Hanalei Visitor Center & Overlook

The U.S. Fish and Wildlife Service plans to add six acres to the approved boundary of the Hanalei National Wildlife Refuge, Kauai. The project is located in the uplands of Hanalei Valley, approximately 300 feet above sea level. The State of Hawaii will complete construction of the visitor center and overlook before the parcel and facilities are donated to the Service by the willing landowner, Princeville Corporation.

USFWS will manage public uses such as wildlife observation and photography, environmental education, and interpretation. Visitors will also have the opportunity to buy natural history related books and items at a small nonprofit bookstore and gift shop. The revenues will help fund operations and maintenance of the site. A modest parking area, public restrooms, a kiosk, and outdoor

garden are also proposed. It was determined through a compatibility determination that the uses will be compatible with the primary Refuge purpose and mission of the National Wildlife Refuge System.

Among the provisions that ensure that operation and management of the project will not have a significant effect on the environment are: daytime operating hours; the use of landscaping for aesthetics and privacy; minimal low-wattage, shielded lighting; a prohibition on picnicking and the sale of food at the bookstore; and constraints on the type of merchandise sold at the bookstore. The Service does not intend to sponsor commercial use of the property including advertising, parking, or commercial tours.

See page 6 for more info.

Draft Long-Range Management Plan Available for Review for Kanepuu Natural Area Partnership Project

The Department of Land and Natural Resources, Division of Forestry and Wildlife is proposing to renew funding for long term conservation management of the 590-acre Kanepuu Preserve on Lanai the Nature Conservancy of Hawaii. Kanepuu Preserve is part of the Natural Area Partnership Program, a state program that provides 2 to 1 matching funds for natural area protection efforts on private lands of Natural Area Reserve quality. Pursuant to the Hawaii Administrative Rule regulating the program (HAR 13-210), the managing partner (The Nature Conservancy of Hawaii) submits updated management plans every six years for approval by the Board of Land and Natural Resources. The Kanepuu Long-Range Management Plan for FY2005 – 2010 is available for your review online at <http://www.state.hi.us/dlnr/dofaw/pubs/index.html>.

Copies of the plan may also be obtained by contacting Theresa Menard (Landscape Conservation Coordinator) of the Nature Conservancy of Hawaii at (808) 821-2147 or theresa_menard@tnc.org.

The preserve is northwest of Lanai City and is comprised of 7 disjunct units ranging from 13 to 368 acres. The elevation is approximately 1,700 feet. The Kanepuu Preserve was created to protect the last major remnant of a rare dryland forest community called olopuu/lama (*Nestegis/Diospyros*) dryland forest. (Olopuu is a native tree in the olive family and lama is a native type of ebony tree.) Olopuu/lama forest once covered large portions of the lowlands on Maui, Molokai, Kahoolawe, and Lanai.

Address comments to the applicant with copies to the consultant and OEQC.

Permits Required: SMA, Building, Grading, Height Waiver, NPDES

The Department of Accounting and General Services (DAGS), State of Hawai'i, on behalf of the State Department of Education (DOE), proposes to construct a new cafeteria building at Waipahu Intermediate School (WIS). The existing cafetorium consists of a serving kitchen and small dining area. Currently food is prepared at a nearby elementary school cafeteria and transported to WIS each day. The chief purpose of the project is to construct a cafeteria with a conventional kitchen and dining area to meet the needs of the 1,400 to 1,500 students who attend Waipahu Intermediate School.

A secondary goal is to integrate sustainable design features that will reduce energy consumption, conserve water, improve functionality, and reduce operational costs. The DOE has designated the WIS cafeteria as a pilot project to be designed according to the LEED (Leadership in Energy and Environmental Design) criteria, a nationally-recognized rating system developed by the U.S. Green Building Council.

To be located near the Waikele Road entrance to the school, just off of Farrington Highway, the new cafeteria will consist of a conventional kitchen; a dining hall with a perma-

nent stage and back-of-house facilities; restrooms; faculty dining room; dressing rooms; and custodial service room. The gross floor area will be 19,200 square feet (sq. ft.), including lanais. The dining hall will be 8,400 sq. ft. in area, and may be used for community meetings during the weekends and evenings.

