

# The Environmental Notice

A SEMI-MONTHLY PERIODIC BULLETIN OF THE OFFICE OF ENVIRONMENTAL QUALITY CONTROL

MAY 23, 2007

## DOT Proposes Honoapiilani Highway Realignment and Widening from Maalaea to Launiupoko

The Hawaii Department of Transportation (HDOT), in cooperation with the Federal Highway Administration (FHWA), will be preparing an Environmental Impact Statement (Draft and Final EIS) to evaluate several realignment and/or widening alternatives with the potential to provide increased roadway capacity, safety, and reliability for Honoapiilani Highway (HWY 30) between Maalaea and Launiupoko.

The project limits extend from just west of Maalaea where the four lanes of Honoapiilani Highway currently end, through the Pali area, and across the coastal plain from Ukumehame to the future intersection with the planned Lahaina Bypass Road in Launiupoko.

Alternative improvements to Honoapiilani Highway between Maalaea and Launiupoko that would increase roadway capacity, enhance safety, and improve the reliability of travel will be examined. Alternatives to be examined will be expanded through the scoping process, but may include widening of Honoapiilani Highway, construction of a new roadway, intersection improvements, and a combination of alternatives.

Project planning will include a number of public outreach activities including the formation of a project Task Force. See page 10.

## Environmental Council Seeks Public Review and Comment on Proposed Draft Update to the Exemption List for the State of Hawaii, Department of Accounting and General Services

On May 4, 2007, the Department of Accounting and General Services of the State of Hawaii, transmitted a proposed updated Exemption List for consideration and approval by the Environmental Council (P-1112.7). The Environmental Council seeks public review and comment on this proposed draft update to the Exemption List for the Department of Accounting and General Services. A copy of the proposed draft update is available as an Adobe Acrobat Portable Document File (PDF) file that can be read by downloading a free copy of Adobe Acrobat Reader at <http://www.adobe.com>. Comments must be submitted on or before June 22, 2007, to Mr. Michael Faye, Chairperson, Environmental Council, 235 South Beretania Street, Room 702, Honolulu, Hawai'i 96813. To receive a copy of the Adobe Acrobat PDF file, please send an electronic mail to [oeqc@doh.hawaii.gov](mailto:oeqc@doh.hawaii.gov) and simply type "Request for DAGS List" in the subject line.

## Final EIS Acceptance Notices

On February 7, 2007, the Governor accepted the Final EIS for the University of Hawaii - West Oahu, island of Oahu.

On May 14, 2007, the Governor accepted the Final EIS for the Wai'anapanapa State Park Master Plan, island of Maui.

Write or call OEQC or our departmental Affirmative Action Officer at Box 3378, Honolulu, HI 96801-3378 or at (808) 586-4616 (voice/tty) within 180 days of a problem. OEQC intends to make the information in this bulletin accessible to everyone. Individuals that require this material in a different format (such as large type or braille), should contact our office for assistance.

# Definitions

## Your guide to the Environmental Review Process

### Draft Environmental Assessment

A project or action that may affect the environment cannot be implemented until an Environmental Assessment (EA) is prepared in accordance with Chapter 343, Hawai'i Revised Statutes (HRS). If the lead State or county agency (the *proposing agency* for agency actions, or the *approving agency* for applicant actions) anticipates that the project will have no significant environmental impact, then affected agencies, individuals, and organizations must be consulted and a Draft EA (DEA) is written and public notice is published in this periodic bulletin (see, section 343-3, HRS) known as the *Environmental Notice*. The public has 30 days to comment on the Draft EA from the date of the first notice.

### Final Environmental Assessment and Finding of No Significant Impact

After the lead agency reviews the public comments, if it determines that the project will have no significant effect on the environment, and then it will prepare a Final EA (FEA) and issue a Finding of No Significant Impact (FONSI) formerly called a *Negative Declaration*. The Final EA must respond to all public comments. An Environmental Impact Statement will not be required and the project may now be implemented. The public has 30 days from the first notice of a FONSI in this periodic bulletin to ask a court to require the preparation of an EIS.

### Final Environmental Assessment and Environmental Impact Statement Preparation Notice

When a lead agency decides that a project may have a significant environmental impact, an Environmental Impact Statement (EIS) must be prepared prior to implementing the project. Like the DEA (see *above*), affected agencies, individuals and organizations must be consulted prior to preparation of the final EA (FEA) and issuance of a determination called an EIS preparation notice (EISPN). (The EA is called *final*, to distinguish it from the draft, above). After the FEA is written by the lead agency, and notice of the FEA and EISPN is published in this periodic bulletin, any agency, group, or individual has 30 days from the first publication of the EISPN to request to become a consulted party and to make written comments regarding the environmental effects of the proposed action. The public (including an applicant) has 60 days from the first notice of an EISPN in this periodic bulletin to ask a court to not require the preparation of an EIS.

### Draft Environmental Impact Statement

After receiving the comments on the FEA and EISPN (see *above*), the lead agency or private applicant must prepare a Draft Environmental Impact Statement (DEIS) prior to project implementation. This document must completely disclose the likely impacts of a project. Direct, indirect and cumulative impacts must be discussed along with measures proposed to mitigate them. The public has 45 days from the first publication date in this periodic bulletin to comment on a DEIS. The DEIS must respond to comments received during the FEA-EISPN comment period in a *point-by-point* manner.

