment (EA) is prepared in accordance with HRS §343. If the lead government agency anticipates that the project will have no significant environmental impact, then a Draft EA is written and public notice is published in this bulletin. The public has 30 days to comment on the Draft EA from the date of the first notice.

Final Environmental Assessment and FONSI (Negative Declaration)

If, after the lead agency reviews the public comments, it feels that the project will have no significant effect on the environment, then it will prepare a Final EA and issue a Finding of No Significant Impact (FONSI) formerly called a Negative Declaration. The Final EA must respond to all public comments. An Environmental Impact Statement will not be required and the project may now be implemented. The public has 30 days from the first notice of a FONSI in this Bulletin to sue in court to require the preparation of an EIS.

EIS Prep Notice

If the lead agency decides that a project may have a significant environmental impact, it must prepare an Environmental Impact Statement (EIS) prior to implementing the project. The first step in preparing an EIS is publishing an EIS Preparation Notice (Prep Notice) in this Bulletin. Agencies, groups or individuals have 30 days from the first publication of an EIS Prep Notice to request to become a consulted party and to make written comments regarding the environmental effects of the proposed action. The draft EIS must respond to these comments.

Draft EIS

If a project is likely to have a significant environmental impact, the lead agency or private applicant must prepare a Draft Environmental Impact Statement (Draft EIS) prior to project implementation. This document must completely disclose the likely impacts of a project. Secondary and cumulative impacts must be discussed along with measures proposed to mitigate them. The public has 45 days from the first publication date in this Bulletin to comment on a Draft EIS.

Final EIS

After considering public comments filed during the Draft EIS stage, the agency or applicant must prepare a Final Environmental Impact Statement (Final EIS). The Final EIS must respond to all comments from the draft stage. If deeper analysis was required, it must be included in this document. If the project is from a private applicant, the lead agency is authorized to accept the FEIS. If the project is public, the Governor or Mayor is the accepting authority. Only after the EIS is accepted, may the project be implemented.

EIS Acceptance Notice

If the accepting authority accepts a Final Environmental Impact Statement, a separate EIS Acceptance Notice will be published in this Bulletin. The public has 60 days from the date of first notice of acceptance to sue in court to challenge the acceptance of an EIS.

NEPA

National Environmental Policy Act (NEPA) is the law that requires federal projects to prepare an EIS. It is similar to Hawaii's law. Some projects require both a state and federal EIS and the public comment procedure should be coordinated. Although not required by law, the OEQC publishes NEPA notices in this Bulletin to help keep the public informed of important actions.

Special Management Area Permits

The Special Management Area (SMA) is along the coastlines of all our islands. Most development in this area requires a Special Management Permit (SMP). The Counties regulate development of this area. On Oahu, the County law requires an EA be prepared to accompany a permit application. This Bulletin posts notice of these SMP applications to encourage public input.

Shoreline Certifications

State law requires that Hawaii shorelines be surveyed and certified when necessary to clearly establish the regulatory building setback (usually 40 feet inland from the shoreline). The public may participate in the process to help assure accurate regulatory boundaries. Private land owners often petition to have their shoreline certified prior to construction. This Bulletin publishes notice of both shoreline certification applications and of final certifications or rejections.

Environmental Council

The Environmental Council is a fifteen-member citizen board appointed by the Governor to advise the State on environmental concerns. The council makes the rules that govern the Environmental Impact Statement process. The agendas of their regular meetings are published in this Bulletin and the public is invited to attend.

Exemption Lists

Government agencies must keep a list describing the minor activities they regularly perform that are declared exempt from the environmental review process. These lists are reviewed and approved by the Environmental Council. This Bulletin will publish an agency's draft exemption list for public comment prior to Council decision making.

Conservation District Permits

Use of land in the State Conservation District requires a Conservation District Use Application (CDUA). These applications are reviewed and approved by the Board of Land and Natural Resources (BLNR). Members of the public may intervene in the permit process. Notice of these permit applications is published in this Bulletin.

Draft Environmental Assessments

(1) Kapahulu Community Plan, Phase I Improvements

District: Honolulu
TMK: Various
Applicant: City and County of Honolulu
Department of Design and Construction
650 South King Street, 9th Floor
Honolulu, Hawai‘i 96813
Contact: Donald Griffin (527-6324)

Approving Agency/Accepting Authority: Same as above.

Consultant: PlanPacific, Inc.
345 Queen Street, Suite 802
Honolulu, Hawai‘i 96813
Contact: Dina Tamura Wong (521-9418 x 14)

Public Comment
Deadline: September 22, 2001
Status: DEA First Notice pending public comment.
Address comments to the applicant with copies to the consultant and OEQC.

Permits Required: none

The City & County of Honolulu, Department of Design and Construction proposes to develop the following seven projects as part of the implementation of the City’s Kapahulu Community Plan (February 2001).

Makai Parking Lot. The site for the makai parking lot is on the ‘Ewa-makai corner of the Kapahulu Avenue-Date Street intersection, on a portion of the Ala Wai Golf Course to the rear of the Hawaiian Dredging Building and extending to the Date Street frontage. The parking lot would have approximately 150 to 160 spaces.

Mauka Parking Lot. Development of this municipal parking lot for the Mauka Business Area involves the interior portion of the vacant, privately-owned former Love’s Bakery lot. It also includes portions of three adjacent lots that are under the same ownership. The Love’s Bakery site is centrally located along Kapahulu Avenue and is large enough to accommodate at least 200 parking spaces for area businesses and other future uses on the property.

Crane Park and Bicycle Rest Stop. The “passive” area of Crane Park between Kapahulu Avenue and the basketball courts is designated for improved paving, seating, and landscaping. The proposed bicycle rest stop would be located in Crane Park at the corner of Kaimuki and Kapahulu Avenues.

Kaimuki Avenue Pedestrian/Bicycle Pathway. The proposed pathway for shared use by bicyclists and pedestrians would extend along the makai side of Kaimuki Avenue from Kapi‘olani Boulevard to Kapahulu Avenue. The paved two-directional, multi-use path would be separated from roadway traffic.

Bicycle Staging Area. The bicycle staging area would be located adjacent to the proposed community center and the existing Ala Wai share-used pathway. The bicycle staging area would be designed to be a meeting and resting stop for recreational bicyclists of all skill levels.

