OCTOBER 23, 2002

Pool in Shade of a Historic Smokestack

The Young Men's Christian Association (YMCA) currently uses the 4.1-acre former O'ahu Sugar Mill complex in Waipahu (which includes the smokestack and the vacant generator/boiler building) for its meeting rooms, offices, multipurpose

room and parking. YMCA wishes to expand its current services by renovating and expanding the boiler building, improving parking and landscaping and adding a swimming pool in the shade of the historic smokestack. See page 4 for more.

Alexander & Baldwin's Pa'ia-Ha'iku Community Plan Amendment

Alexander and Baldwin (AB) wants to obtain land use approvals for the recently constructed Pa'ia Main Post Office on a 1-acre parcel (where the current Post Office is located) and a 5-acre parcel currently used for sugar cane cultivation and where AB seeks to develop a future country town

business district (consistent with the architectural vernacular of Pa'ia Town). The plan requires changes in the State Land Use District from Agricultural to Urban and amendments to the Pa'ia Ha'iku Community Plan. See page 8 for more.

Maui Ocean Club Expanding

Marriott Vacation Club is proposing expanding its existing Maui Ocean Club Resort located at 100 Nohea Kai Drive in Ka'anapali. The proposed project consists of the addition of two new villa unit buildings for vacation ownership, parking structures, site amenities, landscaping and demolition of some existing facilities. Specifically, the project will involve demolishing the existing ballroom, parking structure, luau area, tennis courts, exercise facility, and most of the on-grade parking lot. Existing development includes a 10-story building that contains the guestrooms, lobby, ballrooms and restaurants, and associated amenities. The primary structure was constructed in 1979 as a 720-room Hotel. It is currently undergoing conversion to a 312-room timeshare resort as part of a renovation initiated in 2000 under the project name "Maui Ocean Club". The sequel project will add an additional 146 units to the resort via two freestanding 10-story buildings, one on each side of the existing hotel complex. For more information, please see page 10.

Subdivision in Kealakekua Bay

A landowner is proposing a Planned Unit Development (PUD) subdivision in the Kealakekua Bay Historic District which would create three lots from one 16.316-acre parcel of land located makai of Napo'opo'o Road and Pali o Manuahi. The subdivision has been designed as a PUD in order to allow potential building pads for all three lots to occupy the less steeply sloped parts of the property, thereby avoiding hazardous terrain and minimizing scenic and cultural impacts. Much of the property is too steep for any use and will not be modified. A cultural impact analysis has determined that Pali o Manuahi qualifies as a Traditional Cultural Place, and the view plane looking mauka from Kealakekua Bay area has cultural/historical value. The proposed project will not adversely affect the historic character of the area or the value of Pali o Manuahi. The subdivision will perpetuate low-density agricultural uses for the area consistent with current A-5a zoning and will preserve the character of the Historic District. For more information, please see page 13.

Your guide to the Environmental Review Process

Draft Environmental Assessment

A project or action that may affect the environment cannot be implemented until an Environmental Assessment (EA) is prepared in accordance with HRS §343. If the lead government agency anticipates that the project will have no significant environmental impact, then a Draft EA is written and public notice is published in this periodic bulletin (see, section 343-3, HRS) known as the *Environmental Notice*. The public has 30 days to comment on the Draft EA from the date of the first notice.

Final Environmental Assessment and FONSI (Negative Declaration)

If, after the lead agency reviews the public comments, it feels that the project will have no significant effect on the environment, then it will prepare a Final EA and issue a Finding of No Significant Impact (FONSI) formerly called a *Negative Declaration*. The Final EA must respond to all public comments. An Environmental Impact Statement will not be required and the project may now be implemented. The public has 30 days from the first notice of a FONSI in this Bulletin to sue in court to require the preparation of an EIS.

EIS Prep Notice

If the lead agency decides that a project may have a significant environmental impact, it must prepare an Environmental Impact Statement (EIS) prior to implementing the project. The first step in preparing an EIS is publishing an EIS Preparation Notice (Prep Notice) in this Bulletin. Agencies, groups or individuals have 30 days from the first publication of an EIS Prep Notice to request to become a consulted party and to make written comments regarding the environmental effects of the proposed action. The draft EIS must respond to these comments.

Draft EIS

If a project is likely to have a significant environmental impact, the lead

agency or private applicant must prepare a Draft Environmental Impact Statement (Draft EIS) prior to project implementation. This document must completely disclose the likely impacts of a project. Secondary and cumulative impacts must be discussed along with measures proposed to mitigate them. The public has 45 days from the first publication date in this Bulletin to comment on a Draft EIS.

Final EIS

After considering public comments filed during the Draft EIS stage, the agency or applicant must prepare a Final Environmental Impact Statement (Final EIS). The Final EIS must respond to all comments from the draft stage. If deeper analysis was required, it must be included in this document. If the project is from a private applicant, the lead agency is authorized to accept the FEIS. If the project is public, the Governor or Mayor is the accepting authority. Only after the EIS is accepted, may the project be implemented.

EIS Acceptance Notice

If the accepting authority accepts a Final Environmental Impact Statement, a separate EIS Acceptance Notice will be published in this Bulletin. The public has 60 days from the date of first notice of acceptance to sue in court to challenge the acceptance of an EIS.

NEPA

National Environmental Policy Act (NEPA) is the law that requires federal projects to prepare an EIS. It is similar to Hawaii's law. Some projects require both a state and federal EIS and the public comment procedure should be coordinated. Although not required by law, the OEQC publishes NEPA notices in this Bulletin to help keep the public informed of important actions.

Special Management Area Permits

The Special Management Area (SMA) is along the coastlines of all our islands. Most development in this area requires a Special Management Permit

(SMP) under Chapter 205A, HRS and county ordinance. The Counties regulate development of this area. This Bulletin posts notice of these SMP applications to encourage public input.

Shoreline Certifications

State law requires that Hawaii shorelines be surveyed and certified when necessary to clearly establish the regulatory building setback (usually 40 feet inland from the shoreline). The public may participate in the process to help assure accurate regulatory boundaries. Private land owners often petition to have their shoreline certified prior to construction. This Bulletin publishes notice of both shoreline certification applications and of final certifications or rejections.