### Final Environmental Impact Statement

After considering all public comments filed during the DEIS stage, the agency or applicant must prepare a Final EIS (FEIS). The FEIS must respond in a *point-by-point* manner to all comments from the draft stage. Requisite deeper analyses must be included in the FEIS. For applicant projects, the approving agency is authorized to accept the FEIS. For agency project the Governor or the county mayor is the accepting authority. Only after the EIS is accepted may the project be implemented.

### Acceptability

If the FEIS is accepted, the law requires that notice of this be published in this periodic bulletin. The public has 60 days from the date of first notice of acceptance to ask a court to vacate the acceptance of an EIS. In the case of applicant actions, the law requires that an approving agency must make a determination on acceptance within thirty-days of receipt of the FEIS or the FEIS is deemed accepted. Also, for applicant actions, the law provides for an administrative appeal of a non-acceptance to the Environmental Council.

### National Environmental Policy Act

The National Environmental Policy Act (NEPA) requires federal projects to prepare an EA or EIS. In many ways it is similar to Hawai'i's law. Some projects require both a state (and county) and federal EIS and the public comment procedure should be coordinated. Although not required by law, the OEQC publishes NEPA notices in this periodic bulletin to help keep the public informed of important federal actions.

### Conservation District

Any use of land in the State Conservation District requires a Conservation District Use Application (CDUA). These applications are reviewed and approved by the Board of Land and Natural Resources (BLNR). Members of the public may intervene in the permit process. Notice of these permit applications is published in this periodic bulletin.

### Special Management Area

The Special Management Area (SMA) is along the coastlines of all our islands and development in this area is generally regulated by Chapter 205A, HRS and county ordinance. A special subset of the SMA that is regulated by Chapter 343, HRS is the Shoreline Setback Area. Most development in this area requires a Special Management Permit (SMP). This periodic bulletin posts notice of these SMP applications to encourage public input.

### Shoreline Certifications

State law requires that Hawai'i shorelines be surveyed and certified when necessary to clearly establish the shoreline setback (an area contained between the certified shoreline and a prescribe distance inland (usually 40 feet) from the certified shoreline). The public may participate in the process to help assure accurate regulatory boundaries. Private land owners often petition to have their shoreline certified by the State surveyor prior to construction. This periodic bulletin publishes notice from the Department of Land and Natural Resources of both shoreline certification applicants and of final certifications or rejections.

### Environmental Council

The Environmental Council is a fifteen-member citizen board appointed by the Governor to advise the State on environmental concerns. The council makes the rules that govern the Environmental Impact Statement process. The agendas of their regular meetings are published on the Internet at <http://www.ehawaii.gov.org/calendar> and the public is invited to attend.

### Exemption Lists

Government agencies must keep a list describing the minor activities they regularly perform that are declared exempt from the environmental review process. These lists are reviewed and approved by the Environmental Council. This periodic bulletin will publish an agency's draft exemption list for public comment prior to Council decision making, as well as notice of the Council's decision on the list.

### Endangered Species

This periodic bulletin is required by Section 343-3(c), HRS, to publish notice of public comment periods or public hearings for habitat conservation plans (HCP), safe harbor agreements (SHA), or incidental take licenses (ITL) under the federal Endangered Species Act, as well as availability for public inspection of a proposed HCP or SHA, or a proposed ITL (as a part of an HCP or SHA).

# O'ahu Notices

MAY 23, 2007

## Geiger Community Park (HRS 343 FEA-FONSI)

**District:** Ewa  
**TMK:** 9-1-65:035  
**Proposing Agency:** Department of Design & Construction  
650 South King St.  
Honolulu, HI 96813  
Contact: Howard Koza (768-8403)

**Determination Agency:** Same as above.

**Consultant:** Gerald Park Urban Planner  
1221 Kapiolani Blvd.  
Honolulu, HI 96814  
Contact: Gerald Park (596-7484)

**Status:** Final environmental assessment (FEA) and Finding of No Significant Impact (FONSI).

**Permits Required:** Waiver, Grubbing, Grading, Stockpiling; Building Permit for Building, Electrical, Plumbing, Sidewalk/Driveway and Demolition Work; Water and Water System Requirements; NPDES General Permit; Approval to Construct/Approval to Operate Water Reuse Project.

The Department of Design and Construction, City and County of Honolulu, proposes to construct master plan improvements at Geiger Community Park located at Honouliuli, District of 'Ewa, City and County of Honolulu, State of Hawai'i.

Proposed improvements for field sports include two softball fields and a multi-purpose field to be located on the eastern half of the site. Court sport improvements include two outdoor basketball courts, a tennis court, and a volleyball court to be located in the western corner of the park. A recreation building of about 5,780 square feet is also planned.

Ancillary improvements include lights for the parking lot, one of the softball fields, and the court facilities. A four-foot high chain link fence will circle the park. Water and wastewater connections will be made to existing facilities in Kahiuka Street.