Crosswalk and Sidewalk Improvements. In the near-term, crosswalk and sidewalk improvements are limited to the landscaped gateways and to the planting of additional street trees on Campbell Avenue and on Kapahulu Avenue makai of Campbell Avenue.

Landscaped Gateways. The sites include two traffic islands adjacent to and partially beneath the H-1 Freeway at the mauka end of Kapahulu Avenue, and a triangular traffic island at the makai end of Kapahulu Avenue at the intersection with Leahi Avenue. The proposed gateway features will include plantings that support xeriscaping principles, thematic community signs, and low-intensity landscape lighting to enhance visibility and improve pedestrian safety at night.
(2) Waimanalo District Park Master Plan

District: Ko‘olau
TMK: 4-1-09:264
Applicant: City and County of Honolulu
Department of Design and Construction
650 South King Street, 11th Floor
Honolulu, Hawai‘i 96813

Honolulu, Hawai‘i 96814
Contact: Glenn Kimura (944-8848)

Public Comment Deadline: September 22, 2001
Status: DEA First Notice pending public comment.
Address comments to the applicant with copies to the consultant and OEQC.

Permits Required: Grading, construction, NPDES

The City and County of Honolulu, Department of Design and Construction proposes to construct improvements at Waimanalo District Park to implement an updated Master Plan. The environmental assessment covers planned elements that are sited within the boundaries of the existing 26-acre district park, located at 41-415 Hihimanu Street. Near-term improvements consist of repairs to the existing playfields, gym, multipurpose building, and comfort station; lighting for the play courts and outer parking lots; construction of a lighted jogging/walking path, and landscaping. Proposed new construction include a 5,000-square foot multi-sport building and a pavilion (or hale) of approximately 1,760 square feet. Longer term improvements include expansion of the main parking lot, additional play courts, bleachers for the playfields, a 50-meter swimming pool, a second pavilion, and skateboard facility. The master plan was developed through the vision process sponsored by the City and County of Honolulu. The proposed improvements will correct potential safety hazards and maximize the use of existing facilities. Expanded indoor and outdoor facilities will ease scheduling conflicts due to overlapping schedules and competing demands.

(3) Kawa Ditch Improvements (Courtesy notice)

District: Ko‘olau
TMK: 4-5-89:23
Applicant: Civil Design & Engineering Division
Department of Design and Construction
City and County of Honolulu
650 South King Street, 11th Floor
Honolulu, Hawai‘i 96813
Contact: Dennis Toyama (523-4756)

Approving Agency/Accepting Authority: Department of Design and Construction

Contact: Rae Loui (523-4564)

Consultant: Gray, Hong, Bills, Nojima & Associates, Inc.
841 Bishop Street, Suite 1100
Honolulu, Hawai‘i 96813-3908

Public Comment Deadline: The City seeks comments on the project by September 22, 2001.
Status: June 8, 1995, negative declaration (FONSI)

Kawa Ditch is located in the Pikoiloa Tract Unit No. 9 subdivision in Kan‘eōhe, O‘ahu and flows into Kawa Stream. It is situated off Mokulele Drive within a 40-foot wide drainage right-of-way owned by the City and County of Honolulu. Kawa Ditch was partially lined in 1963; however, surveys revealed erosion with undermining of several lined areas. Erosion has hampered maintenance by limiting vehicular access, and has allowed the ponding of stagnant water resulting in severe odors. In addition, the existing Kawa Ditch does not have adequate capacity required under “Rules Relating to Storm Drainage Standards” of the City & County of Honolulu. The proposed project was initiated by the City and County of Honolulu Department of Public Works and a Negative Declaration (Finding of No Significant Impact) was issued for the Environ-
mental Assessment for Kawa Stream Improvements on June 8, 1995. Subsequently, construction plans and specifications were developed and various environmental permits were obtained for the project; however, the City was unable to secure construction funding for the project. The City is again proposing the project through the Department of Design and Construction. As originally proposed, the project will involve construction of 850 LF of concrete-lined channel within the City’s right-of-way. The construction cost, estimated at $900,000, will be funded entirely by the City. The project is expected to take 3 to 4 months beginning in the mid to latter part of 2002. Construction will temporarily inconvenience neighboring residents with equipment noise, dust and possibly some interference with vehicular and pedestrian traffic. However, the contractor will be required to provide adequate grading, stockpiling and erosion control measures as required by Chapter 23 of the Revised Ordinances of Honolulu, and to comply with requirements of HAR Chapter 11-46, Community Noise Control.

**Status:** EISPN first Notice pending public comment. Address comments to the applicant with copies to the approving agency or accepting authority, the consultant and OEQC. Important note: comments may be submitted on the entire project

Permits Required: Dewatering, street usage, stream channel alteration, special management area, NPDES discharge

The City and County of Honolulu Department of Transportation Services (DTS), in cooperation with the U.S. Department of Transportation, Federal Transit Administration (FTA) and Federal Highway Administration (FHWA), will be preparing a Supplemental Draft Environmental Impact Statement (SDEIS). The proposed action is intended to address existing and future transportation demand and capacity needs, support socioeconomic growth, improve public transit services, facilitate land use development, and support current planning activities and policies. Since completing the August 2000 Primary Corridor Transportation Project Major Investment Study/Draft Environmental Impact Statement (MIS/DEIS) and considering comments received after the MIS/DEIS was distributed, the DTS proposes that another In-Town bus rapid transit (BRT) branch operating from the ‘Iwilei Transit Center, through the Aloha Tower Marketplace and Kaka‘ako makai (the area makai of Ala Moana Boulevard) may be warranted. It should be noted that the MIS/DEIS Preparation Notice was published in the April 23, 1999 The Environmental Notice and the availability of the MIS/DEIS for review and comment was published in the September 8, 2000 The Environmental Notice. In addition, the DTS proposes to amend the Locally Preferred Alternative (LPA) to include rerouting the In-Town BRT branch to the University of Hawai‘i–Manoa alignment from Ward Avenue to Pensacola Street and using the Aloha Stadium Park-and-Ride with an H-1 access ramp from Luapele Drive instead of the previously proposed Kamehameha Drive-In facilities. The new branch would begin at the ‘Iwilei Transit Center, travel Koko Head onto ‘Iwilei Road, turn Koko Head onto North King Street, and proceed to the Hotel Street Transit Mall. It then proceeds in the makai direction on Bishop Street to Aloha Tower Drive. From Aloha Tower Drive, the branch continues in the Koko Head direction on Ala Moana Boulevard and then turns in the makai direction onto Channel Street. The branch then turns in the Koko Head direction onto Ilalo Street and then turns in the mauka direction onto Ward Avenue and proceeds until Auahi Street. From this point, the branch follows the LPA Kaka‘ako/Waikiki branch routing to its terminus in Waikiki. In the reverse direction the Kaka‘ako Makai branch travels Ewa from Waikiki following the LPA Kaka‘ako/Waikiki branch until Auahi Street at Ward Avenue. From Auahi Street/
Ward Avenue, the Kaka‘ako Makai branch travels ‘Ewa in reverse of the Koko Head direction; except that, at the intersection of Bishop Street/Nimitz Highway, the branch turns Koko Head onto Nimitz Highway, then mauka onto Richards Street, and then follows the LPA Kaka‘ako/Waikiki branch to the ‘Iwilei Transit Center, where the new branch ends. If the STREAM technology is selected for the BRT vehicles, a traction power supply station (TPSS) would be required along the Kaka‘ako Makai Alignment. The TPSS is a structure that houses the electrical equipment used to power the STREAM BRT vehicles. The proposed action is likely to have adverse and beneficial impacts on the environment. It is anticipated at this time that the following issues will be of concern: (1) transportation; (2) social and economic impacts; (3) land use; (4) finance and cost-effectiveness; (5) hazardous materials; (6) parks and recreation areas; and (7) coastal zones.