Environmental Council

The Environmental Council is a fifteen-member citizen board appointed by the Governor to advise the State on environmental concerns. The council makes the rules that govern the Environmental Impact Statement process. The agendas of their regular meetings are published in this Bulletin and the public is invited to attend.

Exemption Lists

Government agencies must keep a list describing the minor activities they regularly perform that are declared exempt from the environmental review process. These lists are reviewed and approved by the Environmental Council. This Bulletin will publish an agency's draft exemption list for public comment prior to Council decision making.

Conservation District Permits

Use of land in the State Conservation District requires a Conservation District Use Application (CDUA). These applications are reviewed and approved by the Board of Land and Natural Resources (BLNR). Members of the public may intervene in the permit process. Notice of these permit applications is published in this Bulletin.

Public Comment

Deadline: November 22, 2002
Status: DEA First Notice pending public comment. Address comments to the applicant with copies to the approving agency or accepting authority, the consultant and OEQC.

Permits Required: Building; Grubbing, Grading, Stock-piling; Sewer Connection, Water

The Young Men's Christian Association (YMCA) of Honolulu is proposing to expand its Leeward YMCA facility in Waipahu to improve and expand services. This expansion includes the adaptive reuse of a key building that was formerly part of the O'ahu Sugar Company mill site. Architectural details of the renovated structure and a new wing will be reminiscent of the plantation era, providing a historical perspective of the Waipahu community. In addition, the old mill smokestack—possibly Waipahu's most dominant landmark and a lasting physical reference to Waipahu's history and cultural roots as a plantation town—will be retained and incorporated into the overall site plan.

The expanded Leeward YMCA, along with the adjoining Filipino Community Center, will provide a vital social center for Waipahu, similar to how the old mill comprised the social heart of Waipahu during the plantation era.

Short-term impacts include effects on air quality and noise levels due to construction. Long-term impacts include increased traffic and increased demand for water, sewer facilities, and electrical power. Traffic impacts are expected to be lessened to an acceptable level of service by the connection of Mokuola Street with Manager's Drive and other planned traffic improvements.

Positive long-term impacts include increased social and recreational facilities, increased employment opportunities (at least 51 percent of which will be available to low and moderate income persons), and the adaptive reuse of the O'ahu Sugar Company mill site.

In the larger context, the expansion of the Leeward YMCA will allow the YMCA to provide increased programs and services. The goal of these programs and services is to positively enhance the social fabric and well being of the community, ultimately contributing to an educated and responsible citizenry with the abilities to positively contribute to Hawaii's social and economic well being.

Final Environmental Assessments/Findings of No Significant Impacts (FONSI)

(2) Kawai Nui Gateway Park

District: Ko'olaupoko
TMK: 4-4-34:25; 4-2-17:20 por.; 4-2-16:01 por.
Applicant: City and County of Honolulu
Department of Design and Construction
650 South King Street, 9th Floor
Honolulu, Hawai'i 96813
Contact: Gary Doi (527-6699)

Approving Agency/Accepting Authority: Same as above

Pacific Guardian Center, Makai Tower
733 Bishop Street, Suite 2590
Honolulu, Hawai'i 96814
Contact: David Curry (545-2055)

Status: FEA/FONSI issued, project may proceed.
Permits Required: CDUP; SMA; construction, grading; grubbing

On the recommendation of the Kailua Vision Team, the City and County of Honolulu Department of Design and Construction proposes to develop Kawai Nui Gateway Park on vacant government-owned lands located along the north-eastern boundaries of Kawai Nui Marsh (Marsh) in Kailua. The development is consistent with the 1994 Kawai Nui Marsh Master Plan prepared by the State Department of Land and Natural Resources. The park is designed for passive recreational use and will include a comfort station, a parking lot, an education pavilion, outrigger canoe access to Oneawa Canal, a pedestrian bridge across Oneawa Canal, a nature walk, and waterbird habitat enhancement.

Kawai Nui Gateway Park will be the visual and physical gateway to the Marsh and Kailua from Mokapu Boulevard. It will provide access to underutilized areas along the periphery of the Marsh for a variety of "low-impact" activities that are complementary to preserving, enhancing, studying and appreciating the Marsh resources. The objectives of the project are as follows:

- improve the quality of experience for visitors to the Marsh;
- improve scenic view planes to the Marsh;
- enhance public awareness of the value of the Marsh as a significant natural and cultural resource;
- facilitate wetland ecosystem education and research;
- improve endangered species habitats;
- provide low-impact access for wildlife observation;
- facilitate recreational use of Oneawa Canal by canoe paddlers;
- complete a segment of the Kawai Nui Pathway designed to encircle the Marsh; and
- provide additional parking for visitors to the Marsh to relieve parking pressure at Kawai Nui Community Park.

Short-term adverse impacts (e.g., noise, dust, erosion) to the environment due to construction activities will be mitigated through adherence to federal, State and County permit conditions and municipal ordinances. No adverse environmental impacts are anticipated from use of the park. Adjacent property owners expressed concern regarding increased noise, loss of privacy, and decreased security. These impacts are mitigated through park design elements (e.g., boundary landscaping, berms, and fences), and park rules that will limit the type of permitted activities and hours of park operation.

(3) Kokokahi Place Drainage Improvements

District: Ko'olaupoko
TMK: 4-4
Applicant: City & County of Honolulu
Department of Design & Construction
650 South King Street
Honolulu, Hawai'i 96813
Contact: Albert Miyashiro (527-5155)

Approving Agency/Accepting Authority: Same as above.
Consultant: GKO & Associates
680 'Iwilei Road, Suite 410
Honolulu, Hawai'i 96817
Contact: Robert Purdie, Jr. (524-0355)

Status: FEA/FONSI issued, project may proceed.
Permits Required: Special management area, shoreline setback variance

O'ahu Notices

OCTOBER 23, 2002

The Department of Design and Construction is proposing to construct improvements to the Kokokahi Place Drainage system in Kane'ohē to alleviate flooding in this area. The proposed improvements include the installation of new drain inlets and an 18-inch (transitioning to a 24-inch) drain line extending from the Kokokahi Place cul-de-sac down to Malulani Street and a new 7' x 3' box drain and transition structure parallel to the existing box drain onto the YWCA property below Kane'ohē Bay Drive. No significant impacts are anticipated from construction of these improvements.