The park will be irrigated using non-potable water to be

drawn from either existing recycled water mains in Geiger Road and Kapolei Parkway or a non-potable water well in the park.

Access to all facilities will comply with ADA standards. Recreation programs will be accessible and facilities will be provided to meet that standard. ADA walkways will connect the various facilities in the park and connect to the adjoining street walkway.

The Site Development Plan will be implemented over four phases. The Gentry Development Company and the City and County of Honolulu completed improvements (the existing park facilities) between 1993 and 2001. Funding for the four phases is estimated at \$6.475 million and will be funded by the City and County of Honolulu.

The Site Development Plan was approved by the Ewa Neighborhood Board in November 2006.

May 23, 2007

## McTigue Shoreline Setback Variance for New Single-Family Dwelling (HRS 343 FEA FONSI)

**District:** Ko'olauloa  
**TMK:** (1) 6-1-8:3  
**Applicant:** Terence & Dorene McTigue  
61-405 Kamehameha Hwy, Hale'iwa, HI 96712

**Approving Agency:** Department of Planning & Permitting  
650 S King St., 7th Flr., Honolulu, HI 96813  
Contact: Pamela Davis (768-8017)

**Consultant:** Kusao & Kurahashi, Inc.  
2752 Woodlawn Dr., Ste. 5-202, Honolulu, HI 96822  
Contact: Ardis Shaw-Kim (988-2231)

**Status:** Final environmental assessment (FEA) and Finding of No Significant Impact (FONSI).

**Permits Required:** Shoreline Setback Variance, Zoning Variance, Building

croaches into the 20-foot shoreline setback, and construct a two-story, single-family dwelling (about 2,415 square-feet) which encroaches into the 20-foot shoreline setback. (The site, a nonconforming 2,630-square-foot lot, qualifies for a reduced shoreline setback, pursuant to criteria established in Chapter 23-1.4(b), Revised Ordinances of Honolulu.)

Other proposed improvements within the shoreline setback include a one-car garage, CRM walls, an individual wastewater system, and other minor improvements.

The project proposal will require approval of a Shoreline Setback Variance, building permits, and a Zoning Variance for encroachment into the required yards and height setbacks.

The applicant proposes to demolish a nonconforming one-story, single-family dwelling (constructed about 1965) which en-

## Waianae Supportive Housing Project (HRS 343 FEA FONSI)

**District:** Waianae  
**TMK:** 1-8-5-028: 044 por.  
**Applicant:** Housing Solutions, Inc.  
2734 S. King Street, #100  
Honolulu, HI 96826  
Contact: Terry Brooks (599-5759)

**Approving Agency:** Dept. of Community Services  
715 S. King Street, Suite 311  
Honolulu, HI 96813  
Contact: Keith Ishida (768-7750)

**Consultant:** Environmental Communications, Inc.  
1188 Bishop Street, Suite 2210  
Honolulu, HI 96813  
Contact: Taeyong Kim (528-4661)

**Status:** Final environmental assessment (FEA) Finding of No Significant Impact notice.

**Permits Required:** Sewer, Grading, Foundation, Building

The proposed project consists of residential rental development located on a 7.7 acre urban in-fill site located immediately mauka of the Waianae Neighborhood Community Center.

In total, the project will provide 20 studio units, intended to serve as transitional housing, and 30 low-income rental units along with central common facilities and parking.

Final income requirements for rental of the project units have not been finalized. At a minimum, 80% of the project will be affordable to households earning 60% of the median income adjusted for family size, and 20% of the units will be affordable to households earning 50% of the median income as required by HOME Program rules.

The project will provide fifty units of housing for low-income individuals and families, including those who were formerly homeless. Twenty units are studio apartments intended for short-term transitional housing, and thirty units are two-bedroom apart-

ments, intended for longer-term housing. A common service facility will provide laundry, storage and central community meeting areas as well as offices that may be used for resident training and counseling as well as general office use.

Surrounding uses include residential development, the Waianae Neighborhood Community Center and the nearby Waianae Intermediate School. Residents of the proposed project are expected to largely consist of relocated residents from the Waianae Coast area.

Project site

## Baldwin High School Library (HRS 343 DEA)

**District:** Wailuku  
**TMK:** 3-8-007: 004, 047  
**Proposing Agency:** Department of Education  
 State of Hawaii  
 Facilities Development Branch  
 Branch Management Section  
 1151 Punchbowl Street, Room 501  
 Honolulu, Hawaii 96813  
 Contact: Mr. Michael Shigetani (586-0434)

**Determination Agency:** Same as above.

**Consultant:** Gerald Park Urban Planner  
 1221 Kapiolani Boulevard, Suite 211  
 Honolulu, Hawaii 96814  
 Contact Gerald Park (586-0434)

**Public Comment Deadline:** June 22, 2007

**Status:** Draft environmental assessment (DEA) notice pending 30-day public comment. Address comments to the proposing agency with copies to the consultant and OEQC.

**Permits Required:** Air Conditioning and Ventilation; NPDES; Variance from Pollution Controls; State Historic Preservation Division Approval; Building, Electrical, and Plumbing Permits; Grubbing Grading, Excavation and Stockpiling Permit.