(5) ‘Iwilei Elderly Residential Complex

District: Honolulu
TMK: 1-5-7: 1, 2, 14, 15, 18, 66-69, 71, 74, 75, 78-84

Contact: Glenn Kimura (944-8848)

Public Comment Deadline: September 22, 2001
Status: EISPN First Notice pending public comment. Address comments to the applicant with copies to the approving agency or accepting authority and OEQC.

Permits Required: Demolition, grading and construction

The Housing and Community Development Corporation of Hawai‘i (HCDCH) is proposing to redevelop a portion of State-owned property in Iwilei. HCDCH has issued a Request for Proposals to develop and manage an elderly residential complex. Selection of the developer is expected to occur in late August 2001. The project will be constructed on 1.6 acres located between the OR&L Terminal building and the ‘Iwilei Business Center. It will include up to 200 affordable rental units, an adult day care center with assisted and supportive living services, parking, and landscaping. In the early 1990s, a State office complex known as Liliha Civic Center was planned for the project site. An EIS for the proposed Liliha Civic Center was prepared and accepted in 1992, but the project was postponed indefinitely. Because of substantive changes in project description and loss of timeliness, HCDCH is preparing a Supplemental EIS for the proposed elderly residential complex. The housing development will occupy approximately 28 percent of the site formerly planned for Liliha Civic Center. At present the State’s ‘Iwilei property is comprised of some 18 individual parcels. HCDCH plans to consolidate the affected parcels and to subdivide the site to create a separate lot for residential development. Easements on the 1.6-acre portion will be canceled or relocated. The proposed action also includes relocation of existing underground utilities and construction of new infrastructure and buildings to support the residential complex.

Final Environmental Impact Statements

(6) Kaunala Residential Subdivision (Pursuant to Chapter 25, ROH Only)

District: Ko‘olauloa
TMK: 5-8-003:12 and 95; and 5-8-006:1-6 and 8-29

Contact: Mr. Earl Matsukawa (946-2277)
Public Challenge
Deadline: Consult City Department of Planning and Permitting
Permits Required: County special management area, subdivision approval, grading, and U.S. Army Corps of Engineers Nationwide permit

Kaunala Beach Estates, LLC, proposes to consolidate and subdivide approximately 19 acres of land located at Kaunala, O‘ahu, Hawaii to develop a residential subdivision. Several changes to the proposed project have been made since publication of the Environmental Impact Statement Preparation Notice (EISPN). The project site is now proposed to be subdivided into thirty-three parcels rather than thirty-one. Twenty-nine parcels ranging in size from approximately 10,000 square feet (s.f.) to over 30,000 s.f. will be sold in fee for single-family residential use. A private roadway serving the residential parcels will be developed on an approximately 1.29-acre parcel and the existing sewage treatment plant will occupy an approximately 9,000 s.f. parcel. A remnant parcel on the southwestern portion of the project site will now be granted to the adjacent landowner. A public shoreline access easement from Kamehameha will be provided near the access road to the subdivision. Single family residential improvements on the individual residential parcels will be made at the discretion of subsequent landowners. No new development will occur within the shoreline setback extending 60-feet inland from the certified shoreline. In the Environmental Impact Statement Preparation Notice (EISPN) the applicant had proposed to dedicate a 1.76 acre parcel of land to the city for park use. However at the request of the City Department of Parks and Recreation, the applicant now proposes to dedicate approximately 1.47 acres of land to the City for park use and to construct a paved driveway and stream crossing to a city-owned parcel fronting the ocean identified as tax map key 5-8-06:07. The parcel is part of the city’s Waiale’e Beach Park property. Dedication of the land and construction of the paved driveway will enable the City to improve Waiale’e Beach Park. Improvements present at the site include four multi-family dwellings, twenty-one single-family dwellings and a small-scale sewage treatment plant. Four dwellings on the northwestern portion of the project site will be retained while the other dwellings will be demolished. The existing sewage treatment plant will be retained and will service the proposed subdivision.

Maui Notices
This property, owned by Sunao Omoto Trust, is located at 167 Lahainaluna Road, Lahaina, Hawai‘i. This relatively flat lot has a residential dwelling and carport on it. The structure will be demolished and the parcel cleared to construct a public parking lot. Some grading will be done prior to the installation of utilities. Electrical lines will be installed to provide power for lighting. Water will be supplied to upkeep the surrounding landscape. Runoff will be maintained within the property by the dry wells to be installed. Upon completion of these improvements, the subject parcel will be asphalted and striped. Although this site is suitable for residential uses, the parcels adjoining this property is zoned for commercial use. To return this site to residential is not practical from both an environmental and economic perspective. This proposed project will provide a significant contribution to Maui’s future population by providing additional parking to “live and work in harmony” in a high quality living environment. The location of the proposed project is located at Maui’s major commercial areas. This additional parking will reduce traffic congestion and energy consumption by providing parking closer to the commercial and residential activities. Construction of the project will not require substantial energy consumption relative to other similar projects.