Lahaina Watershed Flood Control Project Record of Decision

The federal Record of Decision for the Lahaina Watershed Flood Control Project has been issued. The Record of Decision was signed on April 20, 2004 by Lawrence Yamamoto, State Conservationist, Natural Resources Conservation Service.

A copy of the Record of Decision may be obtained on the NRCS Hawaii website at www.hi.nrcs.usda.gov/news/lahainaROD.html or by submitting a written request to:

Lawrence Yamamoto, State Conservationist, Natural Resources Conservation Service, P.O. Box 50004, Honolulu, HI 96850.

The Lahaina Watershed FEIS notice was published in the January 8, 2004 issue of The Environmental Notice. The FEIS is a combined federal-state document.

Draft Long-Range Management Plan Available for Review for Kanepuu Natural Area Partnership Project

The Department of Land and Natural Resources, Division of Forestry and Wildlife is proposing to renew funding for long term conservation management of the 590-acre Kanepuu Preserve on Lanai the Nature Conservancy of Hawaii. Kanepuu Preserve is part of the Natural Area Partnership Program, a state program that provides 2 to 1 matching funds for natural area protection efforts on private lands of Natural Area Reserve quality. Pursuant to the Hawaii Administrative Rule regulating the program (HAR 13-210), the managing partner (The Nature Conservancy of Hawaii) submits updated management plans every six years for approval by the Board of Land and Natural Resources. The Kanepuu Long-Range Management Plan for FY2005 – 2010 is available for your review online at <http://www.state.hi.us/dlnr/dofaw/pubs/index.html>. Copies of the plan may also be obtained by contacting Theresa Menard (Landscape Conservation Coordinator) of the Nature Conservancy of Hawaii at (808) 821-2147 or theresa_menard@tnc.org. Comments on the plan may be sent by May 27, 2004 to Randy Kennedy (Native Resources Program Manager) at 1151 Punchbowl Street, Room 224, Honolulu, HI 96813. For additional information contact Randy Kennedy at (808) 587-0054.

Kanepuu Preserve Natural Area Partnership

The preserve is northwest of Lanai City and is comprised of 7 disjunct units ranging from 13 to 368 acres. The elevation is approximately 1,700 feet. The Kanepuu Preserve was created to protect the last major remnant of a rare dryland forest community called olopuu/lama (*Nestegis/Diospyros*) dryland forest. (Olopuu is a native tree in the olive family and lama is a native type of ebony tree.) Olopuu/lama forest once covered large portions of the lowlands on Maui, Molokai, Kahoolawe, and Lanai.

Four endangered plants are found in the preserve: the fragrantly flowered *Gardenia brighamii*, sandalwood or iliahi (*Santalum freycinetianum* var. *lanaiense*), the vining *Bonamia menziesii*, and our official state flower, the mao hau hele (*Hibiscus brackenridgei* ssp. *brackenridgei*). The population of mao hau hele in the preserve is now regenerating naturally and has reached 50 to 60 individuals, making it one of the largest known populations in the state. Native invertebrates and two common species of native birds are also present in Kanepuu Preserve.

The Conservancy's primary management activity will continue to be the removal of axis deer from the Kanepuu and Kahue units, along with the continued exclusion of mouflon sheep and cattle. Due to the corrosive effect of sand, salt and prevailing winds on the island, a significant factor in the ongoing campaign to remove ungulates will be the need for fence replacement and maintenance around the seven preserve units.