The Department of Education, State of Hawaii, proposes to construct a new school library at Henry Perrine Baldwin High School located at Wailuku, Maui, Hawaii. On campus, the proposed library site generally is bounded by the school's Cafeteria on the north, Music Building on the south, Football Field on the west, and the "Banyan Court" on the east.

The proposed project will replace an existing school library with a modern facility with up to date technology and space to support the educational needs of students and the curriculum requirements of instructors. The existing library is close to 45 years old and lacks sufficient space for housing a collection of books, periodicals, reference materials, and general interest ma-

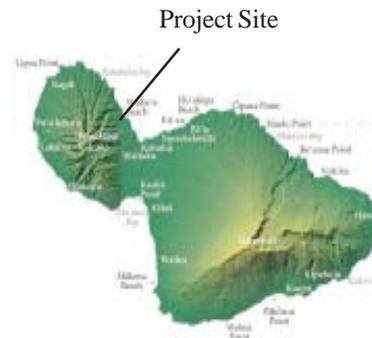

terials for a high school.

An L-shaped building of approximately 14,250 gross square feet is proposed. Space in the one-story structure consists of the main library and incidental library functions of approximately 10,260 net square feet and a supporting media wing of approximately 3,450 net square feet. The two uses will be connected by a shared hallway.

The building will be designed to be sustainable (green and energy efficient) by incorporating sustainable architectural, engineering, landscaping, and Leadership in Energy and Environmental Design (LEED) standards. Sustainable design features in part include maximizing day lighting, energy efficient mechanical and building systems, efficient plumbing systems, efficient landscaping, use of recycled and local/regional construction materials, and controllability of building systems.

Areas around the library will be landscaped and an underground irrigation system installed. A Chinese banyan tree will be removed and replaced with a like tree in the vicinity of the library. Trees will be planted behind the library and along the realigned driveway for shade and noise attenuation.

Construction costs are estimated at \$8.755 million and will be funded by the State of Hawaii. Construction will commence after all design plans are approved and construction permits received. It is projected that construction could start in spring 2008 with completion by June 2009.

# Maui Notices

MAY 23, 2007

## Honoapiilani Highway Realignment/ Widening, Maalaea to Launiupoko (HRS 343 EISPN for an Agency Action)

**District:** Lahaina and Wailuku Districts  
**TMK:** 2-3-6, 2-4-7, and 2-4-8  
**Proposing Agency:** Hawaii Department of Transportation,  
Highways Division  
869 Punchbowl Street, Room 301  
Honolulu, HI 96813  
Contact: Mr. Wayne Kawahara (587-6357)

**Accepting Authority:** Governor  
c/o OEQC

**Consultant:** PB  
1001 Bishop St., ASB Tower, Ste. 2400  
Honolulu, Hawaii 96813  
Contact: David Atkin (566-2205)

**Status:** Environmental Impact Statement Preparation Notice, pending 30-day public comment. Address comments to the applicant with copies to the accepting authority, consultant and OEQC.

### Public Comment

**Deadline:** June 22, 2007

### Permits

**Required:** Section 404 CWA, Section 106/Chapter 6E, US Coast Guard Bridge Permit, Noise, NPDES, SCAP, CDUA, CZM, SMA and others

The Hawaii Department of Transportation (HDOT), in cooperation with the Federal Highway Administration (FHWA), will be preparing an Environmental Impact Statement (Draft and Final EIS) to evaluate several realignment and/or widening alternatives with the potential to provide increased roadway capacity, safety, and reliability for Honoapiilani Highway (HWY 30) between Maalaea and Launiupoko.

The project limits extend from just west of Maalaea where the four lanes of Honoapiilani Highway currently end, through the Pali area, and across the coastal plain from Ukumehame to the future intersection with the planned Lahaina Bypass Road in Launiupoko.

Alternative improvements to Honoapiilani Highway between Maalaea and Launiupoko that would increase roadway capacity, enhance safety, and improve the reliability of travel will be examined. Alternatives to be examined will be expanded through the scoping process, but may include widening of Honoapiilani Highway, construction of a new roadway, intersection improvements, and a combination of alternatives.

Project planning will include a number of public outreach activities including the formation of a project Task Force.

## South Maui Community Park (HRS 343 FEA FONSI)

**District:** Kihei  
**TMK:** (2) 2-2-002:042  
**Proposing Agency:** Maui Department of Parks & Recreation  
 700 Halia Nakoa St., Unit 2, Wailuku, HI 96793  
 Contact: Patrick Matsui (270-7931)

**Determination Agency:** Same as above.  
 Contact: Tamara Horcajo (270-7230)

**Consultant:** Chris Hart & Partners  
 1955 Main St., Ste. 200, Wailuku, HI 96793  
 Contact: Michael J. Summers (242-1955)

**Status:** Final environmental assessment (FEA) and Finding of No Significant Impact (FONSI).

**Permits Required:** SMA; Project Dist. Phase II & III Approval; NPDES Permit; Grading Permit; Building Permit; R1 Reclaimed Water Permit

demption Center, which is already temporarily situated just mauka of the property's southwest corner.