In 1996, the Kihei station responded to a total of 536 alarms, while in 2000, it responded to a total of 718 alarms, an increase of 34 percent. Within the past five years, 44 percent of the alarms that the Kihei station has responded to were from the Wailea district, the area that extends from Kama‘ole Beach Park II to Makena. The new Wailea fire station will enhance the department’s ability to respond to fires and other emergencies in the Wailea district and other areas in South Maui on a timely basis. The proposed Wailea station, which will be similar in design to the existing Kahului station, will house a ladder truck, an engine pumper, and a water tanker, and will be staffed on a daily basis by 11 firefighters. In addition to site work and the installation of utilities (water, sewer, power, phone), ancillary improvements such as a helistop, landscaping, and paved parking areas, as well as fuel pumps and above-ground diesel storage tanks are proposed. Access to the site, which is currently vacant and undeveloped, will be provided via Kilohana Drive. The total estimated cost of the project is $8.0 million. Construction of the project is anticipated to commence upon the receipt of all necessary regulatory approvals.

(2) Wailea Fire Station

District: Makawao
TMK: 2-1-08:por. 46 and por. 113; 3-9-38:por. 28
Applicant: County of Maui
Department of Fire Control
200 Dairy Road
Kahului, Hawai‘i 96732
Contact: Chief Clayton Ishikawa (270-7561)

Appraoing Agency/Accepting Authority: Same as above.
Consultant: Munekiyo & Hiraga, Inc.
305 High Street, Suite 104
Wailuku, Hawai‘i 96793
Contact: Gwen Hiraga (244-2015)

Status: FEA/FONSI issued. Project may proceed.
Permits Required: SMA, Construction Permits

The County of Maui, Department of Fire Control proposes to construct a new fire station at Wailea, Maui on portions of land identified by TMK 2-1-8: 46 and 113, and TMK 3-9-38:28. Currently, fire protection and emergency response services for the South Maui region are provided by the department’s Kihei station, which is located near the Kihei Town Center, about 2-1/4 miles northwest of the new fire station site.

(3) Kihei Garden Mart Proposed Retail Plant Nursery

District: Wailuku
TMK: 3-9-17:12
Applicant: Dale Castleton (874-7676)
357 Kenolio Road
Kihei, Hawai‘i 96753

Approving Agency/Accepting Authority: County of Maui, Dept. of Planning
250 South High Street
Wailuku, Hawai‘i 96793
Contact: Julie Higa (270-7735)

Consultant: Munekiyo, Arakawa & Hiraga, Inc.
305 High Street, Suite 104
Wailuku, Hawai‘i 96793
Contact: Gwen Hiraga (244-2015)

Status: FEA/FONSI issued. Project may proceed.
Permits Required: Community Plan Amendment, Change in Zoning, SMA, Construction Permits

The applicant, Dale Castleton, proposes a retail plant nursery and related improvements for property at Kihei, Maui. The subject property encompasses 19,499 square feet and is bordered by Auhana Road to the north, South Kihei Road to the west, a single-family residence to the east, and the Kihei Park Shore condominium to the south. The property presently contains a plant nursery, a mobile office trailer, and a landscaped...
water feature. Access to the site is via Auhana Road. The footprint of the proposed retail plant nursery will be approximately 3,000 square feet. About 2,100 square feet of floor area will be provided in the facility for greenhouse, office, and employee clean-up purposes. Additional improvements include a drive-way apron, paved parking area, landscaping, and the installation of utility lines. The subject property is within the State “Urban” District and is designated “Multi-Family” and “A-1, Apartment” by the Kihei-Makena Community Plan and Maui County zoning, respectively. In addition to an application for a Special Management Area Use Permit, a request to amend the current Community Plan designation to “Business/Commercial” and a request for a Change in Zoning to “B-2, Community Business” will be sought to establish the appropriate Community Plan and zoning designations for the property. Since the proposed action involves a Community Plan amendment which is independent of the County’s 10-year update process, an Environmental Assessment has been prepared as required by Chapter 343, HRS.

(4) Wailuku-Kahului Wastewater Reclamation Facility Modifications

District: Wailuku
TMK: 3-8-01:188
Applicant: County of Maui
Department of Public Works and Waste Management
200 South High Street
Wailuku, Hawai‘i 96793
Contact: Dave Taylor (270-7417)

Approving Agency/Accepting Authority: Same as above.

Wailuku, Hawai‘i 96793
Contact: Michael Munekiyo (244-2015)

Status: FEA/FONSI issued. Project may proceed.
Permits Required: SMA, CDUP, construction permits

The County of Maui, Department of Public Works and Waste Management proposes modifications to the Wailuku-Kahului Wastewater Reclamation Facility (WWRF) that are intended to improve process reliability and mitigate the potential impacts of tsunami inundation. No increase in capacity is proposed. The proposed modifications include: (1) bar screens and dewatering facilities will be replaced with new equipment; (2) a new flexible aeration basin will be constructed, and the aeration basins will be modified. Aeration piping will be replaced, and the blowers will be relocated to a new blower building; (3) new sludge pumps and grinders will be installed in the garage/maintenance shop building, and related connections will be provided. A new dewatering control room will be constructed in the operations building; (4) the chlorine building will be modified to include an oxidation-reduction potential system; (5) electrical and instrument control systems improvements will parallel the WWRF modifications. A new power feed and metering connection, and a new standby generator will be provided in the new blower building; (6) the new dewatering control room in the operations building, and the blowers and the main electrical equipment in the new blower building will be elevated above the 100-year tsunami wave height; and, (7) additional improvements include a new transformer pad, a new above-ground diesel storage tank, and a new sewage bypass line. The project will be phased and sequenced to minimize disruptions to WWRF operations. The estimated project cost is $9.8 million; construction is anticipated to commence in early 2002.

(5) Kapalua Mauka Resort Expansion

District: Lahaina
TMK: 4-2-01:1 (portion); 4-3-01:6 (portion); 4-3-01:7 (portion); and 4-3-01:8 (portion).

Public Comment
Deadline: September 22, 2001
Status: EISPN First Notice pending public comment. Address comments to the applicant with copies to the approving agency, the consultant, and OEQC.

Permits Required:
- Community plan amendment; state land use district boundary amendment; project district phases 1-3; change in zoning; subdivision approval; grading permit; building permit; NPDES permit.