A management plan to control soil erosion will be developed before construction of the drainage improvements is undertaken. However, because of the steep terrain, there is a potential for loss of soils along the alignment from the cul-de-sac at Kokokahi Place down to Malulani even with best management practices in effect. Construction of the parallel box drain below Kane'ohē Bay drive may also result in a short-term negative impact on water quality.

The total quantity of water discharged during storm events will not be increased by the proposed drainage improvements. However, the flow rate of the water will increase. This may have some adverse effect on nearshore waters during and after storm events. No long-term effects on marine or estuarine species are anticipated.

There will be destruction of vegetation in the area of construction. The area does not support any native plant-dominated vegetation types. There are no threatened, endangered or rare flora in the project area. There will be no effect on significant historic sites.

Kokokahi Place and Malulani will be disturbed temporarily during construction resulting in short-term noise, air quality and traffic impacts. Activities will be planned in cooperation with local residents and the Honolulu Police Department to minimize disruptions. Kane'ohē Bay Drive will not be disturbed.

Total costs are estimated to be \$633,000 and to last six months for each portion of the project. A start date had not been scheduled at this time.

Permits Required: SMA, Building

The applicant is proposing expansions and renovations to the existing Kaiser Lahaina Clinic located at 910 Waine'e Street in Lahaina, Maui. The project will entail a 2,940 square foot expansion to the existing Kaiser facility. Two areas of the existing facility will be expanded. Approximately 760 square feet will be added to the front side of the clinic for a pharmacy and physical therapy component, and approximately 2,180 square feet will be added to the rear of the clinic for storage and a clinic module. Associated with the building improvements, the surrounding landscaping and parking lot will be modified to create additional automobile parking, and existing utilities will be upgraded. The subject property is identified as TMK parcel (2) 4-5-007: 001. The project may also include related improvements within the County right-of-way along Waine'e Street.

The action is anticipated to benefit the West Maui Community by expanding the scope and availability of medical services within the region. No adverse long-term impacts are anticipated. Short-term construction-related impacts are anticipated, however, these impacts can and will be mitigated.

OCTOBER 23, 2002

Status: DEA First Notice pending public comment.
Address comments to the applicant with copies to the consultant and OEQC.

Permits

Required: Well drilling

The Maui Department of Water Supply is proposing the construction of an exploratory well in Kahakuloa, Maui, Hawai'i. The proposed well site is located north of Makamaka'ole Stream, within Lot 16 of the Kahakuloa Agricultural Park Subdivision, aka Maluhia Country Ranches. The Department of Water Supply has several wells within the Waihe'e Aquifer (60103) however, this well will be their first well north of Makamaka'ole Stream. The Commission on Water Resource Management (CWRM) estimates a sustainable yield of 8 MGD for the Waihe'e Aquifer.

The project will involve the drilling, casing and testing of the well. The well will be constructed to the basal aquifer. The annular space will be grouted from just above the water table to ground surface to prevent surface or high level water seepage from entering the well. Water encountered above the basal lens during the drilling of the well will be grouted before continuing with the drilling operation. Well testing will determine the quantity of water available by pump step test and a pump continuous test and sampling during the pump test to determine water quality. The test pump will range from 300 gpm to 1,400 gpm.

Upon completion of the well testing, the well will be capped and the data obtained will be analyzed and the Department of Water Supply will then decide whether to continue with the development of the well. The data will also help confirm the estimated sustainable yield of the aquifer.

Permits Community Plan Amendment, Zoning

Required: Change, District Boundary Amendment, SMA

A&B Properties, Inc. (A&B) seeks land use approvals for the following properties at Pa'ia, Maui, Hawai'i: (1) a 1.043-acre parcel identified as TMK (2)2-5-5:61, which is the site of the recently completed Pa'ia Main Post Office; and (2) a 5.125-acre parcel identified as TMK (2)2-5-5:18 (por.), which is currently used for sugar cane cultivation.

The U.S. Postal Service (USPS) developed the Pa'ia Main Post Office (Parcel 61) exercising its right to develop this federal facility without local land use approvals ordinarily required. As part of the land sales agreement between the USPS and A&B, it was agreed that A&B would prepare and process applications which would establish the Country Town Business zoning designation for the property.

Concurrently, A&B is seeking appropriate land use designations for an adjoining 5.125-acre parcel owned by Alexander & Baldwin, Inc. to enable the future implementation of Country-Town Business uses, a public parking lot and related public-quasi-public uses. The Country Town Business area encompasses approximately 1.434-acres of the 5.125-acre portion of Parcel 18, while the remaining 3.691-acre area is intended for parking and public quasi-public uses.

Since the proposed land use action involves amendments to the Pa'ia-Ha'iku Community Plan independent of the County's ten (10) year update process, an Environmental Assessment (EA) has been prepared as required by Chapter 343, Hawaii Revised Statutes. This EA documents the proposed action's technical characteristics, environmental impacts and alternatives. Further, the EA advances findings and conclusions relative to the significance of the project and its surrounding environs.

Final Environmental Assessments/Findings of No Significant Impacts (FONSI)

(4) Front Street Commercial Building

District: Lahaina
TMK: 4-6-08:48 and 53
Applicant: AJI, LLC
381 Huku Li'i Place, Suite 202
Kihei, Hawai'i 96753
Contact: Becky Collins (874-5263)

Approving Agency/Accepting Authority: County of Maui, Department of Planning
250 South High Street
Wailuku, Hawai'i 96793
Contact: Ann Cua (270-7735)

Consultant: Munekiyo & Hiraga, Inc.
305 High Street, Suite 104
Wailuku, Hawai'i 96793
Contact: Michael Munekiyo (244-2015)

Status: FEA/FONSI issued, project may proceed.
Permits Required: SMA, Historic District Approval, Construction

The applicant, AJI, LLC, proposes to construct a new commercial building on property along Front Street in Lahaina, Maui. The subject property is in the State "Urban" District and is designated "Business/Commercial" and "Historic District No. 2" by the West Maui Community Plan and Maui County zoning, respectively. Kaupo Ranch Ltd. is the fee simple owner of the property.