The proposed project will require the provision of both on- and off-site infrastructure to support the development. On-site infrastructure and related improvements will include the provision of water, sewer, drainage, electrical and telephone system improvements. Access will be provided via the future North-South Collector Road and New Welakahao Street.

This Final Environmental Assessment concludes that the project will not result in significant environmental impacts to surrounding properties, nearshore waters, natural resources, or archaeological and historic resources on the site or in the immediate area. Public infrastructure and services including roadways, sewer and water systems, medical facilities, police and fire protection systems are, or will be, adequate to serve the project and therefore will not be significantly impacted by the project.

In light of the foregoing, the proposed project will not result in significant environmental impacts and a Finding of No Significant Impact (FONSI) is warranted.

This Final Environmental Assessment (EA) has been prepared to assess short and long-term impacts associated with development of the proposed South Maui Community Park. The proposed project is a community park facility incorporating a 1096-seat gymnasium; multi-use courts; soccer, baseball and softball fields; pavilion and amphitheater; 480 bleacher seats; five comfort stations; and an accessory building and storage area for park maintenance equipment, along with supporting on and off-site infrastructure, on 44.83 acres of County-owned property situated northwest of Piilani Highway, Kihei, Maui, Hawaii; TMK No: (2) 2-2-002:042.

The subject property is situated within the State's Urban District and is County zoned Kihei-Makena Project District 5 (PD-K/5). The Community Plan designation is Project District 5. The property is located on the makai side of Piilani Highway, adjacent and south of the Lokelani Intermediate School and between Hale Kuai Street and Welakahao Street, within the developed area of South Kihei. The property is currently undeveloped and overgrown with Kiawe trees, shrubs, weeds, bushes, and grasses. The southwestern corner of the property, approximately 2-acres, is the future site of the Kihei Recycling and Re-

Aerial Map of Project Site

**Consultant:** Ron Terry Ph.D  
Geometrician Associates  
PO Box 396  
Hilo, HI 96721  
Contact: Ron Terry (969-7090)

### Public Comment

**Deadline:** June 22, 2007  
**Status:** Draft environmental assessment (DEA) notice pending 30-day public comment. Address comments to the proposing agency with copies to the consultant and OEQC.

### Permits

**Required:** Hawaii County: SMA Exemption (obtained)  
Shoreline Setback Variance, Plan Approval

The eight-unit Hale Kai O Kona condominium complex, built in 1978, is bordered on the east by Ali'i Drive, on the north and south by other condominiums, and on the west by a shoreline consisting of a pahoehoe shelf and shallow, elevated white sand beach. A concrete masonry wall separates the building foundation from the beach, providing protection from occasional storm waves. A public pedestrian right-of-way connects Ali'i Drive to the shoreline area. In 2004, a fire destroyed the roofs and tops floors of two of the living units and damaged them to the extent that occupation was no longer possible. Charred wood and damaged building components were removed immediately for safety reasons. Sixty to seventy percent of the buildings, including interior finishes and fixtures, were demolished and removed. The first floor level and the walls and floors of the second story remain. The existing foundation remains in good enough condition to be reused.

The proposed project consists of an exact reconstruction in place of these units. No grading will be necessary, and no new parking or buildings will be added. The buildings were originally built outside the minimum 20-foot setback from the shoreline per a November 28, 1977, certified shoreline, in full compliance with all laws, regulations and permits. After the fire, the plans for

reconstruction required another survey of the shoreline. This survey indicated that part of the shoreline had advanced landward, although no flood damage or erosion problems have been reported during the intervening 29 years. The existing placement of the buildings on their original foundations, inclusive of the roofed lanai, now encroach approximately 11 feet into the 20-foot setback.

The objective of the project is to reconstruct these two units so they are habitable once again and in the same condition they were prior to the fire. The owners of the units and other owners have suffered hardship due to the loss of property value, loss of use, the loss of potential income, and special assessments. As the project would take place entirely within an existing condominium complex on top of an existing foundation and first floor, very few impacts would occur, and all can be mitigated.

## Honomu Well Site Additions (HRS 343 DEA for Agency Action)

**District:** South Hilo  
**TMK:** 2-8-013:055  
**Proposing Agency:** Department of Water Supply  
County of Hawaii  
345 Kekuanao'a Street, Suite 20, Hilo 96720  
Contact: Milton Pavao (961-8050)

**Determination Agency:** Same as above.

**Consultant:** Planning Solutions, Inc.  
210 Ward Avenue, Suite 330  
Honolulu, HI 96814  
Contact: Perry J. White (550-4483)

**Public Comment Deadline:** June 22, 2007

**Status:** Draft environmental assessment (DEA) notice pending 30-day public comment. Address comments to the proposing agency with copies to the consultant and OEQC.

**Permits Required:** Plan approval, DOT Const, Building Permit, Pump

The County of Hawai'i Department of Water Supply (DWS) proposes to install a new 300,000 gallon reservoir and a second municipal well source on its existing Honomu well site adjacent to 'Akaka Falls Road (State Hwy 220), approximately 0.5 mi. *mauka* of the community of Honomu. Three-phase electrical power and telephone service will be extended to the site from existing lines along the road. A single-story, 672 square-foot control building will be constructed on the site to house the chlorination system, motor control center, SCADA communications, and other electrical equipment needed to start and stop the well pump. An on-site drainage system and access driveway will also be constructed. The improvements will eliminate the Honomu water system's dependency on the 'Akaka Falls Spring source, which is expected to be subject to costly enhanced treatment requirements, and ensure that the system has adequate potable water storage well into the future.