Maui Land and Pineapple Company is in the preliminary planning stage of a long-planned expansion of the Kapalua Resort around the Village Golf Course mauka of Honoapiilani Highway in the Kapalua region of West Maui. This area is already designated as “Project District 2” in the County of Maui’s West Maui Community Plan. The Project District designation allows for a flexible and creative planning approach for quality developments. Originally envisioned in the West Maui Community Plan as a 450-acre, 750 residential unit community, the proposed master plan decreases the number of housing units to 690 while expanding the area of Project District 2 to approximately 925 acres. The reduction in the number of units and the increase in area allows for lower overall project density and also provides for rural residential uses as a transition to the adjacent agricultural and open space areas. Over a projected 20-year build out period, the proposed Kapalua Mauka community will provide additional residential opportunities at the Kapalua Resort and may also include an expansion of the existing Village Golf Course. The master-planned community will have a variety of residential housing types, including multi-family dwellings and single-family homesites ranging in size from less than 10,000 square feet to over one acre. Kapalua Resort is in the process of preparing a draft Environmental Impact Statement (EIS) for the project and various studies are underway, including: an archaeological assessment, a cultural impact study, biological reports, a traffic impact analysis, a socio-economic impact study, a air quality assessment, a noise assessment, and a civil engineering report.

AUGUST 23, 2001

Public Comment
Deadline: September 22, 2001
Status: DEA First Notice pending public comment.
Address comments to the applicant with copies to the consultant and OEQC.
Permits Required: CDUP, building, grading, flood zone

Permits Required: regulation compliance

The County of Kaua‘i, Department of Water (DOW) is proposing to repair and upgrade its existing water infrastructure in Hanapepe Valley, Kaua‘i. The site is located approximately 2.5 miles from the shoreline at approximately the 70-foot elevation of the valley adjacent to the Hanapepe River.

The DOW is proposing to replace an approximately 240-foot-long section of a 12-inch deteriorating pipeline and construct an accompanying 10-foot-wide concrete pavement cover to protect the pipeline replacement. The concrete cover will also serve as a paved access road to replace an existing dirt road. On the opposite or eastern side of the river, approximately 50 feet of the existing dirt road will be stabilized with a 10-foot-wide concrete pavement. Vehicles currently cross Hanapepe River at this location over an existing concrete ford. The DOW is also proposing to repair a failed slope embankment at an existing well and pump site located approximately 800 feet upriver of the pipeline replacement site. Plans call for repairing the failed embankment with the installation of a buried retaining wall. A damaged chain-link fence located atop the failed embankment will be replaced with a new chain-link fence. The buried retaining wall will include a 4” diameter perforated drain pipe which will connect to a weep hole drain line. Construction of the proposed improvements is expected to begin in the second quarter of 2002 after all government permits and approvals are secured. Completion is expected to occur approximately nine months after construction begins. The cost of construction is projected to be approximately $1.2 million and will be financed by the DOW; no federal, State or private monies are involved.

VOLUNTEERS NEEDED!

Hawai‘i Nature Center is now recruiting individuals to serve as volunteer teaching docents on O‘ahu and Maui. Volunteers will have the opportunity to work outdoors and teach environmental education lessons to visiting elementary school groups. On O‘ahu, field sites include Makiki Forest Recreation Area, USFW Honouliuli Pearl Harbor National Wildlife Refuge in ‘Ewa, and Pu‘u ‘Ualaka‘a State Park. Time commitment is one weekday morning per week, four hours in the morning from late August 2001 to December 2001. On Maui, teaching field sites include ‘Iao Valley and Kealia Pond National Wildlife Refuge. Time commitment is one weekday morning per week, four hours in the morning for the entire school year (Sept. 2001–May 2002). For more information about docent orientation and training, contact Volunteer Coordinator Pauline Kawamata on O‘ahu at 955-0100, ext. 18 OR Environmental Educator Karen Kesseler on Maui at 244-6500, ext. 12.
Draft Environmental Assessments

(1) ‘O‘okala Community Center and Plantation Market Place Project

District: Hamakua

Status: DEA First Notice pending public comment.
Address comments to the applicant with copies to the approving agency or accepting authority, the consultant and OEQC.

Permits Required:
Underground injection control (DOH); and, approval of project construction plans from the County.

The Hamakua Diversified Agricultural Association (HDAA) is proposing to lease a 16.123 acre parcel known as the former ‘O‘okala Gym and Annex Parcel from the County of Hawai‘i, Department of Parks and Recreation. The ‘O‘okala Community Center and Plantation Market Place is being proposed as a multi-purpose center for the ‘O‘okala community that will include a community center, post office, multi-use production facility for farmers, local artists, crafts people and others producing local products. The proposed project will be developed in several phases. The first phase will involve the renovation of an annex building on the south side of the gym. The existing structure, with an area of approximately 1,450 square feet, was last used as a dormitory to house single Hamakua Sugar employees and contains nine bedrooms and a bathroom/restroom facility. The renovation will convert the space into a post office, a conference room, small kitchen and men’s and women’s restrooms. The first phase improvements will also include two paved parking stalls, one handicapped parking stall and an accessible walkway. Funding for the first phase improvements have been secured from the Community Development Block Grant (CDBG) Program in the amount of $250,000 as well as private foundation grants in the amount of $45,000. Construction of the first phase is scheduled to begin in November 2001 and be completed by March 2002.

(2) Tropical Ponds Hawai‘i Aquaculture Farm

Department of Land and Natural Resources
P.O. Box 936
Hilo, Hawai‘i 96721
Contact: Trudy Hanohano (974-6203)
Permits
Required: CDUA

The Applicant is seeking approval of an organic family farm on two parcels above the town of Ninole on the Hamakua coast of the island of Hawai’i. The two parcels are in the General Conservation Subzone. All planned uses are within the statutes of this subzone. No herbicides or pesticides will ever be used on this parcel. The planned uses include the removal of noxious species, the planting of a garden, development of a small scale timber farm, a non-commercial fruit orchard, a native forest restoration area, and a kalo patch. To support these activities, the applicant plans to build a workshed, shadehouse and water catchment system. To facilitate access and control erosion, the applicant will improve the existing jeep roads.