Kaua'i Notices

MONTH DATE, 2004

National Environmental Policy Act

Hanalei National Wildlife Refuge Visitor Information Center and Hanalei Valley Overlook (EA/FONSI)

District: Hanalei
TMK: 5-3-1:16
Applicant: U.S. Fish and Wildlife Service
Box 50167
Honolulu, Hawaii 96850
Contact: Jerry Leinecke (808-792-9548)

The U.S. Fish and Wildlife Service (Service) announces our decision to add six acres to the approved boundary of the Hanalei National Wildlife Refuge (Refuge), Kauai. The project is located in the uplands of Hanalei Valley, approximately 300 feet above sea level. The State of Hawaii will complete construction before the parcel and facilities are donated to the Service by the willing landowner, Princeville Corporation. The project affects a single parcel, TMK 5-3-1:16. We will manage public uses such as wildlife observation and photography, environmental education, and interpretation. Visitors will also have the opportunity to buy natural history related books and items at a small nonprofit bookstore and gift shop. The revenues will help fund operations and maintenance of the site. A modest parking area, public restrooms, a kiosk, and outdoor garden are also proposed. It was determined through a compatibility determination that the uses will be compatible with the primary Refuge purpose and mission of the National Wildlife Refuge System. Among the provisions that ensure that operation and management of the project will not have a significant effect on the environment are: daytime operating hours; the use of landscaping for aesthetics and privacy; minimal low-wattage, shielded lighting; a prohibition on picnicking and the sale of food at the bookstore; and constraints on the type of merchandise sold at the bookstore. The Service does not intend to sponsor commercial use of the property including advertising, parking, or commercial tours.

We are adopting the information and analysis in the Final Environmental Assessment (EA) for the Hanalei Valley/Hanalei National Wildlife Refuge Scenic Stop (State of Hawaii Department of Transportation Highways Division and the U.S. Department of Transportation, Federal Highways Administra-

tion, June 23, 2003). Our Finding of No Significant Impact (FONSI), dated April 9, 2004, applies to the action of acquiring the land and facilities and managing public use and the facility. As the project was found not to have any unmitigable, significant direct, indirect, or cumulative adverse impacts on the environment, we will not prepare an Environmental Impact Statement.

Contact Mike Hawkes, Refuge Manager, Kauai National Wildlife Refuge Complex, P.O. Box 1128, Kilauea, Kauai, HI 96754, telephone (808) 828-1413, to review a copy of the EA and FONSI. Copies have been provided to the Hawaii State Main Library, and Princeville and Lihue public libraries.

Environmental Tip

Vanpool to Work and School

HDOT contracts with Vanpool Hawaii to provide air-conditioned, 7-15 passenger vans and sport utility vehicles for Hawaii commuters. The very popular program began in 1995. There are currently more than 150 Vanpool Hawaii vans on the road.

Vanpools cost \$55 per seat. The driver gets to keep the vehicle to use on weekends and after commute hours, in exchange for picking up riders and collecting fees. All insurance and maintenance costs are included in the fees. The vanpoolers share the costs of parking and gas.

For more information on how you can become a vanpooler, call Vanpool Hawaii (808) 596-VANS or click on www.vanpoolhawaii.com.

Conservation District Use Permits

Persons interested in commenting on the following Conservation District Use Application (Board Permit) must submit comments to the Department of Land and Natural Resources.

Also, anyone interested in receiving notification of determinations on Conservation District Use Applications (Board Permits) must submit requests to DLNR that include the following information:

- 1) Name and address of the requestor;
- 2) The permit for which the requestor would like to receive notice of determination; and
- 3) The date the notice was initially published in the Environmental Notice.

Both comments and requests for notification of determinations must be submitted to DLNR within thirty days from the initial date that the notice was published in the Environmental Notice.

Please send comments and requests to: State of Hawaii, Department of Land and Natural Resources, Office of Conservation and Coastal Lands, 1151 Punchbowl Street, Room 220, Honolulu, Hawaii 96813.

DLNR will make every effort to notify those interested in the subject CDUA, it is not obligated to notify any person not strictly complying with the above requirements. For more information, please contact Tiger Mills of our Office of Conservation and Coastal Lands at 587-0382.

Federal Consistency Reviews

The Hawaii Coastal Zone Management (CZM) Program has received the following federal actions to review for consistency with the CZM objectives and policies in Chapter 205A, Hawaii Revised Statutes. This public notice is being provided in accordance with section 306(d)(14) of the National Coastal Zone Management Act of 1972, as amended. For general information about CZM federal consistency please call John Nakagawa with the Hawaii CZM Program at 587-2878. For neighboring islands use the following toll free numbers: Lanai & Molokai: 468-4644 x72878, Kauai: 274-3141 x72878, Maui: 984-2400 x72878 or Hawaii: 974-4000 x72878.