DWS may seek Federal funding for the project under the Drinking Water State Revolving Fund (DWSRF) program admin-

istered by the Safe Drinking Water Branch of the State Department of Health. Awarding the funding would constitute a Federal action. Consequently, the Draft EA has been prepared under the dual legal authorities of Chapter 343, Hawai'i Revised Statutes/Hawai'i Administrative Rules § 11-200 and the National Environmental Policy Act (NEPA).

DWS has concluded that construction and operation of the proposed facilities would not have substantial adverse impacts on the environment. It proposes to mitigate short-term construction impacts by requiring the selected contractor to incorporate best management practices and mitigation measures into its work program. Consequently, it anticipates a Finding of No Significant Impact (FONSI) for the project.

## Ocean View Domestic Water Well, Reservoir, Transmission and Standpipe/Spigot Project (HRS 343 DEA)

**District:** Ka'u  
**TMK:** (3rd): 9-2-101:32 & 37; 9-2-93:9, 10 & 11; 9-2-185: 94, 95, 96;  
Various private roads and portion of State Hwy. 11

### Proposing

**Agency:** Hawaii County of Water Supply  
345 Kekuanaoa Street Suite, Suite 20  
Hilo HI 96720  
Contact: Kurt Inaba (961-8070x238)

### Determination

**Agency:** Same as above

### Consultant:

Geometrician Associates  
PO Box 396  
Hilo HI 96721  
Contact: Ron Terry (969-7090)

### Public Comment

**Deadline:** June 22, 2007

### Status:

Draft environmental assessment (DEA) notice pending 30-day public comment. Address comments to the applicant with copies to the approving agency, consultant and OEQC.

### Permits

**Required:** Hawai'i County: Planning Department of Approval Plan and Building Permit; Grading Permit; Hawaii State: Well approval (DOH); NPDES (among others).

In response to a decade-long community effort to provide a source of potable water for rapidly growing Ocean View, the Hawaii County Department of Water Supply (DWS) proposes to drill an exploratory well on a one-acre property within Paradise Circle Makai in Ocean View. DWS will then perform a pump test and water quality analysis. If developable water of appropriate water quality is present, it will convert the exploratory well to production and build a 0.5 million gallon reservoir. If funding is sufficient, a backup well will also be built on the site. Transmission lines will conduct the water to a public standpipe/spigot fill site near Lehua Lane and State Highway 11. Licensed water-hauling trucks will utilize the standpipes, and small-quantity resi-

dential self-haulers will use the spigots. Both sites will be fenced and landscaped and hours will likely be restricted at the fill site in order to reduce impacts to neighboring properties. A branching transmission line will provide the opportunity for fire protection for the Ocean View Town Center and Pohue Plaza.

No significant biological, historical or cultural resources are present or would be affected. The Manuka Aquifer has very little current usage and the project would not affect the sustainable yield. Practices to minimize stormwater, dust and noise during construction and operation of the facilities will be implemented. DWS will monitor traffic at the fill site to determine whether offsite signage or road improvements will be necessary to mitigate for the increased traffic that the facility will involve.

## University of Hawaii at Hilo Science Complex and Off-Site Parking Lot (HRS 343 FEA FONSI)

**District:** South Hilo  
**TMK:** 2-4-57: por. 25 & por. 26  
**Proposing Agency:** University of Hawaii at Hilo  
 200 West Kawili Street  
 Hilo, HI 96720  
 Contact: Lo-li Chih (974-7595)

**Determination Agency:** Same as above.

**Consultant:** PBR Hawaii - Hilo Office  
 101 Aupuni St., #310  
 Hilo, HI 96720  
 Contact: Vincent Shigekuni (961-3333)

**Status:** Final Environmental Assessment (FONSI) notice pending 30-day public comment. Address comments to the proposing agency with copies to the consultant and OEQC.

**Permits Required:** Grading, building

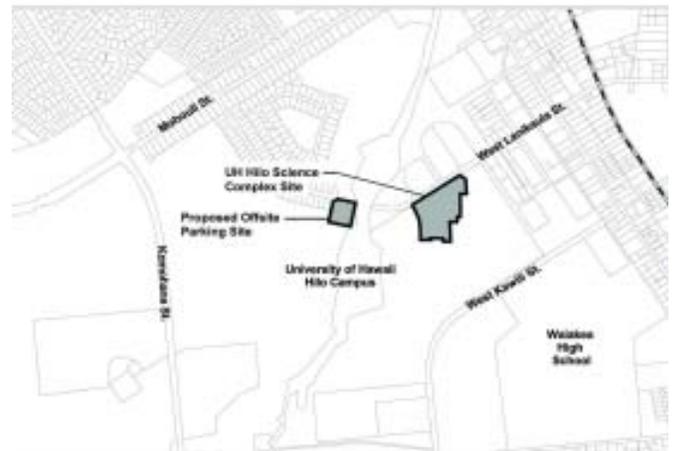

classes, tutoring and work spaces, and faculty offices are inadequate to serve program needs.