(4) Kawaihae 1.0 MG Tank

District: South Kohala
TMK: 6-1-01:003, 6-1-06:002, and 6-1-04: 041
Applicant: State of Hawai’i Department of Hawaiian Home Lands
1099 Alakea Street, 12th Floor
Honolulu, Hawai’i 96813
Contact: Gerald Lee (587-6477)

Approving Agency/Accepting Authority: Same as above.
Consultant: R.M. Towill Corporation
420 Waiakamilo Road, Suite 411
Honolulu, Hawai’i 96817
Contact: Mr. Craig W. Luke (842-1133)

Status: FEA/FONSI issued. Project may proceed.
Permits Required: NPDES, county building and construction permits.

The State of Hawai’i Department of Hawaiian Home Lands (DHHHL) proposes to construct a 1.0 million gallon (mg) reservoir tank in order to increase the flow and pressure of the surrounding existing water system and provide adequate fire protection for the existing Kaei Hana II Industrial Subdivision. The proposed reservoir, will be located approximately ¼ mile above the Kaei Hana II Industrial Subdivision in Kawaihae of the south Kohala district on the island of Hawai’i. The proposed 1.0 mg reservoir was sized and located to conform to the Kawaihae Master Plan. By conforming to the Kawaihae Master Plan, the design and construction of the proposed 1.0 mg will minimize disruptions for relocation of waterlines and access roads in the event of future development. The proposed

Final Environmental Assessments/Findings of No Significant Impact (FONSI)

(3) Piha Kahuku Organic Farm

District: North Hilo
TMK: 3-2-04:43 and 44
Applicant: G.B. Hajim
P.O. Box 373
Hakalau, Hawai’i 96710

Approving Agency/Accepting Authority: Department of Land and Natural Resources
P.O. Box 621
Honolulu, Hawai’i 96809
Contact: Masa Alkire (587-0385)

Status: FEA/FONSI issued. Project may proceed.
1.0 mg reservoir will also assist in addressing future water needs as indicated in the Master Plan. The proposed reservoir will be a reinforced, concrete tank approximately 22 feet in height and 100 feet in diameter. The reservoir will be constructed in accordance with the County of Hawai‘i Department of Water Supply standards for a 1.0 mg reservoir. A six (6) foot tall chainlink fence and gate will be installed around the perimeter of the project site for security purposes. The project requires the development of a road for access to the site from Akoni Pule Highway and water distribution lines to connect influent and effluent lines from the reservoir to the existing water system. The proposed access road and water lines will be approximately 2,500 feet in length and run southwest from the site to Akoni Pule Highway.

Pest Salvinia Environmental Assessment

The Animal and Plant Health Inspection Service (APHIS) has prepared an environmental assessment relative to a demonstration project to eradicate and prevent the spread of the aquatic weed giant salvinia (Salvinia molesta) in the Toledo Bend Reservoir and surrounding areas in Louisiana and eastern Texas. The environmental assessment documents APHIS’s review and analysis of the environmental impacts associated with the alternative actions under consideration. Giant salvinia is a free-floating aquatic fern, native to South America, with a tremendous growth rate and the potential to significantly affect water-reliant agricultural industries, recreation, and the ecology of freshwater habitats throughout much of the United States. Giant salvinia reproduces vegetatively through fragmenting and from dormant buds breaking away. A colony consists of many leaf pairs connected by branching rhizomes. The colony is easily broken, thus producing viable fragments. The colonizing or immature stage of giant salvinia is characterized by small leaves that lie flat upon the water. As the plants rapidly expand and compete for space, the leaves become larger, crowding occurs, and the plants are pushed upright. Mats may grow to a meter thick and can cover large areas. Giant salvinia grows best in stagnant or slow-moving water, and the plant can tolerate a wide pH range. Because giant salvinia is a free-floating plant, it disperses by passive means (water currents and wind) and by “hitchhiking.” Animals may carry the plants over short distances, but humans can spread it widely on fishing gear and boating equipment. Intercontinental dispersal and dispersal within the United States probably have occurred when giant salvinia was sold in the nursery trade, either intentionally as a plant for aquaria or for ponds, or unintentionally when it “hitchhikes” with other aquatic plants collected for academic study or for use in aquaria or ponds. Although native to southeastern Brazil, giant salvinia is now found in North America, South America, Africa, Asia, Australia, New Guinea, and Oceania. The dominant characteristic of
giant salvinia is its tremendous growth rate, which makes it an aggressive invader. Observations at the Toledo Bend Reservoir, which is located on the border between eastern Texas and western Louisiana, noted that a small, unobstructed patch of giant salvinia doubled in size in a few days during the winter of 1998-1999. Where it occurs outside its native range, particularly in the tropics and subtropics, giant salvinia has become a problematic aquatic weed with the potential to choke irrigation systems, streams, and lakes. The mats also may harbor snails and insects that carry human and animal diseases. In a single growing season, giant salvinia can destroy a thriving water community by forming a destructive mass, halting transportation, killing fish, and promoting disease. Giant salvinia is considered a direct threat to rice farming. It gives off hydrogen sulfide, which can damage copper components of hydroelectric generators. The thick mats, which can develop on open lakes, are avoided by small and large boats alike. In the past several years, giant salvinia has been detected in the United States, mostly in association with the nursery trade in aquatic plants. Generally, detections have been in small, confined sites and are currently contained or have been eradicated. Such detections have occurred in Alabama, Arizona, Florida, Hawai‘i, Indiana, Louisiana, Maryland, Missouri, North Carolina, South Carolina, Texas, and Virginia. Of more serious and immediate concern is the current infestation in the Toledo Bend Reservoir and the surrounding areas in Louisiana and eastern Texas. The Toledo Bend Reservoir infestation is a major one in a large body of water. The Animal and Plant Health Inspection Service (APHIS) listed giant salvinia as a noxious weed in 1983. Under APHIS’ regulations, no person may move giant salvinia into or through the United States, or interstate, unless he or she obtains a permit for movement from APHIS. This environmental assessment is available to the public for review and comment. APHIS will consider all comments that it receives by August 23, 2001. Please send four copies of your comment (an original and three copies) to: Docket No. 01-039-1, Regulatory Analysis and Development, PPD, APHIS, Suite 3C03, 4700 River Road Unit 118, Rivendale, MD 20737-1238. Please state that your comment refers to Docket No. 01-039-1 (see, 66 F.R. 38414, July 24, 2001).