Currently, Parcel 48 (7,170 sq. ft.) is vacant and undeveloped, while Parcel 53 (7,501 sq. ft.) contains an asphalt-paved parking lot. Park, school, business, residential, and public/quasi-public uses characterize properties in the surrounding area. Access to the subject property is provided via Front Street.

In connection with the construction of the project, Parcels 48 and 53 will be consolidated to form a single lot. Upon completion of the consolidation process, a one-story commercial building of approximately 4,400 square feet will be built on the site. The new building will contain four

individual tenant spaces ranging in size from 1,008 to 1,312 square feet. The proposed building will be constructed in accordance with County Historic District design guidelines. A portion of the existing parking lot will be retained for onsite parking for the new building. In addition to building construction, utility connections and site landscaping and irrigation are proposed.

The cost of the project is estimated to be \$675,000.00. Construction of the project will commence upon the receipt of all necessary regulatory approvals and is expected to take approximately 12 months.

(5) Waiehu Kou Phase 3 (Supplemental)

District: Wailuku
TMK: 3-2-12:09 & 3-2-12:03
Applicant: Department of Hawaiian Home Lands
P.O. Box 1879
Honolulu, Hawai'i 96805
Contact: Stewart Matsunaga (587-6454)

Approving Agency/Accepting Authority: Same as above.
Consultant: Townscape, Inc.
900 Fort Street Mall, Suite 1160
Honolulu, Hawai'i 96813
Contact: Joanne Hiramatsu (536-6999)

Status: FEA/FONSI issued, project may proceed.
Permits Required: Grading, Building, NPDES

The Department of Hawaiian Home Lands (DHHL) is planning to develop approximately 111 single-family lots for the purpose of providing homes for native Hawaiian beneficiaries on Maui. This Supplemental Environmental Assessment is necessary due to inclusion of approximately 20.78 acres to the original Waiehu Kou Phase 3 project. Originally, the Phase 3 project consisted of 22.43 acres with 60 single-family house lots. Single-family lot sizes will average 7,500 square feet with a minimum lot size of 6,000 square feet in accordance with R-1 zoning designation for the County of Maui.

Sewer service will be provided to the site via the County sewer system. Potable water service will be provided by the County water system. Drainage facilities will be constructed so that there will be no net increase in the volume of storm water leaving the site and entering the existing drainage

Maui Notices

OCTOBER 23, 2002

system. Maui Electric Company will provide electric service to the site via overhead lines. Sandwich Isles Communications, Inc. will provide underground telephone service to the site and Hawai'i Cablevision will provide cable television service.

Additionally, DHHL will install approximately 1,800 lineal feet of potable water distribution lines in the vicinity of Waihe'e Stream to complete the connection of the existing Maui County water system in the Waiehu-Waihe'e area as a component of this project.

Environmental studies were performed and found no proposed, rare, threatened, or endangered plants or animals on the site. Past cultural practices at the site are not known to exist. An archaeological inventory was performed and did not reveal any historic or cultural resources within the project site.

This project is being developed to implement the objectives of the Hawaiian Homes Commission Act of 1920, as amended.

(6) Weinberg Small Business Market Center

District: Wailuku
TMK: 3-4-012:022 por.

Status: FEA/FONSI issued, project may proceed.

Permits Required: Building, plumbing, electrical, grading

Lokahi Pacific, a community development corporation based on the island Maui will be the developer of this project. The project will be located at 62 Market Street in the core of

old Wailuku Town on the island of Maui. The project site is owned by the County of Maui and will be made available to Lokahi Pacific through a long-term lease.

The development of the project will include the partial demolition of an existing office building and the construction of two new adjoining three-story buildings on a 4,571 square foot parcel of land. The existing two-story concrete building that abuts approximately 32 linear feet of street front on Market Street, was constructed in the early 1900s and has been allowed to deteriorate and become run-down. This building will be partially demolished, leaving the front 10 feet of the building to be restored to its original appearance in order to maintain the "turn of the century" style of old Wailuku Town. A new three-story structure will be constructed and attached to the original building facade. This structure will house the Small Business Market Center which will include retail incubators, office space and other small business resources and services. The rental housing component will be located in an adjoining three-story structure which will be constructed directly behind the street front building on land that is presently undeveloped. The rental housing component will consist of four (4) one bedroom units of approximately 400 square feet, with two units each on the second and third story of the building. The ground floor of the housing component will accommodate a commercial co-op kitchen which will be managed and operated as part of the Small Business Market Center, separate from the housing project.

Construction of the project is expected to start in the first quarter of 2003 and be completed in approximately ten months. The total estimated development cost of the project is \$925,000. Funding for the project will be provided through grants from the U.S. Department of Housing and Urban Development, U. S. Department of Commerce, Economic Development Administration and private foundations and funders.

Marriott Vacation Club is proposing the expansion of the existing Maui Ocean Club (MOC) Resort. The proposed project consists of the addition of two new villa unit buildings for vacation ownership, parking structures, site amenities, landscaping and demolition of some existing facilities. Specifically, the project will involve the demolition of the existing ballroom, parking structure, the luau area, the tennis courts, the exercise facility, and most of the on-grade parking lot. The project will dramatically increase the amount of landscaped open-space along the shoreline of the project site.

The subject property is identified as TMK parcel (2) 4-4-013: 001 and is located at 100 Nohea Kai Drive, Ka'anapali Maui. Existing development includes a 10-story building that contains the guestrooms, lobby, ballrooms and restaurants, and associated amenities. The primary structure was constructed in 1979 as a 720-room Hotel. It is currently undergoing conversion to a 312-room timeshare resort as part of a renovation initiated in 2000 under the project name "Maui Ocean Club". The sequel project will add an additional 146 units to the resort via two freestanding 10-story buildings, one on each side of the existing hotel complex.