For specific information or questions about an action listed below please contact the CZM staff person identified for each action. Federally mandated deadlines require that comments be received by the date specified for each CZM consistency review and can be mailed to:

Office of Planning
Department of Business, Economic Development and
Tourism
P.O. Box 2359
Honolulu, Hawaii 96804

Or, fax comments to the Hawaii CZM Program at 587-2899.

(1) Fort Weaver Road Widening, Ewa, Oahu

Applicant: State of Hawaii Department of Transportation
Contact: Milton Oka, 692-7579
Federal Action: Federal Financial Assistance
Federal Agency: Federal Highway Administration
Location: Fort Weaver Rd., Farrington Hwy. to Geiger Rd.
CZM Contact: John Nakagawa, 587-2878
Proposed Action:

Widen Fort Weaver Road, from Farrington Highway to Geiger Road, from four lanes to six lanes in both directions. The project also involves constructing a bicycle lane, constructing a sidewalk in the southbound direction, widening a shared use path, and installing curbs and gutters.

Comments Due: May 24, 2004

(2) Coconut Island Coral Transplant, Kaneohe Bay, Hawaii

Applicant: Hawaii Institute of Marine Biology
Contact: Jo Leong, 234-7480
Federal Action: Department of the Army Permit (200400296)
Federal Agency: U.S. Army Corps of Engineers
Contact: Lolly Silva, 438-7023
Location: Coconut Island, Kaneohe Bay, Hawaii
CZM Contact: Debra Tom, 587-2840
Proposed Action:

The Hawaii Institute of Marine Biology located at Coconut Island, Kaneohe Hawaii is proposing to remove and transplant coral at four different sites within Kaneohe Bay. The coral heads will be transplanted within one area identified as Coconut Island south. The moving of the corals to the proposed restoration site will be accomplished with assistance of a U.S. Army dive and salvage team as part of their training.

Comments Due: May 24, 2004

Guam Micronesian Kingfisher Recovery Plan

The U.S. Fish and Wildlife Service announces the availability of the Draft Revised Recovery Plan for the Sihek or Guam Micronesian Kingfisher (*Halcyon cinnamomina cinnamomina*) for public review and comment. The sihek is listed as endangered by the federal government and also by the Territory of Guam. Sihek are forest kingfishers endemic to the island of Guam in the Mariana Archipelago. Sihek were last observed on Guam in 1988 and are now believed to be extirpated from the wild. Currently, sihek are represented by a captive population of 60 individuals in 11 zoological institutions. Prior to their extirpation from the island, sihek utilized a wide variety of forest habitats.

The goal of this plan is to reestablish sihek in at least 2 stable or increasing subpopulations of 1,000 adults each, 1 in northern Guam and 1 in southern Guam, in conjunction with habitat protection and predator control measures, as well as long-term monitoring to ensure the effectiveness of management actions. The USFWS is

soliciting written comments on the draft revised recovery plan described. All comments received by on or before June 28, 2004 will be considered in developing a final revised recovery plan.

Copies of the draft revised recovery plan are available for inspection, by appointment, during normal business hours at the following location: U.S. Fish and Wildlife Service, Pacific Islands Fish and Wildlife Office, 300 Ala Moana Boulevard, Room 3-122, Honolulu, **Hawaii** 96850 (phone: (808) 792-9400). Requests for copies of the draft revised recovery plan and written comments and materials regarding this plan should be addressed to the Field Supervisor, Ecological Services, at the above Honolulu address. An electronic copy of the draft revised recovery plan is also available at: <http://endangered.fws.gov/recovery/index.html#plans>.

FOR FURTHER INFORMATION CONTACT: Fred Amidon, Fish and Wildlife Biologist, at (808) 792-9400. [from 4/28/04 Federal Register]