Soil Contamination at Refinery in Kapolei

Based on a RCRA facility investigation, the U.S. Environmental Protection Agency (EPA) and the Hawai‘i Department of Health seek comments on: removing 350 tons of soils with arsenic and placing these at Waimanalo Gulch Landfill; and investigating and remediating a free product plume from groundwater voluntarily being done by Tesoro Kapolei Refinery. Technical documents are available for comment at: (1) EPA (541-2710); (2) Pearl City Library (453-6566); or, (3) Hazardous Waste Section, ask for Paul Kalaiwa’a at 586-4226 (The Honolulu Advertiser, August 10, 2001, page B-7).

Western Pacific Community Development Program and Demonstration Projects

The National Marine NMFS proposes criteria developed by the Council to determine what communities will be eligible to participate in western Pacific community development programs to be established by the Council and the Secretary of Commerce (Secretary) for fisheries under the Council’s jurisdiction in order to promote access to such fisheries by western Pacific communities and to apply for and receive grants for related demonstration projects. NMFS also proposes definitions, developed with the Council, for certain terms appearing in section 305(i)(2) of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), the section authorizing the Council and the Secretary to establish such programs, and in the criteria developed by the Council. NMFS is proposing these criteria and definitions so that it may have the benefit of public comment before deciding whether to approve the criteria and adopt the definitions. The intent of this proposal is to implement section 305(i)(2) so that appropriate programs may be established in the future. Comments on this proposed rule must be received before 5 p.m. Eastern Daylight Savings Time on August 27, 2001. Faxed comments received before the deadline will be accepted provided the signed original is received for the record by September 5, 2001. Written comments on this proposed rule must be sent to Robert Ziobro, Western Pacific Project - F, National Marine Fisheries Service, 1315 East-West Highway, Silver Spring, MD 20910, or faxed to 301-713-2258. Comments will not be accepted if submitted via e-mail or Internet. Call Robert C. Ziobro at (301) 713-2239 for details. You may also reach him by facsimile at 301-713-2258 (see, 66 F.R. 39131, July 27, 2001).

Lihu‘e Airport EIS Cancelled

The Federal Aviation Administration (FAA) has decided to stop preparing an Environmental Impact Statement (EIS) for a proposed runway extension project at Lihu‘e Airport. The decision is based upon the Governor’s cancellation of the proposed runway extension project at Lihu‘e Airport. For more, call David J. Welhouse, Project Engineer, HNL-621, Federal Aviation Administration, Honolulu Airports District Office, Box 50244, Honolulu, Hawai‘i, 96850-0001, telephone (808) 541-1243 (see, 66 F.R. 40774, August 3, 2001).

Reopening of Critical Habitat Comment Period for ‘Elepaio

The U.S. Fish and Wildlife Service (FWS), announced the availability of the draft economic analysis for the proposed determination of critical habitat for the Oahu ‘elepaio (Chasiempis sandwichensis ibidis), a bird, on the island of O‘ahu. FWS is also providing notice of the reopening of the public comment period for the proposal to designate critical habitat for this bird to allow all interested parties to comment simultaneously on the proposed rule and the associated draft economic analysis. Comments previously submitted need not be resubmitted as they will be incorporated into the public record as part of this reopened public comment period and will be fully considered in the final rule. FWS will accept public comments until September 5, 2001. Written comments and information should be submitted to Field Supervisor, U.S. Fish and Wildlife Service, Pacific Islands Office, 300 Ala Moana Blvd., P.O. Box 50088, Honolulu, Hawai‘i 96850-0001. For details, contact Paul Henson, Field Supervisor, or Eric VanderWerf, Biologist, U.S. Fish and Wildlife Service, at the above address or by telephone (808) 541-3441 or facsimile (808) 541-3470 (see, 66 F.R. 40960, August 6, 2001).
Proposal To Reissue/Modify Nationwide Permits

The U. S. Army Corps of Engineers (Corps) is soliciting comments for the reissuance of the existing Nationwide Permits (NWPs), General Conditions, and definitions with some modifications. The Corps reissued NWPs on December 13, 1996 (see, 61 F.R.65874). These NWPs will expire February 11, 2002, except as discussed below. In the December 13, 1996, issue of the Federal Register, the Corps announced its intention to replace NWP 26 with activity-specific NWPs before the expiration date of NWP 26. In the March 9, 2000, Federal Register notice (65 FR 12818-12899), the Corps published five new NWPs, modified six existing NWPs, modified six General Conditions, and added two new General Conditions to replace NWP 26. The five new NWPs (i.e., 39, 41, 42, 43, 44) and six modified NWPs (i.e., NWPs 3, 7, 12, 14, 27, and 40) will expire five years from their effective date of June 7, 2000. In order to reduce the confusion regarding the expiration of the NWPs and the administrative burden, it is the Corps intent to reissue all NWPs and General Conditions contained within this Notice, including those not scheduled to expire on February 11, 2002. Thus, all issued, reissued and modified NWPs, and General Conditions contained within this notice will become effective and expire on the same date. The reissuance process starts with today's publication of the proposed NWPs in the Federal Register and concurrent release of public notices by Corps District offices for a 45-day comment period. Comments on the reissuance of the proposed NWPs must be received by September 24, 2001. The public hearing will be held at 1 p.m. on September 12, 2001. Send comments to HQUSACE, ATTN: CECW-OR, 441 G Street, NW, Washington, DC 20314-1000. The public hearing will be held at the GAO Building, 441 G Street, NW, Washington, DC 20314-1000, 7th floor auditorium. For details contact Mr. White or Mr. Sam Collinson, at (202) 761-4599 or access the U.S. Army Corps of Engineers Regulatory Home Page at: http://www.usace.army.mil/inet/functions/cw/cecwo/reg/, or in Hawaii contact the Corps at Honolulu District Engineer, ATTN: CEPOH-ET-PO, Building 230, Fort Shafter, Honolulu, HI 96858-5440 (see, 66 F.R. 42069, August 9, 2001).

CALL FOR DATA

Any persons who have data and information on the quality of surface waters in Hawaii are encouraged to submit these documents to the Department of Health, Clean Water Branch, for use in preparing the State’s Clean Water Act §303(d) List of Impaired Waters, due to the U.S. Environmental Protection Agency by April 1, 2002. Data and information submitted should include the name of the person(s) or organization(s) who collected the data, the reason for the study, the name of the analytical laboratory, if water quality analyses were conducted, and a map showing the name of the area studied and locations of sampling stations. For numeric data, Excel files are preferred. Data and other information may be sent by e-mail to eakazawa@eha.health.state.hi.us; mailed to Eugene Akazawa, Department of Health, Clean Water Branch, 919 Ala Moana Boulevard, 3rd floor, Honolulu, Hawaii 96814; or faxed to (808)586-4352, attention Eugene Akazawa. Any materials submitted must be received or postmarked by Friday, November 16, 2001.
## Department of Health Permits

The following is a list of some pollution control permits currently being reviewed by the State Department of Health. For more information about any of the listed permits, please contact the appropriate branch or office of the Environmental Management Division at 919 Ala Moana Boulevard, Honolulu.