A Draft Environmental Impact Statement (DEIS) will be prepared to describe and analyze the impacts associated with this project and will be submitted in conjunction with the application for a Special Management Area (SMA) Permit.

Permits

Required: Building, Grading

The County of Maui Police Department (MPD) proposes the construction of a new police station in Lana'i City, Lana'i.

Currently, Lana'i police protection and related services are provided by the existing Lana'i Police Station, located across Fraser Avenue on Eighth Street. Existing facilities are contained in a former residential unit, approximately 624 sq. ft., originally constructed in 1939. Under current conditions, one (1) Lieutenant, one (1) Sergeant, seven (7) officers, one (1) civilian clerk, and a part-time animal control officer utilize the limited area for policing efforts, administrative services, and the storage of an arsenal, evidence and confidential staff reports. Other items requiring space in the existing station facility include a locker room for officers, restrooms, a Breathalyzer machine and administrative desk space. In addition, the Lana'i Police Station shares limited space with the State of Hawaii Judiciary. Approximately one-third of the existing police station building houses one (1) full-time employee and a temporary courtroom facility for the Judiciary.

The proposed project will replace the existing Lana'i Police station facilities, providing a new 8,200 sq. ft. station with space for policing duties, increased storage area for files and evidence, and separated cell blocks for housing juveniles, adults, and males and females according to federal requirements. Other planned functional spaces will include space for a full-time investigator, locker rooms and restrooms, a fitness room, and a multipurpose conference room. Ancillary structures will include a 30-foot radio tower, covered parking area, storage space, and a dog kennel.

Estimated cost of construction is \$3.7 million. Construction of the project is anticipated to commence upon the receipt of all necessary regulatory approvals.

Permits

Required: SMA

The proposed Planned Unit Development (PUD) subdivision would create three lots from one 16.316-acre parcel of land located makai of Napo'opo'o Road and Pali o Manuahi.

The basic alternative to the proposed subdivision is to leave the property intact as one parcel. Although multiple homes might be accommodated through farm dwellings or condominium property regimes, such arrangements would not accomplish the owners' objective of creating three separate parcels of a size appropriate for the zoning.

The subdivision has been designed as a PUD in order to allow potential building pads for all three lots to occupy the less steeply sloped parts of the property, thereby avoiding hazardous terrain and minimizing scenic and cultural impacts. Brief, temporary effects to air quality and ambient

noise will occur during construction of homes and farm buildings. Much of the property is too steep for any use and will not be modified. A further effect is that three households would now be accommodated on the property instead of one, which would be expected to increase the population of South Kona by about six individuals.

The site is located within the Kealakekua Bay Historic District. The State Historic Preservation Division has determined that no archaeological historic sites are present and that no effects to such would likely occur as a result of the action. However, cultural impact analysis has determined that Pali o Manuahi qualifies as a Traditional Cultural Place, and the view plane looking mauka from Kealakekua Bay area has cultural/historical value. The proposed project will not adversely affect the historic character of the area or the value of Pali o Manuahi by inserting incongruous land uses or interfering with scenic public views, given adherence to proposed building pads. The subdivision will perpetuate low-density agricultural uses for the area consistent with current A-5a zoning and will preserve the character of the Historic District.

Kaua'i Notices

OCTOBER 23, 2002

Drinking Water State Revolving Fund Notice

Kalaheo 0.5 Million Gallon Storage Tank (Job No. 94-3)

The proposed project is located in Kalaheo, Koloa, Kaua'i. It involves the construction of a 500,000 gallon reservoir, booster pump, control building, emergency generator and diesel fuel storage facility connecting pipelines, appurtenances and miscellaneous site improvements.

Activities associated with construction and installation of the proposed improvements will be short term, temporary impacts confined to the immediate vicinity of the project sites. Increased intermittent traffic, noise, dust and vehicular and equipment emissions can be expected and will be controlled. These impacts will not be significant because the project site is small and is surrounded by tall Eucalyptus and Cook Pine trees and open fields. Areas cleared of vegetation should be revegetated as soon as possible to prevent soil erosion, especially on the sloped areas. Equipment noise controls will be implemented according to Department of Health (DOH) guidelines. Dust control will be maintained by sprinkling with water when needed. Waste materials associated with the construction of the control building or installation of the piping and appurtenances will be disposed of in an environmentally safe manner in accordance with State Department of Health requirements and guidelines.

Efficient and effective operations and maintenance will mitigate any potential negative long-term impacts associated with the proposed improvements. Intermittent use of the emergency generator will produce some noise, which should be adequately dampened by the generator's built-in muffler system and the building sheltering the unit. Routine inspections and maintenance will prevent the occurrence of unanticipated releases of diesel fuel.

This project may be funded by Federal Funds through the State of Hawai'i's Drinking Water State Revolving Fund (DWSRF) program, which would constitute a federal action, and will require the project to meet all Hawai'i DWSRF program requirements.

Also see March 23, 2002 Environmental Notice.

Wailua Homesteads Well #3 Drill & Test, Wailua Homesteads, Kaua'i (Job No. 98-33)

The County of Kaua'i, Department of Water proposes to drill, case and pump test an exploratory potable water well to serve Wailua Homesteads. The proposed Wailua Homesteads Well No. 3 would be located approximately 4 miles northwest of Wailua on lands owned by the State of Hawai'i and managed by the Division of Forestry and Wildlife as a Game Management Area. The well would be approximately 680 feet deep, and would be partially cased with 14-inch diameter steel casing. The source may yield up to 1 million gallons per day. The estimated cost of the proposed well project is \$600,000 and construction is expected to last about 6 months.

This project may be funded by federal funds through the State of Hawai'i's Drinking Water State Revolving Fund (DWSRF) program, which would constitute a federal action, and will require the project to meet all Hawai'i DWSRF program requirements.

Also see August 8, 2001 Environmental Notice.