In order to meet the needs of a growing student population, UH-Hilo proposes the construction of a new Science Complex on the northern boundary of the main campus. Several buildings currently exist on the project site, which is underutilized with regard to density. The Science Complex will provide laboratories, classrooms and offices to support the Natural Sciences Division programs including Astronomy, Biology, Chemistry, Computer Science, Geology, Marine Science, Math, and Physics, as well as the Pharmacy and science research programs. The project also includes an off-site parking lot on Lanikaula Street.

On April 23, 2005, a draft environmental assessment was published in the Environmental Notice. Subsequent to that publication, an off-site parking lot was added to the project and this Revised Draft EA addresses the impacts of the parking lot and comments received in response to the original Draft EA (published on April 23, 2005), as well as during the pre-assessment consultation process.

It is expected that the proposed Science Complex will have no significant effect on the local, County or Statewide physical or human environments; a Finding of No Significant Impact (FONSI) is anticipated.

In the last ten years, the physical science programs (Physics/Astronomy, Chemistry, Mathematics, Computer Science, and Geology) at the University of Hawaii at Hilo (UH-Hilo) have grown. The Biology and Marine Science programs have also grown tremendously. Most of the facilities housing science and technology programs were built in the 1950s and 1960s, and the size, amenities, number of classrooms, and teaching laboratories available are inadequate to accommodate the rapidly expanding programs. Existing buildings also lack proper utilities and are not flexible for modern science and technology programs. Multi-sized

## Special Management Area (SMA) Minor Permits

Pursuant to Hawai'i Revised Statute (HRS) 205A-30, the following is a list of SMA Minor permits that have been approved or are pending by the respective county/state agency. For more information about any of the listed permits, please contact the appropriate county/state Planning Department. City & County of Honolulu (523-4131); Hawai'i County (961-8288); Kaua'i County (241-6677); Maui County (270-7735); Kaka'ako (Honolulu) or Kalaeloa (Barbers Point) Community Development District (587-2840).

SPECIAL MANAGEMENT AREA (SMA) MINOR PERMITS		
Location (TMK)	Description (File No.)	Applicant/Agent
Honolulu: Wai'alaie (3-5-23-39)	Installation of 3 panel antennas, 2 microwave antennas, 1 GPS antenna, an equipment cabinet and conduit on roof of Kahala Hotel and Resort (2007/SMA-17)	Clearwire LLC / Cascadia PM LLC (Charles Fortner)
Hawai'i: Puna (1-4-2-8)	Walking paths, picnic tables, gazebos, outdoor showers & related improvements at Isaac Hale Memorial Park (SMM 07-000052)	County Department of Parks & Recreation
Kaua'i: Nawiliwili (3-5-2-2)	Co-generation cooling tower (SMA(U) 2007-16)	Kaua'i Marriot Resort
Maui: Huelo (2-9-7-63)	Replace utility pole (SM2 20070032)	Maui Electric Company, Ltd.

# Pollution Control Permit Applications

MAY 23, 2007

## Department of Health Permits

Below is a list of some pollution control permits currently before the State Department of Health. For more information about any of the listed permits, please contact the appropriate branch or office of the Environmental Management Division at 919 Ala Moana Boulevard, Honolulu. Abbreviations are as follows: **CAB** - Clean Air Branch (586-4200); **CD** - comments due; **CSP** - Covered Source Permit; **CWB** - Clean Water Branch (586-4309); **I** - issued; **SHWB** - Solid and Hazardous Waste Branch (586-4226); **SDWB** - Safe Drinking Water Branch (586-4258); **N** - none; **NSP** - Noncovered Source Permit; **NPDES** - National Pollutant Discharge Elimination System under the Federal Clean Water Act; **R** - received; **T** - temporary; **UIC** - Underground Injection Control; **NA** - not applicable.

# Conservation District Notices

MAY 23, 2007

## Conservation District Use Permits

Persons interested in commenting on the following Conservation District Use Application (Department Permit) must submit comments to the Department of Land and Natural Resources (DLNR). Also, anyone interested in receiving notification of determination on Conservation District Use Applications (Department Permits) must submit requests to DLNR that include the following information: (1) name and address of the requestor; (2) the permit for which the requestor would like to receive notice, notice of determination; and (3) the date the notice was initially published in the Environmental Notice. Both comments and requests for notification of determinations must be submitted to DLNR within thirty days from the initial date that the notice was published in the Environmental Notice. Please send comments and requests to: State of Hawai'i, Department of Land and Natural Resources, Office of Conservation and Coastal Lands, P.O. Box 621, Honolulu, Hawai'i 96809. While DLNR will make every effort to notify those interested in the subject CDUA, it is not obligated to notify any person not strictly complying with the above requirements. For more information please contact Michael Cain at 587-0048.