Federal Consistency Reviews

The Hawai‘i Coastal Zone Management (CZM) Program has received the following federal actions to review for consistency with the CZM objectives and policies in Chapter 205A, Hawai‘i Revised Statutes. This public notice is being provided in accordance with section 306(d)(14) of the National Coastal Zone Management Act of 1972, as amended. For general information about CZM federal consistency please call John Nakagawa with the Hawai‘i CZM Program at 587-2878. For neighboring islands use the following toll free numbers: Lana‘i & Moloka‘i: 486-4644 x 72878, Kaua‘i: 274-3141 x 72878, Maui: 984-2400 x 72878 or Hawai‘i: 974-4000 x 72878. For specific information or questions about an action listed below please contact the CZM staff person identified for each action. Federally mandated deadlines require that comments be received by the date specified for each CZM consistency review and can be mailed to: David W. Blane, Director, Office of Planning, Department of Business, Economic Development and Tourism, P.O. Box 2359, Honolulu, Hawai‘i 96804. Or, fax comments to the Hawaii CZM Program at 587-2899.

(1) Realign Existing Drain Line “N” Outlet, The Peninsula at Hawai‘i Kai

**Federal Action:** Federal Permit - Dept of the Army Permit  
**Federal Agency:** U.S. Army Corps of Engineers  
**Applicant:** SCD International, LLC  
**Agent:** Sea Engineering, Inc.  
**Location:** Hawai‘i Kai, O‘ahu, Hawai‘i  
**TMK:** 3-9-08: 010  
**CZM Contact:** Debra Tom, 587-2840  
**Proposed Action:**  
SCD International, LLC proposes to relocate an existing drain line from a break in the seawall to a new outlet approximately 130 feet southeast of the existing outlet. The relocation will improve the efficiency of the storm drain, and will eliminate the earthen ditch bisecting Luna Kai Marina Park.

**Comments Due:** September 6, 2001

(2) Salt Lake Boulevard Improvements

**Federal Action:** Federal Agency Activity  
**Federal Agency:** Federal Highways Administration (FHWA)  
**Applicant:** FHWA / City and County of Honolulu, Dept of Design & Construction (DDC)  
**Location:** Salt Lake Boulevard from Bougainville Drive to Reeves Street  
**CZM Contact:** Debra Tom, 587-2840  
**Proposed Action:**  
FHWA and DDC propose improvements to Salt Lake Boulevard from Bougainville Drive to Reeves Street. Roadway improvements for the proposed project include street widening, on-street parking on the north side, median with exclusive left-turn lanes, roadway drainage system, street lighting system, traffic signal system, 8-foot wide concrete sidewalks on each side, and bike lanes.

**Comments Due:** September 6, 2001

(3) Friendship Community Services Project - Varona Village, ‘Ewa, O‘ahu

**Federal Action:** Federal Assistance - Community Development Block Grant (CDBG)  
**Federal Agency:** U.S. Department of Housing and Urban Development  
**Applicant:** Department of Community Services, City and County of Honolulu  
**Location:** Varona Village, Renton Road, Ewa  
**TMK:** 9-1-17: 69  
**CZM Contact:** John Nakagawa, 587-2878  
**Proposed Action:**  
The Department of Community Services is proposing to grant CDBG funds to Friendship Community Services for the acquisition of 14 acres of land in the ‘Ewa Villages area. The parcel is proposed to be developed as a community center to include a park, employment training facilities, and facilities for seniors and other community groups. In addition, the Friendship Bible Church will acquire a one-acre parcel for the development of a 200-student day care facility with a playground area. As much as possible, existing structures will be renovated for reuse as classrooms and workshops. Development will be in accordance with historic preservation guidelines for ‘Ewa Villages.

**Comments Due:** September 6, 2001

CZM Advisory Groups

Coastal Erosion Advisory Group  
**Date:** Thursday, September 27, 2001  
**Time:** 9:30 a.m. – 11:30 p.m.  
**Location:** 235 South Beretania Street, 6th Floor  
**CZM Contact:** Debra Tom, 587-2840
Office of Planning (OP) Recruitment for Vacancies on the Coastal Zone Management (CZM) Citizens Advisory Group

The Office of Planning (OP) is conducting a statewide recruitment to fill seven vacancies on the newly reorganized CZM Citizens Advisory Group pursuant to Act 169. The role of the advisory group is to provide advice to the State of Hawaii’s CZM Program with respect to planning and policy management issues. The positions being recruited are for each of the main Hawaiian Islands. Consideration for selection will focus on those applicants representing interests in the following areas: business, environment, practitioners of native Hawaiian culture, terrestrial and marine commerce, recreation, research, and tourism. However, at-large positions will also be considered for selection in recognition of overlapping interests. Appointment of individuals will be made by the Director of OP. Members will serve without pay, but are provided airfare. Meetings will be held, but not be limited to, six times per year during the workweek and may be held on different islands. The deadline to submit an application is September 14, 2001. Applications must be received by OP no later than 4:30 p.m. Hawai‘i Standard Time on the specified deadline date. Applications received after the deadline will not be considered. For more information or to obtain an application, please contact Susan Feeney at (808) 587-2880 on Oahu; Fax (808) 587-2899; e-mail: sshirais@dbedt.hawaii.gov. From the neighbor islands, please use the following numbers: Hawai‘i 974-4000; Kaua‘i 274-3141; Maui 984-2400; Moloka‘i and Lana‘i 1-800-468-4644.

Special Management Area (SMA) Minor Permits

Pursuant to Hawai‘i Revised Statute (HRS) 205A-30, the following is a list of SMA Minor permits that have been approved or are pending by the respective county agency. For more information about any of the listed permits, please contact the appropriate county Planning Department. City & County of Honolulu (523-4131); Hawai‘i County (961-8288); Kaua‘i County (241-6677); Maui County (270-7735).