For more information on the above projects, please contact Keith Fujimoto, County of Kaua'i, Department of Water at (808) 245-5449.

Pollution Control Permit Applications

OCTOBER 23, 2002

Notice of Voluntary Response Program (VRP) Project

The Department of Health (DOH) has an amended project, which has been accepted into the Voluntary Response Program (VRP). The purpose of the program is to encourage cleanup and economic development of contaminated property. Under the VRP, "perspective purchasers" of contaminated property may enter into an agreement with the DOH to investigate and cleanup contaminated property under direct DOH oversight. Once the VRP is successfully completed, the prospective purchaser receives a "Letter of Completion"; however, the exemptions from future liability would only apply to future purchasers. A brief description of the accepted project is listed below.

The DOH welcomes comments from the public regarding these and other VRP projects. For information regarding the Voluntary Response Program or the Town Inn/Town Square Project, please contact Mr. Mark Sutterfield, Project Manager at (808) 586-4249.

Town Inn/Town Square Voluntary Response Project

This project consists of two adjoining parcels of land referred to as the Town Inn Parcel and the Town Square Parcel. The Town Inn Parcel consists of a four-story building which houses a 26-room hotel, the Town Inn (formerly the Kobayashi Hotel, 250 N. Beretania St.). A parking lot is associated with the Town Inn Parcel. Additional businesses located in the building include:

248 N. Beretania St.	Kurobara (restaurant)
252 N. Beretania St.	Jen's Karaoke
252A N. Beretania St.	Clip Art Hair Design
254 N. Beretania St.	Eleanor's Catering
256 N. Beretania St.	Chiyo's (diner)
258 N. Beretania St.	River Town Grill Restaurant & Bar

The Town Square Parcel consists of a two-story commercial building and parking lot. Businesses located in the Town Square include:

1200 College Walk-100A	Jian Keng Li
1200 College Walk-100	'A'ala Catering
1200 College Walk-101	E-Sport
1200 College Walk-103/104	J&L Printing
1200 College Walk-105	Skater's Inn
1200 College Walk-106	Pacific System Engineer- ing
1200 College Walk-108	Pierce National Insurance
1200 College Walk-107/109/110	Chad N. Hiyakumoto
1200 College Walk-113	Republic Parking North- west
1200 College Walk-114	Hawaii Lupus Foundation
1200 College Walk-116	Design Perspective
1200 College Walk-117	Tavern 515/Club Yurakucho
1200 College Walk-118	International Four Corp.
1200 College Walk-119	Ken Onishi
1200 College Walk-121	Steve Joe dba Nobel Ins. Agency
1200 College Walk-208	Kahea
1200 College Walk-210/212/214	Honolulu Weekly, Inc.

This 1.44-acre site is presently owned by K-Green Corporation, which purchased the property from Greca International Corporation in 1987.

The suspected contamination to be addressed in this voluntary action is related to leakage of diesel fuel from an underground storage tank that was located on the Town Inn Parcel of the site.

For additional information regarding this project or to review the application, please contact the DOH project manager, Mr. Mark Sutterfield, at (808)586-4249.

Federal Consistency Reviews

The Hawai'i Coastal Zone Management (CZM) Program has received the following federal actions to review for consistency with the CZM objectives and policies in Chapter 205A, Hawai'i Revised Statutes. This public notice is being provided in accordance with section 306(d)(14) of the National Coastal Zone Management Act of 1972, as amended. For general information about CZM federal consistency please call John Nakagawa with the Hawai'i CZM Program at 587-2878. For neighboring islands use the following toll free numbers: Lana'i & Moloka'i: 468-4644 x72878, Kaua'i: 274-3141 x72878, Maui: 984-2400 x72878 or Hawai'i: 974-4000 x72878.

For specific information or questions about an action listed below please contact the CZM staff person identified for each action. Federally mandated deadlines require that comments be received by the date specified for each CZM consistency review and can be mailed to:

David W. Blane, Director
Office of Planning
Dept. of Business, Economic Development and Tourism
P.O. Box 2359
Honolulu, Hawai'i 96804

Or, fax comments to the Hawai'i CZM Program at 587-2899.

(1) General Permit GP2002-01 for Boat Docks in Hawai'i Kai Marina, O'ahu

Federal Action: Department of the Army Permit
Federal Agency: U.S. Army Corps of Engineers
Contact: Peter Galloway, 438-8416

Location: Hawai'i Kai Marina, O'ahu

CZM Contact: John Nakagawa, 587-2878

Proposed Action:

Reissue the general permit authorizing the installation and maintenance of private boat docks by riparian proprietors within Hawai'i Kai Marina. The previous general permit expired on July 27, 2002. The general permit would not authorize any dredging or filling activities. The authorization is limited to only one dock per single-family dwelling, waterfront parcel, multi-family dwelling waterfront unit or commercial entity. In addition, docks must conform to the Boat Dock Policy Guidelines established by the Hawai'i Kai Marina Community Association and comply with their mooring restrictions.

Comments Due: November 6, 2002

(2) Proposed Amendments to Fishery Management Plans

Applicant: Western Pacific Regional Fishery Management Council
Contact: Kitty Simonds, Executive Director, 522-8220

Federal Action: Federal Agency Activity

Location: State of Hawai'i

CZM Contact: John Nakagawa, 587-2878

Proposed Action:

The Council is proposing three amendments to the Fishery Management Plans (FMP) dealing with bycatch (Pelagics and Bottomfish FMPs), overfishing (Pelagics, Bottomfish and Crustaceans FMPs), and identification of fishing communities (Pelagics, Bottomfish Crustaceans and Precious Corals FMPs). The FMP amendments are required by the Magnuson-Stevens Fishery Conservation and Management Act.

Comments Due: November 6, 2002

(3) Nanakuli Makai Improvements, Wai'anae Coast Emergency Access Road, Oahu

Applicant: City & County of Honolulu, Dept. of Transportation Services

Agent: Gray, Hong, Bills, Nojima & Associates, Inc.