## Fencing Around the Kona Forest Unit, Hakalau National Wildlife Refuge

We are advising the public that the U.S. Fish and Wildlife Service (Service) has developed a Draft Environmental Assessment (EA) to evaluate the potential environmental effects associated with construction of 27,000 meters (88,500 feet) of fence to enclose 2,145 hectares (5,300 acres) of land within the Kona Forest Unit, Hakalau Forest National Wildlife Refuge. The Kona Forest Unit, located in the South Kona District, Island of Hawai'i, supports four species of endangered forest birds, the endangered Hawaiian hoary bat, and a high diversity of native plant species, of which several are threatened or endangered. Until 2002, the Kona Forest Unit also supported the last wild 'Alala (Hawaiian crow) so the unit will likely serve as a place for future reintroduction of 'Alala to the wild. Three fencing alternatives are proposed. Each would include pig- and cattle-proof fences at the lower elevations and taller sheep-proof fences at the upper elevations. Alternative 1 would provide a bulldozed access corridor along the entire fenceline. Alternative 2 would be identical, except with a 6-foot-wide, hand-cleared access corridor at the 3,400-foot cross fence. Alternative 3 would involve hand clearing and a 6-foot-wide access corridor for the entire fenceline, where access roads do not already exist. The proposed fencing would support the management program approved in 1997 when the Kona Forest Unit was established. Management is focused on endangered species recovery actions including biological research and monitoring, prevention and suppression of wildfires, and habitat restoration through reforestation, feral ungulate control, non-native predator control, and invasive plant control. These actions would simultaneously benefit other native species on the Kona Forest Unit. Based on information in the draft EA, the Service has determined the project will not significantly impact the quality of the human environment and has made a preliminary Finding of No Significant Impact (FONSI). The draft EA has been distributed to Federal, State and County agencies as well as to community, environmental, and Hawaiian groups. Copies are available for public review at the Kailua-Kona Public Library, the Kealekekua Public Library, the Hilo Public Library, the Hamilton Library at the University of Hawai'i, and the Hawai'i State Library at 478 South King Street in Honolulu. A digital copy is available on the Fish and Wildlife Service, Pacific Islands, Big Island NWR Complex website: <http://www.fws.gov/pacificislands/wnwr/bignwrindex.html>. For further information, call or write Mr. Richard C. Wass, Manager, Hakalau Forest National Wildlife Refuge, 60 Nowelo Street, Suite 100, Hilo, Hawai'i 96720, (808) 443-2300. Comments should be submitted in writing to the above address and must be postmarked on or before June 22, 2007.

## DHHL Villages of Lai'opua

At the request of the Department of Hawaiian Home Lands (DHHL), a Notice of Availability for a Federal Environmental Assessment (EA) for the Village 5, Village 4, and Village 1 Subdivisions, Villages of Lai'opua (Village 5, Village 4, and Village 1 respectively) and a Finding of No Significant Impact (FONSI) was posted in the prior edition of the *Environmental Notice*.

This notice informed the public that these projects proposed the development of approximately 115 residential lots in Village 5, 249 lots in Village 4, and 260 lots in Village 1, all at Kealakehe, Kailua-Kona, on the island of Hawai'i (TMK 3<sup>rd</sup>. 7-4-021: 05 & 06, 7-4-021: 10, 11 & 12 and 7-4-021: 14). The Village 5 subdivision site would abut an 26.6-acre parcel being set aside as a preserve for 'aupaka, an endangered shrub and the Village 4 subdivision site would abut an 11.2-acre parcel being set aside as a preserve for uhiuhi, an endangered tree. "Mini-preserves" for uhiuhi are also being planned within Villages 5 and 4. These preserves were proposed in cooperation with the U.S. Fish and Wildlife Service and the Hawai'i Department of Land and Natural Resources as part of a 1999 endangered species mitigation plan. That plan included not only species protection but also restoration. The preserve design is currently being updated, implementation will occur simultaneously with construction of these subdivisions, and a number of measures are being taken to ensure that existing plants are protected during and after land development.

The prior notice also indicated that a State of Hawai'i Environmental Impact Statement (EIS) was completed in 1990 for the entire 960-acre Kealakehe planned community, of which the 23.6-acre Lai'opua Village 5, 60.4-acre Village 4 and 49.7-acre Village 1 are components. The DHHL had concluded after careful review that neither these projects nor environmental conditions have changed sufficiently to warrant preparation of a new State of Hawai'i EIS.

However, the public is notified that completion of the EA is pending and they are advised to watch for a new notice of availability for the EA will be posted in the public newspapers shortly upon completion of the EA. A new notice of availability may be published in a subsequent edition of the OEQC *Environmental Notice* if the timing of the forthcoming notice in the public newspapers, along with the prerequisite comment periods, coincides with the publication schedule of the OEQC *Environmental Notice*.

Interested parties may contact DHHL to request that the new notice be forwarded to them at the time of its posting and when the EA becomes available. Submit requests for a copy of the notice in writing to Mr. Micah A. Kane, Chairman, Attention: William Makanui, Department of Hawaiian Home Lands, P.O. Box 1879, Honolulu, Hawai'i 96805, (808) 587-6449.

## Correction: Reburial of Mokapu Collection Aboard MCBH Kaneohe

The notice in the May 08, 2007 *Environmental Notice* was prematurely printed and is invalid.