Contact: Sheryl Nojima, 521-0306

Federal Action: Department of the Army Permit

Federal Agency: U.S. Army Corps of Engineers
Contact: Bill Lennan, 438-6986

Location: Farrington Highway at Nanakuli Stream, O'ahu

TMK: 8-9-1: 2 & 8-9-6: 69

CZM Contact: John Nakagawa, 587-2878

Proposed Action:

Demolish existing pedestrian bridge at Nanakuli Stream and replace with a traffic-bearing bridge. This project implements a part of the Wai'anae Coast Emergency Access Road, which will provide an alternate route along the Leeward Coast during emergency situations.

Comments Due: November 6, 2002

Federal Notices

OCTOBER 23, 2002

City to Use 'Umi Street Bus Terminus as Refueling Facility

Section 5334(g) of the Federal Transit Laws, as codified, 49 U.S.C. 5301, *et seq.*, permits the Administrator of the Federal Transit Administration (FTA) to authorize a recipient of FTA funds to transfer land or a facility to a public body for any public purpose with no further obligation to the Federal Government if, among other things, no Federal agency is interested in acquiring the asset for Federal use. The property is an unused, vacant bus terminus, consisting of an approximately 12,800 square foot parcel of land fronting 'Umi Street in Honolulu, Hawai'i. The property is situated within an area zoned IMX-1 for industrial-commercial mixed use. The parcel is located across the street from the Kalihi Shopping Center near Haunapo Lane and a one-family housing unit. A one-family housing unit to the north and Verizon Hawai'i's property to the east and south border it. Office buildings are on Verizon Hawai'i's site. [**Editor's note:** "Place Names of Hawai'i" by Mary Kawena Puku'i, Samuel H. Elbert and Esther Mo'okini (University Press of Hawai'i, 1981, at page 215) identifies 'Umi and Haunapo as Kalihi land names noting that 'Umi probably referred to the sixteenth century chief of Hawai'i. The name 'Umi also means "to strangle" which was probably derived from the strangling of a victim used as a human sacrifice at the Haunapo heiau which stood in the vicinity of the present street.] The 'Umi Street property was previously used as a municipal transit bus terminus. It is presently vacant without any building structures. An existing concrete pavement bus turnaround driveway is situated on the front half of the property. The concrete pavement is in good condition. The rear portion of the parcel does not have any improvements and is overgrown with vegetation. The property frontage along 'Umi Street is open. A concrete block wall and chain link fence separates the property's perimeter adjoining the residential and Verizon Hawai'i properties. Accordingly, FTA is issuing this Notice to advise Federal agencies that the City and County of Honolulu Department of Transportation Services intends to transfer a vacant parcel of land without structures to Honolulu's Department of Facility Maintenance to use as a refueling station for city vehicles. Any Federal agency interested in acquiring the land or facility must notify the FTA Region IX Office of its interest by November 1, 2002. Interested parties should notify the Regional Office by writing to Leslie T. Rogers, Regional Administrator, Federal Transit Administration, 201 Mission Street, Suite 2210, San Francisco, California 94105. Contact Edward Carranza, Director of Office of Program Management at (415) 744-3118 for details (see, 67 F.R. 61950, October 2, 2002).

Critical Habitat for O'ahu Plant Species

The U.S. Fish and Wildlife Service (FWS) gives notice of a public hearing on the proposed critical habitat designations for 99 plants from the island of O'ahu, Hawai'i. In addition, the comment period (which originally closed on July 29, 2002) was reopened on August 26, 2002, and closed on September 30, 2002, will now be reopened. The new comment period and public hearing will allow all interested parties to submit oral or written comments on the proposal. Comments already submitted on the proposed rule need

not be resubmitted as they will be fully considered in the final determination. The comment period for this proposal now closes on November 30, 2002. Any comments received by the closing date will be considered in the final decision on this proposal. The public hearing will be held from 6 to 8 p.m. on Tuesday, November 19, 2002, at the Ala Moana Hotel, 410 Atkinson Drive, on O'ahu. Prior to the public hearing, FWS will be available from 3:30 to 4:30 p.m. to provide information and to answer questions. The FWS will also be available for questions after the hearing. Comments and materials concerning this proposal should be sent to the Field Supervisor, U.S. Fish and Wildlife Service, Pacific Islands Office, 300 Ala Moana Boulevard, Room 3-122, P.O. Box 50088, Honolulu, Hawaii 96850. Comments and materials received will be available for public inspection, by appointment, during normal business hours at the above address. Contact Paul Henson, at the above address by telephone at (808) 541-3441, or by facsimile at (808) 541-3470 (see, 67 F.R. 63066, October 10, 2002).

Critical Habitat for Maui and Kaho'olawe Plant Species

The U.S. Fish and Wildlife Service (FWS), announces the availability of the draft economic analysis for the proposed designations of critical habitat for plant species from the islands of Maui and Kaho'olawe. In earlier Federal Register notices published August 26, 2002, FWS reopened the comment period and provided notice of a public hearing (67 F.R. 54764 and 67 F.R. 54766) for the proposed designations or non-designations of critical habitat for these plants. FWS is now providing notice of extending the comment period to allow peer reviewers and all interested parties to comment simultaneously on the proposed rule and the associated draft economic analysis. Comments previously submitted need not be resubmitted as they will be incorporated into the public record as part of this extended comment period and will be fully considered in preparation of the final rule. FWS will accept public comments until November 1, 2002. Written comments and information should be submitted to Field Supervisor, U.S. Fish and Wildlife Service, Pacific Islands Office, 300 Ala Moana Blvd., P.O. Box 50088, Honolulu, Hawai'i 96850-0001. Contact Paul Henson, Field Supervisor, Pacific Islands Office, at the above address or by telephone at (808) 541-3441 or by facsimile at (808) 541-3470 (see, 67 F.R. 61845, October 2, 2002).

Aquatic Nuisance Species Task Force Meeting in Waikiki to discuss Brown Tree Snake *inter alia*

The federal Aquatic Nuisance Species (ANS) Task Force will meet from 8:30 a.m. to 5:00 p.m., on Wednesday, November 13, 2002; from 8:30 a.m. to 5:00 p.m., Thursday, November 14, 2002; and from 8:30 a.m. to 1:00 p.m., Friday, November 15, 2002. Meetings will be held at the Radison Waikiki Prince Kuhio, 2500 Kuhio Avenue, Honolulu, Hawai'i 96815, telephone (808) 922-0811. Contact Sharon Gross, Executive Secretary, Aquatic Nuisance Species Task Force at (703) 358-2308 or by e-mail at: sharon--gross@fws.gov. Topics to be covered include: a field trip to view local invasive species problems; an update of activities from

each of the Task Force's regional panels; submission of a Rapid Response Plan by the Western Regional Panel; status and updates from several other Task Force committees including the Prevention Committee, the Communications, Education and Outreach Committee, and the Research Committee; approval of the Draft Green Crab Control Plan; status of State and Interstate ANS Management Plans and approval of the Massachusetts State Plan; an update on ballast water management activities; a panel on the status of Brown Tree Snake activities; and other topics (see, 67 F.R. 62493, October 7, 2002).

Human Remains from Lana'i at the Bernice Pauahi Bishop Museum

The National Park Service of the U.S. Department of the Interior has given notice that an inventory of human remains from Lana'i, in the possession of the Bernice Pauahi Bishop Museum, Honolulu, has been complete in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA). A detailed assessment of these human remains has been made by Bishop Museum's professional staff in consultation with representatives from the Maui/Lana'i Island Burial Council. In 2002, human remains representing one individual were found in collections from Maunalei Cave, Lana'i. The remains consist of a human phalange. No known individuals were identified. No associated funerary objects are present. In 2002, human remains representing one individual were found in collections from Lana'i. The remains consist of a human tooth. No associated funerary objects are present. The collections were gifted to the Bishop Museum by George F. Arnemann in 1956. Based on the above-mentioned information, officials of the Bishop Museum have determined that, pursuant to 43 CFR 10.2 (d)(1), the human remains listed above represent the physical remains of two individuals of Native American ancestry. Officials of the Bishop Museum also have determined that, pursuant to 43 CFR 10.2 (e), there is a relationship of shared group identity that can be reasonably traced between these Native American human remains and associated funerary objects and the Maui/Lana'i Island Burial Council, Hui Malama I Na Kupuna O Hawai'i Nei and Office of Hawaiian Affairs. Representatives of any other Native Hawaiian organization that believes itself to be culturally affiliated with these human remains should contact Dr. Guy Kaulukukui, Vice President of Cultural Studies, Bishop Museum, 1525 Bernice Street, Honolulu, Hawai'i, 96718-2704, telephone (808) 848-4126 before November 12, 2002. Repatriation of these human remains to the above organizations may begin after that date if no additional claimants come forward (see, 67 F.R. 63151, October 10, 2002).

Repatriation of Cultural Items from Lana'i at the Bernice Pauahi Bishop Museum

The National Park Service of the U.S. Department of the Interior has given notice of the intent to repatriate cultural items from Lana'i, in the possession of the Bernice Pauahi Bishop Museum, Honolulu, that meet the definition of "unassociated funerary object" under Section 2 of the Native American Graves

Protection and Repatriation Act (NAGPRA). In 1926, G.C. Munro gifted 97 glass and ivory beads to the Bishop Museum. Accession records indicate that the beads were "found some years ago with the bones of a child." The burial site was located on the island of Lana'i. Excavation records indicate that the human remains with whom these funerary objects were associated were not collected, or were collected but are no longer within the Bishop Museum's collection. A detailed assessment of these unassociated funerary objects was made by Bishop Museum's professional staff in consultation with representatives from the Maui/Lana'i Island Burial Council. Based on the above-mentioned information, officials of the Bishop Museum have determined that, pursuant to 43 CFR 10.2 (d)(2)(ii), these 97 cultural items are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony and are believed, by a preponderance of the evidence, to have been removed from a specific burial site of a Native American individual. Officials of the Bishop Museum also have determined that, pursuant to 43 CFR 10.2 (e), there is a relationship of shared group identity that can be reasonably traced between these 97 unassociated funerary objects and the Maui/Lana'i Island Burial Council, Hui Malama I Na Kupuna O Hawai'i Nei, and the Office of Hawaiian Affairs. Representatives of any other Native Hawaiian organization that believes itself to be culturally affiliated with these unassociated funerary objects should contact Dr. Guy Kaulukukui, Vice President of Cultural Studies, Bishop Museum, 1525 Bernice Street, Honolulu, Hawai'i, 96718-2704, telephone (808) 848-4126 before November 12, 2002. Repatriation of these unassociated funerary objects to the above organizations may begin after that date if no additional claimants come forward (see, 67 F.R. 63152, October 10, 2002).

Guam/Marianas Critical Habitat for One Mammal and Two Bird Species

The U.S. Fish and Wildlife Service (FWS), has reconsidered whether designating critical habitat for the Mariana fruit bat (*Pteropus mariannus mariannus*), little Mariana fruit bat (*Pteropus tokudae*), Guam Micronesian kingfisher (*Halcyon cinnamomina cinnamomina*), Mariana crow (*Corvus kubaryi*), Guam broadbill (*Myiagra freycineti*), and Guam subspecies of bridled white-eye (*Zosterops conspicillatus conspicillatus*) would be prudent. FWS proposes designation of critical habitat for the Mariana fruit bat, Guam Micronesian kingfisher, and Mariana crow pursuant to the Endangered Species Act of 1973, as amended (Act). FWS proposes designating approximately 24,803 acres on the island of Guam for the Mariana fruit bat and the Guam Micronesian kingfisher. For the Mariana crow, FWS proposes designating approximately 23,004 acres on the island of Guam and approximately 6,084 acres on the island of Rota in the Commonwealth of the Northern Mariana Islands (CNMI). FWS solicits data and comments from the public on all aspects of this proposal, including data on economic and other impacts. FWS may revise this proposal to incorporate or address new information received during the comment period. (see 67 F.R. 63737, October 15, 2002).
